Finally, the first clause in proposed § 2.122(c)(2) [identified herein as § 2.122(d)(2)] has been modified to read "A registration owned by any party to a proceeding may be made of record in the proceeding by that party by appropriate identification and introduction during the taking of testimony or by filing a notice of reliance." There is a slight difference between the clause as adopted and the clause as suggested by the organization (the organization's suggested wording "during the proper testimony period" has been changed to "during the taking of testimony"). The change in the wording was made so that it would be clear that this portion refers to identification and introduction during the taking of testimony as distinguished from identification and introduction by notice of reliance. This change is not to be construed as an indication that such identification and introduction does not have to be made "during the proper testimony period"; with the deception of status and title copies of a plaintiff's pleaded registration submitted with the complaint, any evidence which a party offers on the case must be offered during the proper testimony period.

Comment: With respect to proposed § 2.123(a)(1) (which provides, inter alia, that if a party serves notice of the taking of a testimonial deposition upon written questions of a witness within the United States, any adverse party may, within fifteen days from the date of service of the notice, file a motion with the Trademark Trial and Appeal Board, for good cause, for an order that the deposition be taken by oral examination), one individual, noting that the procedure for taking testimony by written questions is unsatisfactory and often frustrating, suggested that the paragraph be changed to require that a party seeking to utilize this procedure (in lieu of an oral examination) file a motion requesting, for good cause shown, permission to by-pass the oral examination of its witness, that is, that the burden of filing a motion and showing good cause be shifted to the party who wants to take testimony upon written questions.

Response: If the burden of filing the motion were shifted in the manner suggested, the Trademark Trial and

VOL 48 ISS 100 MAY 23 1983 UMI

Appeal Board would have to rule on a motion in every case where a party desires to take testimony by written questions. Under the rule as proposed, the Board would have to rule on a motion only in those cases where one party desires to take testimony by written questions and the adverse party objects to the use of this procedure in lieu of an oral deposition. Often, the adverse party does not object. Moreover, Rule 31 F.R.C.P., which provides for the use of depositions upon written questions in federal district courts, does not require that a party who wishes to use this procedure file a motion requesting permission to do so. Accordingly, this suggestion has not been adopted.

Comment: Two organizations commented that proposed paragraphs (j) and (k) of § 2.123, which relate to the raising of objections to testimony depositions taken in inter partes proceedings, appear to be inconsistent and unclear as to the timing of objections. Both organizations suggested that the paragraphs be modified to rely upon the pertinent portion of the Federal Rules of Civil Procedure, namely, Rule 32(d)(3). Similarly, one individual commented that proposed paragraph (k) is ambiguous as to the timing of an objection to testimony based upon lack of competency of the witness.

Response: In order to improve their consistency and clarity, the paragraphs have been modified as suggested. It should be noted that the result of the modification of paragraph (j) is that if a party fails to attend the taking of a deposition, he thereby waives any objection which under Rule 32(d)(3)(A) and (B) F.R.C.P. is deemed to be waived if not made at the taking of the deposition. This is a significant change from existing § 2.123(j), which permits the raising of formal or technical objections as soon as a party becomes aware of them, e.g., in the case of a party who did not attend the taking of a deposition, at the time when such party receives a copy of a transcript of the deposition.

Comment: With respect to the same paragraphs, one individual suggested that the Trademark Trial and Appeal Board entertain and determine, prior to the briefing period, motions to strike testimony, so that parties to a proceeding before the Board will know exactly what is in the record when they write their briefs.

Response: The adoption of this suggestion would put an intolerable burden on the Board because the Board would have to read testimony depositions both at the time of determination of a motion to strike them and again at final hearing. It is the longstanding policy of the Board not to read trial testimony taken in a proceeding before it, or to examine other evidence offered by the parties in support of their respective cases, until final hearing. See, for example: *Curtice-Burns, Inc.* v. *Northwest Sanitation Products, Inc.*, 182 USPQ 572 (Comr. 1974), and *Clairol Incorporated* v. *Holland Hall Products, Inc.*, 161 USPQ 616 (TTAB 1969). Accordingly, the suggestion has not been adopted.

Comment: With respect to proposed § 2.124(d)(2) (which provides in part that when one or more testimonial depositions are to be taken upon written questions, the Trademark Trial and Appeal Board may suspend or reschedule other proceedings in the matter to allow for the orderly completion of the depositions upon written questions), one individual expressed his belief that when the Board receives notice that a deposition is to be taken upon written questions, it should immediately suspend proceedings for a sixty-day period to allow for the completion of the deposition, thereby avoiding unnecessary motions to extend the trial periods.

Response: The paragraph has been modified to provide that in such situations the Board "shall" suspend or reschedule other proceedings in the matter to allow for the orderly completion of the deposition. The length of the suspension has been left to the discretion of the Board since the time required to complete the taking of a deposition upon written questions varies according to the place where the witness is located.

Comment: One organization, noting that the words "the letter" in proposed § 2.124(e) have no antecedent and hence create an unnecessary ambiguity, suggested that the words "the notice and of all of the questions mailed" be substituted therefor. With respect to the statement in proposed § 2.124(f) that it is the responsibility of the party who takes a deposition upon written questions to assure that the transcript is correct, the same organization suggested that the paragraph be modified to include a cross-reference to proposed § 2.125(b), which specifies procedures for correcting transcripts.

Response: The paragraphs have been modified as suggested.

Comment: With respect to proposed §§ 2.27(e), 2.120(f), and 2.125(e), which relate to the provision, in inter partes proceedings before the Trademark Trial and Appeal Board, of certain types of discovery information, and the submission of certain types of trial evidence, under protective order, one individual commented that the proposed rules would appear to permit parties to keep virtually all relevant information confidential from the public at large.

Response: Under the rules as proposed and adopted, only trade secrets and confidential information are held under seal and kept confidential by the Board. Very little of the evidence offered in inter partes proceedings before the Trademark Trial and Appeal Board is of this nature.

Comment: Two organizations objected to proposed § 2.128(a)(3) (which provides in essence that when a party fails to file a brief on the case, the Trademark Trial and Appeal Board may treat such failure as a concession of the case) on the grounds that the proposed rule is unduly harsh; that it constitutes an abrogation of the Board's responsibility to decide cases on the record before it, regardless of the absence of briefs; that the granting or denial of a registration with its evidentiary presumptions is too important an issue to be decided on the basis of a presumed concession; and that a party who fails to file a brief should at least be given an opportunity to show cause why judgment should not be entered against him for such failure. Similarly, one member of another organization believes that the proposed rule would encourage the filing of spurious oppositions in cases where the opposer feels that the applicant may not be in a position to afford the legal fees required for preparing a brief.

Response: For the reasons indicated in the comments, proposed § 2.128(a)(3) has been modified to refer only to the party in the position of plaintiff, and proposed § 2.128(a)(1) has been modified to make it clear that the filing of a brief on the case is not mandatory for the party in the position of defendant. Further, the primary purpose of proposed § 2.128(a)(3) was to save the Board the burden of determining cases of the merits in instances where the parties have settled, but have failed to inform the Board thereof, or where one party, particularly the plaintiff, has lost interest in the case. It is not the intention of the Board to enter judgment against a plaintiff for failure to file a brief on the case if the plaintiff still desires to obtain a determination of the case on the merits. Accordingly, proposed § 2.128(a)(3) has been modified herein to provide an opportunity for the plaintiff who fails to file a main brief on the case to show cause why such failure should not be treated as a concession of the case. Additionally, the paragraph has been modified to indicate that judgment may be entered against a plaintiff for failure to file a main brief only if plaintiff fails to file a response to the order to show cause or files a response indicating that he has lost interest in the case.

Comment: One organization, noting that proposed § 2.128(b) permits briefs to be filed on legal or letter size paper, suggested that since the federal courts now permit only the use of letter size paper, consideration should be given to requiring that briefs and all other formal papers filed in the Patent and Trademark Office by on letter size paper only. With respect to the same paragraph, one individual recommended, because of the different paper sizes permitted under the rule, that the rule be modified to specify the number of words that a brief can contain or, alternatively, to specify separately the number of pages permitted for briefs written on each size of paper. The same individual suggested that it should be made clear that the permitted number of pages in a brief does not include pages containing the index and the alphabetical list of cases.

Response: The paragraph has been modified to require that briefs be submitted on letter size paper. As to what is included within the specified page limitations, the paragraph as proposed and adopted states in part that "no brief shall contain more that fifty pages *of argument* and, in the case of a reply brief, *the entire brief* shall not exceed twenty-five pages" (emphasis added). It is believed that the paragraph as written clearly indicates that the fifty-page limitation for a main brief applies only to the length of the argument and does not include the index and case list pages, but that the twenty-five page limitation for a reply brief applies to the entire brief, e.g., argument, index, case list, and all. Accordingly, no further modification has been made.

Comment: With respect to proposed § 2.134(b) (which provides that if the respondent in a cancellation proceeding permits his involved registration to be cancelled under section 8 of the Act of 1946 or fails to renew the registration under section 9 of the Act of 1946, such cancellation or failure to renew shall be deemed to be the equivalent of a cancellation by request of respondent without the consent of the adverse party and shall result in entry of judgment against respondent), two organizations commented that the judgment entered against a respondent under the proposed paragraph would have a res judicata effect; that the entry of such a judgment would be unduly harsh where the cancellation or expiration was the result of an inadvertence or mistake; and that, at a minimum, a respondent should be allowed to "show cause" why such a judgment should be entered. Similarly one individual commented that in such situations, a respondent whose use of its registered mark has in fact been discontinued should be put in a position whereby it can terminate the dispute with prejudice only as to the ground of abandonment.

Response: The paragraph has been modified to provide an opportunity for the respondent in such situation to "show cause" why judgment should not be entered against it. If respondent submits a showing that the cancellation or expiration was the result of an inadvertence or mistake, judgment will not be entered against it. If respondent submits a showing that the cancellation or expiration was occasioned by the fact that its registered mark had been abandoned and that such abandonment was not made for purposes of avoiding the proceeding but rather was the result, for example, of a two-year period of nonuse which commenced well before respondent learned of the existence of the proceeding, judgment will be entered against it only and specifically on the ground of abandonment.

Comment: Apparently with respect to proposed § 2.135 (which provides that after the commencement of an opposition proceeding, if applicant files a written abandonment of the application or of the mark without the written consent of every adverse party, judgment shall be entered against the applicant), one individual expressed his belief that if an applicant involved in an opposition were allowed to abandon its mark or application without the consent of the opposer without incurring entry of judgment against itself, more applicants would abandon, thus saving money for the Patent and Trademark Office.

Response: The purpose of § 2.135 is to prevent an applicant involved in an opposition from abandoning its opposed application and then refiling, thus putting opposer (and the Patent and Trademark Office) to the expense of multiple proceedings. A rule to the contrary would be inequitable. Accordingly, § 2.135 has not been modified in the manner suggested by this comment.

Comment: One individual questioned the necessity for the requirement in proposed § 2.142(e)(2) that if the appellant in an ex parte proceeding requests an oral argument, the examiner who issued a refusal of registration or a requirement from which an appeal is taken, or in lieu thereof another examiner from the same examining division as designated by the supervisory attorney thereof, shall present an oral argument.

Response: The purpose of the requirement is to ensure that the examining attorney will be present at the oral hearing to respond to any new arguments raised by appellant and to answer any questions which the members of the panel assigned to hear the case may have. The examining attorney's oral argument need not be lengthy; if he(she) has nothing to add to what he(she) has already said in his(her) appeal brief, he(she) may simply say so.

Comment: With respect to the last sentence of proposed § 2.165(a) (which states in essence that the certificate of mailing procedure provided by § 1.8 does not apply to affidavits or declarations filed under section 8 (a) or (b) of the Act), one organization expressed its belief that the sentence should be deleted in light of H.R. 6260.

Response: H.R. 6260, which was enacted on August 27, 1982 as Pub. L. 97-247, amended 35 U.S.C. 21 to include a provision that the Commissioner may by rule prescribe that any paper or fee required to be filed in the Patent and Trademark Office will be considered filed in the Office on the date on which it was deposited with the United States Postal Service or would have been deposited with the United States Postal Service but for postal service interruptions or emergencies designated by the Commissioner. As a result thereof, a new section, § 1.10, effective February 27, 1983, has been added, by final rule notice published in the **Federal Register** on January 20, 1983 at 48 FR 2696, to Part 1 of Title 37 CFR. The new section provides a procedure for assigning the date on which any paper or fee is deposited as "Express Mail" with the United States Postal Service as the filing date of the paper or fee in the Patent and Trademark Office. Inasmuch as this new section applies to "any paper or fee", it applies to affidavits or declarations filed under section 8 (a) or (b) of the Act of 1946. However, the § 1.8 certificate of mailing procedure has not been eliminated, and that section still specifically provides that the procedure outlined therein does not apply to affidavits filed under section 8 (a) or (b) of the Act. In view thereof, the last sentence of § 2.165(a) has been amended by the addition of a final clause, namely, "but the certificate of mailing by 'Express Mail' procedure provided by § 1.10 does apply thereto."

Comment: One organization has submitted suggestions for changes to rules not involved herein.

Response: The suggested changes cannot be adopted without affording

VOL
48
ISS
100
MAY
23
1983
UMI

members of the public an opportunity to comment thereon. However, these suggestions will be considered in connection with any future proposals to amend the rules in question.

Environmental, energy and other considerations: The rule change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

The rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354). The rule change includes no additional or increased fees. Substantive rights to use valuable trademarks are not adversely affected.

The rule change does not impose a record keeping or reporting burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. No additional information is required from the public. No additional records are required to be maintained by the Patent and Trademark Office because there are no additional fees or proceedings to monitor.

The Patent and Trademark Office has determined that this rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increases in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. There will be no significant, adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign based enterprises in domestic or export markets.

Amendment of Regulations

After consideration of the comments received and pursuant to the authority contained in 15 U.S.C. 1123, Part 2 of Title 37 of the Code of Federal Regulations is amended as set forth below.

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

1. Section 2.27 is amended by revising paragraphs (b) and (d) and adding paragraph (e) to read as follows:

§ 2.27 Pending trademark application index; access to applications.

* * * * *

(b) Except as provided in paragraph (e) of this section, access to the file of a particular pending application will be permitted prior to publication under § 2.80 upon written request.

* * * * *

(d) Except as provided in paragraph (e) of this section, after a mark has been registered, or published for opposition, the file of the application and all proceedings relating thereto are available for public inspection and copies of the papers may be furnished upon paying the fee therefor.

(e) Anything ordered to be filed under seal pursuant to a protective order issued or made by any court or by the Trademark Trial and Appeal Board in any proceeding involving an application or a registration shall be kept confidential and shall not be made available for public inspection or copying unless otherwise ordered by the court or the Board, or unless the party protected by the order voluntarily discloses the matter subject thereto. When possible, only confidential portions of filing with the Board shall be filed under seal.

2. Section 2.63 is revised to read as follows:

§ 2.63 Reexamination.

(a) After response by the applicant, the application will be reexamined or reconsidered. If registration is again refused or any formal requirement[s] is repeated, but the examiner's action is not stated to be final, the applicant may respond again.

(b) After reexamination the applicant may respond by filing a timely petition to the Commissioner for relief from a formal requirement if: (1) The requirement is repeated, but the examiner's action is not made final, and the subject matter of the requirement is appropriate for petition to the Commissioner (see § 2.146(b)); or (2) the examiner's action is made final and such action is limited to subject matter appropriate for petition to the Commissioner. If the petition is denied, the applicant shall have until six months from the date of the Office action which repeated the requirement or made it final or thirty days from the date of the decision on the petition, whichever date is later, to comply with the requirement. A formal requirement which is the subject of a petition decided by the Commissioner may not subsequently be the subject of an appeal to the Trademark Trial and Appeal Board.

3. Section 2.64 is revised to read as follows:

§ 2.64 Final action.

(a) On the first or any subsequent reexamination or reconsideration the refusal of the registration or the insistence upon a requirement may be stated to be final, whereupon applicant's response is limited to an appeal, or to a compliance with any requirement, or to a petition to the Commissioner if permitted by § 2.63(b).

(b) During the period between a final action and expiration of the time for filing an appeal, the applicant may request the examiner to reconsider the final action. The filing of a request for reconsideration will not extend the time for filing an appeal or petitioning the Commissioner, but normally the examiner will reply to a request for reconsideration before the end of the six-month period if the request is filed within three months after the date of the final action. Amendments accompanying requests for reconsideration after final action will be entered if they comply with the rules of practice in trademark cases and the Act of 1946.

4. Section 2.65 is revised to read as follows:

§ 2.65 Abandonment.

(a) If an applicant fails to respond, or to respond completely, within six months after the date an action is mailed, the application shall be deemed to have been abandoned. A timely petition to the Commissioner pursuant to §§ 2.63(b) and 2.146 is a response which avoids abandonment of an application.

(b) When action by the applicant filed within the six-month response period is a bona fide attempt to advance the examination of the application and is substantially a complete response to the examiner's action, but consideration of some matter or compliance with some requirement has been inadvertently omitted, opportunity to explain and supply the omission may be given before the question of abandonment is considered.

5. Section 2.72 is revised to read as follows:

§ 2.72 Amendments to description or drawing of the mark.

Amendments to the description or drawing of the mark may be permitted only if warranted by the specimens (or facsimilies) as originally filed, or supported by additional specimens (or facsimilies) and a supplemental affidavit or declaration in accordance with § 2.20 alleging that the mark shown in the amended drawing was in actual use prior to the filing date of the application. Amendments may not be made if the character of the mark is materially altered.

6. Section 2.81 is revised to read as follows:

§ 2.81 Allowance of application.

If no opposition is filed within the time permitted or all oppositions filed are dismissed, and if no interference is declared and no concurrent use proceeding is instituted, the application will be prepared for issuance of the certificate of registration as provided in § 2.151.

§ 2.88 [Removed]

7. Section 2.88 is removed.

§ 2.94 [Removed]

8. Section 2.94 is removed.

§ 2.95 [Removed]

9. Section 2.95 is removed.

10. Section 2.96 is revised to read as follows:

§ 2.96 Issue; burden of proof.

The issue in an interference between applications is normally priority of use, but the rights of the parties to registration may also be determined. The party whose application involved in the interference has the latest filing date is the junior party and has the burden of proof. When there are more than two parties to an interference, a party shall be a junior to and shall have the burden of proof as against every other party whose application involved in the interference has an earlier filing date. If the involved applications of any parties have the same filing date, the application with the latest date of execution will be deemed to have the latest filing date and that applicant will be the junior party. The issue in an interference between an application and a registration shall be the same, but in the event the final decision is adverse to the registrant, a registration to the applicant will not be authorized so long as the interfering registration remains on the register.

§ 2.97 [Removed]

11. Section 2.97 is removed.

12. Section 2.98 is revised to read as follows:

§ 2.98 Adding party to interference.

A party may be added to an interference only upon petition to the Commissioner by that party. If an application which is or might be the subject of a petition for addition to an interference is not added, the examiner may suspend action on the application pending termination of the interference proceeding.

13. Section 2.99 is revised to read as follows:

§ 2.99 Application to register as concurrent user.

(a) An application for registration as a lawful concurrent user will be examined in the same manner as other applications for registration.

(b) When it is determined that the mark is ready for publication, the applicant may be required to furnish as many copies of this application, specimens and drawing as may be necessary for the preparation of notices for each applicant, registrant or user specified as a concurrent user in the application for registration.

(c) Upon receipt of the copies required by paragraph (b) of this section, the examiner shall forward the application for concurrent use registration for publication in the Official Gazette as provided by § 2.80. If no opposition is file, or if all oppositions that are filed are dismissed or withdrawn, the Trademark Trial and Appeal Board shall prepare a notice for the applicant for concurrent use registration and for each applicant, registrant or user specified as a concurrent user in the application. The notices for the specified parties shall state the name and address of the applicant and of the applicant's attorney or other authorized representative, if any, together with the serial number and filing date of the application.

(d)(1) The notices shall be sent to each applicant, in care of his attorney or other authorized representative, if any, to each user, and to each registrant. A copy of the application shall be forwarded with the notice to each party specified in the application.

(2) An answer to the notice is not required in the case of an applicant or registrant whose application or registration is specified as a concurrent user in the application, but a statement, if desired, may be filed within forty days after the mailing of the notice; in the case of any other party specified as a concurrent user in the application, and answer must be filed within forty days after the mailing of the notice.

(3) If an answer, when required, is not filed, judgment will be entered precluding the specified user from claiming any right more extensive than that acknowledged in the application(s) for concurrent use registration, but the applicant(s) will remain with the burden of proving entitlement to registration(s).

(e) The applicant for a concurrent use registration has the burden of proving entitlement thereto. If there are two or more applications for concurrent use registration involved in a proceeding, the party whose application has the latest filing date is the junior party. A party whose application has a filing date between the filing dates of the earliest involved application and the latest involved application is a junior party to every party whose involved application has an earlier filing date. If any applications have the same filing date, the application with the latest date of execution will be deemed to have the latest filing date and that applicant will be the junior party. A person specified as an excepted user in a concurrent use application but who has not filed an application shall be considered a party senior to every party that has an application involved in the proceeding.

(f) When a concurrent use registration is sought on the basis that a court of competent jurisdiction has finally determined that the parties are entitled to use the same or similar marks in commerce, a concurrent use registration proceeding will not be instituted if all of the following conditions are fulfilled:

(1) The applicant is entitled to registration subject only to the concurrent lawful use of a party to the court proceeding; and

(2) The court decree specifies the rights of the parties; and

(3) A true copy of the court decree is submitted to the examiner; and

(4) The concurrent use application complies fully and exactly with the court decree; and

(5) The excepted use specified in the concurrent use application does not involve a registration, or any involved registration has been restricted by the Commissioner in accordance with the court decree.

If any of the conditions specified in this paragraph is not satisfied, a concurrent use registration proceeding shall be prepared and instituted as provided in paragraphs (a) through (e) of this section.

(g) Registrations and applications to register on the Supplemental Register and registrations under the Act of 1920 are not subject to concurrent use registration proceedings.

14. Section 2.104 is revised to read as follows:

§ 2.104 Contents of opposition.

The opposition must set forth a short and plain statement showing how the opposer would be damaged by the registration of the opposed mark and state the grounds for opposition. A duplicate copy of the opposition, including exhibits, shall be filed with the opposition.

15. Section 2.105 is revised to read as follows:

VOL
48
ISS
100
MAY
23
1983
UMI

§ 2.105 Notification of opposition proceeding(s).

When an opposition in proper form has been filed and the correct fee(s) have been submitted, a notification shall be prepared by the Trademark Trial and Appeal Board, which shall identify the title and number of the proceeding and the application involved and shall designate a time, not less than thirty days from the mailing date of the notification, within which an answer must be filed. A copy of the notification shall be forwarded to the attorney or other authorized representative of the opposer, if any, or to the opposer. The duplicate copy of the opposition and exhibits shall be forwarded with a copy of the notification to the attorney or other authorized representative of the applicant, if any, or to the applicant.

16. Section 2.106 is amended by revising paragraph (c) to read as follows:

§ 2.106 Answer.

* * * * *

(c) The opposition may be withdrawn without prejudice before the answer is filed. After the answer is filed, the opposition may not be withdrawn without prejudice except with the written consent of the applicant.

17. Section 2.107 is revised to read as follows:

§ 2.107 Amendment of pleadings in an opposition proceeding.

Pleadings in an opposition proceeding may be amended in the same manner and to the same extent as in a civil action in a United States district court.

18. Section 2.113 is revised to read as follows:

§ 2.113 Notification of cancellation proceeding.

(a) When a petition for cancellation has been filed in proper form (see §§ 2.111 and 2.112), a notification shall be prepared by the Trademark Trial and Appeal Board, which shall identify the title and number of the proceeding and the registration or registrations involved and shall designate a time, not less than thirty days from the mailing date of the notification, within which an answer must be filed. A copy of the notification shall be forwarded to the attorney or other authorized representative of the petitioner, if any, or to the petitioner. The duplicate copy of the petition for cancellation and exhibits shall be forwarded with a copy of the notification to the respondent (see § 2.118). If the petition is found to be defective as to form, the party filing the petition shall be so advised and allowed a reasonable time for correcting the informality.

19. Section 2.115 is revised to read as follows:

§ 2.115 Amendment of pleadings in a cancellation proceeding.

Pleadings in a cancellation proceeding may be amended in the same manner and to the same extent as in a civil action in a United States district court.

20. Section 2.116 is amended by revising paragraphs (b) and (c) to read as follows:

§ 2.116 Rules of Procedure.

* * * * *

(b) The opposer in an opposition proceeding or the petitioner in a cancellation proceeding shall be in the position of plaintiff, and the applicant in an opposition proceeding or the respondent in a cancellation proceeding shall be in the position of defendant. A party that is a junior party in an interference proceeding or in a concurrent use registration proceeding shall be in the position of plaintiff against every party that is senior, and the party that is a senior party in an interference proceeding or in a concurrent use registration proceeding shall be a defendant against every party that is junior.

(c) The opposition or the petition for cancellation and the answer correspond to the complaint and answer in a court proceeding.

21. Section 2.117 is revised to read as follows:

§ 2.117 Suspension of proceedings.

(a) Whenever it shall come to the attention of the Trademark Trial and Appeal Board that parties to a pending case are engaged in a civil action which may be dispositive of the case, proceedings before the Board may be suspended until termination of the civil action.

(b) Whenever there is pending, at the time when the question of the suspension of proceedings is raised, a motion which is potentially dispositive of the case, the motion may be decided before the question of suspension is considered.

(c) Proceedings may also be suspended, for good cause, upon motion or a stipulation of the parties approved by the Board.

22. Section 2.120 is revised to read as follows:

§ 2.120 Discovery.

(a) *In general.* The provisions of the Federal Rules of Civil Procedure relating to discovery shall apply in opposition, cancellation, interference and concurrent use registration proceedings except as otherwise provided in this section. The Trademark Trial and Appeal Board will specify the closing date for the taking of discovery.

(b) *Discovery deposition within the United States.* The deposition of a natural person shall be taken in the Federal judicial district where the person resides or is regularly employed or at any place on which the parties agree by stipulation. The responsibility rests wholly with the party taking discovery to secure the attendance of a proposed deponent other than a party or anyone who, at the time set for the taking of the deposition, is an officer, director, or managing agent of a party, or a person designated under Rule 30(b)(6) or Rule 31(a) of the Federal Rules of Civil Procedure. See 35 U.S.C. 24.

(c) *Discovery deposition in foreign countries.* (1) The discovery deposition of a natural person residing in a foreign country who is a party or who, at the time set for the taking of the deposition, is an officer, director, or managing agent of a party, or a person designated under Rule 30(b)(6) or Rule 31(a) of the Federal Rules of Civil Procedure, shall, if taken in a foreign country, be taken in the manner prescribed by § 2.124 unless the Trademark Trial and Appeal Board, upon motion for good cause, orders or the parties stipulate, that the deposition be taken by oral examination.

(2) Whenever a foreign party is or will be, during a time set for discovery, present within the United States or any territory which is under the control and jurisdiction of the United States, such party may be deposed by oral examination upon notice by the party seeking discovery. Whenever a foreign party has or will have, during a time set for discovery, an officer, director, managing agent, or other person who consents to testify on its behalf, present within the United States or any territory which is under the control and jurisdiction of the United States, such officer, director, managing agent, or other person who consents to testify in its behalf may be deposed by oral examination upon notice by the party seeking discovery. The party seeking discovery may have one or more officers, directors, managing agents, or other persons who consent to testify on behalf of the adverse party, designated under Rule 30(b)(6) of the Federal Rules of Civil Procedure. The deposition of a person under this paragraph shall be taken in the Federal judicial district where the witness resides or is regularly employed, or, if the witness neither resides nor is regularly employed in a Federal judicial district, where the witness is at the time of the deposition. This paragraph does not preclude the taking of a discovery deposition of a foreign party by any other procedure provided by paragraph (c)(1) of this section.

(d) *Request for production.* The production of documents and things under the provisions of Rule 34 of the Federal Rules of Civil Procedure will be made at the place where the documents and things are usually kept, or where the parties agree, or where and in the manner which the Trademark Trial and Appeal Board, upon motion, orders.

(e) *Motion for an order to compel discovery.* If a party fails to designate a person pursuant to Rule 30(b)(6) or Rule 31(a) of the Federal Rules of Civil Procedure, or if a party, or such designated person, or an officer, director or managing agent of a party fails to attend a deposition or fails to answer any question propounded in a discovery deposition, or any interrogatory, or fails to produce and permit the inspection and copying of any document or thing, the party seeking discovery may file a motion before the Trademark Trial and Appeal Board for an order to compel a designation, or attendance at a deposition, or an answer, or production and an opportunity to inspect and copy. The motion shall include a copy of the request for designation or of the relevant portion of the discovery deposition; or a copy of the interrogatory with any answer or objection that was made; or a copy of the request for production, any proffer of production or objection to production in response to the request, and a list and brief description of the documents or things that were not produced for inspection and copying. The motion must be supported by a written statement from the moving party that such party or the attorney therefor has made a good faith effort, by conference or correspondence, to resolve with the other party or the attorney therefor the issues presented in the motion and has been unable to reach agreement. If issues raised in the motion are subsequently resolved by agreement of the parties, the moving party should inform the Board in writing of the issues in the motion which no longer require adjudication.

(f) *Motion for a protective order.* Upon motion by a party from whom discovery is sought, and for good cause, the Trademark Trial and Appeal Board may make any order which justice requires to protect a party from annoyance, embarrassment, oppression, or undue burden or expense, including one or more of the types of orders provided by clauses (1) through (8), inclusive, of Rule 26(c) of the Federal Rules of Civil Procedure. If the motion for a protective order is denied in whole or in part, the Board may, on such conditions (other than an award of expenses to the party prevailing on the motion) as are just, order that any party provide or permit discovery.

(g) *Failure to comply with order.* If a party fails to comply with an order of the Trademark Trial and Appeal Board relating to discovery, including a protective order, the Board may make any appropriate order, including any of the orders provided in Rule 37(b)(2) of the Federal Rules of Civil Procedure, except that the Board does not have authority to hold any person in contempt or to award any expenses to any party. The Board may impose against a party any of the sanctions provided by this subsection in the event that said party or any attorney, agent, or designated witness of that party fails to comply with a protective order made pursuant to Rule 26(c) of the Federal Rules of Civil Procedure.

(h) *Request for admissions.* Requests for admissions shall be governed by Rule 36 of the Federal Rules of Civil Procedure except that the Trademark Trial and Appeal Board does not have authority to award any expenses to any party. A motion by a party to determine the sufficiency of an answer or objection to a request made by that party for an admission shall include a copy of the request for admission and any exhibits thereto and of the answer or objection. The motion must be supported by a written statement from the moving party that such party or the attorney therefor has made a good faith effort, by conference or correspondence, to resolve with the other party or the attorney therefor the issues presented in the motion and has been unable to reach agreement. If issues raised in the motion are subsequently resolved by agreement of the parties, the moving party should inform the Board in writing of the issues in the motion which no longer require adjudication.

(i) *Telephone and pre-trial conferences.* (1) Whenever it appears to the Trademark Trial and Appeal Board that a motion filed in an inter partes proceeding is of such nature that its resolution by correspondence is not practical, the Board may, upon its own initiative or upon request made by one or both of the parties, resolve the motion by telephone conference.

(2) Whenever it appears to the Trademark Trial and Appeal Board that questions or issues arising during the interlocutory phase of an inter partes proceeding have become so complex that their resolution by correspondence or telephone conference is not practical and that resolution would be likely to be facilitated by a conference in person of the parties or their attorneys with a Member or Attorney-Examiner of the Board, the Board may, upon its own initiative or upon motion made by one or both of the parties, request that the parties or their attorneys, under circumstances which will not result in undue hardship for any party, meet with the Board at its offices for a pre-trial conference.

(j) *Use of discovery deposition, admission, or answer to interrogatory.* (1) The discovery deposition of a party or of anyone who at the time of taking the deposition was an officer, director or managing agent of a party, or a person designated by a party pursuant to Rule 30(b)(6) or Rule 31(a) of the Federal Rules of Civil Procedure, may be offered in evidence by an adverse party.

(2) Except as provided in paragraph (j)(1) of this section, the discovery deposition of a witness, whether or not a party, shall not be offered in evidence unless the person whose deposition was taken is, during the testimony period of the party offering the deposition, dead; or out of the United States (unless it appears that the absence of the witness was procured by the party offering the deposition); or unable to testify because of age, illness, infirmity, or imprisonment; or cannot be served with a subpoena to compel attendance at a testimonial deposition; or there is a stipulation by the parties; or upon a showing that such exceptional circumstances exist as to make it desirable, in the interest of justice, to allow the deposition to be used. The use of a discovery deposition by any party under this paragraph will be allowed only by stipulation of the parties approved by the Trademark Trial and Appeal Board, or by order of the Board on motion, which shall be filed at the time of the purported offer of the deposition in evidence, unless the motion is based upon a claim that such exceptional circumstances exist as to make it desirable, in the interest of justice, to allow the deposition to be used, in which case the motion shall be filed promptly after the circumstances claimed to justify use of the deposition became known.

(3) A discovery deposition, an answer to an interrogatory, or an admission to a request for admission, which may be offered in evidence under the provisions of paragraph (j) of this section may be made of record in the case by filing the deposition or any part thereof with any

VOL 48 ISS 100 MAY 23 1983 UMI

exhibit to the part that is filed, or a copy of the interrogatory and answer thereto with any exhibit made part of the answer, or a copy of the request for admission and any exhibit thereto and the admission (or a statement that the party from whom an admission was requested failed to respond thereto), together with a notice of reliance. The notice of reliance and the material submitted thereunder should be filed during the testimony period of the party who files the notice of reliance. An objection made at a discovery deposition by a party answering a question subject to the objection will be considered at final hearing.

(4) If only part of a discovery deposition is submitted and made part of the record by a party, an adverse party may introduce under a notice of reliance any other part of the deposition which should in fairness be considered so as to make not misleading what was offered by the submitting party.

(5) An answer to an interrogatory, or an admission to a request for admission, may be submitted and made part of the record by only the inquiring party except that, if fewer than all of the answers to interrogatories, or fewer than all of the admissions, are offered in evidence by the inquiring party, the responding party may introduce under a notice of reliance any other answers to interrogatories, or any other admissions, which should in fairness be considered so as to make not misleading what was offered by the inquiring party.

(6) Paragraph (j) of this section will not be interpreted to preclude the reading or the use of a discovery deposition, or answer to an interrogatory, or admission as part of the examination or cross-examination of any witness during the testimony period of any party.

(7) When a discovery deposition, or a part thereof, or an answer to an interrogatory, or an admission, has been made of record by one party in accordance with the provisions of paragraph (j)(3) of this section, it may be referred to by any party for any purpose permitted by the Federal Rules of Evidence.

(8) Interrogatories, requests for production, requests for admissions, and materials or depositions obtained during the discovery period should not be filed with the Board except when submitted with a motion to compel discovery, or in support of or response to a motion for summary judgment, or under a notice of reliance during a party's testimony period.

23. Section 2.121 is revised to read as follow:

§ 2.121 Assignment of times for taking testimony.

(a)(1) The Trademark Trial and Appeal Board will issue a trial order assigning to each party the time for taking testimony. No testimony shall be taken except during the times assigned, unless by stipulation of the parties approved by the Board, or, upon motion, by order of the Board. Testimony periods may be rescheduled by stipulation of the parties approved by the Board, or upon motion granted by the Board, or by order of the Board. The resetting of the closing date for discovery will result in the rescheduling of the testimony periods without action by any party.

(2) The initial trial order will be mailed by the Board after issue is joined.

(b)(1) The Trademark Trial and Appeal Board will schedule a testimony period for the plaintiff to present its case in chief, a testimony period for the defendant to present its case and to meet the case of the plaintiff, and a testimony period for the plaintiff to present evidence in rebuttal.

(2) When there is a counterclaim, or when proceedings have been consolidated and one party is in the position of plaintiff in one of the involved proceedings and in the position of defendant in another of the involved proceedings, or when there is an interference or a concurrent use registration proceeding involving more than two parties, the Board will schedule testimony periods so that each party in the position of plaintiff will have a period for presenting its case in chief against each party in the position of defendant, each party in the position of defendant will have a period for presenting its case and meeting the case of each plaintiff, and each party in the position of plaintiff will have a period for presenting evidence in rebuttal.

(c) A testimony period which is solely for rebuttal will be set for fifteen days. All other testimony periods will be set for thirty days. The periods may be extended by stipulation of the parties approved by the Trademark Trial and Appeal Board, or upon motion granted by the Board, or by order of the Board.

(d) when parties stipulate to the rescheduling of testimony periods or to the rescheduling of the closing date for discovery and the rescheduling of testimony periods, a stipulation presented in the form used in a trial order, signed by the parties, or a motion in said form signed by one party and including a statement that every other party has agreed thereto, and submitted in one original plus as many photocopies as there are parties, will, if approved, be so stamped, signed, and dated, and the copies will be promptly returned to the parties.

24. Section 2.122 is revised to read as follows:

§ 2.122 Matters in evidence.

(a) *Rules of evidence.* The rules of evidence for proceedings before the Trademark Trial and Appeal Board are the Federal Rules of Evidence, the relevant provisions of the Federal Rules of Civil Procedure, the relevant provisions of Title 28 of the United States Code, and the provisions of this Part of Title 37 of the Code of Federal Regulations.

(b) *Application files.* (1) The file of each application or registration specified in a declaration of interference, of each application or registration specified in the notice of a concurrent use registration proceeding, of the application against which a notice of opposition is filed, or of each registration against which a petition or counterclaim for cancellation is filed forms part of the record of the proceeding without any action by the parties and reference may be made to the file for any relevant and competent purpose.

(2) The allegation in an application for registration, or in a registration, of a date of use is not evidence on behalf of the applicant or registrant; a date of use of a mark must be established by competent evidence. Specimens in the file of an application for registration, or in the file of a registration, are not evidence on behalf of the applicant or registrant unless identified and introduced in evidence as exhibits during the period for the taking of testimony.

(c) *Exhibits to pleadings.* Except as provided in paragraph (d)(1) of this section, an exhibit attached to a pleading is not evidence on behalf of the party to whose pleading the exhibit is attached unless identified and introduced in evidence as an exhibit during the period for the taking of testimony.

(d) *Registrations.* (1) A registration of the opposer or petitioner pleaded in an opposition or petition to cancel will be received in evidence and made part of the record if the opposition or petition is accompanied by two copies of the registration prepared and issued by the Patent and Trademark Office showing both the current status of and current title to the registration. For the cost of a copy of a registration showing status and title, see § 2.6(n).

(2) A registration owned by any party to a proceeding may be made of record

in the proceeding by that party by appropriate identification and introduction during the taking of testimony or by filing a notice of reliance, which shall be accompanied by a copy of the registration prepared and issued by the Patent and Trademark Office showing both the current status of and current title to the registration. The notice of reliance shall be filed during the testimony period of the party that files the notice.

(e) *Printed publications and official records.* Printed publications, such as books and periodicals, available to the general public in libraries or of general circulation among members of the public or that segment of the public which is relevant under an issue in a proceeding, and official records, if the publication or official record is competent evidence and relevant to an issue, may be introduced in evidence by filing a notice of reliance on the material being offered, which notice shall specify the printed publication or the official record and the pages to be read, indicate generally the relevance of the material being offered, and be accompanied by the official record or a copy thereof whose authenticity is established under the Federal Rules of Evidence, or by the printed publication or a copy of the relevant portion thereof, including the title page and any other page needed to show the place and date of publication, the name and address of the publisher, and the name of the author or the editor. A copy of an official record of the Patent and Trademark Office need not be certified to be offered in evidence. The notice of reliance shall be filed during the testimony period of the party that files the notice.

(f) *Testimony from other proceedings.* By order of the Trademark Trial and Appeal Board, on motion, testimony taken in another proceeding, or testimony taken in a suit or action in a court, between the same parties or those in privity may be used in a proceeding, so far as relevant and material, subject, however, to the right of any adverse party to recall or demand the recall for examination or cross-examination of any witness whose prior testimony has been offered and to rebut the testimony.

25. Section 2.123 is amended by revising paragraphs (a), (e)(3), (j) and (k) to read as follows:

§ 2.123 Trial testimony in inter partes cases.

(a)(1) The testimony of witnesses in inter partes cases may be taken by depositions upon oral examination as provided by this section or by depositions upon written questions as provided by § 2.124. If a party serves notice of the taking of a testimonial deposition upon written questions of a witness who is, or will be at the time of the deposition, present within the United States or any territory which is under the control and jurisdiction of the United States, any adverse party may, within fifteen days from the date of service of the notice, file a motion with the Trademark Trial and Appeal Board, for good cause, for an order that the deposition be taken by oral examination.

(2) A testimonial deposition taken in a foreign country shall be taken by deposition upon written questions as provided by § 2.124, unless the Board, upon motion for good cause, orders that the deposition be taken by oral examination, or the parties so stipulate.

* * * * *

(e) *Examination of witnesses.* * * *.

(3) Every adverse party shall have full opportunity to cross-examine each witness. If the notice of examination of witnesses which is served pursuant to paragraph (c) of this section is improper or inadequate with respect to any witness, an adverse party may cross-examine that witness under protest while reserving the right to object to the receipt of the testimony in evidence. Promptly after the testimony is completed, the adverse party, if he wishes to preserve the objection, shall move to strike the testimony from the record, which motion will be decided on the basis of all of the relevant circumstances. A motion to strike the testimony of a witness for lack of proper or adequate notice of examination must request the exclusion of the entire testimony of that witness and not only a part of that testimony.

* * * * *

(j) *Effect of errors and irregularities in depositions:* Rule 32(d) (1), (2), and (3) (A) and (B) of the Federal Rules of Civil Procedure shall apply to errors and irregularities in depositions. Notice will not be taken of merely formal or technical objections which shall not appear to have wrought a substantial injury to the party raising them; and in case of such injury it must be made to appear that the objection was raised at the time specified in said rule.

(k) *Objections to admissibility:* Subject to the provisions of paragraph (j) of this section, objection may be made to receiving in evidence any deposition, or part thereof, or any other evidence, for any reason which would require the exclusion of the evidence from consideration. Objections to the competency of a witness or to the competency, relevancy, or materiality of testimony must be raised at the time specified in Rule 32(d)(3)(A) of the Federal Rules of Civil Procedure. Such objections will not be considered until final hearing.

26. Section 2.124 is revised to read as follows:

§ 2.124 Depositions upon written questions.

(a) A deposition upon written questions may be taken before any person before whom depositions may be taken as provided by Rule 28 of the Federal Rules of Civil Procedure.

(b)(1) A party desiring to take a testimonial deposition upon written questions shall serve notice thereof upon each adverse party within ten days from the opening date of the testimony period of the party who serves the notice. The notice shall state the name and address of the witness. A copy of the notice, but not copies of the questions, shall be filed with the Trademark Trial and Appeal Board.

(2) A party desiring to take a discovery deposition upon written questions shall serve notice thereof upon each adverse party and shall file a copy of the notice, but not copies of the questions, with the Board. The notice shall state the name and address, if known, of the person whose deposition is to be taken. If the name of the person is not known, a general description sufficient to identify him or the particular class or group to which he belongs shall be stated in the notice, and the party from whom the discovery deposition is to be taken shall designate one or more persons to be deposed in the same manner as is provided by Rule 30(b)(6) of the Federal Rules of Civil Procedure.

(c) Every notice given under the provisions of paragraph (b) of this section shall be accompanied by the name or descriptive title of the officer before whom the deposition is to be taken.

(d)(1) Every notice served on any adverse party under the provisions of paragraph (b) of this section shall be accompanied by the written questions to be propounded on behalf of the party who proposes to take the deposition. Within twenty days from the date of service of the notice, any adverse party may serve cross questions upon the party who proposes to take the deposition; any party who serves cross questions shall also serve every other adverse party. Within ten days from the date of service of the cross questions, the party who proposes to take the deposition may serve redirect questions on every adverse party. Within ten days from the date of service of the redirect

VOL 48 ISS 100 MY 23 1983 UMI

questions, any party who served cross questions may serve recross questions upon the party who proposes to take the deposition; any party who serves recross questions shall also serve every other adverse party. Written objections to questions may be served on a party propounding questions; any party who objects shall serve a copy of the objections on every other adverse party. In response to objections, substitute questions may be served on the objecting party within ten days of the date of service of the objections; substitute questions shall be served on every other adverse party.

(2) Upon motion for good cause by any party, or upon its own initiative, the Trademark Trial and Appeal Board may extend any of the time periods provided by paragraph (d)(1) of this section. Upon receipt of written notice that one or more testimonial depositions are to be taken upon written questions, the Trademark Trial and Appeal Board shall suspend or reschedule other proceedings in the matter to allow for the orderly completion of the depositions upon written questions.

(e) Within ten days after the last date when questions, objections, or substitute questions may be served, the party who proposes to take the deposition shall mail a copy of the notice and copies of all the questions to the officer designated in the notice; a copy of the notice and of all the questions mailed to the officer shall be served on every adverse party. The officer designated in the notice shall take the testimony of the witness in response to the questions and shall record each answer immediately after the corresponding question. The officer shall then certify the transcript and mail the transcript and exhibits to the party who took the deposition.

(f) The party who took the deposition shall promptly serve a copy of the transcript, copies of documentary exhibits, and duplicates or photographs of physical exhibits on every adverse party. It is the responsibility of the party who takes the deposition to assure that the transcript is correct (see § 2.125(b)). If the deposition is a discovery deposition, it may be made of record as provided by § 2.120(j). If the deposition is a testimonial deposition, the original, together with copies of documentary exhibits and duplicates or photographs of physical exhibits, shall be filed promptly with the Trademark Trial and Appeal Board.

(g) Objections to questions and answers in depositions upon written questions may be considered at final hearing.

27. Section 2.125 is revised to read as follows:

§ 2.125 Filing and service of testimony.

(a) One copy of the transcript of testimony taken in accordance with § 2.123, together with copies of documentary exhibits and duplicates or photographs of physical exhibits, shall be served on each adverse party within thirty days after completion of the taking of that testimony.

(b) The party who takes testimony is responsible for having all typographical errors in the transcript and all errors of arrangement, indexing and form of the transcript corrected, on notice to each adverse party, prior to the filing of one certified transcript with the Trademark Trial and Appeal Board. The party who takes testimony is responsible for serving on each adverse party one copy of the corrected transcript or, if reasonably feasible, corrected pages to be inserted into the transcript previously served.

(c) One certified transcript and exhibits shall be filed promptly with the Trademark Trial and Appeal Board. Notice of such filing shall be served on each adverse party and a copy of each notice shall be filed with the Board.

(d) Each transcript shall comply with § 2.123(g) with respect to arrangement, indexing and form.

(e) Upon motion by any party, for good cause, the Trademark Trial and Appeal Board may order that any part of a deposition transcript or any exhibits that directly disclose any trade secret or other confidential research, development, or commercial information may be filed under seal and kept confidential under the provisions of § 2.27(e). If any party or any attorney or agent of a party fails to comply with an order made under this paragraph, the Board may impose any of the sanctions authorized by § 2.120(g).

§ 2.126 [Removed]

28. Section 2.126 is removed.

29. Section 2.127 is revised to read as follows:

§ 2.127 Motions

(a) Every motion shall be made in writing, shall contain a full statement of the grounds, and shall embody or be accompanied by a brief. A brief in response to a motion shall be filed within fifteen days from the date of service of the motion unless another time is specified by the Trademark Trial and Appeal Board or the time is extended by order of the Board on motion for good cause. When a party fails to file a brief in response to a motion, the Board may treat the motion as conceded. An oral hearing will not be held on a motion except on order by the Board.

(b) Any request for reconsideration or modification of an order or decision issued on a motion must be filed within thirty days from the date thereof. A brief in response must be filed within fifteen days from the date of service of the request.

(c) Interlocutory motions, requests, and other matters not actually or potentially dispositive of a proceeding may be acted upon by a single Member of the Trademark Trial and Appeal Board or by an Attorney-Examiner of the Board to whom authority so to act has been delegated.

(d) When any party files a motion to dismiss, or a motion for judgment on the pleadings, or a motion for summary judgment, or any other motion which is potentially dispositive of a proceeding, the case will be suspended by the Trademark Trial and Appeal Board with respect to all matters not germane to the motion and no party should file any paper which is not germane to the motion. If the case is not disposed of as a result of the motion, proceedings will be resumed pursuant to an order of the Board when the motion is decided.

30. Section 2.128 is revised to read as follows:

§ 2.128 Briefs at final hearing.

(a)(1) The brief of the party in the position of plaintiff shall be due not later than sixty days after the date set for the close of rebuttal testimony. The brief of the party in the position of defendant, if filed, shall be not later than thirty days after the due date of the first brief. A reply brief by the party in the position of plaintiff, if filed, shall be due not later than fifteen days after the due date of the defendant's brief.

(2) When there is a counterclaim, or when proceedings have been consolidated and one party is in the position of plaintiff in one of the involved proceedings and in the position of defendant in another of the involved proceedings, or when there is an interference or a concurrent use registration proceeding involving more than two parties, the Trademark Trial and Appeal Board will set the due dates for the filing of the main brief, and the answering brief, and the rebuttal brief by the parties.

(3) When a party in the position of plaintiff fails to file a main brief, an order may be issued allowing plaintiff until a set time, not less than fifteen days, in which to show cause why the Board should not treat such failure as a concession of the case. If plaintiff fails to file a response to the order, or files a response indicating that he has lost

interest in the case, judgment may be entered against plaintiff.

(b) Briefs shall be submitted in typewritten or printed form, double spaced, on letter size paper. Without leave of the Trademark Trial and Appeal Board, no brief shall contain more than fifty pages of argument and, in the case of a reply brief, the entire brief shall not exceed twenty-five pages. Each brief shall contain an alphabetical index of cases cited therein. One original and two legible copies, on good quality paper, of each brief shall be filed.

31. Section 2.129 is revised to read as follows:

§ 2.129 Oral argument; reconsideration.

(a) If a party desires to have an oral argument at final hearing, the party shall request such argument by a separate notice filed not later than ten days after the due date for the filing of the last reply brief in the proceeding. Oral arguments will be heard by three Members of the Trademark Trial and Appeal Board at the time specified in the notice of hearing. If any party appears at the specified time, that party will be heard. If the Board is prevented from hearing the case at the specified time, a new hearing date will be set. Unless otherwise permitted, oral arguments in an inter partes case will be limited to thirty minutes for each party. A party in the position of plaintiff may reserve part of the time allowed for oral argument to present a rebuttal argument.

(b) The date or time of a hearing may be reset, so far as is convenient and proper, to meet the wishes of the parties and their attorneys or other authorized representatives.

(c) Any request for rehearing or reconsideration or modification of a decision issued after final hearing must be filed within thirty days from the date of the decision. A brief in response must be filed within fifteen days from the date of service of the request. The times specified may be extended by order of the Trademark Trial and Appeal Board on motion for good cause.

32. Section 2.131 is revised to read as follows:

§ 2.131 Remand after decision in inter partes proceeding.

If, during an inter partes proceeding, facts are disclosed which appear to render the mark of an applicant unregistrable, but such matter has not been tried under the pleadings as filed by the parties or as they might be deemed to be amended under Rule 15(b) of the Federal Rules of Civil Procedure to conform to the evidence, the Trademark Trial and Appeal Board, in lieu of determining the matter in the decision on the proceeding, may refer the application to the examiner for reexamination in the event the applicant ultimately prevails in the inter partes proceeding. Upon receiving the application, the examiner shall withhold registration pending reexamination of the application in the light of the reference by the Board. If, upon reexamination, the examiner finally refuses registration to the applicant, an appeal may be taken as provided by §§ 2.141 and 2.142.

33. Section 2.132 is revised to read as follows:

§ 2.132 Involuntary dismissal for failure to take testimony.

(a) If the time for taking testimony by any party in the position of plaintiff has expired and that party has not taken testimony or offered any other evidence, any party in the position of defendant may, without waiving the right to offer evidence in the event the motion is denied, move for dismissal on the ground of the failure of the plaintiff to prosecute. The party in the position of plaintiff shall have fifteen days from the date of service of the motion to show cause why judgment should not be rendered against him. In the absence of a showing of good and sufficient cause, judgment may be rendered against the party in the position of plaintiff. If the motion is denied, testimony periods will be reset for the party in the position of defendant and for rebuttal.

(b) If no evidence other than a copy or copies of Patent and Trademark Office records is offered by any party in the position of plaintiff, any party in the position of defendant may, without waiving the right to offer evidence in the event the motion is denied, move for dismissal on the ground that upon the law and the facts the party in the position of plaintiff has shown no right to relief. The party in the position of plaintiff shall have fifteen days from the date of service of the motion to file a brief in response to the motion. The Trademark Trial and Appeal Board may render judgment against the party in the position of plaintiff, or the Board may decline to render judgment until all of the evidence is in the record. If judgment is not rendered, testimony periods will be reset for the party in the position of defendant and for rebuttal.

(c) Any motion filed under paragraph (a) or (b) of this section must be filed before the opening of the testimony period of the moving party.

34. Section 2.134 is revised to read as follows:

§ 2.134 Surrender or voluntary cancellation of registration.

(a) After the commencement of a cancellation proceeding, if the respondent applies for cancellation of the involved registration under section 7(d) of the Act of 1946 without the written consent of every adverse party, judgment shall be entered against the respondent.

(b) After the commencement of a cancellation proceeding, if it comes to the attention of the Trademark Trial and Appeal Board that the respondent has permitted his involved registration to be cancelled under section 8 of the Act of 1946 or has failed to renew his involved registration under section 9 of the Act of 1946, an order may be issued allowing respondent until a set time, not less than fifteen days, in which to show cause why such cancellation or failure to renew should not be deemed to be the equivalent of a cancellation by request of respondent without the consent of the adverse party and should not result in entry of judgment against respondent as provided by paragraph (a) of this section. In the absence of a showing of good and sufficient cause, judgment may be entered against respondent as provided by paragraph (a) of this section.

35. Section 2.135 is revised to read as follows:

§ 2.135 Abandonment of application or mark.

After the commencement of an opposition, concurrent use, or interference proceeding, if the applicant files a written abandonment of the application or of the mark without the written consent of every adverse party, judgment shall be entered against the applicant.

36. Section 2.142 is proposed to be revised to read as follows:

§ 2.142 Time and manner of ex parte appeals.

(a) Any appeal filed under the provisions of § 2.141 must be filed within six months from the date of final refusal or the date of the action from which the appeal is taken. An appeal is taken by filing a notice of appeal and paying the appeal fee.

(b) The brief of appellant shall be filed within sixty days from the date of appeal. If the brief is not filed within the time allowed, the appeal may be dismissed. The examiner shall, within sixty days after the brief of appellant is sent to the examiner, file with the Trademark Trial and Appeal Board a written brief answering the brief of appellant and shall mail a copy of the

VOL 48 ISS 100 MAY 23 1983 UMI

brief to the appellant. The appellant may file a reply brief within twenty days from the date of mailing of the brief of the examiner.

(c) All requirements made by the examiner and not the subject of appeal shall be complied with prior to the filing of an appeal.

(d) The record in the application should be complete prior to the filing of an appeal. The Trademark Trial and Appeal Board will ordinarily not consider additional evidence filed with the Board by the appellant or by the examiner after the appeal is filed. After an appeal is filed, if the appellant or the examiner desires to introduce additional evidence, the appellant or the examiner may request the Board to suspend the appeal and to remand the application for further examination.

(e)(1) If the appellant desires an oral hearing, a request therefor should be made by a separate notice filed not later than ten days after the due date for a reply brief. Oral argument will be heard by three Members of the Trademark Trial and Appeal Board at the time specified in the notice of hearing, which may be reset if the Board is prevented from hearing the argument at the specified time or, so far as is convenient and proper, to meet the wish of the appellant or his attorney or other authorized representative.

(2) If the appellant requests an oral argument, the examiner who issued the refusal of registration or the requirement from which the appeal is taken, or in lieu thereof another examiner from the same examining division as designated by the supervisory attorney thereof, shall present an oral argument. If no request for an oral hearing is made by the appellant, the appeal will be decided on the record and briefs.

(3) Oral argument will be limited to twenty minutes by the appellant and ten minutes by the examiner. The appellant may reserve part of the time allowed for oral argument to present a rebuttal argument.

(f)(1) If, during an appeal from a refusal of registration, it appears to the Trademark Trial and Appeal Board that an issue not previously raised may render the mark of the appellant unregistrable, the Board may suspend the appeal and remand the application to the examiner for further examination to be completed within thirty days.

(2) If the further examination does not result in an additional ground for refusal of registration, the examiner shall promptly return the application to the Board, for resumption of the appeal, with a written statement that further examination did not result in an additional ground for refusal of registration.

(3) If the further examination does result in an additional ground for refusal of registration, the examiner and appellant shall proceed as provided by §§ 2.61, 2.62, 2.63 and 2.64. If the ground for refusal is made final, the examiner shall return the application to the Board, which shall thereupon issue an order allowing the appellant sixty days from the date of the order to file a supplemental brief limited to the additional ground for the refusal of registration. If the supplemental brief is not filed by the appellant within the time allowed, the appeal may be dismissed.

(4) If the supplemental brief of the appellant is filed, the examiner shall, within sixty days after the supplemental brief of the appellant is sent to the examiner, file with the Board a written brief answering the supplemental brief of appellant and shall mail a copy of the brief to the appellant. The appellant may file a reply brief within twenty days from the date of mailing of the brief of the examiner.

(5) If an oral hearing on the appeal had been requested prior to the remand of the application but not yet held, an oral hearing will be set and heard as provided in paragraph (e) of this section. If an oral hearing had been held prior to the remand or had not been previously requested by the appellant, an oral hearing may be requested by the appellant by a separate notice filed not later than ten days after the due date for a reply brief on the additional ground for refusal of registration. If the appellant files a request for an oral hearing, one will be set and heard as provided in paragraph (e) of this section.

(g) An application which has been considered and decided on appeal will not be reopened except for the entry of a disclaimer under section 6 of the Act of 1946 or upon order of the Commissioner, but a petition to the Commissioner to reopen an application will be considered only upon a showing of sufficient cause for consideration of any matter not already adjudicated.

37. Section 2.146 is revised to read as follows:

§ 2.146 Petitions to the Commissioner.

(a) Petition may be taken to the Commissioner: (1) From any repeated or final formal requirement of the examiner in the ex parte prosecution of an application if permitted by § 2.63(b); (2) in any case for which the Act of 1946, or Title 35 of the United States Code, or this Part of Title 37 of the Code of Federal Regulations specifies that the matter is to be determined directly or reviewed by the Commissioner; (3) to invoke the supervisory authority of the Commissioner in appropriate circumstances; (4) in any case not specifically defined and provided for by this part of Title 37 of the Code of Federal Regulations; (5) in an extraordinary situation, when justice requires and no other party is injured thereby, to request a suspension or waiver of any requirement of the rules not being a requirement of the Act of 1946.

(b) Questions of substance arising during the ex parte prosecution of applications, including, but not limited to, questions arising under sections 2, 3, 4, 5, 6 and 23 of the Act of 1946, are not considered to be appropriate subject matter for petitions to the Commissioner.

(c) Every petition to the Commissioner shall include a statement of the facts relevant to the petition, the points to be reviewed, the action or relief that is requested, and the requisite fee (see § 2.6). Any brief in support of the petition shall be embodied in or accompany the petition. When facts are to be proved in ex parte cases (as in a petition to revive an abandoned application), the proof in the form of affidavits or declarations in accordance with § 2.20, and any exhibits, shall accompany the petition.

(d) A petition on any matter not otherwise specifically provided for shall be filed within sixty days from the date of mailing of the action from which relief is requested.

(e)(1) A petition from the denial of a request for an extension of time to file a notice of opposition shall be filed within fifteen days from the date of mailing of the denial of the request and shall be served on the attorney or other authorized representative of the applicant, if any, or on the applicant. Proof of service of the petition shall be made as provided by § 2.119(a). The applicant may file a response within fifteen days from the date of service of the petition and shall serve a copy of the response on the petitioner, with proof of service as provided by § 2.119(a). No further paper relating to the petition shall be filed.

(2) A petition from an interlocutory order of the Trademark Trial and Appeal Board shall be filed within thirty days after the date of mailing of the order from which relief is requested. Any brief in response to the petition shall be filed, with any supporting exhibits, within fifteen days from the date of service of the petition. Petitions and responses to petitions, and any papers accompanying a petition or response, under this subsection shall be served on every adverse party pursuant to § 2.119(a).

(f) An oral hearing will not be held on a petition except when considered necessary by the Commissioner.

(g) The mere filing of a petition to the Commissioner will not act as a stay in any appeal or inter partes proceeding that is pending before the Trademark Trial and Appeal Board nor stay the period for replying to an Office action in an application except when a stay is specifically requested and is granted or when §§ 2.63(b) and 2.65 are applicable to an ex parte application.

(h) Authority to act on petitions, or on any petition, may be delegated by the Commissioner.

§ 2.147 [Removed]

38. Section 2.147 is removed.

39. Section 2.165 is revised to read as follows:

§ 2.165 Reconsideration of affidavit or declaration.

(a)(1) If the affidavit or declaration filed pursuant to § 2.162 is insufficient or defective, the affidavit or declaration will be refused and the registrant will be notified of the reason. Reconsideration of the refusal may be requested within six months from the date of the mailing of the action. The request for reconsideration must state the grounds for the request. A supplemental or substitute affidavit or declaration required by section 8 of the Act of 1946 cannot be considered unless it is filed before the expiration of six years from the date of the registration or from the date of publication under section 12(c) of the Act. The certificate of mailing procedure provided by § 1.8 does not apply to affidavits or declarations or to supplemental or substitute affidavits or declarations filed under section 8 (a) or (b) of the Act, but the certificate of mailing by "Express Mail" procedure provided by § 1.10 does apply thereto.

(2) A request for reconsideration shall be a condition precedent to a petition to the Commissioner to review the refusal of the affidavit or declaration unless the first action refusing the affidavit or declaration directs the registrant to petition the Commissioner for relief, in which event the petition must be filed within six months from the date of mailing of the action.

(b) If the refusal of the affidavit or declaration is adhered to, the registrant may petition the Commissioner to review the action under § 2.146(a)(2). The petition to the Commissioner requesting review of the action adhering to the refusal of the affidavit or declaration must be filed within six months from the date of mailing of the action which denied reconsideration.

(c) The decision of the Commissioner on the petition will constitute the final action of the Patent and Trademark Office. If there is no petition to the Commissoner, the Commissioner will notify the registrant of the refusal of the affidavit or declaration after the expiration of six years from the date of registration or from the date of publication under section 12(c) of the Act of 1946, and such notice will constitute the final action of the Office.

(d) A petition to the Commissioner for review of the action shall be a condition precedent to an appeal to or action for review by any court.

40. Section 2.173 is amended by revising paragraph (b) to read as follows:

§ 2.173 Amendment; disclaimer in part.

* * * * *

(b) No amendment in the identification of goods or services in a registration will be permitted except to restrict the identification or otherwise to change it in ways that would not require republication of the mark. No amendment seeking the elimination of a disclaimer will be permitted.

* * * * *

41. Section 2.184 is revised to read as follows:

§ 2.184 Refusal of renewal.

(a) If the application for renewal is incomplete or defective, the renewal will be refused. The application may be completed or amended in response to a refusal, subject to the provisions of § 2.183. If a response to a refusal of renewal is not filed within six months from the date of mailing of the action, the application for renewal will be considered abandoned. A request to reconsider a refusal of renewal shall be a condition precedent to a petition to the Commissioner to review the refusal of renewal.

(b) If the refusal of renewal is adhered to, the registrant may petition the Commissioner to review the action under § 2.146(a)(2). The petition to the Commissioner requesting review of the action adhering to the refusal of the renewal must be filed within six months from the date of mailing of the action which adhered to the refusal. If a timely petition to the Commissioner is not filed, the application for renewal will be considered abandoned.

(c) The decision of the Commissioner on the petition will constitute the final action of the Patent and Trademark Office.

(d) A petition to the Commissioner for review of the action shall be a condition precedent to an appeal to or action for review by any court.

42. Section 2.186 is revised to read as follows:

§ 2.186 Action may be taken by assignee of record.

Any action with respect to an assigned application or registration which may or must be taken by a registrant or applicant may be taken by the assignee provided that the assignment has been recorded.

Dated: April 26, 1983.

Donald J. Quigg,

Deputy Commissioner of Patents and Trademarks.

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Parts 1 and 5

[Docket No. 30422-84]

Revision of Foreign Filing License Procedure

AGENCY: Patent and Trademark Office, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Patent and Trademark Office proposes to revise the rules of practice in patent cases to establish a streamlined procedure for granting a license for foreign filing. The term "transmitting" as used in the proposed rules would include transmittal of technical data to a foreign country for purposes of filing a patent application. The proposed rules also specify the content of a petition for retroactive license. The proposed changes would simplify the obtaining of foreign filing licenses for amendments, modifications, and supplements and would result in reduced work for both patent applicants and the Patent and Trademark Office. At the same time, national security protections would be strengthened.

DATES: Comments must be submitted on or before July 20, 1983; a public hearing will be held July 20, 1983; requests to present oral testimony should be received prior to July 13, 1983.

ADDRESSES: Address written comments and requests to present oral testimony to the Commissioner of Patents and Trademarks; Attention: Kenneth L. Cage, Special Laws Administration, Group 220, Room 4–10D17, Washington, D.C. 20231. The hearing will be held in Room 3–11C24 of Building 3, Crystal Plaza, located at 2021 Jefferson Davis Highway, Arlington, VA. Written comments and transcripts of the public hearing will be available for public inspection in Room 3–11A13 of Building 3, Crystal Plaza.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Cage by telephone at (703) 557–2877 or by mail marked to his attention and addressed to the Commissioner of Patents and Trademarks, Washington, D.C. 20231.

SUPPLEMENTARY INFORMATION: Under the present procedures, all licenses for foreign filing of a patent application have the same scope, as set forth in current § 5.15. The scope of these licenses, as held by the Court in *In re Gaertner*, 202 USPQ 714 (C.C.P.A. 1979), does not include amendments and modifications of an application which contain additional subject matter.

Under the proposed rules, there would be two types of licenses of differing scope for foreign filing. The first type under § 5.15(a), the grant of which would be indicated on the filing receipt in accordance with § 5.12(a) published at 48 FR 2696, would permit the transmittal for filing of the application and of any amendments or modifications to the application in a foreign country, even if "additional subject matter" were introduced into the foreign application provided the subject matter did not change the general nature of the subject matter disclosed and did not pertain to certain categories of potentially sensitive material which are set forth in proposed § 5.15(a) (1)–(5). This scope of license under § 5.15(a) would also be granted under § 5.12(b) pursuant to § 5.13 petition, if the § 5.15(a) scope of license is indicated on the license grant.

The second type of license under § 5.15(b) would be limited in scope to the original subject matter disclosed at the time the license was granted and would not cover "additional subject matter" as the phrase is currently interpreted (*In re Gaertner*, 202 USPQ 714 (C.C.P.A. 1979)). The licenses under §§ 5.12(b), 5.13, and 5.14 would be of the same scope as those granted under present practice unless a § 5.15(a) license is indicated on the license grant. If a petition for a license under § 5.12(b) is granted prior to the grant of the § 5.12(a) filing receipt licenses, the former would merge into the latter and would be considered a § 5.12(a) license for the purpose of proposed § 5.15.

A new § 5.20 is proposed which would set forth in the regulations the requirements to be met for the granting of a retroactive license. The proposed requirements include (1) a list of the foreign countries which received the information; (2) the date(s) of transmittal; (3) an oath or declaration which avers to (i) the non-sensitive nature of the material, (ii) a showing of diligence in attempting to obtain the license upon discovery of the error, and (iii) a showing of facts which support a conclusion of inadvertence; and (4) the required fee. The section as proposed also provides in paragraph (b) for review from a denial of a petition for a retroactive license.

A revised § 5.11(a) is proposed which would set forth in the regulations a requirement that a license from the Commissioner of Patents and Trademarks is required before transmitting an application to a foreign country, if the United States application has not been on file for six months, or no application has been filed in the United States. This proposed rule change would more accurately reflect the intent of the statutes and make the rules more closely conform with the regulations of other agencies which deal with the export of technical data to a foreign country. The proposed change requiring a license before transmitting an application to a foreign country is not intended to interpret the language in 35 U.S.C. 184 "file or cause or authorize to be filed" as necessarily requiring a license before an application is transmitted to a foreign country. Further, the proposed change is not intended to imply that every transmission within six months of U.S. filing without a license is prohibited under the existing regulations, such as where an application has been transmitted to a foreign agent without an authorization to file a foreign application. The proposed regulations are intended to change existing practice by requiring a license in all situations to transmit an application abroad. This change is proposed under the authority of 35 U.S.C. 6 to assure adequate protection of sensitive material under title 35 and to provide for consistency with the Arms Control Act and the Export Administration Act and their implementing regulations.

A revised § 5.11(b) is proposed which would state that applications under secrecy order under § 5.2 cannot be transmitted or filed in a foreign country except in accordance with § 5.5.

A revised § 5.11(c) is proposed which would state that a license pursuant to paragraph (a) is not required where the invention is not made in the United States, or the U.S. application was on file for six months withour a secrecy order being issued.

A new § 5.11(d) is proposed which would state that a license for foreign filing may be revoked at any time upon written notice.

Sections 5.1, 5.12(b), 5.13, 5.14, 5.15 and 5.17, as proposed are revised to conform to the § 5.11 requirement of a license for transmittal of an application to a foreign country.

Finally, §§ 5.12(b), 5.13, 5.14, 5.15, and 1.17, as proposed, also would refer to the new fees for these services.

Discussion of Specific Sections Proposed To Be Changed

Section 1.17(h) is proposed to be amended to include a specific reference to § 5.20 petitions for retroactive licenses for which the petition fee is charged, rather than having the present retroactive license fee under § 1.182 petitions. The fee for § 5.12(b) licenses is new and is for special handling of these license request.

Section 5.1, as proposed, would reflect the proposed § 5.11 license requirement for transmittal to a foreign country.

Section 5.11, as proposed, would require a license for transmitting an application to a foreign country for filing if the U.S. application has not been on file for at least six months prior to the date of transmittal, or no application has been filed in the United States. This will enable the Patent and Trademark Office to better exercise the export control functions set forth in §§ 5.18 and 5.19 established in accordance with 35 U.S.C. 184, the Arms Control Act of 1977 and the Export Administration Act of 1979, respectively.

Under these Acts, the export of technical data is the activity to be controlled. Proposed § 5.11(a) controls export activity by requiring a license for transmittal of technical data in connection with foreign filing of an application and to that extent implements the Arms Control Act and the Export Administration Act. If a license as required by proposed § 5.11 is obtained under §§ 5.12, 5.13 or 5.14, no license for the export of technical data to a foreign country in connection with a patent application is required under the Export Administration Act of 1979 or the Arms Control Act of 1977. It is emphasized that the scope of the license for transmittal of technical data is limited to transmitting an application for foreign filing and does not include selling or using the technical data in a foreign country. These latter acts continue to require separate licenses under the Export Administration Act and the Arms Control Act.

Also, the transmittal of technical data in any form to a foreign country for purposes other than filing or supporting the filing of a patent application or consideration whether a patent application should be filed is not controlled by title 35 United States Code or the exiting or proposed regulations in Part 5. The transmittal of data to a foreign country in such cases would be subject to other laws and regulations such as the export and arms control regulations.

Section 5.11(b), as proposed, states that an application cannot be transmitted to a foreign country when the corresponding United States application is under secrecy order except under § 5.5.

Section 5.11(c), as proposed, states that no license is required if the invention was not made in the United States, or the application was on file in the United States at least six months and is not under a secrecy order issued under § 5.2.

Section 5.11(d), as proposed, states that any license for foreign filing may be revoked at any time by written notification.

Section 5.12(b), as proposed, would refer to the license fee under proposed § 1.17(h).

Section 5.13, as proposed, would refer to the fee under proposed § 1.17(h) for a petition for license where no corresponding national or international application has been filed in the United States.

Section 5.14(a), as proposed, would indicate that petitions under this section require a fee as set forth in proposed § 1.17(h).

The other changes make grammatical corrections and would not alter the intent of the section.

Section 5.14(c), as proposed, would reflect the proposed § 5.11 license requirement for transmittal to a foreign country.

Section 5.15, as proposed, would change the scope of licenses granted under § 5.12(a). Paragraph (a) of § 5.15 defines the scope of licenses to be granted under § 5.12(a), the granting of which is indicated on the filing receipt. This license permits transmitting corresponding subject matter in the application to any foreign country for filing and any amendments, modifications, and supplements, including divisions, changes or supporting matter consisting of the illustration, exemplification or explanation of subject matter disclosed in the application. This includes new matter which does not change the general nature of subject matter disclosed and does not pertain to certain prohibited subjects or areas listed on various export restriction lists. These lists are established by the Department of State, the Department of Commerce, the Departmenmt of Energy, and various executive orders and statutes.

These changes also permit an applicant to take action in the prosecution of the foreign or international application and submit supporting data such as affidavits, test data or the like as long as it directly relates to the application and does not pertain to the prohibited subjects or areas enumerated in § 5.15(a).

New paragraph (b) of § 5.15, as proposed, would define the scope of a license granted under § 5.12(b) to be the same as a license granted under the provisions of present § 5.15. The existing prohibition against the filing of "subject matter additional to that covered by the license" is being continued. Accordingly, court interpretations of this language would still apply. Only the scope of a § 5.12(a) license would be different from foreign filing licenses which have been granted in the past. Subject matter listed in § 5.15(a)(1)–(a)(5) would require an additional license, regardless of which provision authorized the original license grant.

New paragraph (c) of § 5.15, as proposed, would define the scope of a license granted pursuant of § 5.13 to be of the same scope as a paragraph (a) license, if it is indicated on the license grant.

New paragraph (d) of § 5.15, as proposed, would provide for a reorganization of paragraphs with no significant change in substance.

New paragraph (e) of § 5.15, as proposed, would recite the situations in which a license would be required to file any amendment or other papers abroad. Amendments to applications under both types of licenses are covered. Any amendment to an application licensed under proposed § 512(a) requires a separate license only if it pertains to specifically identified areas or subjects. Any amendment to an application licensed under § 5.12(b) requires a separate license if the amendment discloses additional subject matter.

Paragraph (f) of § 5.15, as proposed, would set forth the licensing requirements for combining or dividing applications. If any of the applications have not been licensed under § 5.12(a), then any additional subject matter must be separately licensed. If all of the applications have been licensed under § 512(a), then only subject matter listed in paragraph 5.15 (a)(1)–(a)(5) need be separately licensed.

Paragraph (g) of § 5.15, as proposed, would include a reference to the section dealing with the requirements for a petition for a retroactive license.

Section 5.17, as proposed, would include the transmittal requirement of proposed § 5.11 in the use of a license.

Section 5.20, as proposed, is new and would set forth the requirements for seeking a retroactive license.

New § 5.20(a) requires identification of the subject matter which is to be licensed as in §§ 5.13 or 5.14. New § 5.20 (a)(1) and (a)(2) identify the specific proscribed transmittal for filing for which the license is made retroactive. New § 5.20(a)(3) provides for the specific showing of inadvertence. New § 5.20(a)(4) refers to the required fee. New § 5.20(b) provides for time periods to renew petitions that have been denied, and procedures to be followed after denial of a renewed petition.

Section 5.23, as proposed, would reflect the new organizational title.

Environmental, energy, and other considerations: The proposed rule

VOL
48
ISS
100
MAY
23
1983
UMI

change will not have a significant impact on the quality of the human environment or the conservation of energy resources.

The proposed rule change will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act. Pub. L. 96-354) for several reasons. Under this proposed rulemaking, small entities would be able to obtain licenses without filing separate requests therefor. In general, the rule change will also expedite proceedings before the Patent and Trademark Office, changing existing procedures where they can be simplified.

The Patent and Trademark Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increases in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This proposed rule change would not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3401 *et seq.*, since no additional recordkeeping or reporting requirements are placed on the public.

Proposed Amendment of Regulations

Notice is hereby given that, pursuant to the authority granted to the Commissioner of Patents and Trademarks by 35 U.S.C. 6, the Patent and Trademark Office proposes to amend Title 37 of the Code of Federal Regulations as set forth below.

It is proposed to amend 37 CFR, Parts 1 and 5 as follows, with deletions indicated by brackets and additions by arrows:

PART 1—[AMENDED]

1. Section 1.17 is proposed to be amended by revising paragraph (h) to read as follows:

§ 1.17 Patent application processing fees.

* * * * *

(h) For filing a petition to the Commissioner under a section of ►Part 1 or 5◄ [this part] listed below which refers to this paragraph, $120.00.

—§ 1.47—for filing by other than all the inventors or a person not the inventor
—§ 1.48—for correction of inventorship
—§ 1.182—for decision on questions not specifically provided for
—§ 1.183—to suspend the rules
—§ 1.288—for late filing of interference settlement agreement
►—§§ 5.13 and 5.14—for special handling of foreign filing license
—§ 5.20—for retroactive license◄

PART 5—[AMENDED]

2. Section 5.1 is proposed to be amended by revising paragraph (a) to read as follows:

§ 5.1 Defense inspection of certain applications.

(a) The provisions of this part shall apply to both national and international applications filed in the Patent and Trademark Office and, with respect to inventions made in the United States, to applications filed in any foreign country or any international authority other than the United States Receiving Office. The

(1) ►transmittal for◄ filing of a national or an international application in a foreign country or with an international authority other than the United States Receiving Office, or

(2) transmittal of an international application to a foreign agency or an international authority other than the United States Receiving Office is considered to be a foreign filing within the meaning of Chapter 17 of Title 35, United States Code.

* * * * *

3. The center heading preceding § 5.11 and § 5.11 are proposed to be amended by revising the center heading and paragraphs (a), (b), and (c), and adding new paragraph (d) to read as follows:

Licenses for Foreign ►Transmittal or◄ Filing

§ 5.11 License for ►transmitting◄ [filing] application ►on an invention made in the United States to a◄ [in] foreign country [or for transmitting international applications].

(a) [When no secrecy order has been issued under § 5.2, a] ►A◄ license from the Commissioner of Patents and Trademarks [under 35 U.S.C. 184] is required before [filing] any application for patent or for the registration of a utility model, industrial design, or model [, in a foreign country, or transmitting an international application to any foreign patent agency or any international agency other than the United States Receiving Office, or causing or authorizing such filing or transmittal, with respect to] ►on◄ an invention made in the United States ►can be transmitted to a foreign country (including an international agency in a foreign country) for filing if:

(1) An application on the invention has been on file in the United States less than six months prior to the date on which the application is to be transmitted, or

(2) No application on the invention has been field in the United States.

The license from the Commissioner of Patents and Trademarks referred to in this paragraph would be issued pursuant to, and meet the requirements of, 35 U.S.C. 184 and §§ 5.18 and 5.19 of this part. ◄[, if:

(1) The foreign application is to be filed or its filing caused or authorized before a national or international application for patent is filed in the United States, or

(2) The foreign application is to be filed, or its filing caused or authorized, or the transmittal of the international application is caused or authorized, prior to the expiration of six months from the filing of the application in the United States.]

(b) ►If a secrecy order has been issued under § 5.2, an application cannot be transmitted to, or filed in, a foreign country (including an international agency in a foreign country), except in accordance with §5.5.◄ [When there is no secrecy order in effect, a license under 35 U.S.C. 184 is not required if:

(1) The invention was not made in the United States, or

(2) The foreign application is to be filed or the international application is to be transmitted, or its filing or transmittal caused or authorized, after the expiration of six months from the filing of the national application in the United States.]

(c) ►No license pursuant to paragraph (a) of this section is required if:

(1) the invention was not made in the United States, or

(2) the United States application is not subject to a secrecy order under § 5.2, and was filed at least six months prior to the date on which the application is transmitted to a foreign country.◄ [When a secrecy order has been issued under § 5.2, an application cannot be filed in a foreign country, nor can an international application be transmitted to any agency other than the United States Receiving Office except in accordance with § 5.5.]

►(d) A license pursuant to paragraph (a) of this section can be revoked at any time upon written notification by the Patent and Trademark Office.◄

4. Section 5.12 is proposed to be amended by revising paragraph (b) to read as follows:

§ 5.12 Petition for license.

* * * * *

(b) Petitions for license under 35 U.S.C. 184 should be presented in letter form and [should] ►must◄ include ►any required fee,◄ petitioner's address, and full instructions for delivery of the requested license when it is to be delivered to other than the petitioner.

5. Section 5.13 is proposed to be revised to read as follows:

§ 5.13 Petition for license; no corresponding application.

►If◄ [Where there is] no corresponding national or international application ►has been filed in the United States◄ , the petition for license ►under § 5.12(b)◄ must be accompanied by ►any required fee (§ 1.17(h)) and◄ a legible copy of the material upon which ►a◄ license is desired. This copy will be retained as a measure of the license granted. For assistance in the identification of the subject matter of each license so issued, it is suggested that the petition or requesting letter be submitted in duplicate and provide a title and other description of the material. The duplicate copy of the petition will be returned with the license or other action on the petition. [Where an international application is being filed in the United States Receiving Office, the petition may accompany the international application.]

6. Section 5.14 is proposed to be amended by revising paragraphs (a) and (c) to read as follows:

§ 5.14 Petition for license; corresponding U.S. application.

(a) Where there is a corresponding United States application on file ►a◄ [the] petition for license ►under § 5.12(b) must include any required fee (§ 1.17(h)) and◄ must identify this application by serial number, filing date, inventor, and title, ►but◄ [and] a copy of the material upon which the license is desired is not required. The subject matter licensed will be measured by the disclosure of the United States application. Where the title is not descriptive, and the subject matter is clearly of no interest from a security standpoint, time may be saved by a short statement in the petition as to the nature of the invention.

* * * * *

(c) where the application to be [filed or] transmitted abroad ►for filing◄ contains matter not disclosed in the United States application or applications, including the case where the combining of two or more United States applications introduces subject matter not disclosed in any of them, a copy of the application as it is to be ►transmitted for filing◄ [filed] in the foreign country or international application ►as it◄ [which] is to be transmitted to a foreign international or national agency [as it is to be filed] ►for filing◄ in the Receiving Office must be furnished with the petition. If, however, all new matter in the foreign or international application to be ►transmitted◄ [filed] is readily identifiable, the new matter may be submitted in detail and the remainder by reference to the pertinent United States application or applications.

7. Section 5.15 is proposed to be amended by revising paragraph (a), redesignating paragraphs (b), and (c) as paragraphs (f) and (g) and revising new paragraphs(f) and (g) and adding new paragraphs (b), (c), (d), and (e) to read as follows:

§ 5.15 Scope of license.

(a) [A] ►Grant of a◄ license ►under § 5.12(a) authorizes the transmittal of◄ [to file] an application ►to◄ [in] a foreign country or [transmit] ►the transmittal of◄ an international application to any foreign ►patent agency◄ or international ►patent ◄agency [other that the United States Receiving Office, when granted.] ►where the subject matter of the foreign or international application corresponds to that of the domestic application. Further, this license◄ includes authority to forward all duplicate and formal papers to the foreign country or international agencies and to make amendments ►, modifications and supplements, including new matter which does not change the general nature of the subject matter disclosed, at the time of transmittal, or later, ◄and► to◄ take any action in the prosecution of the foreign or international application [.] ►unless the paper, modification, amendment, supplemnt of action involves subject matter pertaining to:

(1) Defense services or articles designated in the United States Munitions List applicable at the time of filing, the unlicensed exportation of which is prohibited pursuant to the Arms Export Control Act of 1977;

(2) Restricted Data, sensitive nuclear technology or technlogy useful in the production or utilization of special nuclear material or atomic energy, the dissemination of which is subject to restrictions of the Atomic Energy Act of 1954, as amended, and the Nuclear Non-Proliferation Act of 1978, as implemented by the Regulations for unclassified Activities in Foreign Atomic Energy Programs;

(3) Articles, materials and supplies, the export of which is prohibited or restricted pursuant to the Export Administration Act of 1979, as implemented by the Export Administration Regulatons;

(4) Information subject to classification in accordance with executive orders protecting national security information from disclosure; or

(5) Information, the dissemination, disclosure or exportation of which is restricted by a statute, regulation or executive order which amends or supersedes any of paragraphs (a)(1)–(4) of this section.◄ [Provided subject matter additional to that covered by the license is not involved. In those cases in which no license is required to file the foreign application or transmit the international application, no license is required to file papers in connection with the prosecution of the foreign or international application not involving the disclosure of additional subject matter. Any paper filed abroad or with an international agency following the filing of a foreign or international application which involves the disclosure of additional subject matter must be separately licensed in the same manner as a foreign or international application.]

►(b) Grant of a license under § 5.12(b) authorizes the transmittal of an application to a foreign country or the transmittal of an international application to any foreign patent agency or international patent agency. Further, this license includes authority to forward all duplicate and formal papers to the foreign patent agency or international patent agency and to make amendments, modifications or supplements to and take any action in the prosecution of the foreign or international application, provided subject matter additional to that covered by the license is not involved.

(c) Grant of a license under § 5.12(b) pursuant to § 5.13 shall have the same scope of a license granted in paragraph (a) of this section, if it is so specified in the license.

VOL
48
ISS
100
MAY
23
1983
UMI

(d) In those cases in which no license is required to transmit the foreign application or the international application, no license is required to transmit papers in connection with the prosecution of the foreign or international application not involving the disclosure of additional subject matter.

(e) Any paper transmitted abroad or to an international patent agency following the transmittal of a foreign or international application which involves the disclosure of subject matter listed in paragraphs (a)(1)–(a)(5) of this section must be separately licensed in the same manner as a foreign or international application. Further, if no license has been granted under § 5.12(a) on filing the corresponding United States application, any paper filed abroad or with an international patent agency which involves the disclosure of additional subject matter must be licensed in the same manner as a foreign or international application.◄

►(f)◄ [(b)] Licenses separately granted in connection with two or more United States applications may be exercised by combining or dividing the disclosures, as desired, provided►:

(1) Subject matter listed in paragraph (a)(1)–(a)(5) of this section is not introduced and,

(2) In the case where at least one of the licenses was obtained under § 5.12(b),◄ additional subject matter is not introduced.

►◄ [(c)] A license does not apply to acts done before the license was granted unless the petition specifically requests and describes the particular acts and the license is worded to apply to such acts.►See § 5.20.◄

8. Section 5.17 is proposed to be revised to read as follows:

§ 5.17 Who may use license.

Licenses may be used by anyone interested in the ►transmitting for◄ foreign filing or international transmittal for or on behalf of the inventor or the inventor's assigns.

9. A new § 5.20 is proposed to be added to read as follows:

►§ 5.20 Petition for retroactive license.

(a) A petition for retroactive license under 35 U.S.C. 184 shall be presented in accordance with § 5.13 or § 5.14, and shall include:

(1) A listing of the foreign countries to which the patent application material was transmitted,

(2) The dates on which the material was transmitted,

(3) A verified statement containing:

(i) An averment that the subject matter in question was not under a secrecy order at the time it was transmitted and filed abroad, and that is is not currently under a secrecy order,

(ii) A showing that the license has been diligently sought after discovery of the proscribed transmittal and foreign filing, and

(iii) An explanation of why the material was inadvertently transmitted and filed broad without the required license under § 5.11 first having been obtained, and

(4) The required fee (§ 1.17(h)).

The above explanation must include a showing of facts from which a conclusion of inadvertence may be drawn rather than a mere allegation of inadvertence. The showing of facts should include statements by those persons having personal knowledge of the acts regarding transmitting and filing in a foreign country and should be accompanied by copies of any necessary supporting documents such as letters of transmittal or instructions for filing. The acts which are alleged to constitute inadvertence should cover the period from the time of transmission until actual filing of the petition under this section.

(b) If a petition for a retroactive license is denied, a time period of not less than thirty days shall be set, during which the petition may be renewed. Failure to renew the petition within the set time period will result in a final denial of the petition. If a renewed petition is denied, the denial is final unless recourse be had under § 1.181 within two months of the date of the denial. If the petition for a retroactive license is denied with respect to the invention of a pending application and no petition under § 1.181 has been filed, a final rejection of the application under 35 U.S.C. 185 will be made.◄

10. Section 5.23 is proposed to be revised to read as follows:

§ 5.23 Correspondence.

All correspondence in connection with this part, including petitions, should be addressed to "Commissioner of Patents and Trademarks (Attention ►Licensing and Review◄ [Patent Security Division]), Washington, D.C. 20231."

Dated: May 18, 1983.

Gerald J. Mossinghoff,

Commissioner of Patents and Trademarks.

DEPARTMENT OF EDUCATION

34 CFR Part 668

Student Assistance General Provisions

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes a new definition of an independent student. Over the past several years, as the definition of an independent student has been liberalized, the number of independent students has increased. This increase has raised a question of equity in the distribution of funds. The new proposed definition of an independent student includes a more stringent definition for some students. It is intended that the new definition will result in a reemphasis of the traditional premise of student aid that the student and/or his or her parents have the main responsibility for financing the cost of postsecondary education.

DATE: Comments must be received on or before July 7, 1983.

ADDRESS: Comments should be addressed to Mr. Brian Kerrigan, Basic Grant Policy Section, Office of Student Financial Assistance, U.S. Department of Education, Room 4318, Regional Office Building 3, 400 Maryland Avenue, SW., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: David Morgan or Deborah Cohen, (202) 472–4300.

SUPPLEMENTARY INFORMATION: In the 1976–77 award year, when half-time students became eligible to participate in the Pell Grant Program, 38 percent of the eligible Pell Grant applicants filed as independent students. Since then, the percentage of eligible independent applicants has steadily increased, with 1981–82 estimates indicating that independent students will comprise 42–46 percent of the eligible Pell Grant applicant pool. A similar trend exists in the other aid programs. In addition, there is concern about both the legitimacy and ramifications of many claims of independency.

The Department of Education published a comprehensive analysis of the independent student issue in the December, 1981 *OSFA Bulletin*, and requested comments from the financial aid community. That analysis elicited a wide range of suggestions from members of the community, and almost all of them requested a more stringent definition. From those suggestions three concepts were frequently repeated:

1. The use of age as a criterion for determining automatic dependency. Those suggestions focused on a specific age or on the use of four years of elapsed time after high school graduation. Advocates of automatic dependency expressed a concern for an equitable distribution of a limited amount of funds. Parents who are able to contribute to a student's education are expected to contribute at least until the student reaches the age of twenty-two.

2. An emphasis on using prior year data to determine dependency, rather than estimated information. Many commenters suggested extending the current criteria to one or two years before the base year. (The base year for the 1984–85 award year would be 1983.)

3. A distinction between undergraduate and graduate students. Many commenters thought that parents should not be automatically responsible for financing the student's cost for graduate study merely becaue they supported the student as an undergraduate. Such a presumption of dependency is often made when there is an emphasis on data from prior years.

The Secretary has incorporated many of these concepts in his proposal to change the definition of the independent student. Under this proposal, for award year 1984–85, a non-veteran, unmarried student who does not have any dependents of his or her own would be deemed to be dependent if he or she is not at least twenty-two years old on December 31, 1983, and the student received or will receive more than $750 from the parents, was claimed or will be claimed as a dependent for Federal income tax purposes by the parent(s), or lived or will live for more than six weeks in the home of the parent(s) in any of the three calendar years before, or the first calendar year of, the award year. A non-veteran, unmarried student who is at least 22, or who has dependents, would be dependent if any of the above three criteria affirmatively apply to him or her during either the most recent calendar year before, or the first calendar year of, the award year. As in award years 1982–83 and 1983–84, a married student will be considered dependent if any of the three criteria affirmatively apply to him or her for the first calendar year of an award year only. This rule for married students will also apply to students who are veterans. For the 1984–85 award year, the first calendar year of an award year will be 1984. As in the past, if a student is a ward of the court or both the parents of the student are deceased, the student would automatically be independent.

The extension of the three traditional criteria to prior years has been favored by many members of the finanical aid community, including the National Association of Student Financial Aid Administrators. This extension also emphasizes the traditional focus of the parental duty of providing for the student's postsecondary education. The state of California currently applies these three dependency criteria to four calendar years for most students under the age of 30 who apply for state-sponsored financial aid programs. However, the California model does not make explicit exceptions for married students or students with dependents.

The Secretary has agreed to the suggestion of many commenters that his extension to prior years should be phased in gradually. The Secretary is phasing in the new definition for these students so that he will not have to go beyond 1982 in determining independence. This assures that a student who begins post-secondary education in award year 1983–84 will not have his or her independent student status changed as a result of events transpiring before 1982.

The current criteria for determining dependency are retained for those students above the age of twenty-two. This separate criteria for students above the age of 22 is proposed because of the widely held view that, while parents should at least finance their children's undergraduate education, they should not be expected continually to pay for their children's schooling. The age of 22 was chosen because most students complete their undergraduate education at this age. Most students are not eighteen years old before the calendar year they graduate from high school. In most cases, a student is expected to complete his or her undergraduate education in four years, therefore, a student who is 22 before the first calendar year of an award year is likely to have completed his or her undergraduate studies. In those instances where the parents help the student through his or her undergraduate studies, a student might retain his or her dependency status for one year beyond the undergraduate level since the dependency criteria apply to the base year and the first calendar year of the award year. However, inclusion of the current dependency criteria for several years prior to the base year would cause a student to retain his or her dependency status *well beyond* the undergraduate level.

The extension of the dependency criteria to prior years does not apply to married students because of the statutory mandate found in section 482(c)(1)(E) of the Higher Education Act of 1965, as amended. That section calls for a determination of a married student's independent status based on the student's relationship with his or her parents in the year of application. For reasons of form design and ease of application, the term "the year of application" has been equated with the term "the first calendar year of the award year." Further, since students with dependents are more often financially independent, regardless of age, compared to unmarried students with no dependents, the same exemption from the age requirement that applies to married students is proposed to apply to students with dependents.

The proposal with regard to veterans is made in cooperation with the Department of Defense and reflects the special circumstances of a veteran. A person who has served in the military has almost always established a history of economic independence from his family for a period of several years, including living away from the parental home. However, the special circumstances of military service (e.g., tours of duty outside of the country) often result in a tendency for the veteran to return home for a brief period to renew family ties once he or she is discharged from the armed services. This situation is not adequately taken into account when the current dependency criteria are applied. Since the veteran would ordinarily have established his independence while in the military, the Secretary believes it would be appropriate to ignore the relationship with his or her parents during a transitional period in determining his independent student status. Thus, in determining whether a veteran is an independent student, the definition proposes to disregard whether the veteran resided with his or her parents or received financial support from them during a one year period immediately following the veteran's date of discharge from active duty.

The definition of an "award year" as the period of time between July 1 of one calendar year and June 30 of the following calendar year already exists in the Pell Grant and campus-based regulations. It is repeated here as a component of the "independent student" definition because it does not currently exist either in the regulations for, or the administration of, the Guaranteed Student Loan or the PLUS program. The term is needed in the proposed "independent student" definition since one of the dependency criteria applies to students who are twenty-two years old before the first calendar year of an award year. Thus, for the 1984–85 award year, the age criterion would apply to students who were twenty-two before January 1, 1984, i.e., by December 31, 1983.

The proposed regulation refers to dependents as defined in 34 CFR 690.42. Section 690.42, *"Special definitions,* is taken from the proposed 1984–85 Pell Grant Family Contribution Schedule. Currently, the Secretary is proposing alternative regulations for determining the expected family contributions for the 1984–85 award year under the Pell Grant Program.

The proposed definitions of "dependent of the student" as written in § 690.42 under Alternatives A and B are listed below:

Alternative A

A "dependent of the student" means, the student's spouse, and other persons who have been claimed on the 1983 Federal income tax return as a dependent by the student and student's spouse. If the student has not filed a 1983 Federal tax return at the time of application, "dependent of the student" means the student's spouse and other persons who were eligible to be claimed in 1983 by the student and the student's spouse under the Internal Revenue Code of 1954.

Alternative B

A "dependent of the student" means—

(a) The student's spouse (unless separated or divorced from the student).

(b) Any of the student's or spouse's children who are deemed to be dependent students (with respect to the student or spouse) when filing for title IV aid.

(c) Other dependent children of the student or spouse, and

(d) Other persons who live with and receive more than one-half of their support from the student or spouse and will continue to receive more than half of their support from the student or spouse for the 1984–85 award year.

The Secretary will include in the final regulation for the 1984–85 Family Contribution Schedule, a definition based on one of these alternatives. That final definition in 34 CFR 690.42 will be the one referred to in the final independent student regulation, which will apply to all student financial assistance programs (except for the State Student Incentive Grant Program), authorized by title IV of the Higher Education Act of 1965, as amended.

Executive Order 12291: These proposed regulations have been reviewed in accordance with Executive Order 12291. They are classified as non-major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. These regulations revise the definition of an independent student for the title IV student financial aid programs. The definition is used in determining a student's eligibility for financial assistance. The regulations will not have an impact on small entities.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations Written comments and recommendations may be sent to the address given at the beginning of this document. All comments submitted on or before the 45th day after publication of this document will be considered before the Secretary issues final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 4318, ROB–3, 7th and D Streets, SW., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

List of Subjects in 34 CFR Part 668

Administrative practice and procedure, Colleges and universities, Consumer protection, Education, Loan programs.education, Grant programs—education, Student aid.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

1983
UMI

PART 668—STUDENT ASSISTANCE GENERAL PROVISIONS

Subpart A—General 8

Sec.

* * * * *

668.1a Independent Student.

* * * * *

2. A new § 668.1a is added to read as follows:

* * * * *

§ 668.1a Independent Student

(a) An independent student is—

(1) An unmarried student who is not a veteran, and who is not 22 years old before the first calender year of an award year, and who does not have dependents as defined in 34 CFR 690.42, who during the three calender years immediately before, and the first calender year of, an award year—

(i) Has not lived and will not live for more than six weeks in any of those years in the home of the parent(s) for whom income must be reported according to 34 CFR 690.33;

(ii) Has not been claimed and will not be claimed as a dependent for Federal income tax purposes by the parent(s) for whom income must be reported according to 34 CFR 690.33; and

(iii) Has not received and will not receive financial assistance of more than $750 in any of those years from the parent(s) for whom income must be reported according to 34 CFR 690.33;

(2) An unmarried student who is not a veteran, and who is 22 years old before the first calendar year of an award year, or who is not 22 years old, but has dependents as defined in 34 CFR 690.42, who during the most recent calendar year before, and the first calendar year of, an award year—

(i) Has not lived and will not live for more than six weeks in the home of the parent(s) for whom income must be reported according to 34 CFR 690.33;

(ii) Has not been claimed and will not be claimed as a dependent for Federal income tax purposes by the parent(s) for whom income must be reported according to 34 CFR 690.33; and

(iii) Has not received and will not receive financial assistance of more than $750 from the parent(s) for whom income must be reported according to 34 CFR 690.33; or

(3) A married student or a veteran who, for the first calendar year of an award year—

(i) Has not lived and will not live for more than six weeks in the home of the parent(s) for whom income must be reported according to 34 CFR 690.33;

(ii) Has not been claimed and will not be claimed as a dependent for Federal income tax purposes by the parent(s) for whom income must be reported according to 34 CFR 690.33; and

(iii) Has not received and will not receive financial assistance of more than $750 from the parent(s) for whom income must be reported according to 34 CFR 690.33.

(b) However, if both parents have died, or the student has been declared a ward of the court, the student is independent.

(c) Under paragraph (a)(3) of this section, in determining whether a veteran is an independent student, disregard whether the veteran resided with his parents or received financial assistance from them during a one year period immediately following the date the veteran was discharged from active duty from the Armed Services.

(d) An award year is the period of time between July 1 of one calendar year and June 30 of the following calendar year.

(e) A veteran is a person who served on active duty for more than 365 consecutive days in the U.S. Armed Forces and was discharged or released with an honorable discharge.

(f) Paragraph (a)(1) of this section will not become effective until the 1985–86 award year. In 1984–85 an unmarried student who is not a veteran, and is not 22 years old before January 1, 1984, and who does not have dependents as defined in 34 CFR 690.42 is independent if for 1982, 1983, and 1984, he or she—

(1) Has not lived and will not live for more than six weeks in any of those years in the home of the parent(s) for whom income must be reported according to 34 CFR 690.33;

(2) Has not been claimed and will not be claimed as a dependent for Federal income tax purposes by the parent(s) for whom income must be reported according to 34 CFR 690.33; and

(3) Has not received and will not receive financial assistance of more than $750 in any of those years from the parent(s) for whom income must be reported according to 34 CFR 690.33.

Department of Commerce

Economic Development Administration

Standards for Designation of Redevelopment Areas Under Section 401(a) of the Act; Interim Rule and Public Works and Development Facilities Program; Interim Rule

VOL 48 ISS 100 MY 23 1983 UMI

DEPARTMENT OF COMMERCE

Economic Development Administration

13 CFR Part 302

Standards for Designation of Redevelopment Areas Under Section 401(a) of the Act

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: Interm rule.

SUMMARY: This rule amends EDA's Designation of Areas regulation to modify the meaning of "substantial unemployment". This term is now defined as an annual average rate of unemployment equal to or above the national average rate of unemployment during the most recent quarter for which appropriate data is available, instead of as a fixed rate of unemployment. The amendment will not apply to projects authorized prior to May 23, 1983.

DATES: Effective date: May 23, 1983.
Comments by: July 22, 1983.

ADDRESS: Send comments to the Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Walter Archibald, Director, Office of Compliance Review, U.S. Department of Commerce, Economic Development Administration, Room 7325, Washington, D.C. 20230, (202) 377–2710.

SUPPLEMENTARY INFORMATION: EDA is amending its Designation of Areas regulation at 13 CFR Part 302, Subpart A—Standards for Designation of Redevelopment Areas Under Section 401(a) of the Act. The regulation to be amended states one of the conditions which if met enables an area to be designated as a Public Works Impact Area. The amendment defines "substantial unemployment" as an annual average unemployment rate equal to or above the national average unemployment rate during the most recent quarter for which appropriate data is available. This change will assure designation of areas where unemployment is highest.

Because this rule relates to EDA's public works program, it is exempt from the notice and comment procedures described in Section 553 of the Administrative Procedure Act (5 U.S.C. 553). However, while the rule will become effective upon publication in interim form, the public will be given an opportunity to comment before it is published in final form.

In accordance with Section 3(c)(3) of Executive Order No. 12291, this rulemaking has been submitted to the Director of the Office of Management and Budget. Since this is a "major rule," a Regulatory Impact Analysis is required.

In accordance with section 8(a)(1) of Executive Order 12291, "Federal Regulation" this regulation is exempt from the procedures precribed by such Order because it responds to an emergency situation. The emergency situation to which this regulation responds is the implementation of Pub. L. 98–8 (97 Stat. 13), the Emergency Jobs Act. Public Law 98–8, enacted on March 24, 1983, is intended to "provide productive employment for hundreds of thousands of jobless Americans". Sections 101 (e) and (f) of Pub. L. 98–8 (97 Stat. 32) provide:

(e) Notwithstanding any other provision of law, the head of each Federal agency to which appropriations are made under this title, with respect to project grants or project contracts in this section, shall expedite final approval of projects * * *. Nothing required by this section shall impede the rapid expenditure of funds under this section.

(f) Notwithstanding any other provisions of law, any agency rulemaking proceeding conducted in order to implement the provisions of this title shall be conducted expeditiously, and in no case shall an agency hearing on the record be required.

The amendment to 13 CFR 302.7, "Designation of public works impact program areas," in concert with an amendment to 13 CFR 305.5, "Supplementary grant rates", will promote the purposes of the Emergency Jobs Act by ensuring a fairer distribution of the limited funds available to EDA under that Act and by ensuring that projects located in areas of relatively greater economic distress, as indicated by unemployment rates, receive a proportionately greater share of Federal funding.

In addition, there are no reporting or recordkeeping requirements under the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

It has been determined by the General Counsel of the Department of Commerce that this rulemaking will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 13 CFR Part 302

Community development.

Accordingly, EDA revises 13 CFR 302.7(a)(3) as follows:

PART 302—DESIGNATION OF AREAS

§ 302.7 Designation of public works impact program areas.

(a) The Assistant Secretary shall designate communities or neighborhoods defined without regard to political or other subdivisions or boundaries when he determines one of the following conditions has been met.

* * * * *

(3) Substantial unemployment as established by an annual average unemployment rate equal to or more than the national average unemployment rate during the most recent quarter for which appropriate data is available. Notwithstanding, the minimum substantial unemployment rate for designation under this section is fixed at 8.5 percent. This definition of substantial unemployment does not apply to projects authorized prior to May 23, 1983.

* * * * *

(Sec. 701, Pub. L. 89–136, 79 Stat. 570) (42 U.S.C. 3211). Sec. 1–105, E.O. 12185, DOC Organization Order 10–4, as amended (40 FR 56702, as amended)

Dated: May 13, 1983.

Carlos C. Campbell,

Assistant Secretary for Economic Development.

[FR Doc. 83–13953 Filed 5–20–83; 10:33 am]

BILLING CODE 3510–24–M

13 CFR Part 305

Public Works and Development Facilities Program

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: Interim rule.

SUMMARY: This rule amends EDA's Public Works and Development Facilities Program regulations. The amendment to 13 CFR 305.5(b)(iv) changes requirements for supplementary grant rates for Public Works Impact Program (PWIP) projects so that such rates will be determined on a graduated basis. This change will not apply to projects authorized prior to May 23, 1983. The amendment to 13 CFR 305.5(e) provides for retention of the highest applicable maximum grant rate in effect between the time of authorization by the Assistant Secretary—the Regional Directors no longer authorize projects—and the time of project approval.

DATES: Effective date: May 23, 1983.
Comments by July 22, 1983.

ADDRESS: Send comments to the Assistant Secretary for Economic Development, U.S. Department of Commerce, Room 7800B, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Walter Archibald, Director, Office of Compliance Review, U.S. Department of Commerce, Economic Development Administration, Room 7019, Washington, D.C. 20230, (202) 377–2710.

SUPPLEMENTARY INFORMATION: EDA is amending its Public Works and Development Facilities Program regulation at 13 CFR Part 305, Subpart A—*Direct and Supplementary Grants for Public Works and Development Facilities.* The regulation to be amended at 13 CFR 305.5(b)(iv) provides for a maximum grant rate of 80 percent for Public Works Impact Program (PWIP) projects in areas designated under Section 401(a)(6) (42 U.S.C. 3161(a)(6)) of the Public Works and Economic Development Act of 1965, as amended which cannot meet the requirements for a 100 percent maximum grant rate under 13 CFR 305.5(b)(3)(ii). The amendment will assure that grant rates for projects authorized on or after May 23, 1983, will be determined on a graduated basis. This change will assure equitable treatment for PWIP grantees. The regulation to be amended at 13 CFR 305.5(e) states that projects are authorized by the Assistant Secretary—not the Regional Directors. Maximum applicable grant rates for the period from project authorization to project approval, are to be applied.

Because this rule relates to EDA's public works program, it is exempt from the notice and comment procedures described in Section 553 of the Administrative Procedure Act (5 U.S.C. 553).

In accordance with Section 3(c)(3) of Executive Order No. 12291, this rulemaking has been submitted to the Director of the Office of Management and Budget. Since this is a "major rule," a Regulatory Impact Analysis is required.

In accordance with section 8(a)(1) of Executive Order 12291, "Federal Regulation" this regulation is exempt from the procedures prescribed by such Order because it responds to an emergency situation. The emergency situation to which this regulation responds is the implementation of Pub. L. 98–8 (97 Stat. 13), the Emergency Jobs Act. Pub. L. 98–8, enacted on March 24, 1983, is intended to "provide productive employment for hundreds of thousands of jobless Americans". Sections 101(e) and (f) of Pub. L. 98–8 (97 Stat. 32) provide:

(e) Notwithstanding any other provision of law, the head of each Federal agency to which appropriations are made under this title, with respect to project grants or project contracts in this section, shall expedite final approval of projects * * *. Nothing required by this section shall impede the rapid expenditure of funds under this section.

(f) Notwithstanding any other provisions of law, any agency rulemaking proceeding conducted in order to implement the provisions of this title shall be conducted expeditiously, and in no case shall an agency hearing on the record be required.

The amendment to 13 CFR 305.5, "Supplementary grant rates", in concert with an amendment to 13 CFR 302.7, "Designation of public works impact program areas," will promote the purposes of the Emergency Jobs Act by ensuring a fairer distribution of the limited funds available to EDA under that Act and by ensuring that projects located in areas of relatively greater economic distress, as indicated by unemployment rates, receive a proportionately greater share of Federal funding.

In addition, there are no reporting or recordkeeping requirements under the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

It has been determined by the General Counsel of the Department of Commerce that this rulemaking will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 13 CFR Part 305

Community development, Community facilities, Grant programs—community development, Indians, Loan programs—community development.

Accordingly, EDA revises 13 CFR 305.5 (b)(3)(iv) and (e) as follows:

PART 305—PUBLIC WORKS AND DEVELOPMENT FACILITIES PROGRAM

§ 305.5 Supplementary grant rates.

* * * * *

(b) In determining the amount of supplementary grant assistance, the Assistant Secretary will take into consideration the following factors:

* * * * *

(3) The maximum grant rate of funds granted under authority of title I of the Act for projects in designated areas, determined by relative needs, is as follows:

* * * * *

(iv) Projects located in redevelopment areas designated under section 401(a)(6) of the act but which cannot meet the requirement of paragraph (b)(3)(ii) of this section will be:

(A) The annual average unemployment rate for the preceding 12 months is 12 percent or higher,

(B) The annual average unemployment rate for the preceding 12 months is 10.5 percent to 11.9 percent,

(C) The annual average unemployment rate for the preceding 12 months is 9 percent to 10.4 percent,

(D) The annual average unemployment rate for the preceding 12 months is less than 9 percent,

This amendment will not affect projects authorized prior to May 23, 1983.

* * * * *

(e) Notwithstanding paragraphs (c) and (d) of this section an applicant shall be eligible for the highest applicable maximum grant rate in effect between the time the Assistant Secretary authorizes the application and the time the project is approved.

Authority: (Sec. 701, Pub. L. 89–136, 79 Stat. 570) (42 U.S.C. 3211). Sec. 1–105, E.O. 12185, DOC Organization Order 10–4, as amended (40 FR 56702, as amended)

Dated: May 13, 1983.

Carlos C. Campbell,

Assistant Secretary for Economic Development.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Last Listing May 18, 1983

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (phone 202–275–3030).

S.J. Res. 51 / Pub. L. 98–30 Designating May 21, 1983, as "Andrei Sakharov Day". (May 18, 1983; 97 Stat. 190) Price $1.75.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 101
Tuesday, May 24, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Parts 212 and 214

Documentary Requirements for Nonimmigrants; Admission of Certain Inadmissible Aliens; Foreign Medical Graduates in Exchange Programs

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule makes a technical amendment in reference to the name change of the "International Communiction Agency" to "United States Information Agency". The rule also requires exchange aliens participating in graduate medical education and training programs to file annual affidavits attesting to their standing in the programs and certifying that they will leave the United States upon completion of their education and training. A new form which includes the affidavit must be submitted to the Service annually and must accompany all extension of stay applications filed by these exchange aliens.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: For General Information: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 I Street, N.W., Washington, D.C. 20536, Telephone: (202) 633–3048. For Specific Information: Ron Lindquist, Immigration Examiner, 425 I Street, N.W., Washington, D.C. 20536, Telephone: (202) 633–5014.

SUPPLEMENTARY INFORMATION: This rule changes the name "International Communication Agency" to "United States Information Agency" in paragraphs (c)(2), (c)(9), and (c)(10) of 8 CFR 212.7. The name of the agency was changed by Executive Order 12388 of October 14, 1982.

Additionally, paragraph (j) of 8 CFR 214.2 is revised to provide that an alien in the exchange visitor program who is participating in graduate medical education or training (nonimmigrant admitted temporarily to the United States as defined in section 101(a)(15)(J) of the Immigration and Nationality Act) is required to submit an affidavit to the Service each year attesting to his good standing in the program and that he will return to the country of his nationality or last residence upon completion of the program. This affidavit requirement was added to section 212 (j)(1)(E) of the Immigration and Nationality Act by Pub. L. 97–116, section 5, 95 Stat. 1612, (8 U.S.C. 1182(j)(1)(E)), effective December 29, 1981. The Service has developed Form I–644, Supplementary Statement for Medical Graduate Trainees, which form, containing the affidavit, is required to be filed yearly and also must accompany all requests for extensions of stay in the United States.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary because the agency name change is a technical correction and the amendment requiring the filing of affidavits by nonimmigrant exchange visitors participating in graduate medical training is mandated by statute.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule will not have a significant economic impact on a substantial number of small entities.

This order is not a major rule within the definition of section 1(b) of E.O. 12291.

List of Subjects

8 CFR Part 212

Administrative practice and procedure, Aliens.

8 CFR Part 214

Administative practice and procedure, Aliens Health professions.

Accordingly, Title 8, Chapter I is amended as follows:

PART 212—DOCUMENTARY REQUIREMENTS: NONIMMIGRANT; WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

§ 212.7 [Amended]

1. In § 212.7, paragraphs (c)(2), (c)(9), and (c)(10) are amended by removing the words "International Communication Agency" and inserting, in their place, the words "United States Information Agency."

PART 214—ADMISSION OF NONIMMIGRANTS

2. In § 214.2, paragraph (j) is revised to read as follows:

§ 214.2 Special requirements for admission, extension, and maintenance of status.

* * * * *

(j) *Exchange aliens*—(1) *General.*—(i) "Exchange alien" means a nonimmigrant admitted under section 101(a)(15) (J) of the Act or who acquired such status, or who acquired exchange-visitor status under the United States Information and Education Exchange Act. Any exchange alien coming to the United States as a participant in a program designated under section 101(a)(15)(J) of the Act and accompanying spouse and minor children shall not be admitted without submitting a completely executed Form IAP–66. The spouse and minor children following to join the participant shall not be admitted without a copy of current Form IAP–66 endorsed by the program sponsor indicating the expiration of stay date as shown on Form I–94. Any alien seeking to change nonimmigrant status to exchange visitor status shall file Form I–506 and attach a valid Form IAP–66.

(ii) *Extensions of stay.* The initial admission and extensions of stay of an exchange aliens, spouse, and minor children may be authoried in increments of not more than 12 months, limited to the period specified on Form IAP–66. Exchange aliens shall apply for extensions of stay on current Form IAP–66. Extensions of stay for spouse and children require, as an attachment to Form IAP–66, forms I–94 and names of the applicants, dates and places of birth, passport numbers, issuing countries, and

VOL
48
ISS
101
MAY
24
1983
UMI

expiration dates. Form IAP–66 presented by an exchange alien returning from a temporary absence may be retained for re-entries during the balance of the alien's stay.

(ii) *Readmission.* Any nonimmigrant alien, whose visa is revalidated under 22 CFR 41.125(f)(2) or who is within the purview of that regulation except that the alien's visa has not expired, returning as a nonimmigrant as defined by section 101(a)(15)(J) of the Act shall, if otherwise admissible, be readmitted without Form IAP–66 for the remainder of the initial admission or current extension of stay as shown on the alien's Form I–94.

(iv) *Extension of stay for spouse or child.* When granting an extension of stay, a spouse or child shall be classified under section 101(a)(15)(J) unless the extension of stay is for a purpose other than to accompany the participant. An accompanying spouse or child shall not be granted an extension of stay unless the participant has been granted an extension of stay.

(v) *Employment.* The accompanying spouse and minor children of a participant may accept employment for support (including, but not limited to, customary recreational and cultural activities and related travel) of the accompanying nonparticipating spouse and minor children in the United States if authorized by the Service. Employment shall not be authorized if this income is needed to support the participant. Application to accept employment must be made to the district director having jurisdiction over the place where the participant is residing temporarily. The application for employment does not have to be in writing.

(2) *Special Reporting Requirement.* Each exchange alien participating in a program of graduate medical education or training shall file Form I–644 (Supplementary Statement for Graduate Medical Trainees) annually with the Service attesting to the conditions as specified on the form. The exchange alien shall also submit Form I–644 as an attachment to a completed Form IAP–66 when applying for an extension of stay.

(3) *Alien in Cancelled Programs.* When the approval of an exchange visitor program is withdrawn by the Director of the United States Information Agency, the district director shall send a notice of the withdrawal to each participant in the program and a copy of each such notice shall be sent to the program sponsor. If the exchange visitor is currently engaged in activities authorized by the cancelled program, the participant is authorized to remain in the United States to engage in those activities until expiration of the period of stay previously authorized. The district director shall notify participants in cancelled programs that permission to remain in the United States as an exchange visitor, or extension of stay may be obtained if the participant is accepted in another approved program and a Form IAP–66, executed by the new program sponsor, is submitted. In this case, a release from the sponsor of the cancelled program will not be required

(4) *Eligibility requirements for section 101(a)(15)(J) classification for aliens desiring to participate in programs under which they will receive graduate medical education or training.*—(i) *Requirements.* Any alien coming to the United States as an exchange visitor to participate in a program under which the alien will receive graduate medical education or training, or any alien seeking to change nonimmigrant status to that of an exchange visitor on Form I–506 for that purpose, must have passed parts of I and II of the National Board of Medical Examiners Examination (or an equivalent examination as determined by the Secretary of Health and Human Services), and must be competent in oral and written English, and shall submit a completely executed and valid Form IAP–66.

(ii) *Exemptions.* From January 10, 1978 until December 31, 1983, any alien who has come to or seeks to come to the United States as an exchange visitor to participate in an accredited program of graduate medical education or training, or any alien who seeks to change nonimmigrant status for that purpose, may be admitted to participate in such program without regard to the requirements stated in subparagraphs (A) and (B)(ii)(I) of section 212(j)(1) of the Act if a substantial disruption in the health services provided by such program would result from not permitting the alien to participate in the program: *Provided* that the exemption will not increase the total number of aliens then participating in such programs to a level greater than that participating on January 10, 1978.

* * * * *

(Secs. 212 and 214 of the Immigration and Nationality Act, as amended; 8 U.S.C. 1181 and 1184)

Dated: May 6, 1983.

BILLING CODE 1505-01-M

DEPARTMENT OF ENERGY

Office of the Secretary

10 CFR Part 961

Standard Contract for Disposal of Spent Nuclear Fuel and/or High Level Radioactive Waste

AGENCY: Department of Energy.

ACTION: Final rule; correction.

SUMMARY: On April 18, 1983 the Department of Energy (DOE) published its final rule entitled, "Standard Contract for Disposal of Spent Nuclear Fuel and/or High-Level Radioactive Waste" (48 FR 16590). This notice corrects the definition of "kilowatt hours generated" in the said final rule (48 FR 16600), which inadvertently omitted a phrase from DOE's proposed rule published on February 4, 1983 (48 FR 5458). It also deletes superfluous words inadvertently repeated in Article IV.A.1(a) of the said final rule (48 FR 16601). Additionally, a reference omitted from § 961.11 is inserted.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: W. Michael Kurgan, Deputy Director, Office of Business, Operations and Financial Management, Nuclear Waste Policy Act Project Office, Department of Energy, Room 7B–084, Washington, D.C. 20585, (202) 252–6842.

Issued in Washington, D.C., May 16, 1983.

Hilary J. Rauch,

Director, Procurement & Assistance Management Directorate.

PART 961—[AMENDED]

§ 961.11 [Corrected]

Accordingly, 10 CFR 961.11 is corrected as follows:

1. Immediately following § 961.11, "Text of the contract," "(Approved by the Office of Management and Budget under control number 1091–0260)"

2. Article I, paragraph 13 (48 FR 16600) is corrected to read as follows:

13. The term 'kilowatt hours generated' means electricity generated by nuclear fuel at a civilian nuclear power reactor specified in Appendix A hereto as measured at the output terminals of the turbine generator, including an equivalent amount of electricity for any process heat generated by the reactor and used other than at the reactor.

3. Article IV.A.1(a) (48 FR 16601) is corrected so that the first sentence thereof shall read as follows:

(a) On an annual basis, commencing October 1, 1983, the Purchaser shall provide DOE with information on actual discharges to date and projected discharges for the next ten (10) years in the form and content set forth in Appendix B, annexed hereto and made a part hereof. * * *

[FR Doc. 83-13820 Filed 5-23-83; 8:45 am]

BILLING CODE 6450-01-M

FEDERAL RESERVE SYSTEM

12 CFR Part 220

[Docket No. R–0389]

Credit by Brokers and Dealers; Complete Revision and Simplification of Regulation T

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is adopting a completely revised and simplified Regulation T, credit by brokers and dealers. The new Regulation incorporates changes made in response to comments received on the complete revision of Regulation T as well as proposals previously published and adopted. The 11 accounts currently required to be maintained by brokers and dealers will be consolidated into 7 accounts along functional lines. In addition, the new regulation will facilitate options writing by institutions and permit options clearing agencies to accept, under specified conditions, any underlying security as the required Regulation T deposit. Terminology throughout the new regulation has been conformed to that of modern-day industry usage so that the regulation will henceforth refer to "equity/margin requirement" instead of "maximum loan value/adjusted debit balance."

In response to comments received, the revised Regulation T will permit brokers to maintain more than one account for a customer in two situations. Under the old regulation, a customer's transactions had to be consolidated into a single margin account. Under the new regulation, a clearing broker will be permitted to maintain separate margin accounts for a single person who is introduced by different brokers. Introducing brokers will also be permitted to maintain separate accounts for the same person if the accounts are cleared by different clearing brokers. A separate margin account may also be established for the same person if it is controlled by an investment adviser with discretionary authority.

The new regulation establishes a separate account for arbitrage transactions. This differs in form from the proposed revision, under which arbitrage transactions were to be recorded in the Market Functions Account.

Another difference between the proposed revision and the regulation adopted today is the elimination of the requirement in the Specialists' provision (§ 220.12) that exchanges file monthly reports with the Board disclosing the use of specialist credit. Regulation T currently requires a 25% margin on long and short positions in underlying stock serving as permitted offsets. The new regulation provides for a "good faith" margin in those situations. Specialists will have 7 days to deposit margin instead of the present 5 days in an effort to provide specialists with treatment parallel to that given public customers.

The regulation also takes cognizance of new instruments—securities-exchange-traded options on foreign currency, and options on certificates of deposit and equity stock indices—which were defined to be "securities" for purposes of the Securities Exchange Act of 1934 by Pub. L. 97–303. As has been previously announced (47 FR 47464 Oct. 26, 1982), Board staff is in the process of conducting a special study of the effectiveness, scope and structure of federal regulation of margin requirements. Accordingly, for the present time, the Board has set the margin level of these instruments as the amount specified by the rules of the national securities exchange on which the option is traded, provided that all such rules have been approved by the SEC. This is comparable to action taken in 1981 by the Board with respect to options on exempted debt securities (46 FR 49827 Oct. 8, 1981).

Other changes adopted today that are different from the proposed revision are as follows: (1) Permission to use a convertible or exchangeable security instead of the present 50% margin when the underlying security is sold short in a margin account; (2) permission for the use of convertible or exchangeable securities as proxies for the related security when call options are written in the cash account; (3) in connection with the writing of put options, permission to use the following instruments as substitutes for cash, provided their current market value at the time the put is written equals or exceeds the exercise price of the option and provided further that they mature in one year or less: securities issued or guaranteed by the United States or its agencies, negotiable bank certificates of deposit, or bankers acceptances issued by banking institutions in the United States and payable in the United States; (4) one of the conditions under which an over-the-counter margin bond will be marginable has been changed to make the $25 million size criterion applicable only at time of issuance, rather than at the time of the extension of credit, as was formerly the case and (5) minor refining language changes to the definitional section which will have no substantive effect on the regulation, but which were made to conform to industry usage.

EFFECTIVE DATE: November 21, 1983 but may be implemented after June 20, 1983, at the option of the creditor.

FOR FURTHER INFORMATION CONTACT: At the Board of Governors of the Federal Reserve System, Washington, D.C. 20551, contact: Laura Homer, Securities Credit Officer, or Robert Lord, Attorney, Division of Banking Supervision and Regulation (202) 452–2781. At the Federal Reserve Bank of New York, contact: Mindy Silverman, Assistant Counsel, (212) 791–5032.

SUPPLEMENTARY INFORMATION:

I. History of the Proposed Revision of Regulation T

As part of its Regulatory Improvement Project, and after an extensive study conducted by the Federal Reserve Bank of New York on the margin regulations, the Board, on March 30, 1982 published for public comment a completely revised and simplified Regulation T, which governs credit extended by securities brokers and dealers. (FR 13376). The proposed simplification incorporated amendments to Regulation T adopted by the Board earlier in the year, as well as two proposed amendments issued for public comment prior to publication of the proposed simplification. The amendments already adopted by the Board and incorporated into the proposed complete revision expanded the permissible arranging activities of brokers and dealers and removed the automatic equity building features in the Regulation. (47 FR 2981, Jan. 21, 1982). The two amendments that were still in the proposal stage at the time of publication of the complete revision were adopted, with certain

VOL 48 ISS 101 MAY 24 1983 UMI

modifications, as final rules in May, 1982. They amended Regulation T (1) to permit letters of credit, CD's government securities and banker's acceptances to be used, in addition to cash, as collateral in broker/dealer securities borrowing and lending transactions (47 FR 21238, May 18, 1982), and (2) to specify new criteria for eligibility on the Board's List of OTC Margin Stocks (47 FR 21756, May 20, 1982).

Another amendment to Regulation T, proposed and adopted by the Board after publication of the complete revision, has been incorporated into the final rule. The amendment permits brokers and dealers to extend credit on the collateral of private mortgage pass-through securities meeting specified issue-size and reporting requirements (47 FR 55912, December 14, 1982).

A proposal to amend Regulation T by providing a framework for the regulation of credit extended in connection with transactions in stock index futures contracts has not been incorporated into the final rule adopted today. (47 FR 8788, March 2, 1982). This proposal is still under consideration by the Board.

II. Summary of Comments

There were thirty-eight (38) respondents to the Board's proposal to revise Regulation T. The respondents consisted of nine Federal Reserve Banks, sixteen broker/dealers, four self-regulatory organizations and exchanges, three trade associations, one clearing corporation, two law firms, two individuals and one State agency (North Carolina State Treasurer).

The majority of respondents supported the Board's efforts to simplify and reduce the language of Regulation T and to facilitate compliance with it. While the majority of the respondents requested both technical and language modifications, most felt that the proposed simplification would greatly reduce the burdens of recordkeeping and margin calculations for broker/dealers while not interfering with the Board's ability to regulate the extension of credit for the purchase of securities. Respondents such as the National Association of Securities Dealers, Merrill Lynch Pierce Fenner & Smith, and the Credit Division of the Securities Industry Association stated that the proposed regulation was responsive to changes taking place within the securities industry.

Several respondents, however, including the New York Stock Exchange (NYSE), repeated earlier positions that they have expressed to the Board and its staff that Regulation T should be eliminated and replaced by uniform margin regulations established by the self-regulatory organizations with or without oversight authority by the Federal Reserve Board. Seven of the thirty-eight respondents argued in support of this position. Most of these respondents suggested technical and language changes to the proposed revised regulation in the event Regulation T was not eliminated. The NYSE acknowledged that some of its proposals to amend Regulation T may first require amendments to the Securities Exchange Act of 1934.

The continued role of the Board in the area of margin regulation is now being reviewed by Board staff in cooperation with the staffs of the Securities and Exchange Commission and the Commodity Futures Trading Commission (47 FR 47464, October 26, 1982). The study will consider possible recommendations for legislative change.

Many of the commenters requested that the Board provide an adequate implementation period to give firms time to adapt existing computer programs to changes required by the proposed revision. The implementation period requested ranged from two to six months. Several commenters also requested that the Board allow an additional comment period before the proposed regulation changes become mandatory. In view of the nature of the comments received, the Board does not believe that an additional comment period is necessary and that implementation of the revised regulation at an early date outweighs any further technical changes that may be necessary. The new regulation will go into effect on November 21, 1983, but creditors may at their option, begin to operate under its terms as early as June 20, 1983.

Many commenters requested that specific requirements, the imposition of which is currently left up to exchanges of firms, be mandated by the Board. For example, a request was made that the Board establish mandatory procedures for transferring accounts between brokers and fixed time periods for completion. The commenter making this request believes that such Board-imposed requirements would better serve the public than the system where each self-regulator designs its own requirements. The Board believes that granting such a request would be inconsistent with its efforts to simplify the Regulation and, therefore, has not adopted such requirements.

III. Detailed Explanation of Changes

1. General Applicability

(a) The titles of the accounts have been changed to titles that are more descriptive of the contents of each account or simply to remove the term "special."

(b) The change in terminology from "adjusted debit balance/maximum loan value" to "margin/equity" is reflected in three sections of the regulation: Definitions (§ 220.2(a), (d), (f), (1), (m), and (n)), Margin Account (§ 220.4), and the Supplement (section 220.18).

2. Definitions, § 220.2

(a) The definition of "creditor" has been changed to conform the language to section 7 of the Securities Exchange Act of 1934 ("the Act") (15 U.S.C. section 78g) and to identify specific categories of persons coming within the definition.

(b) Language that is presently contained in paragraph (3) of the definition of "registered security" has been eliminated from the definition. That language is not necessary in light of the Board's authority, since 1968, to designate any security as marginable, *i.e.*, as having loan value in a margin account.

(c) The definition of "exempted security" has been removed from the regulation. The definition in section 3(a)(12) of the Act is sufficient because the only additional language presently in the regulatory definition is no longer necessary for the reason described in paragraph (b) above.

(d) In the definition of "OTC Margin Stock", the word "stock" has been replaced with the words "equity security" to clarify that the term includes convertible bonds and other instruments that are often not considered "stock." The criteria for inclusion on the list of OTC margin stocks has been moved from the Supplement to the body of the regulation, because it is not the type of requirement that the Board may need to change quickly, as are the margin levels.

(e) In response to several comments, the terms "equity deficiency" and "equity excess" have been changed to "margin deficiency" and "margin excess" in the definition section and throughout the regulation, as the terms in the proposal had a different meaning in the industry.

(f) A definition of "good faith margin" has been added because such a definition was added to the proposed revisions of Regulations G and U and is useful in simplifying language.

(g) A more descriptive definition of "short call or short put" (§ 220.2(w)) has been substituted for the definition contained in the original proposed revision. The new definitions will also refer to securities exchange-traded options on foreign currency, and options on certificates of deposit and stock indices as these new instruments came within the Board's margin setting authority as a result of a legislative amendment (Pub. L. 97-303, amending 15 U.S.C. 78c(a)(10)) defining them as "securities" for purposes of the Securities Exchange Act of 1934.

(h) The definition of "OTC margin bond" has been changed to make the issue-size criterion applicable at time of issuance only. This will make the circumstances under which an OTC margin bond may be marginable consistent with the marginability of private mortage pass-through securities (adopted by the Board in December 1982, 47 FR 55912, December 14, 1982).

3. General Provisions, § 220.3

(a) *Separation of accounts, § 220.3(b).* (i) The term "segregation" has been replaced with "separation." A statement has been added to require written entries to be made when cash or securities are used to meet requirements in another account, if withdrawals of cash or securities are permitted under the regulation.

(b) *Receipt of Funds or Securities, § 220.3(e).* (i) The language that a creditor may "at his option" treat the various types of noncash payment as receipt of payment was removed as unnecessary.

(ii) Certain language was removed from the existing regulation describing a check, draft or order as drawn on a bank or a savings bank, which in the ordinary course of business is payable on presentation, as unnecessary. As long as the instrument is, by its terms or usage, payable on presentation and is accepted by the creditor in good faith, it may be considered receipt of payment, whether it is drawn on a "bank" or on one of the other types of depository institutions that may issue such payment instruments.

(iii) The reference to "telegraphic" notice was also removed; since the creditor has the right to obtain hard copy of a telegraphic notice, it may be considered to be included in the term "written notice."

(c) *Exchange of Securities, § 220.3(f).* The subsection entitled "Reorganizations" and certain language of that section was changed. Staff has received inquiries from time to time on the meaning of "reorganization" and "recapitalization," and there has not been a clear understanding of the scope of the section. The new language is intended to clarify that the section covers any exchange offer that is made to all holders of an issue of securities. The new language also clarifies the requirement that the consideration received in the exchange must be deposited in the account.

(d) *Variable Annuity Contracts Issued by Insurance Companies, § 220.3(i).* Most of the language from the present § 220.7(f) was eliminated as unnecessary.

(e) *Valuing Securities, § 220.3(g)(1).* Language has been added specifying that the computation of the total cost of a purchase or the net proceeds of a sale must include any commission charged. This is a formal statement of the accepted practice of including the cost of a commission when determining the cost of a transaction. Because the treatment of commissions has been addressed in this section, the reference to commissions in the section on service charges (present § 220.6(g)) has been deleted. (See new § 220.4(f).)

(f) *Innocent mistakes, § 220.3(h).* In response to comments the word "mechanical" was deleted so as to avoid any inference that violations may be excused for only "non-human" errors.

4. Margin Account, § 220.4(a)

In contrast to the proposed revision, this section permits separate margin accounts to be established for the same person by creditors that: (1) Clear transactions for other creditors where the transactions are introduced to the clearing creditor by separate creditors or (2) clear transactions through other creditors if the transactions are effected by separate creditors. Separate accounts may also be established for the same person by a creditor to provide one or more accounts over which the creditor or a third party investment advisor has investment discretion.

5. Transfer of Account, § 220.5(f)

(a) The description of the statement to be obtained by the transferee in present §220.6(d) was rephrased to state simply that any margin call issued under Regulation T has been satisfied.

(b) In subsection (2), the term "*bona fide*" was removed as unnecessary. Since the transaction must be one that is not undertaken to avoid Regulation T and the creditor is required to accept in good faith the statement describing the circumstances giving rise to the transfer, the creditor may not accept a statement that indicates that the transfer was not a legitimate incident to the transaction.

6. Cash Account, § 220.8

(a) The statement that *bona fide* cash transactions may be effected in the cash account has been removed as unnecessary. The description of permissible transactions includes only those that are *bona fide* cash transactions. Use of the term "*bona fide*" is redundant since permissible transactions must be done in good faith. The reference in the present § 220.4(c)(6) to "*bona fide* cash transactions" was removed for the same reason.

(b) A substantive change has been added in paragraph (a)(3)(i) concerning the issuance of a call option before payment is made for the purchase of a security. This will permit customers who cannot or do not maintain a margin account to take advantage of the investment strategy of taking a position in an option at the same time that they take a position in the underlying security or a security immediately convertible into the underlying security without the payment of money. It is anticipated that creditors permitting customers to write options on an underlying security using a convertible or exchangeable security as the proxy will require the customer to give written authorization for the conversion in the event an option exercise notice is received. Banks issuing escrow agreements against convertible securities should also have such written authorization.

(c) In response to comments received, securities issued by the United States or its agencies, negotiable certificates of deposit and bankers acceptances will be permitted as substitutes for cash in connection with the writing of put options, provided these instruments have a maturity of one year or less and their current market value at the time the put is written is equal to or greater than the put exercise price.

(d) Language has been added in § 220.8(b)(2) to clarify that the extension of time in a delivery against payment transaction is permitted if delivery of the security is delayed due to market conditions. See ¶ 5-501 in Securities Credit Transactions Handbook. The phrase "delivery against payment" is defined in the Definitions Section (see § 220.2(e)) rather than in the Cash Account Section.

(e) The 90-day freeze provision has been modified, as a clarifying measure, to apply only to transactions in *non-exempted* securities.

7. The Special Memorandum Account, § 220.6

As described in the proposal (46 FR 37517), the account is a renamed version of section 6 of the Special Miscellaneous Account. The types of deposit permitted in the Special Memorandum Account are now listed in the regulation.

VOL 48 ISS 101 MAY 24 1983 UMI

8. Broker Dealer Credit Account, § 220.11

(a) As noted in the proposal (46 FR 37517 (1981)), this account contains the provisions that are presently in sections 1, 2 and 3 of the Special Miscellaneous Account and adds a provision to cover jointly owned clearing firms.

(b) There is new language that approval for emergency credit, credit for capital contributions and subordinated credit for capital purposes should be obtained from the appropriate Examining Authority, rather than from a committee of a national securities exchange. This reflects the fact that all creditors may not be members of a national securities exchange; it does not change the requirement for members of exchanges for whom the appropriate Examining Authority would be the exchange.

9. The Non-Securities Credit Account, § 220.9

(a) As described in the proposal (46 FR 37517 (1981)), this account contains provisions that are presently in the Special Commodity Account and sections 7 and 8 of the Special Miscellaneous Account.

(b) In the language comparable to present § 220.7(c) the phrase "on a margin security (other than an exempted security)" has been removed. The revised language will clarify that the required nonpurpose statement applies to unsecured credit as well as secured credit.

(c) Specific reference to form F.R. T–4 has been deleted from the Nonsecurities Credit Account (§ 220.9), but creditors must obtain such forms when extending nonpurpose credit.

10. The Market Functions Account, § 220.12

This account combines the Specialist Account and two sections of the Special Miscellaneous Account for credit to odd-lot dealers and to finance the underwriting or distribution of securities. There is a substantive addition, which provides for credit to OTC marketmakers and third-marketmakers similar to the provisions for bank loans to such marketmakers in present § 221.3(w) and (y) of Regulation U. Under the new regulation, exchanges will no longer have to file monthly reports (Form 2020) on the use of specialist credit. The required margin on long and short positions in underlying stock that serve as permitted offsets has been changed from a proposed 25% requirement to a "good faith" requirement. In addition, like public customers, specialists will have 7 days in which to deposit margin. The original proposal would have imposed a 5 day requirement.

11. The Arbitrage Account, § 220.7

Under the Board's March 30, 1982 proposal (47 FR 13376) this account would have been folded into the Market Functions Account. Due to comments received, a separate account for arbitrage transactions has been established.

12. Arranging for Loans by Others, § 220.13

The arranging provision has been clarified to indicate that sales of all non-margin securities (not just non-margin securities with installment or other deferred payment provisions) are excluded from the arranging prohibitions if such sales are exempt from registration under sections 4(2) or 4(6) of the Securities Act of 1933 (§ 220.13(b)).

13. Borrowing By Creditors, § 220.15

(a) The statutory prohibition in section 8 of the Act was rephrased to make it clear that borrowing "on" a security means using that security as collateral for a loan.

(b) The last sentence of present § 220.5(b) was removed as unnecessary. Blank forms and information regarding filing or termination of agreements are available at any Federal Reserve Bank.

(c) The provisions for loans from other creditors has been shortened considerably. The substance of present §§ 220.15(a)(3) and (c) are contained in § 220.5(a)(3) of the revised version. The revised version does not specifically refer to loans from other creditors to meet emergency needs or to the fact that credit from another creditor would be subject to any other applicable provisions of law. The former provision is included in the list of permissible loans by creditors under a provision of the Broker Dealer Credit Account (§ 220.11(a)); the latter provision applies to all activities of a creditor, *i.e.*, a creditor is always subject to any other applicable provisions of law in addition to those provisions contained in Regulation T.

14. Credit for Clearance of Securities, § 220.14

(a) The terminology was changed from a "fraction of a day" to "not for more than one day" because it is simpler and does not actually expand the permissible time period from that defined in present § 220.6(i). Since § 220.6(i) places no limit on the fraction of a day during which the credit may be extended, it could apply to credit outstanding for an entire day (minus one minute, for example). Recognizing that that is the case, it is less confusing to simply permit the credit for no more than one day. Also, the term "association" (referring to a national securities association) was added in recognition of the fact that creditors may be members of a national securities exchange or association.

(b) A provision was added to permit a clearing broker to acquire an option position from an option clearing agency, such as the Options Clearing Corporation, by depositing securities other than the particular securities underlying the option. Under the present provisions, only cash, government securities, letters of credit or the particular securities may be used for the required deposit.

15. Supplement, § 220.18

In view of a pending SEC rule change (Release No. 34–19162 October 20, 1982), the language of the section describing margin required for OTC options on exempted debt securities has been modified to exclude any options on exempt securities that the SEC determines are themselves exempt securities.

16. Reports

The subsection entitled "Reports" (§ 220.7(d)) in the present Regulation was removed as unnecessary; section 17 of the Securities Exchange Act of 1934 (15 U.S.C. § 78q) requires persons subject to the margin regulations to file reports required by the Board.

17. Miscellaneous

(a) As under the present regulation, convertible or exchangeable securities may be used instead of the present 50% margin when the related security is sold short.

(b) Other requests for modification of the proposed revision have not been adopted because of insufficient supporting data or because they are inappropriate in light of the Board's statutory responsibilities.

Final Regulatory Flexibility Analysis

The **Federal Register** documents published in June and July of 1981 (46 FR 32592 and 46 FR 37516) by the Board contained an Initial Regulatory Flexibility Analysis for the complete revision of Regulation T. Comments received on the proposal appear to agree with the Board's analysis.

List of Subjects 12 CFR Part 220

Banks, banking, Brokers, Credit, Federal Reserve System, Margin, Margin requirements, Investments, Reporting requirements, Securities.

Accordingly, pursuant to sections 3, 7, 8 and 23 of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78c, g, h and w) the Board completely revises Regulation T as follows:

PART 220—CREDIT BY BROKERS AND DEALERS

Sec.

220.1 Authority, purpose, and scope.
220.2 Definitions.
220.3 General provisions.
220.4 Margin account.
220.5 Margin account exceptions and special provisions.
220.6 Special memorandum account.
220.7 Arbitrage account.
220.8 Cash account.
220.9 Nonsecurities credit account.
220.10 Omnibus account.
220.11 Broker-dealer credit account.
220.12 Market functions account.
220.13 Arranging for loans by others.
220.14 Clearance of securities.
220.15 Borrowing by creditors.
220.16 Borrowing and lending securities.
220.17 Requirements for list of OTC margin stocks.
220.18 Supplement to Regulation T.

§ 220.1 Authority, purpose, and scope.

(a) *Authority and purpose.* Regulation T (this part) is issued by the Board of Governors of the Federal Reserve System (the Board) pursuant to the Securities Exchange Act of 1934 (the Act) (15 U.S.C. 78a et seq.). Its principal purpose is to regulate extensions of credit by and to brokers and dealers; it also covers related transactions within the Board's authority under the Act. It imposes, among other obligations, initial margin requirements and payment rules on securities transactions.

(b) *Scope.* (1) This part provides a margin account and seven special purpose accounts in which to record all financial relations between a customer and a creditor. Any transaction not specifically permitted in a special account shall be recorded in a margin account.

(2) This part does not preclude any exchange, national securities association, or creditor from imposing additional requirements or taking action for its own protection.

§ 220.2 Definitions.

The terms used in this part have the meanings given them in section 3(a) of the Act or as defined in this section.

(a) "Credit balance" means the cash amount due the customer in a margin account after debiting amounts transferred to the special memorandum account.

(b) "Creditor" means any broker or dealer (as defined in sections 3(a)(4) and 3(a)(5) of the Act), any member of a national securities exchange, or any person associated with a broker or dealer (as defined in section 3(a)(18) of the Act), except for business entities controlling or under common control with the creditor.

(c) "Customer" includes: (1) Any person or persons acting jointly: (i) to or for whom a creditor extends, arranges, or maintains any credit; or (ii) who would be considered a customer of the creditor according to the ordinary usage of the trade;

(2) any partner in a firm who would be considered a customer of the firm absent the partnership relationship; and

(3) any joint venture in which a creditor participates and which would be considered a customer of the creditor if the creditor were not a participant.

(d) "Debit balance" means the cash amount owed to the creditor in a margin account after debiting amounts transferred to the special memorandum account.

(e) "Delivery against payment," "Payment against delivery," or a "C.O.D. transaction" refers to an arrangement under which a creditor and a customer agree that the creditor will deliver to, or accept from, the customer, or the customer's agent, a security against full payment of the purchase price.

(f) "Equity" means the total current market value of security positions held in the margin account plus any credit balance less the debit balance in the margin account.

(g) "Escrow agreement" means any agreement issued in connection with a call or put option under which a bank, holding the underlying security, foreign currency, certificate of deposit, or required cash, is obligated to deliver to the creditor (in the case of a call option) or accept from the creditor (in the case of a put option) the underlying security, foreign currency, or certificate of deposit against payment of the exercise price upon exercise of the call or put.

(h) "Examining authority" means: (1) The national securities exchange or other self-regulatory organization of which a creditor is a member; or

(2) if not a member of any such self-regulatory organization, the Regional Office of the Securities and Exchange Commission (SEC) where the creditor has its principal place of business; or

(3) if a member of more than one self-regulatory organization, the organization designated by the SEC as the examining authority for the creditor.

(i) "Good faith margin" means the amount of margin which a creditor, exercising sound credit judgment, would customarily require for a specified security position and which is established without regard to the customer's other assets or securities positions held in connection with unrelated transactions.

(j) "In or at the money" means the current market price of the underlying security is not more than one standard exercise interval below (with respect to a call option) or above (with respect to a put option) the exercise price of the option.

(k) "In the money" means the current market price of the underlying security is not below (with respect to a call option) or above (with respect to a put option) the exercise price of the option.

(l) "Margin call" means a demand by a creditor to a customer for a deposit of additional cash or securities to eliminate or reduce a margin deficiency as required under this part.

(m) "Margin deficiency" means the amount by which the required margin exceeds the equity in the margin account.

(n) "Margin excess" means the amount by which the equity in the margin account exceeds the required margin. When the margin excess is represented by securities, the current value of the securities is subject to the percentages set forth in § 220.18 (the Supplement).

(o) "Margin security" means any registered security, OTC margin stock, OTC margin bond, or any security issued by either an open-end investment company or unit investment trust which is registered under section 8 of the Investment Company Act of 1940 (15 U.S.C. 80a–8).

(p) "Nonexempted security" means any security other than an exempted security (as defined in section 3(a)(12) of the Act).

(q) "Nonmember bank" means a bank that is not a member of the Federal Reserve System.

(r) "OTC margin bond" means: (1) A debt security not traded on a national securities exchange which meets all of the following requirements:

(i) At the time of the original issue, a principal amount of not less than $25,000,000 of the issue was outstanding;

(ii) The issue was registered under section 5 of the Securities Act of 1933 (15 U.S.C. 77e) and the issuer either files periodic reports pursuant to section 13(a) or 15(d) of the Act or is an insurance company which meets all of the conditions specified in section 12(g)(2)(G) of the Act; and

(iii) At the time of the extension of credit, the creditor has a reasonable basis for believing that the issuer is not

VOL 48 ISS 101 MAY 24 1983 UMI

in default on interest or principal payments; or

(2) A private mortgage pass-through security (not guaranteed by an agency of the U.S. government) meeting all of the following requirements:

(i) An aggregate principal amount of not less than $25,000,000 (which may be issued in series) was issued pursuant to a registration statement filed with the SEC under section 5 of the Securities Act of 1933;

(ii) Current reports relating to the issue have been filed with the SEC; and

(iii) At the time of the credit extension, the creditor has a reasonable basis for believing that mortgage interest, principal payments and other distributions are being passed through as required and that the servicing agent is meeting its material obligations under the terms of the offering.

(s) "OTC margin stock" means any equity security not traded on a national securities exchange that the Board has determined has the degree of national investor interest, the depth and breadth of market, the availability of information respecting the security and its issuer, and the character and permanence of the issuer to warrant being treated like an equity security traded on a national securities exchange. An OTC stock is not considered to be an "OTC margin stock" until it appears on the Board's periodically published list of OTC margin stocks.

(t) "Overlying option" means: (1) A put option purchased or a call option written against a long position in an underlying security in the specialist record in § 220.12(b); or

(2) a call option purchased or a put option written against a short position in an underlying security in the specialist record in § 220.12(b).

(u) "Purpose credit" means credit for the purpose of: (1) Buying, carrying, or trading in securities; or

(2) buying or carrying any part of an investment contract security which shall be deemed credit for the purpose of buying or carrying the entire security.

(v) "Registered security" means any security that: (1) Is registered on a national securities exchange; or

(2) Has unlisted trading privileges on a national securities exchange.

(w) "Short call or short put" means a call option or a put option that is issued, endorsed, or guaranteed in or for an account.

(1) A short call obligates the customer to sell the underlying security, foreign currency, or certificate of deposit at the exercise price upon receipt of an exercise notice at any time prior to the expiration date of the option.

(2) A short put obligates the customer to purchase the underlying security, foreign currency, or certificate of deposit at the exercise price upon receipt of an exercise notice at any time prior to the expiration date of the option.

(3) A short call or a short put on stock index options obligates the customer to pay the holder of an "in the money" long put or call who has exercised the option the cash difference between the exercise price and the current assigned value of the index as established by the option contract.

(x) "Specialist joint account" means an account which, by written agreement, provides for the commingling of the security positions of the participants and a sharing of profits and losses from the account on some predetermined ratio.

(y) "Underlying security" means the security that will be delivered upon exercise of an option.

§ 220.3 General provisions.

(a) *Records.* The creditor shall maintain a record for each account showing the full details of all transactions.

(b) *Separation of accounts.* Except as provided for in the margin account and the special memorandum account, the requirements of an account may not be met by considering items in any other account. If withdrawals of cash or securities are permitted under the regulation, written entries shall be made when cash or securities are used for purposes of meeting requirements in another account.

(c) *Maintenance of credit.* Except as prohibited by this part, any credit initially extended in compliance with this part may be maintained regardless of: (1) Reductions in the customer's equity resulting from changes in market prices;

(2) any security in an account ceasing to be margin or exempted; or

(3) any change in the margin requirements prescribed under this part.

(d) *Guarantee of accounts.* No guarantee of a customer's account shall be given any effect for purposes of this part.

(e) *Receipt of funds or securities.* (1) A creditor, acting in good faith, may accept as immediate payment:

(i) Cash or any check, draft, or order payable on presentation; or

(ii) Any security with sight draft attached.

(2) A creditor may treat a security, check or draft as received upon written notification from another creditor that the specified security, check, or draft has been sent.

(3) Upon notification that a check, draft, or order has been dishonored or when securities have not been received within a reasonable time, the creditor shall take the action required by this part when payment or securities are not received on time.

(f) *Exchange of securities.* (1) To enable a customer to participate in an offer to exchange securities which is made to all holders of an issue of securities, a creditor may submit for exchange any securities held in a margin account, without regard to the other provisions of this part, provided the consideration received is deposited into the account.

(2) If a nonmargin, nonexempted security is acquired in exchange for a margin security, its retention, withdrawal, or sale within 60 days following its acquisition shall be treated as if the security is a margin security.

(g) *Valuing securities.* The current market value of a security shall be determined as follows:

(1) Throughout the day of the purchase or sale of a security, the creditor shall use the security's total cost of purchase or the net proceeds of its sale including any commissions charged.

(2) At any other time, the creditor shall use the closing sale price of the security on the preceding business day, as shown by any regularly published reporting or quotation service. If there is no closing price, the creditor may use any reasonable estimate of the market value of the security as of the close of business on the preceding business day.

(h) *Innocent mistakes.* If any failure to comply with this part results from a mistake made in good faith in executing a transaction or calculating the amount of margin, the creditor shall not be deemed in violation of this part if, promptly after the discovery of the mistake, the creditor takes appropriate corrective action.

(i) *Variable annuity contracts issued by insurance companies.* Any insurance company that issues or sells variable annuity contracts or engages in a general securities business as a broker or dealer shall be subject to this part only for transactions in connection with those activities. Extensions of credit associated with conventional lending practices of insurance companies are subject to Part 207 of this Chapter.

§ 220.4 Margin account.

(a) *Margin transactions.* (1) All transactions not specifically authorized for inclusion in another account shall be recorded in the margin account.

(2) A creditor may establish separate margin accounts for the same person to:

(i) Clear transactions for other creditors where the transactions are introduced to the clearing creditor by separate creditors; or

(ii) Clear transactions through other creditors if the transactions are effected by separate creditors; or

(iii) Provided one or more accounts over which the creditor or a third party investment adviser has investment discretion.

(b) *Required margin.* The required margin for each position in securities is set forth in section 220.18 (the Supplement) and is subject to the exceptions and special provisions contained in section 220.5 (Margin Account Exceptions and Special Provisions).

(c) *When additional margin is required.* (1) *Computing deficiency.* All transactions on the same day shall be combined to determine whether additional margin is required by the creditor. For the purpose of computing equity in an account, security positions are established or eliminated and a credit or debit created on the trade date of a security transaction. Additional margin is required on any day when the day's transactions create or increase a margin deficiency in the account and shall be for the amount of the margin deficiency so created or increased.

(2) *Satisfaction of deficiency.* The additional required margin may be satisfied by a transfer from the special memorandum account or by a deposit of cash, margin securities, exempted securities, or any combination thereof.

(3) *Time limits.* (i) A margin call shall be satisfied within 7 business days after the margin deficiency was created or increased.

(ii) The 7 day period may be extended for one or more limited periods upon application by the creditor to a self-regulatory organization or national securities association unless the organization or association believes that the creditor is not acting in good faith or that the creditor has not sufficiently determined that exceptional circumstances warrant such action. Applications shall be filed and acted upon prior to the end of the 7 day period or the expiration of any subsequent extension. However, applications filed by firms having no direct electronic access to the organization or association may be accepted as timely filed if postmarked by midnight of the last day of the 7 day period or any subsequent extension.

(4) *Satisfaction restriction.* Any transaction, position, or deposit that is used to satisfy one requirement under this part shall be unavailable to satisfy any other requirement.

(d) *Liquidation in lieu of deposit.* If any margin call is not met in full within the required time, the creditor shall liquidate securities sufficient to meet the margin call or to eliminate any margin deficiency existing on the day such liquidation is required, whichever is less. If the margin deficiency created or increased is $500 or less, no action need be taken by the creditor.

(e) *Withdrawals of cash or securities.* (1) Cash or securities may be withdrawn from an account, except if:

(i) Additional cash or securities are required to be deposited into the account for a transaction on the same or a previous day; or

(ii) The withdrawal, together with other transactions, deposits, and withdrawals on the same day, would create or increase a margin deficiency.

(2) Margin excess may be withdrawn or may be transferred to the special memorandum account (§ 220.6) by making a single entry to that account which will represent a debit to the margin account and a credit to the special memorandum account.

(3) If a creditor does not receive a distribution of cash or securities which is payable with respect to any security in a margin account on the day it is payable and withdrawal would not be permitted under this paragraph, a withdrawal transaction shall be deemed to have occurred on the day the distribution is payable.

(f) *Interest, service charges, etc.* (1) Without regard to the other provisions of this section, the creditor, in its usual practice, may debit the following items to a margin account if they are considered in calculating the balance of such account:

(i) Interest charged on credit maintained in the margin account;

(ii) Premiums on securities borrowed in connection with short sales or to effect delivery;

(iii) Dividends, interest, or other distributions due on borrowed securities;

(iv) Communication or shipping charges with respect to transactions in the margin account; and

(v) Any other service charges which the creditor may impose.

(2) A creditor may permit interest, dividends, or other distributions credited to a margin account to be withdrawn from the account if:

(i) The withdrawal does not create or increase a margin deficiency in the account; or

(ii) The current market value of any securities withdrawn does not exceed 10 percent of the current market value of the security with respect to which they were distributed.

§ 220.5 Margin account exceptions and special provisions.

(a) *Unissued securities* (1) The required margin on a net long or net short commitment in an unissued security is the margin that would be required if the security were an issued margin security, plus any unrealized loss on the commitment or less any unrealized gain.

(2) Margin is not required on a net short commitment in unissued securities when the account contains the related issued securities, nor for any net short or net long position in unissued exempted securities.

(b) *Short Sales.* (1) The required margin for the short sale of a security shall be the amount set forth in § 220.18 (the Supplement).

(2) A short sale "against the box" shall be treated as a long sale for the purpose of computing the equity and the required margin.

(c) *Options.* (1) *Margin or cover for options on exempted debt securities, certificates of deposit, stock indices, or securities exchange traded options on foreign currencies.* The required margin for each transaction involving any short put or short call on an exempted debt security, certificate of deposit, stock index, or foreign currency (if the option is traded on a securities exchange), shall be the amount or positions in lieu of margin set forth in § 220.18 (the Supplement).

(2) *Margin for options on equity securities.* The required margin for each transaction involving any short put or short call on an equity security shall be the amount set forth in § 220.18 (the Supplement), plus any unrealized loss on the commitment or minus any unrealized gain. However, the required margin may not exceed the current market value of the underlying security in the case of a call, or the exercise price in the case of a put.

(3) *Cover or positions in lieu of margin.* No margin is required for an option written on an equity security position when the account holds any of the following:

(i) the underlying security in the case of a short call, or a short position in the underlying security in the case of a short put;

(ii) securities immediately convertible into or exchangeable for the underlying security without the payment of money in the case of a short call, if the right to convert or exchange does not expire on or before the expiration date of the short call;

VOL 48 ISS 101 MY 24 1983 UMI

(iii) an escrow agreement for the underlying security or foreign exhange (in the case of a short call) or cash (in the case of a short put);

(iv) a long call on the same number of shares of the same underlying security if the long call does not expire before the expiration date of the short call, and if the amount (if any), by which the exercise price of the long call exceeds the exercise price of the short call is deposited in the account;

(v) a long put on the same number of shares of the same underlying security if the long put does not expire before the expiration date of the short put, and if the amount (if any), by which the exercise price of the short put exceeds the exercise price of the long put is deposited in the account;

(vi) a warrant to purchase the underlying security, in the case of a short call, if the warrant does not expire on or before the expiration date of the short call, and if the amount (if any), by which the exercise price of the warrant exceeds the exercise price of the short call is deposited in the account. A warrant used in lieu of the required margin under this provision shall contribute no equity to the account.

(4) *Adjustments.* (i) When a short position held in the account serves in lieu of the required margin for a short put, the amount prescribed by paragraph (c)(2) of this section as the amount to be added to the required margin in respect of short sales shall be increased by any unrealized loss on the position.

(ii) When a security held in the account serves in lieu of the required margin for a short call, the security shall be valued at no greater than the exercise prices of the short call.

(5) *Straddles.* When both a short put and a short call are in a margin account on the same number of shares of the same underlying security, the required margin shall be the margin on either the short put or the short call, whichever is greater, plus any unrealized loss on the other option.

(6) *Exclusive designation.* The customer may designate at the time the option order is entered which security position held in the account is to serve in lieu of the required margin, if such service is offered by the creditor; or the customer may have a standing agreement with the creditor as to the method to be used for determining on any given day which security position will be used in lieu of the margin to support an option transaction. Only security held in the account which serves in lieu of the required margin for a short put or a short call shall be unavailable to support any other option transaction in the account.

(d) *Accounts of partners.* If a partner of the creditor has a margin account with the creditor, the creditor shall disregard the partner's financial relations with the firm (as shown in the partner's capital and ordinary drawing accounts) in calculating the margin or equity of the partner's margin account.

(e) *Contribution to joint venture.* If a margin account is the account of a joint venture in which the creditor participates, any interest of the creditor in the joint account in excess of the interest which the creditor would have on the basis of its right to share in the profits shall be treated as an extension of credit to the joint account and shall be margined as such.

(f) *Transfer of accounts.* (1) A margin account that is transferred from one creditor to another may be treated as if it had been maintained by the transferee from the date of its origin, if the transferee accepts, in good faith, a signed statement of the transferor (or, if that is not practicable, of the customer), that any margin call issued under this part has been satisfied.

(2) A margin account that is transferred from one customer to another as part of a transaction, not undertaken to avoid the requirements of this part, may be treated as if it had been maintained for the transferee from the date of its origin, if the creditor accepts in good faith and keeps with the transferee account a signed statement of the transferor describing the circumstances for the transfer.

§ 220.6 Special memorandum account.

(a) A special memorandum account (SMA) may be maintained in conjunction with a margin account. A single entry amount may be used to represent both a credit to the SMA and a debit to the margin account. A transfer between the two accounts may be effected by an increase or reduction in the entry. When computing the equity in a margin account, the single entry amount shall be considered as a debit in the margin account. A payment to the customer or on the customer's behalf or a transfer to any of the customer's other accounts from the SMA reduces the single entry amount.

(b) The SMA may contain the following entries:

(1) dividend and interest payments;

(2) Cash not required by this part, including cash deposited to meet a maintenance margin call or to meet any requirement of a self-regulatory organization that is not imposed by this part;

(3) Proceeds of a sale of securities or cash no longer required on any expired or liquidated security position that may be withdrawn under §220.4(e) of this part; and

(4) Margin excess transferred from the margin account under § 220.4(e)(2) of this part.

§ 220.7 Arbitrage account.

In an arbitrage account a creditor may effect and finance for any customer *bona fide* arbitrage transactions. For the purpose of this section, the term *"bona fide* arbitrage" means:

(1) A purchase or sale of a security in one market together with an offsetting sale or purchase of the same security in a different market at as nearly the same time as practicable for the purpose of taking advantage of a difference in prices in the two markets, or

(2) A purchase of a security which is, without restriction other then the payment of money, exchangeable or convertible within 90 calendar days of the purchase into a second security together with an offsetting sale of the second security at or about the same time, for the purpose of taking advantage of a concurrent disparity in the prices of the two securities.

§ 220.8 Cash account

(a) *Permissible transactions.* In a cash account, a creditor, may:

(1) Buy for or sell to any customer any security if: (i) There are sufficient funds in the accounts; or (ii) the creditor accepts in good faith the customer's agreement that the customer will promptly make full cash payment for the security before selling it and does not contemplate selling it prior to making such payment;

(2) Buy from or sell for any customer any security if: (i) The security is held in the account; or (ii) the creditor accepts in good faith the customer's statement that the security is owned by the customer or the customer's principal, and that it will be promptly deposited in the account;

(3) Issue, endorse, or guarantee an option for any customer if:

(i) In the case of a call option, the underlying security (or a security immediately convertible into the underlying security, without the payment of money) is held in or purchased for the account on the same day, and the option premium is held in the account until cash payment for the underlying or convertible security is received; or

(ii) In the case of a put option, the creditor obtains cash in an amount equal to the exercise price or holds in the account any of the following instruments with a current market value at least equal to the exerecise price and with one year or less to maturity: securities issued or guaranteed by the United States or its agencies, negotiable bank certificates of deposit, or bankers acceptances issued by banking institutions in the United States and payable in the United States.

(4) Use an escrow agreement in lieu of the cash or underlying security position if:

(i) In the case of a call or a put, the creditor is advised by the customer that the required securities or cash are held by a bank and the creditor independently verifies that an appropriate escrow agreement will be delivered by the bank promptly; or

(ii) In the case of a call issued, endorsed, or guaranteed on the same day the underlying security is purchased in the account and the underlying security is to be delivered to a bank, the creditor verifies that an appropiate escrow agreement will be delivered by the bank promptly.

(b) *Time periods for payment; cancellation or liquidation.* (1) *Full cash payment.* A creditor shall obtain full cash payment for customer purchases within 7 business days of the date:

(i) Any nonexempted security was purchased;

(ii) Any unissued security was made available by the issuer for delivery to purchasers;

(iii) Any "when distributed" security was distributed under a published plan;

(iv) A security owned by the customer has matured or has been redeemed and a new refunding security of the same issuer has been purchased by the customer, provided:

(A) The customer purchased the new security no more than 35 calendar days prior to the date of maturity or redemption of the old security;

(B) The customer is entitled to the proceeds of the redemption; and

(C) The delayed payment does not exceed 103 percent of the proceeds of the old security.

(2) *Delivery against payment.* If a creditor purchases for or sells to a customer a security in a delivery against payment transaction, the creditor shall have up to 35 calendar days to obtain payment if delivery of the security is delayed due to the mechanics of the transaction and is not related to the customer's willingness or ability to pay.

(3) *Shipment of securities, extension.* If any shipment of securities is incidental to consummation of a transaction, a creditor may extend the 7 business day period by the number of days required for shipment, but not by more than 7 business days.

(4) *Cancellation; liquidation; minimum amount.* A creditor shall promptly cancel or otherwise liquidate a transaction or any part of a transaction for which the customer has not made full cash payment within the required time. A creditor may, at its option, disregard any sum due from the customer not exceeding $500.

(c) *90 day freeze.* (1) If a nonexempted security in the account is sold or delivered to another broker or dealer without having been previously paid for in full by the customer, the privilege of delaying payment beyond the trade date shall be withdrawn for 90 calendar days following the date of sale of the security. Cancellation of the transaction other than to correct an error shall constitute a sale.

(2) The 90 day freeze shall not apply if: (i) Within 7 business days of the trade date, full payment is received or any check or draft in payment has cleared and the proceeds from the sale are not withdrawn prior to such payment or check clearance; or (ii) the purchased security was delivered to another broker or dealer for deposit in a cash account which holds sufficient funds to pay for the security. The creditor may rely on a written statement accepted in good faith from the other broker or dealer that sufficient funds are held in the other cash account.

(d) *Extension of time periods; transfers.* (1) Unless a self-regulatory organization or association believes that the creditor is not acting in good faith or that the creditor has not sufficiently determined that exceptional circumstances warrant such action, it may, upon application by the creditor:

(i) Extend any period specified in paragraph (b) of this section;

(ii) Authorize transfer to another account of any transaction involving the purchase of a margin or exempted security; or

(iii) Grant a waiver from the 90 day freeze.

(2) Applications shall be filed and acted upon prior to the end of the 7 day period or the expiration of any subsequent extension. However, an application filed from firms having no direct electronic access to the exchange or association may be accepted as timely filed if it is postmarked no later than midnight of the last day of the 7 day period or any subsequent extension.

§ 220.9 Nonsecurities credit account.

(a) In a nonsecurities credit account a creditor may:

(1) Effect and carry transactions in commodities;

(2) Effect and carry transactions in foreign exchange;

(3) Extend and maintain secured or unsecured nonpurpose credit, subject to the requirements of paragraph (b) of this section.

(b) Every extension of credit, except as provided in paragraphs (a) (1) and (2) of this section, shall be deemed to be purpose credit unless, prior to extending the credit, the creditor accepts in good faith from the customer a written statement that it is not purpose credit. The statement shall conform to the requirements established by the Board. To accept the customer's statement in good faith, the creditor shall be aware of the circumstances surrounding the extension of credit and shall be satisfied that the statement is truthful.

§ 220.10 Omnibus account.

(a) In an omnibus account, a creditor may effect and finance transactions for a broker or dealer who is registered with the SEC under section 15 of the Act and who gives the creditor written notice that:

(1) all securities will be for the account of customers of the broker or dealer; and

(2) any short sales effected will be short sales made on behalf of the customers of the broker or dealer other than partners.

(b) The written notice required by paragraph (a) shall conform to any SEC rule on the hypothecation of customers' securities by brokers or dealers.

§ 220.11 Broker-dealer credit account.

(a) *Permissible transactions.* In a broker-dealer credit account, a creditor may:

(1) Purchase any security from or sell any security to another creditor under a good faith agreement to promptly deliver the security against full payment of the purchase price.

(2) Effect or finance transactions of any of its owners if the creditor is a clearing and servicing broker or dealer owned jointly or individually by other creditors.

(3) Extend and maintain credit to any partner or stockholder of the creditor for the purpose of making a capital contribution to, or purchasing stock of, the creditor, affiliated corporation or another creditor.

(4) Extend and maintain, with the approval of the appropriate examining authority:

(i) Credit to meet the emergency needs of any creditor; or

(ii) Subordinated credit to another creditor for capital purposes, if the other creditor:

(A) Is an affiliated corporation; or

(B) Will not use the proceeds of the loan to increase the amount of dealing in securities for the account of the creditor,

VOL 48 ISS 101 MAY 24 1983 UMI

its firm or corporation or an affiliated corporation.

(b) For purposes of paragraphs (a) (3) and (4) of this section "affiliated corporation" means a corporation all the common stock of which is owned directly or indirectly by the firm or general partners and employees of the firm, or by the corporation or holders of the controlling stock and employees of the corporation and the affiliation has been approved by the creditor's examining authority.

§ 220.12 Market functions account.

(a) *Requirements.* In a market functions account, a creditor may effect or finance the transactions of market participants in accordance with the following provisions. A separate record shall be kept for the transactions specified for each category described in paragraphs (b) through (f) of this section. Any position in a separate record shall not be used to meet the requirements of any other category.

(b) *Specialists.* (1) *Applicability.* A creditor may clear or finance specialist transactions for any specialist, or any specialist joint account, in which all participants, or all participants other than the creditor, are registered as specialists on a national securities exchange that requires regular reports on the use of specialist credit from the registered specialists.

(2) *Permitted offset positions.* A specialist in options may establish, on a share-for-share basis, a long or short position in the securities underlying the options in which the specialist makes a market, and a specialist in securities other than options may purchase or write options overlying the securities in which the specialist makes a market, if the account holds the following permitted offset positions:

(i) A short option position which is "in or at the money" and is not offset by a long or short option position for an equal or greater number of shares of the same underlying security which is "in the money";

(ii) A long option position which is "in or at the money" and is not offset by a long or short option position for an equal or greater number of shares of the same underlying security which is "in the money";

(iii) A short option position against which an exercise notice was tendered;

(iv) A long option position which was exercised;

(v) A net long position in a security (other than an option) in which the specialist makes a market; or

(vi) A net short position in a security (other than an option) in which the specialist makes a market.

(3) *Required Margin.* The required margin for a specialist's transactions shall be:

(i) Good faith margin for any long or short position in a security in which the specialist makes a market;

(ii) Good faith margin for any wholly-owned margin security or exempted security;

(iii) The margin prescribed by section 220.18 (the Supplement) when a security purchased or sold short in the account does not qualify as a specialist or permitted offset position.

(4) *Additional margin; restriction on "free-riding."* (i) Except as required by paragraph (b)(8) of this section, the creditor shall issue a margin call on any day when additional margin is required as a result of specialist transactions. The creditor may allow the specialist a maximum of 7 business days to satisfy a margin call.

(ii) If a specialist fails to satisfy a margin call within the period specified in this paragraph (and the creditor is required to liquidate securities to satisfy the call), the creditor shall be prohibited for a 15 calendar day period from extending any further credit to the specialist to finance transactions in nonspecialty securities.

(iii) The restriction on "free-riding" shall not apply to:

(A) Any specialist on a national securities exchange that has an SEC-approved rule on "free-riding" by specialists; or (B) the acquisition or liquidation of a permitted offset position.

(5) *Deficit status.* On any day when a specialist's separate record would liquidate to a deficit, the creditor shall not extend any further specialist credit in the account and shall issue a margin call at least as large as the deficit. If the call is not met by noon of the following business day, the creditor shall liquidate positions in the specialist's account.

(6) *Withdrawals.* Withdrawals may be permitted to the extent that the equity exceeds the margin requirements specified in paragraph (b)(4) of this section.

(c) *Underwritings and distributions.* A creditor may effect or finance for any dealer or group of dealers transactions for the purpose of facilitating the underwriting or distribution of all or a part of an issue of securities with a good faith margin.

(d) *OTC Marketmakers and Third Marketmakers.* (1) A creditor may clear or finance with a good faith margin, marketmaking transactions for an OTC marketmaker or a third marketmaker who:

(i) Is in compliance with any applicable SEC rule, including minimum net capital rules;

(ii) Regularly submits *bona fide* competitive bid and offer quotations to a recognized inter-dealer quotation system;

(iii) Is ready, willing, and able to effect transactions in reasonable amounts with other brokers and dealers at the quoted prices; and

(iv) Has a reasonable average rate of inventory turnover.

(2) If the credit extended to a marketmaker ceases to be for the purpose of marketmaking, or the dealer ceases to be a marketmaker for an issue of securities for which credit was extended, the credit shall be subject to the margin specified in section 220.18 (the Supplement).

(e) *Odd-lot dealers.* A creditor may clear and finance odd-lot transactions for any creditor who is registered as an odd-lot dealer on a national securities exchange with a good faith margin.

§ 220.13 Arranging for loans by others.

A creditor may not arrange for the extension or maintenance of credit to or for any customer by any person upon terms and conditions other than those upon which the creditor may itself extend or maintain credit under the provisions of this part, except that this limitation shall not apply to credit arranged for a customer which does not violate Parts 207 and 221 of this Chapter and results solely from:

(a) Investment banking services, provided by the creditor to the customer, including, but not limited to, underwritings, private placements, and advice and other services in connection with exchange offers, mergers or acquisitions, except for underwritings that involve the public distribution of an equity security with installment or other deferred payment provisions; or

(b) The sale of nonmargin securities (including securities with installment or other deferred payment provisions) if the sale is exempted from the registration requirements of the Securities Act of 1933 under section 4(2) or section 4(6) of the Act.

§ 220.14 Clearance of Securities.

(a) *Credit for clearance of securities.* The provisions of this part shall not apply to the extension or maintenance of any credit that is not for more than one day if it is incidental to the clearance of transactions in securities directly between members of a national securities exchange or association or through any clearing agency registered with the SEC.

(b) *Deposit of securities with options clearing agency.* The provisions of this part shall not apply to the deposit of securities with an options clearing agency for the purpose of meeting its deposit requirements if:

(1) The clearing agency issues options on securities;

(2) The clearing agency is registered with the SEC;

(3) The deposit consists of any underlying securities for classes of option contracts outstanding at the time of the deposit; and

(4) The deposit complies with the rules of the clearing agency which have been approved by the SEC.

§ 220.15 Borrowing by Creditors.

(a) *Restrictions on borrowing.* A creditor may not borrow in the ordinary course of business as a broker or dealer using as collateral any registered nonexempted security, except:

(1) From or through a member bank of the Federal Reserve System; or

(2) From any nonmember bank that has filed with the Board an agreement as prescribed in paragraph (b) of this section, which agreement is still in effect; or

(3) From another creditor if the loan is permissible under this part.

(b) *Agreements of nonmember banks.* (1) A nonmember bank shall file an agreement that conforms to the requirements of section 8(a) of the Act (See Form F.R. T–2) if:

(i) Its principal place of business is in a territory or insular possession of the United States; or

(ii) It has an office or agency in the United States and its principal place of business is outside the United States.

(2) Any other nonmember bank shall file an agreement that conforms to the requirements of section 8(a) of the Act (See From F.R. T–1).

(3) Any nonmember bank may terminate its agreement if it obtains the written consent of the Board.

§ 220.16 Borrowing and Lending Securities.

Without regard to the other provisions of this part, a creditor may borrow or lend securities for the purpose of making delivery of the securities in the case of short sales, failure to receive securities required to be delivered, or other similar situations. Each borrowing shall be secured by a deposit of one or more of the following: cash, securities issued or guaranteed by the United States or its agencies, negotiable bank certificates of deposit and bankers acceptances issued by banking institutions in the United States and payable in the United States, or irrevocable letters of credit issued by a bank insured by the Federal Deposit Insurance Corporation or a foreign bank that has filed an agreement with the Board on Form F.R. T–2. Such deposit made with the lender of the securities shall have at all times a value at least equal to 100 percent of the market value of the securities borrowed, computed as of the close of the preceding business day.

§ 220.17 Requirements for list of OTC margin stocks.

(a) *Requirements for inclusion on the list.* Except as provided in paragraph (d) of this section, OTC margin stock shall meet the following requirements:

(1) Four or more dealers stand willing to, and do in fact, make a market in such stock and regularly submit bona fide bids and offers to an automated quotations system for their own accounts;

(2) The minimum average bid price of such stock, as determined by the Board, is at least $5 per share.

(3) The stock is registered under section 12 of the Act, or is an American Depository Receipt (ADR) of a foreign issuer whose securities are registered under section 12 of the Act, or is a stock of a foreign issuer required to file reports under section 15(d) of the Act;

(4) Daily quotations for both bid and asked prices for the stock are continuously available to the general public;

(5) The stock has been publicly traded for at least six months;

(6) The issuer has at least $4 million of capital, surplus, and undivided profits;

(7) There are 400,000 or more shares of such stock outstanding in addition to shares held beneficially by officers, directors or beneficial owners of more than 10 percent of the stock;

(8) There are 1,200 or more holders of record, as defined in SEC Rule 12g5–1 (17 CFR 240.12g5–1), of the stock who are not officers, directors or beneficial owners of 10 percent or more of the stock, or the average daily trading volume of such stock as determined by the Board, is at least 500 shares; and

(9) The issuer has been in existence for at least three years.

(b) *Requirements for continued inclusion on the list.* Except as provided in paragraph (d) of this section, OTC margin stock shall meet the following requirements:

(1) Three or more dealers stand willing to, and do in fact, make a market in such stock and regularly submit bona fide bids and offers to an automated quotations system for their own accounts;

(2) The minimum average bid price of such stocks, as determined by the Board, is at least $2 per share;

(3) The stock is registered as specified in paragraph (a)(3) of this section;

(4) Daily quotations for both bid and asked prices for the stock are continuously available to the general public;

(5) The issuer has at least $1 million of capital, surplus, and undivided profits;

(6) There are 300,000 or more shares of such stock outstanding in addition to shares held beneficially by officers, directors, or beneficial owners of more than 10 percent of the stock; and

(7) There continue to be 800 or more holders of record, as defined in SEC Rule 12g5–1 (17 CFR 240.12g5–1), of the stock who are not officers, directors, or beneficial owners of 10 percent or more of the stock, or the average daily trading volume of such stock, as determined by the Board, is at least 300 shares.

(c) *Removal from the list.* The Board shall periodically remove from the list any stock that:

(1) Ceases to exist or of which the issuer ceases to exist, or

(2) No longer substantially meets the provisions of paragraph (b) of this section or § 220.2(s).

(d) *Discretionary authority of Board.* Without regard to the other paragraphs of this section, the Board may add to, or omit or remove from the OTC margin stock list, any equity security, if in the judgment of the Board, such action is necessary or appropriate in the public interest.

(e) *Unlawful Representations.* It shall be unlawful for any creditor to make, or cause to be made, any representation to the effect that the inclusion of a security on the list of OTC margin stocks is evidence that the Board or the SEC has in any way passed upon the merits of, or given approval to, such security or any transactions therein. Any statement in an advertisement or other similar communication containing a reference to the Board in connection with the list or stocks on that list shall be an unlawful representation.

§ 220.18 Supplement to Regulation T.

Margin Requirements

The required margin for each security position held in a margin account shall be as follows:

(a) *Margin security except for (b) below:* 50 percent of the current market value of the security.

(b) *Exempted security, registered non-*

VOL 48 ISS 101 MAY 24 1983 UMI

convertible debt security or OTC margin bond: the margin required by the creditor in good faith.

(c) *Short put or short call on an equity security:* 30 percent of the current market value of the underlying security, but not less than $250, adjusted or waived in accordance with section 220.5(c).

(d) *Short sale of nonexempted security:* 150 percent of the current market value of the security or 100 percent of the current market value if a security exchangeable or convertible within 90 calendar days without restriction other than the payment of money into the security sold short is held in the account.

(e) *Short sale of an exempted security:* 100 percent of the current market value of the security plus the margin required by the creditor in good faith.

(f) *Nonmargin, nonexempted security or a long position in any option:* 100 percent of the current market value.

(g) *Short put or short call on an exempted debt security or certificate of deposit:* (1) The amount or other position specified by the rules of the national securities exchange on which the option is traded, provided that all such rules have been approved or amended by the SEC; or

(2) In the case of an over-the-counter option on an exempted debt security that the SEC has not determined to be an exempted security, an amount or other position which the creditor in good faith deems to be equivalent to the margin or cover on comparable exchange-traded options.

(h) *Short put or short call (securities exchange traded) on foreign currency:* The amount, other option position, or foreign currency position specified by the rules of the national securities exchange on which the option is traded, provided that all such rules have been approved or amended by the SEC.

(i) *Short put or short call on a stock index:* The amount or other security positions specified by the rules of the national securities exchange on which the option is traded, provided that all such rules have been approved or amended by the SEC.

By order of the Board of Governors of the Federal Reserve System, May 16, 1983.

William W. Wiles,

Secretary of the Board.

13 CFR Part 101

[Rev. 2-Amdt. 28]

Delegation of Authority To Conduct Program Activities in Field Offices

Correction

In FR Doc. 83-11775 beginning on page 19872 in the issue of Tuesday, May 3, 1983 make the following correction in the **SUMMARY**, paragraph two, line one, "not" should read "now"

BILLING CODE 1505-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 5

Amendments to Commission Standards of Conduct

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: This amends the Commission's Standards of Conduct to authorize certain Commission officials to require employees below Grade GS-13 to file statements of employment and financial interests under the conditions set forth in Office of Personnel Management (OPM) regulations.

DATE: Effective May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Jerome A. Tintle, Office of General Counsel, Federal Trade Commission, Washington, D.C. 20580, (202) 523-3487.

SUPPLEMENTARY INFORMATION: OPM regulations provide that agencies shall require statements of employment and financial interests from, among others, employees classified below GS-13 who are in positions which otherwise meet the criteria of 5 CFR 735.403 (b) or (c); the provision applies when the requirement for submitting statements has been specifically justified in writing to OPM as essential to protect the integrity of the Government and to avoid employee involvement in possible conflicts of interest. 5 CFR 735.403(d). The Commission amends 16 CFR 5.32(j) to conform to this OPM requirement.

Since the amendments relate solely to matters involving agency management and personnel, they are not subject to the notice and comment requirements of the Administrative Procedure Act. 5 U.S.C. 553(a)(2). For the same reason, the requirements of the Regulatory Flexibility Act do not apply. 5 U.S.C. 601(2) (Supp. V 1981).

List of Subjects in 16 CFR Part 5

Administrative practice and procedure, Conflict of interests.

PART 5—[AMENDED]

Accordingly, paragraph (j) of 16 CFR 5.32 is revised to read as follows:

§ 5.32 Statements of employment and financial interests under Executive Order 11222.

* * * * *

(j) The Executive Director, the General Counsel, or a Bureau Director may require any of the following employees under his or her supervision, in addition to those specified in paragraphs (c)—(i) of this section, to file statements pursuant to this section and to submit the statements to him or her:

(1) An employee classified at GS-13 or above, or at a comparable pay level under another authority, whose position meets the criteria established by the Office of Personnel Management in 5 CFR 735.403; and

(2) An employee classified below GS-13, or at a comparable pay level under another authority, who is in a position which otherwise meets the criteria of 5 CFR 735.403 and whose requirement to file statements has been specifically justified in writing by his or her supervising official to the Office of Personnel Management as essential to protect the integrity of the Government and to avoid the employee's involvement in possible conflicts of interest. The names of employees designated to file statements pursuant to this paragraph shall be reported to the General Counsel.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 211

[Release No. SAB-52]

Staff Accounting Bulletin No. 52

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Accounting Bulletin.

SUMMARY: This staff accounting bulletin expresses the staff's views regarding accounting for terminations of overfunded defined benefit pension plans.

DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Lawrence S. Jones, Office of the Chief Accountant (202/272-2158); or Howard P. Hodges, Jr., Division of Corporation Finance (202/272-2553), Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The statements in Staff Accounting Bulletins are not rules or interpretations of the Commission nor are they published as bearing the Commission's official approval. They represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws.

Accounting, Reporting and recordkeeping requirements, Securities.

George A. Fitzsimmons,

Secretary.

PART 211—[AMENDED]

Accordingly, Part. 211 of title 17 of the Code of Federal Regulations is amended by adding Staff Accounting Bulletin No. 52 to the table found in Subpart B.

Staff Accounting Bulletin No. 52

The staff herein adds Section I to Topic 5 of the Staff Accounting Bulletin Series. This section discusses the staff's position on the recognition of gains on termination of overfunded denied benefit pension plans.

Topic 5: Miscellaneous Accounting

* * * * *

I. Terminations of Defined Benefit Pension Plans

Facts: Company A terminates its defined benefit pension plan and replaces it with a defined contribution plan. Pension plan assets in excess of requirements for benefits accumulated under the terminated plan are returned to the company.

Question 1: May the company recognize a gain upon termination of its pension plan and recovery of the excess plan assets?

Interpretive Response: The staff will not object to the recognition of a gain on termination of a company's pension plan if all obligations under the terminated plan are fully funded and the substituted employee benefit arrangements are not linked to the prior plan. The staff does not believe gain recognition is appropriate, however, when benefit provisions under the new plan are based on such factors as past employee service or guaranteed minimum benefits because the substituted plan would in substance be a continuation of the termination plan.

Question 2: Assuming gain recognition is appropriate, how should the gain be presented in the company's income statement?

Interpretive Response: The staff believes that the termination of a pension plan meets the criteria for classification as an extraordinary item under Accounting Principles Board Opinion No. 30. Terminations of pension plans are of an unusual nature and not expected to recur as a consequence of customary and continuing business activities. A company's expectation that it would terminate several pension plans over a few years, for example, through negotiations with employee unions, would not affect the staff's position.

Gains or losses from pension plan terminations which arise in connection with decisions to dispose of a segment of the business or close a plant should be reported in the same manner as the costs related to the discontinued operations or plant closing.

17 CFR Part 241

[Release No. 34-19756]

Interpretations of Rule 16b-3

AGENCY: Securities and Exchange Commission.

ACTION: Publication of interpretations.

SUMMARY: The Commission is setting forth its views on certain interpretive questions arising with respect to Rule 16b-3 as the result of a recent judicial decision. Rule 16b-3 provides an exemption from the short-swing profit recovery provisions of section 16(b) of the Securities Exchange Act of 1934, for certain securities transactions occurring under employee benefit plans not considered within the purpose of section 16(b).

FOR FURTHER INFORMATION CONTACT: William E. Toomey, Office of Chief Counsel, Division of Corporation Finance, Securities and Exchange Commission, Washington, D.C. 20549, (202) 272-2573.

SUPPLEMENTARY INFORMATION: In *Colema Realty Corp.* v. *R. D. Bibow, et al.*,[1] a United States District Court recently held that an amendment to an existing stock option plan permitting the delivery of already owned stock in payment for the exercise of a stock option conferred material benefits on option holders and must be approved by shareholders in order for the plan to retain the exemption provided by Rule 16b-3 [17 CFR 240.16b-3] under the Securities Exchange Act of 1934 (the "Exchange Act") [15 U.S.C. 78a et seq.]. This decision is in conflict with an earlier Commission position on the same issue, and thus has raised substantial questions for issuers attempting to maintain stock option plans in accordance with Rule 16b-3. The Commission wishes to make known its views on certain of these questions for the guidance of those concerned with compliance with the rule.

I. Background

Rule 16b-3[2] was adopted by the Commission to provide an exemption from the short-swing profit recovery provisions of Section 16(b) of the Exchange Act [3] for securities transactions under employee benefit plans not considered within the purposes of Section 16(b). One of the conditions of the rule is that certain types of amendments to a plan must receive the approval of shareholders, including any amendment which would materially increase the benefits accruing to participants under the plan.[4]

In 1979, the Internal Revenue Service ruled that an employee could deliver already owned stock in payment for the exercise of a stock option without recognizing any taxable gain on the unrealized appreciation of the delivered shares. The tax advantages of this ruling, however, were generally thought to be unavailable to employees who were also officers or directors of a company and subject to Section 16(b) of the Exchange Act, since the stock-for-stock exercise appeared to involve the simultaneous purchase and sale of an equity security subject to the short-swing profit recovery provisions of Section 16(b).

The Commission received a number of requests for exemptive relief from the possible application of Section 16(b) to this new compensation technique. In April 1980, the Commission proposed

[1] *Colema Realty Corp.* v. *R. D. Bibow, et al.*, No. H-82-430 (D.Conn. Feb. 9, 1983).

[2] Rule 16b-3 is discussed in some detail in Section IV. C. of Release No. 34-18114 (September 23, 1981) [46 FR 46147] (October 1, 1981).

[3] Section 16(b) provides in part that any profit realized by an insider as a result of a purchase and sale or sale and purchase of an equity security of his company, made within a six-month period shall inure to the company.

[4] Rule 16b-3[a][2][ii][A].

VOL 48 ISS 101 MAY 24 1983 UMI

the amendment of Rule 16b–3 to exempt from Section 16(b) the mechanical transactions of exchange necessary to exercise an option through the delivery of already owned stock.[5] In the release proposing the change, the Commission noted that without such an exemption, the legitimate use of certain types of employee compensation plans would be largely frustrated, and that the safeguards inherent in Rule 16b–3 made the opportunities for abuse slight. The Commission also expressed the view that, under the proposal, an amendment to an existing stock option plan allowing the delivery of already owned stock upon exercise of an option would not be a material amendment to the plan requiring stockholder approval, since it would not result in any additional remuneration for directors and officers not already contemplated by the plan.

The release proposing the amendment for comment specifically requested comment with respect to the Commission's view on the materiality of an implementing plan amendment and the need for shareholder approval thereof. The release adopting the proposed amendments stated that virtually all public comment had been favorable, and that every commentator who had addressed the issue of materiality of plan amendments had agreed with the Commission's opinion that such amendments did not materially increase participants' benefits and therefore did not necessitate shareholder approval under Rule 16b–3.[6] Accordingly, the Commission reaffirmed its view that amendments to existing stock option plans permitting the stock-for-stock exercise of options need not be submitted to shareholders for approval under Rule 16b–3.

II. The Colema Decision

The *Colema* case, in brief, involved a shareholder derivative suit alleging that the delivery of already owned stock as payment for an option exercise, and the exercise of that option through a multiple series of exchanges of shares, resulted in short-swing profits for officers that should be returned to the company. The defendants contended, among other things, that the exchange transactions were specifically exempted from Section 16(b) liability by the new, stock-for-stock amendments to Rule 16b–3. The District Court disagreed, indicating that amendments to stock option plans permitting the use of the stock delivery technique conferred material benefits upon plan participants, and thus required shareholder approval in accordance with Rule 16b–3. In *Colema,* shareholder approval had not been obtained, and the court held that the exemption provided by Rule 16b–3 was not available to the defendants. The court took notice of the Commission's contrary position on the materiality of such amendments for purposes of the rule, but did not find it controlling. The court did find, however, that the defendants had acted in good faith reliance on Commission rules and regulations, and so were immune from liability under Section 23(a) of the Exchange Act.[7]

III. The Commission's Views

The Commission continues to believe that its determination not to require shareholder approval of plan amendments designed to implement stock-for-stock exercise of options was based on cogent reasons, among them the fact that officer and director participants do not receive any additional remuneration by virtue of such arrangements. While rulemaking action with respect to the issue raised by *Colema* is not being considered at this time, this issue will be included in the Commission's review of its rules under Section 16 which it anticipates conducting later this year. Until such review is completed, the Commission will take the position that stockholder approval is required under Rule 16b–3 of plan amendments allowing the delivery of stock to exercise options.

The Commission recognizes that issuers with unapproved stock delivery amendments are faced with the problem of devising a method to eliminate liability under Section 16(b) during the interim period between the date of the *Colema* decision (February 9, 1983) and the date stockholder approval of the amendments is obtained. In the Commission's view, the exemption provided by Rule 16b–3 would be preserved if issuers submit the stock delivery amendments for stockholder approval as soon as practicable (usually at the next meeting of security holders, whether annual or special) and make all transactions occurring under such amendments after the *Colema* decision contingent on stockholder approval of the amendments and ratification of the interim transactions.[8] Accordingly, if such approval and ratification are not forthcoming, the transactions would be rescinded.

The Commission believes it is appropriate to address two other issues indirectly raised by the *Colema* decision. The first is whether the Rule 16b–3 exemption is lost for all transactions under a plan which contains a stock delivery amendment that has not been approved by stockholders.[9] The Commission does not believe such a result is required by the rule or consonant with its intent where stockholder approval of such an amendment was not solicited because of reliance upon the Commission's position on the matter. In the Commission's view, it would be inappropriate to subject plan participants to liability for transactions unrelated to stock delivery amendments under the above circumstances.

The second issue is whether the *Colema* decision affects the availability of Rule 16b–3 for the so-called "pyramiding" of shares. The *Colema* case involved pyramiding, which is a technique under which an optionee requests the issuer to automatically apply the shares received upon the exercise of a portion of a stock option to satisfy the exercise price for additional portions of the option. The effect of pyramiding is to allow a participant to deliver a relatively small number of shares in satisfaction of the exercise price of even the largest option. The Commission believes that the use of pyramiding is within the meaning of Rule 16b–3, so long as the technique yields an optionee no more than the appreciation or "spread" inherent in the very exercise of the option. This position, of course, is based on the assumption that shareholder approval will be obtained, after appropriate disclosure of the pyramiding technique, and that all other applicable conditions of the rule will be satisfied.

[5] Release No. 34–16770 (April 30, 1980) [45 FR 29663].

[6] Release No. 34–17080 (August 21, 1980) [45 FR 57389].

[7] Section 23(a) provides in pertinent part that liabilities imposed by the Exchange Act shall not apply to any act done or omitted in good faith in conformity with a rule, regulation or order of the Commission. It is unclear, however, to what extent reliance may be placed on Section 23(a) for transactions under unapproved stock delivery amendments occurring after February 9, 1983, the date of the court's decision.

[8] There also would appear to be other measures that similarly would preserve the Rule 16b–3 exemption until stockholder approval could be obtained. For example, an issuer may retain the stock delivery provisions but limit their use to persons who are not officers or directors. This measure is based on the principle, articulated in Release No. 34–13659 (June 2, 1977) [42 FR 33283] (June 30, 1977), that a plan which is bifurcated in its treatment of insiders and non-insiders will be in compliance with Rule 16b–3, so long as the transactions with insiders comply with the applicable requirements of the rule.

[9] Of course, if the stock delivery amendment is rescinded until such time as it is approved by stockholders, there clearly would be no issue regarding the availability of Rule 16b–3 for transactions under the plan occurring after the rescission.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79–76–163 (Colorado–31); Order No. 300]

High-Cost Gas Produced From Tight Formations; Final Rule

Issued: May 19, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determined that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This final order adopts the recommendation of the Colorado Oil and Gas Conservation Commission that a portion of the Mesaverde Formation, located in Rio Blanco County, Colorado be designated as a tight formation under § 271.703(d).

EFFECTIVE DATE: This rule is effective June 20, 1983.

FOR FURTHER INFORMATION CONTACT: Jane M. Oliver, (202) 357–357–8316 or Victor Zabel, (202) 357–8616.

SUPPLEMENTARY INFORMATION:

The Commission hereby amends § 271.703(d) of its regulations to include a portion of the Mesaverde Formation as located in Rio Blanco County, Colorado, as a designated tight formation eligible for incentive pricing under § 271.703. The amendment was proposed in a Notice of Proposed Rulemaking by the Director, Office of Pipeline and Producer Regulation, issued January 17, 1983 (48 FR 2778, January 21, 1983),[1] based on a recommendation by the Colorado Oil and Gas Conservation Commission (Colorado) in accordance with § 271.703, that a portion of the Mesaverde Formation be designated as a tight formation.

Evidence submitted by Colorado supports the assertion that the recommended portion of the Mesaverde Formation meets the guidelines contained in § 271.703(c)(2).[2] The Commission adopts the Colorado recommendation.

This amendment shall become effective June 20, 1983.

[Docket No. RM79–76–159 (Texas—29); Order No. 299]

High-Cost Gas Produced From Tight Formations; Final Rule

Issued: May 19, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determined that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This final order adopts the recommendation of the Railroad Commission of Texas that the Vicksburg Formation in the Portilla (9000') Field be designated as a tight formation under § 271.703(d).

EFFECTIVE DATE: This rule is effective June 20, 1983.

FOR FURTHER INFORMATION CONTACT: Steven Ross, (202) 357–8571, or Walter W. Lawson, (202) 357–8556.

SUPPLEMENTARY INFORMATION:

The Commission hereby amends § 271.703(d) of its regulations to include the Vicksburg Formation in the Portilla (9000') Field, in San Patricio County, Texas, as a designated tight formation eligible for incentive pricing under § 271.703. The amendment was proposed in a Notice of Proposed Rulemaking by the Director, Office of Pipeline and Producer Regulation, issued December 16, 1982, 47 FR 57057 (December 22, 1982)[1] based on a recommendation by the Railroad Commission of Texas (Texas), in accordance with § 271.703, that the Vicksbury Formation in Portilla (9000') Field, be designated as a tight formation.

Evidence submitted by Texas supports the assertion that the Vicksburg Formation in the Portilla (9000') Field meets the guidelines contained in § 271.703(c)(2). The Commission adopts the Texas recommendation.

This amendment shall become effective June 20, 1983.

In consideration of the foregoing, Part 271 of Subchapter H, Chapter I, *Code of Federal Regulations*, is amended as set forth below.

By the Commission.

Kenneth F. Plumb,

Secretary.

PART 271—[AMENDED]

Section 271.703 is amended by adding subparagraph (d) (128) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(128) *Vicksburg Formation in the Portilla (9000') Field in Texas.* RM79–76 (Texas—29).

(i) *Delineation of formation.* The Vicksburg Formation in the Portilla (9000') Field is located in the northern portion of San Patricio County, Texas, Railroad Commission District 4, approximately six miles northeast of Sinton, Texas, and underlies 15,000 acres of land bounded by the Chiltipin Creek to the south, U.S. Highway 77 to the west, and the Aransas River to the north. The eastern boundary is a line extending from the Chiltipin Creek on the south to the Aransas River on the north and approximately bisecting the following surveys: Isaac Clover A–89, N.J. Devenny A–105, and Ralph Ellis Hrs. A–115.

(ii) *Depth.* The depth to the top of the Vicksburg Formation in the Portilla (9000') Field varies between 8,600 feet and 9,000 feet and the formation extends to depths in excess of 11,000 feet.

18 CFR Part 271

[Docket No. RM79–76–120 (Oklahoma—2)]

High-Cost Gas Produced from Tight Formation Oklahoma; Final Rule

May 5, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final Rule; correction.

SUMMARY: This document corrects a final rule that concerned high-cost gas produced from tight formations, Docket No. RM79–76–120 (Oklahoma—2). The final rule appeared in the **Federal Register** on February 1, 1983 (48 FR 4461), and designated an incorrect paragraph number under § 271.703(d) of the Commission's regulations (18 CFR 271.703(d)).

FOR FURTHER INFORMATION CONTACT: Jane M. Oliver, Office of General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, (202) 357–8316.

The following restates, and corrects the paragraph number in FR Doc. 83–2636, appearing on page 4462. On page 4462, the paragraph allocated for the designation of the "Cleveland Sand of the Kansas City Group" in Oklahoma as a tight formation should read as follows:

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraph (d)(116) to read as follows:

§ 271.703 tight formations.

* * * * *

(d) *Designated Tight formations.*

* * * * *

(116) *"Cleveland Sand" of the "Kansas City Group" in Oklahoma.* RM79–76–120 (Oklahoma—2).

* * * * *

Kenneth F. Plumb,

Secretary.

18 CFR Part 271

[Docket No. RM79–76 (Texas—11 Addition); Order No. 208]

High-Cost Gas Produced From Tight Formations; Correction

Issued: February 22, 1982

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; correction.

SUMMARY: This document corrects the subparagraph number assigned to the designated tight formation, the Wilcox Formation in Texas, Docket No. RM79–76 (Texas—11) and (Texas—11 Addition) as it was issued by the Commission in Order No. 208 and appeared in the **Federal Register** on February 12, 1982 at 47 FR 6425.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, Office of General Counsel, 825 N. Capitol Street, N.E., Washington, D.C. 20426, (202) 357–8511.

SUPPLEMENTARY INFORMATION: A correction is made in FR Doc. No. 82–3973, as it appears in the center column of page 6425 in the issue of February 12, 1982, so that in the revision of § 271.703, the reference is to paragraph (d)(63) instead of (d)(58), as it appears both in the sentence announcing the revision of the regulation and in the regulation itself appearing in that column.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 416

[Regulations No. 16]

Supplemental Security Income for the Aged, Blind, and Disabled; Subpart K—Income

AGENCY: Social Security Administration, HHS.

ACTION: Final rule.

SUMMARY: These regulations implement section 101(a)(2)(B) of Pub. L. 96–222 and section 202 of Pub. L. 96–265 which amend section 1612(a)(1) of the Social Security Act. The regulations provide that certain payments received due to the earned income tax credit provisions of section 43 of the Internal Revenue Code will be included in the definition of earned income. These regulations provide further that payment for services performed in a sheltered workshop or work activities center also constitutes earned income.

EFFECTIVE DATE: These regulations are effective May 24, 1983. The statutes which these rules implement establish that all sheltered workshop payments are to be treated as earned income beginning October 1, 1980, and earned income tax credit payments are to be treated as earned income beginning January 1, 1980.

FOR FURTHER INFORMATION CONTACT: Rita Hauth, Legal Assistant, 6401 Security Boulevard, Baltimore, Maryland 21235, (301) 594–7112.

SUPPLEMENTARY INFORMATION: We are revising our recodified regulations on income under the Supplemental Security Income program, Part 416 of the Code of Federal Regulations. The recodified regulations, Subpart K of Part 416, were published October 3, 1980 (45 FR 65541).

VOL 48 ISS 101 MY 24 1983 UMI

The notice of proposed rulemaking (NPRM) which proposed amending Subpart K to include the rules described in these final regulations was published January 19, 1981 (46 FR 4949). Only one comment has been received since publication of the NPRM. A State Department of Public Welfare praised the clarity and simplicity of the rules.

These regulations are necessary because of legislation. The effect of the legislation is significant because the amount of income individuals have is a factor in determining eligibility for SSI and the amount of benefits payable. The law and regulations classify income as either earned or unearned income and provide greater exclusions from earned income than from unearned income. Thus, a beneficiary who receives a given amount of earned income can receive a higher benefit than another who receives a like amount of unearned income.

Sections 416.1110 and 416.1111 of the regulations are amended to include two changes in the definition of earned income because of the enactment of Pub. L. 96–222 and Pub. L. 96–265. The amended § 416.1110 describes the new types of earned income and § 416.1111 tells how we count that income to determine the amount of benefits payable.

Pub. L. 96–222, section 101(a)(2)(B), added a new type of earned income for SSI purposes—payments received due to the earned income credit provisions of section 43 of the Internal Revenue Code of 1954 as Federal income tax refunds or as advance payments of these credits made by employers under section 3507 of the same code. These payments are earned income as of January 1, 1980. The retroactive effective date of this law (Pub. L. 96–222 was enacted April 1, 1980) fills the gap that occurred because section 105(f) of the prior statute, Pub. L. 95–600, excluded these payments from income for SSI purposes only until December 31, 1979. If the new statute had not been enacted, SSA would have counted the earned income credit payments as unearned income after the exclusions expired. Individuals who received payments of earned income tax credits in 1980 or later would have received lower SSI benefits since unearned income is subject to lesser exclusions than earned income.

Earned income tax credits are available to people who meet certain conditions of family composition and amount of income. The credit payments can be received in a lump sum subsequent to the filing of an income tax return as an addition to any regular income tax refund due the individual. As an alternative, they may be advanced to individuals by employers over a period of employment during the tax year under procedures established by the Internal Revenue Service. If the advance payments turn out to be incorrect because the employer advanced more than was due, SSA adjusts benefits to make up for the resulting SSI underpayment at the time the correct amount is established. The new statute states that the adjustment will be made in benefits payable to the individual. SSA will carry out this provision under the rules in Subpart E of the Regulations (20 CFR, Part 416). These rules provide that an SSI underpayment will be made to the underpaid individual or, if the individual is deceased, to his or her eligible spouse.

Pub. L. 96–265, section 202, states that beginning October 1, 1980, payment for services performed in a sheltered workshop or work activities center constitutes earned income. Since all payments for these services are not earned income, there is no need to distinguish between sheltered workshops or work activities centers and other employers. Prior to Pub. L. 96–265, these payments were either earned income or unearned income depending on whether the individual's effort constituted employment or therapy. Thus, if two beneficiaries received payments in the same workshop, one may have been receiving earned income as an employee and the other unearned income because he or she was in a rehabilitative training program. The second beneficiary received a lower SSI benefit because unearned income is subject to fewer exclusions. Beneficiaries and agencies that serve the handicapped found the different treatment hard to understand and considered it unfair. SSA was obliged to develop cases to determine whether the income received in a sheltered workshop or work activities center was earned or unearned. The new law and regulations advantage beneficiaries as well as end these administrative problems.

We have made minor editorial changes in the regulations as they were published with the Notice of Proposed Rulemaking and have deleted the effective dates that were included in § 416.1110. The effective dates have been deleted because they had only temporary value.

Regulatory Procedures

Executive Order No. 12291—These regulations have been reviewed under Executive Order 12291 and do not meet any of the criteria for a major regulation. SSA estimates that the provision of Pub. L. 96–222 that provides that earned income tax credit payments are earned income will result in $4 million in program savings each year and administrative costs will be negligible. SSA estimates that the provision of Pub. L. 96–265 that provides that sheltered workshop payments are earned income will come to $2 million per year in program costs and will create no additional administrative costs. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act of 1980—These regulations impose no additional reporting and recordkeeping requirement requiring OMB clearance. SSA has clearance for form SSA–8150 (OMB No. 0960–0128) on which beneficiaries are to report income.

Regulatory Flexibility Act—We certify that these regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities because they primarily affect individuals with some impact on States. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96–354, the Regulatory Flexibility Act, is not required.

John A. Svahn,

Commissioner of Social Security.

Approved: April 26, 1983.

Margaret M. Heckler,

Secretary of Health and Human Services.

Part 416 of Title 20 of the Code of Federal Regulations is amended as follows:

PART 416—[AMENDED]

1. The authority citation for Subpart K of Part 416 is revised to read as follows:

Authority: Secs. 1102, 1601, 1602, 1611, 1612, 1613, 1614 and 1631 of the Social Security Act as amended; Sec. 211 of Pub. L. 93–66; 49 Stat. 647, as amended, 86 Stat. 1465, 1466, 1468, 1470, 1471, 1473, 1475, 87 Stat. 154; 42 U.S.C. 1302, 1381, 1381a, 1382, 1382a, 1382b, 1383c and 1383. Sec. 202 of Pub. L. 96–265, 94 Stat. 449; 42 U.S.C. 1382c.

2. Section 416.1110 is amended by revising the material preceding paragraph (a) and by adding new paragraphs (c) and (d) to read as follows:

§ 416.1110 What is earned income.

Earned income may be in cash or in kind and consists of the following types of payments:

* * * * *

(c) *Refunds of Federal income taxes and advance payments by employers made in accordance with the earned income credit provisions of the Internal Revenue Code.* Refunds on account of earned income credits are payments made to you under the provisions of section 43 of the Internal Revenue Code of 1954, as amended. These "refunds" may be greater than taxes you have paid. You may receive earned income tax credit payments along with any other Federal income tax refund you receive because of overpayment of your income tax, (Federal income tax refunds made on the basis of taxes you have already paid are not income to you as stated in § 416.1103(d).) Advance payments of earned income tax credits are made by your employer under the provisions of section 3507 of the same code. You can receive earned income tax credit payments only if you meet certain requirements of family composition and income limits.

(d) *Payments for services performed in a sheltered workshop or work activities center.* Payments for services performed in a sheltered workshop or work activities center are what you receive for participating in a program designed to help you become self-supporting.

3. Section 416.1111 is being revised by redesignating paragraph (c) as paragraph (e) and adding new paragraphs (c) and (d) to read as follows:

§ 416.1111 How we count earned income.

* * * * *

(c) *Refunds of Federal income taxes and advance payments by employers made under the earned income credit provisions of the Internal Revenue Code.* We count payments advanced by your employer and refunds of Federal income taxes made under the earned income credit provisions of the Internal Revenue Code of 1954 in the quarters in which you receive them. You receive refunds in a single quarter if they are paid as a result of the filing of your income tax return and as an addition to the refund of taxes withheld by your employer. You receive payments advanced by your employer along with your wages spread over the period of your employment. If we do not pay you the correct amount of benefits (that is, we withheld too much from your benefits) because your employer has advanced you more than was actually due, SSA will make up the difference in benefits when the correct amount of your earned income credits is determined by the Internal Revenue Service (see § 416.542 for the rules on underpayments). If your employer advanced less than you were actually due we will count the additional amount in the quarter in which you receive it from Internal Revenue Service.

(d) *Payments for services in a sheltered workshop or activities center.* We count payments you receive for service performed in a sheltered workshop or work activities center when you receive them or when they are set aside for your use. We determine the amount of the payments for each calendar quarter.

* * * * *

Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Trimethoprim and Sulfadiazine Sterile Suspension

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Syntex Agribusiness, Inc., providing for the safe and effective use of a combination antibacterial drug for treating dogs.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Sandra K. Woods, Bureau of Veterinary Medicine (HFV–114), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: Syntex Agribusiness, Inc., 3401 Hillview Ave., Palo Alto, CA 94304, filed NADA 132–486 providing for subcutaneous use of Di-Trim 24% Injection (a sterile suspension containing 40 milligrams (mg) of trimethoprim and 200 mg of sulfadiazine per milliliter) for the treatment of bacterial infections of dogs. The product is indicated where control of bacterial infections is required during treatment of acute urinary tract infections, acute bacterial complications of distemper, acute respiratory tract infections, acute alimentary tract infections, wound infections and

VOL 48 ISS 101 MAY 24 1983 UMI

abscesses, and acute septicemia due to *Streptococcus zooepidemicus*. The NADA is approved and the regulations are amended to reflect the approval.

The basis of this approval is discussed in the freedom of information summary (FOI summary). In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 522

BILLING CODE 4160-01-M

---

21 CFR PART 610

[Docket No. 81N-0116]

Hepatitis Requirements; Amendment of Restrictions on Use as Injectable Biological Products

AGENCY: Food and Drug Administration.

ACTION: Final Rule.

SUMMARY: The Food and Drug Administration (FDA) is amending restrictions on the collection and use of blood, plasma, or serum that has been shown to be reactive for hepatitis B surface antigen (HBsAg). Current regulations do not permit use of reactive blood, plasma, or serum in the manufacture of injectable biological products. The agency is amending the regulations to permit the collection and use of blood, plasma, or serum reactive for HBsAg for further manufacture into hepatitis B vaccine.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph Wilczek, National Center for Drugs and Biologics (HFN–813), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20205, 301–443–1306.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 7, 1981 (46 FR 35121), FDA proposed to amend §§ 610.40 and 610.41 of the biologics regulations (21 CFR 610.40 and 610.41) to permit the collection and use of blood, plasma, or serum reactive for HBsAg for further manufacture into hepatitis B vaccine. Data submitted to the agency demonstrate that blood, plasma, or serum that is reactive for HBsAg can be used effectively to produce an inactivated vaccine against hepatitis B. In November 1981, the Commissioner of Food and Drugs announced the approval of the first licensed hepatitis B vaccine to combat hepatitis B infections, a major public health problem in the United States.

Interested persons were given until September 8, 1981, to submit written comments regarding this proposal. Five letters, some containing a number of comments, were received on the proposal, and one letter fully endorsed the proposal. A summary of the comments and the agency's responses are as follows:

1. Two comments objected to the continuation of the requirements contained in § 610.40(d) (1)(v) and (2)(iv) that the Office of Biologics be notified in writing of each shipment of hepatitis reactive source blood, plasma, or serum.

The agency advises that any amendment of the shipment reporting requirements is beyond the scope of this final rulemaking. However, the agency believes that the comment has merit and is exploring the possibility of deleting hepatitis shipment reporting requirements. Accordingly, FDA is rejecting the comment at this time.

2. One comment stated that the proposed regulations appeared to be at variance with an agency guideline, issued in April 1981 and revised in August 1981, for plasmapheresing HBsAg reactive donors. The guideline provides that hepatitis reactive source blood, plasma, or serum, can be labeled "Collected from a donor known to be reactive for hepatitis B surface antigen. This plasma is presumed to be infectious". This cautionary labeling statement permits a source supplier to assume that source material collected from a known positive donor is reactive for hepatitis B without first having to perform confirmatory hepatitis testing. In the proposed rule, however, FDA proposed to require that labeling on such source material or final product state that the source blood, plasma, or serum, was reactive when tested for HBsAg and may transmit viral hepatitis. The proposed cautionary labeling statement indicates that confirmatory hepatitis testing was performed on source material and it was found to be reactive.

FDA agrees with the comment's observation regarding a conflict between the guideline and the proposal. FDA believes that the labeling alternative set forth in the April 1981 guideline provides adequate notice to handlers and users of the plasma that the plasma may be infectious. Therefore, in the final rule, the agency is allowing use of an alternative cautionary labeling statement equivalent to that found in the guideline. The agency is also amending § 610.40(d) (1)(v) and (2)(iv) of the biologics regulations to make clear that, if properly labeled, shipments of such plasma may be made without prior testing for HBsAg. Section 610.40 of the final rule has been amended in paragraph (d) (1)(v) and (2)(iv) by adding the sentence "Such shipments shall not be subject to the requirements of paragraph (b)(3) of this section".

3. One comment stated that the current regulations permit donors with past histories of being reactive for HBsAg and currently with anti-HBs antibodies to serve as a source of hepatitis B immune globulin, an injectable product. The comment noted that the proposed rule would permit use of these donors only for the preparation of in vitro diagnostic products and not for the preparation of hepatitis B immune globulin.

The agency acknowledges that it inadvertently proposed to change the requirements of the regulation as described by the comment. Therefore, the agency is amending § 610.41 of the final rule to permit donors with anti-HBs antibodies to serve as a source for hepatitis B immune globulin.

4. One comment stated that proposed § 610.41 does not clearly allow persons with a prior history of clinical viral hepatitis and persisting HBsAg infection to serve as a source of HBsAg for hepatitis B vaccine production or preparation of diagnostic products.

The agency intended that the proposed rule permit collection of blood or plasma from such donors provided that adequate donor protection and personnel safety procedures are followed, e.g., the agency guideline of August 1981 for plasmapheresing HBsAg reactive donors. For clarification, in the final rule, the agency is amending § 610.41 to state "A person known to have previously tested positive for hepatitis B surface antigen, testing positive, or both, * * *" rather than "A person testing positive or known to have previously tested positive * * *."

5. One comment stated that the proposed rule does not provide for the use of large quantities of blood, plasma, or serum reactive for HBsAg for research and development of other new vaccines or similar products either in the United States or in other countries. The comment suggested that hepatitis B reactive source material should be available for interstate and international shipments for the manufacture of unlicensed vaccines for preclinical and clinical trials.

The agency agrees with this comment. Accordingly, in the final rule, the agency is removing the word "licensed" from the phrase "licensed hepatitis B vaccine" in proposed §§ 610.40 (d)(1) and 610.41. This revision will permit shipment of hepatitis B source material to manufacturers who are not yet licensed or are awaiting licensure, and who intend to manufacture biological products derived from hepatitis B reactive source material.

6. One comment asked whether recipients of hepatitis B vaccine may serve as a source of blood donations for hepatitis B immune globulin within 6 months of vaccination. Current Source Plasma (Human) regulations in § 640.63(c)(13) permit collection of plasma containing antibody to hepatitis B antigen within such a time period.

The agency advises that prospective blood donors who have been immunized with the hepatitis B vaccine potentially could become blood donors for hepatitis B immune globulin within 6 months of vaccination. The recipients of an inactivated hepatitis B vaccine are not precluded from donating blood as a consequence of the vaccination procedure.

Accordingly, FDA is amending restrictions on the collection and use of blood, plasma, or serum that has been shown or is presumed to be reactive to HBsAg to permit the use of such products in the manufacture of hepatitis B vaccine. Further, FDA is making minor clarifying changes in the regulation.

The agency has determined pursuant to 21 CFR 25.24(d)(10) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Paperwork Reduction Act of 1980

Section 610.40 (d) (1) and (2) of this final rule contains information collection requirements that were submitted for review and approval to the Office of Management and Budget (OMB), as required by section 3507 of the Paperwork Reduction Act of 1980. The requirements were approved and assigned OMB control number 0910–0136. In this final rule, FDA is continuing these approved information collection requirements, but is providing more flexible requirements for certain blood products that are reactive for hepatitis B surface antigen to allow use of such products for further manufacture into hepatitis B vaccine.

The agency has examined the economic impact of this final rule in accordance with Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96–354). The agency concludes that this rule will not result in any increase in the cost of biological products being regulated, and that it may serve to decrease the production cost of hepatitis B vaccine by increasing the availability of source material for its manufacture. There were no public comments on the proposed rule in response to the initial regulatory flexibility analysis. The agency believes that the final rule will not have a significant impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act. The final rule removes restrictions placed on the collection and use of blood, plasma, or serum reactive for HBsAg so that a potential life-saving vaccine may be manufactured. The agency certifies that a final regulatory flexibility analysis is not warranted.

List of Subjects in 21 CFR Part 610

Biologics, Labeling.

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Part 610 is amended as follows:

PART 610—GENERAL BIOLOGICAL PRODUCTS STANDARDS

1. By revising paragraph (d) and adding paragraph (f) of § 610.40 to read as follows:

§ 610.40 Test for hepatitis B surface antigen.

* * * * *

(d) *Restrictions on use.* Blood, plasma, or serum that is reactive when tested for hepatitis B surface antigen or that was collected from a donor known to be reactive for hepatitis B surface antigen shall not be used in manufacturing biological products except as provided in paragraph (d) (1) and (2) of this section.

(1) *Injectable biological products and licensed in vitro diagnostic biological products.* Blood, plasma, or serum that is reactive when tested for hepatitis B surface antigen or that was collected from a donor known to be reactive for hepatitis B surface antigen may be used in manufacturing hepatitis B vaccine and licensed in vitro diagnostic biological products if all of the following conditions are met:

(i) The final product cannot be prepared from blood, plasma, or serum that is nonreactive when tested for hepatitis B surface antigen, due either to the nature or to the scarcity of the final product.

(ii) The label of the source blood, plasma, or serum conspicuously states either that it is reactive when tested for hepatitis B surface antigen and it may transmit viral hepatitis; or that the source blood, plasma, or serum was collected from a donor known to be reactive for hepatitis B surface antigen and it may transmit viral hepatitis, although confirmatory hepatitis testing has not been done.

(iii) The package label of the licensed in vitro diagnostic biological product prepared from such blood, plasma, or serum states conspicuously that either the product was prepared from source material that was reactive when tested for hepatitis B surface antigen and it may transmit viral hepatitis; or that the source material was collected from a donor known to be reactive for hepatitis B surface antigen and it may transmit viral hepatitis, although confirmatory hepatitis testing has not been done.

(iv) The package label of the licensed injectable biological product prepared from such blood, plasma, or serum states that the product has been inactivated.

(v) The Director, Office of Biologics (HFN–800), National Center for Drugs and Biologics, Food and Drug

VOL 48 ISS 101 MY 24 1983 UMI

Administration, 8800 Rockville Pike, Bethesda MD 20205, is notified in writing at the time of the shipment, or in the case of repetitive shipments, or April 1 and October 1 of each year, of each shipment of source blood, plasma, or serum for manufacture into hepatitis B vaccine or into a licensed in vitro diagnostic biological product. Such shipments shall not be subject to the requirements of paragraph (b)(3) of this section. Each notification shall identify the kind and amount of source material shipped, the name and address of the consignee, the date of shipment, and the manner in which the source material is labeled.

(2) *Unlicensed in vitro diagnostic biological products.* Blood, plasma, or serum that is reactive when tested for hepatitis B surface antigen or that was collected from a donor known to be reactive for hepatitis B surface antigen may be used in manufacturing unlicensed in vitro diagnostic biological products including clinical chemistry control reagents if all of the following conditions are met:

(i) The final product cannot be prepared from blood, plasma, or serum that is nonreactive when tested for hepatitis B surface antigen, due either to the nature or to the scarcity of the final product.

(ii) The label of the source blood, plasma, or serum states conspicuously that either it is reactive when tested for hepatitis B surface antigen and it may transmit viral hepatitis; or that the source blood, plasma, or serum was collected from a donor known to be reactive for hepatitis B surface antigen and it may transmit viral hepatitis, although confirmatory hepatitis testing has not been done.

(iii) The manufacturer of the source blood, plasma, or serum obtains written assurance from the manufacturer(s) of the final unlicensed product that package labels of all unlicensed products will conspicuously state, as required by § 809.10(a)(4) of this chapter, that the product was prepared from blood, plasma, or serum that was reactive when tested for hepatitis B surface antigen and it may transmit viral hepatitis; or that the source material was collected from a donor known to be reactive for hepatitis B surface antigen and it may transmit viral hepatitis, although confirmatory hepatitis testing has not been done.

(iv) At the time of shipment, the Director, Office of Biologics (HFN–800), National Center for Drugs and Biologics, Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20205, is notified in writing of each shipment of source blood, plasma, or serum signifying the kind and the amount of source material shipped, the name and address of the consignee, the date of shipment, and the manner in which such source material was labeled. Such shipments shall not be subject to the requirements of paragraph (b)(3) of this section.

* * * * *

(f) The information collection requirements in paragraph (d) of this section were approved by the Office of Management and Budget and assigned OMB control number 0910–0136.

2. By revising § 610.41 to read as follows:

§ 610.41 History of hepatitis B surface antigen.

A person known to have previously tested positive for hepatitis B surface antigen, testing positive, or both, may not serve as a donor of human blood, plasma, or serum, except that under § 640.75 of this chapter, such a donor may serve as a source of hepatitis B surface antigen for the manufacture of hepatitis B vaccine or the preparation of a diagnostic product for laboratory tests, or a person known to have previously tested positive for hepatitis B surface antigen may serve as a source of antibody to hepatitis B surface antigen for the preparation of a biological product or a diagnostic product for laboratory tests.

Effective date. This regulation is effective May 24, 1983.

(Sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262))

Dated: May 9, 1983.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Ch. I

[FHWA Docket No. 83-4, Notice No. 7]

Truck Size Policy Statement; Cancellation of Certain Interim Truck Route Designations in the State of Connecticut

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Modification of policy statement.

SUMMARY: On April 5, 1983 (48 FR 14844), the FHWA made an interim designation of certain Federal-aid primary system highways in each State that must be made available to certain size trucks for the period from April 6 through October 3, 1983. By this notice the FHWA is canceling the interim designation of those primary system highways in the State of Connecticut that had not been designated by that State. The agency will address the interim designation for qualifying primary system highways in Connecticut in a separate proceeding, which will be instituted in the near future.

EFFECTIVE DATE: The modifications are effective May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Sheldon G. Strickland, Office of Highway Planning, (202) 426–0153, or Mr. David C. Oliver, Office of the Chief Counsel, (202) 426–0825, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are 7:30 a.m. to 4:00 p.m. ET, Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: On April 5, 1983 (48 FR 14844), the FHWA published a notice of policy statement that designated, on an interim basis, qualifying Federal-aid primary system (FAP) routes available to certain size vehicles pursuant to sections 411 and 416 of the Surface Transportation Assistance Act of 1982 (STAA) (Pub. L. 97–424, 96 Stat. 2097), as amended by Pub. L. 98–17. On the same date, the Governor of the State of Connecticut signed into law Connecticut Substitute Bill 6018 (SB 6018). SB 6018 purports to prohibit the operation of certain vehicles authorized by the STAA on public highways in Connecticut. The terms of the Connecticut statute directly conflict with the STAA.

The Federal Government expects to commence litigation against the State of Connecticut in order to enjoin those provisions of SB 6018 that directly conflict with Federal law. In order to clarify the issues in that litigation, FHWA is cancelling the interim designation of all FAP routes added by FHWA in the April 5 notice beyond those previously proposed for designation by the State of Connecticut. The issue of an interim designation primary system in Connecticut will be addressed in a rulemaking proceeding that will be instituted in the near future. At that time, the State and other interested parties will be able to submit comments on FHWA proposals for interim designations.

We wish to emphasize that, pursuant to the clear language of the STAA, the entire Interstate System in Connecticut remains open to the trucks authorized by the STAA. In addition, so that the public is aware of which highways will be open to these vehicles, we are setting out, in an Appendix to this notice, the FAP highways in Connecticut on which the trucks may operate.

Issued on May 20, 1983.

R. A. Barnhart,

Federal Highway Administrator.

BILLING CODE 4910-22-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 888

[Docket No. R-83-1074]

Section 8—Fair Market Rents for New Construction and Substantial Rehabilitation—All Market Areas

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of effective date.

SUMMARY: This document announces the effective date for the interim rule published in the **Federal Register** on April 15, 1983 (48 FR 16424) which amends the Section 8 Fair Market Rents applicable to New Construction and Substantial Rehabilitation for all market areas, in compliance with the requirements of Section 8(c)(1) of the U.S. Housing Act of 1937. The rule provided for a 30-day public comment period from the date of publication, and the effective date provision of the rule stated that, after the comment due date of May 16, 1983, a notice of the effective date of the rule would be published in the **Federal Register**.

On the basis of its consideration of the comments received during the public comment period, HUD has determined not to make any changes at this time in the Fair Market Rents published on April 15, 1983. Accordingly, all of the Fair Market Rents contained in Schedule A, as published in the **Federal Register** on April 15, 1983, will become effective as provided under "Effective Date", below.

However, HUD will continue carefully to evaluate all comments received, whether during or after expiration of the public comment period, to determine whether any further revision of the Fair Market Rent schedules should be made. If this evaluation indicates a need to make any further revision of the Fair Market Rent schedules for particular market areas, HUD will publish a revision of those schedules at a future date.

EFFECTIVE DATE: The effective date for the interim rule published April 15, 1983, at 48 FR 16424, is May 19, 1983. (For application of the Fair Market Rents in the interim rule in cases where the owner's application for Section 202/Section 8 assistance or owner's proposal for other Section 8 new construction or substantial rehabilitation assistance is accepted for processing by HUD (by FmHA in the case of assistance under Part 884; by the State Agency in the case of assistance under Part 883) prior to the effective date of this Rule, see Note 2 to Schedule A in the interim rule.)

FOR FURTHER INFORMATION CONTACT: Linda Cheatham, Director, Technical Support Division, Department of Housing and Urban Development, Room 6138, 451 Seventh Street, SW., Washington, D.C. 20410. Telephone: (202) 426–7113. This is not a toll-free number.

Dated: May 19, 1983.

Grady J. Norris,

Assistant General Counsel for Regulations.

[FR Doc. 83-13800 Filed 5-23-83; 8:45 am]

BILLING CODE 4210-27-M

DEPARTMENT OF JUSTICE

Parole Commission

Paroling, Recommitting, and Supervising Federal Prisoners

28 CFR Part 2

AGENCY: Parole Commission, Justice.

ACTION: Final rule.

SUMMARY: To remove redundancy in its regulations the U.S. Parole Commission is editorially simplifying its rules.

DATE: June 6, 1983.

FOR FURTHER INFORMATION CONTACT: Toby Slawsky, Office of the General Counsel, U.S. Parole Commission, 5550 Friendship Blvd., Chevy Chase, MD. 20815, Tel. (301) 492–5959.

SUPPLEMENTARY INFORMATION: The Parole Commission is simplifying its rules at 28 CFR 2.13(d), Initial Hearing; Procedure. The generic language of this provision is redundant with 28 CFR 2.18.

List of Subjects in 28 CFR Part 2

Administrative practice and procedure, Prisoners, Probation and parole.

PART 2—[AMENDED]

Accordingly, pursuant to the provisions of 18 U.S.C. 4203(a)(1) and 4206(a)(6), 28 CFR 2.13 is amended by revising paragraph (d) as follows:

§ 2.13 Initial hearing; procedure.

* * * * *

(d) In accordance with 18 U.S.C. 4206, the reasons for establishment of a release date shall include a guidelines evaluation statement containing the prisoner's offense severity rating and salient factor score (including the points credited on each item of such score) as described in § 2.20, as well as the specific factors and information relied upon for any decision outside the range indicated by the guidelines.

* * * * *

I certify that this rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Dated: May 5, 1983.

Benjamin F. Baer,

Chairman, Parole Commission.

BILLING CODE 7035-01-M

---

28 CFR Part 2

Paroling, Recommitting, and Supervising Federal Prisoners

AGENCY: Parole Commission, Justice.

ACTION: Final rule.

SUMMARY: Because of administrative costs the Commission is simplifying its current procedures concerning a prisoner's refusal to sign a parole certificate.

EFFECTIVE DATE: July 4, 1983.

FOR FURTHER INFORMATION CONTACT: Toby Slawsky, Office of the General Counsel, U.S. Parole Commission, 5550

VOL
48
ISS
101
MAY
24
1983
UMI

Friendship Blvd., Chevy Chase, MD. 20815, Tel. (301) 492–5959.

SUPPLEMENTARY INFORMATION: The Commission is amending its rules at 28 CFR 2.40, Conditions of Release, by removing the requirement that a prisoner be given a special interview on the next docket when he refuses to sign a parole certificate. This change is intended to simplify Commission procedures and reduce costs. The Commission has found that the consequences of a prisoner's refusal to sign a parole certificate (i.e., waiver of parole) can be adequately explained to the prisoner by institutional staff and documented. A prisoner can, of course, reapply for parole at any time in accordance with 28 CFR 2.11.

List of Subjects in 28 CFR Part 2

Administrative practice and procedures, Prisoners, Probation and parole.

PART 2—[AMENDED]

Accordingly pursuant to 18 U.S.C. 4203(a)(1) and 4204(a)(6), 28 CFR 2.40 is amended by revising paragraph (h) as follows:

§ 2.40 Conditions of release.

* * * * *

(h) A prisoner who, having been granted a parole date, subsequently refuses to sign the parole certificate, or any other consent form necessary to fulfill the conditions of parole, shall be deemed to have withdrawn the application for parole as of the date of refusal to sign. To be again considered for parole, the prisoner must reapply for parole consideration. With respect to prisoners who are required to be released to supervision through good time reductions (pursuant to 18 U.S.C Sections 4161 and 4164), the conditions of parole set forth in this rule, and any other special conditions ordered by the Commission, shall be in full force and effect upon the established release date regardless of any refusal by the releasee to sign the parole certificate.

* * * * *

I certify that this rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Dated: May 5, 1983.

Benjamin F. Baer,

Chairman, Parole Commission.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Parts 1912 and 1912a

Advisory Committees; Notice of Meetings, and Quorum Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Final rule.

SUMMARY: This document changes the notice requirements for OSHA advisory committee meetings from 7 to 15 days in order to conform to the applicable Federal law. In order to improve these regulations and to establish better organization and management in the use of the National Advisory Committee on Occupational Safety and Health (NACOSH) the quorum requirement is changed to be a simple majority.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. James Foster, Occupational Safety and Health Administration, Room N–3637, United States Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210. Telephone: (202) 523–8148.

SUPPLEMENTARY INFORMATION: In October 1973, OSHA regulations with regard to advisory committees were promulgated. 29 CFR Part 1912, entitled "Advisory Committees on Standards," was promulgated on October 11, 1973 (38 FR 28035); and Part 1912a, entitled "National Advisory Committee on Occupational Safety and Health," was promulgated on October 18, 1973 (38 FR 28934). This document amends Parts 1912 and 1912a with respect to the provisions concerning notices of meetings. Additionally, Part 1912a is amended with regard to the quorum requirements.

Notice of Meetings

Section 1912.27 currently requires that public notice of any advisory committee meeting be given "at least seven (7) days in advance of the meeting." Section 1912a.7 has a similar seven day notice requirement. Since this notice must be published in the **Federal Register** these minimum tme periods should conform to the Federal Register Act (FRA) (44 U.S.C. Chapter 15). Section 1508 of the FRA requires a minimum of 15 days notice under normal circumstances. OSHA has generally provided the 15 days' notice required by the FRA. In order to conform these OSHA regulations to applicable federal law and to OSHA's practice, this amendment changes the seven day notice periods to 15 day notice periods.

Quorum requirements for NACOSH

Under current NACOSH regulations a quorum is a majority of the members of the committee, provided that a member representing management, labor, and the public are included in the majority (§ 1912a.6(a)). While the need for a majority of the members to constitute a quorum is common, the additional requirements are not. In the preamble to the **Federal Register** document adopting the NACOSH regulations, no reason was given for adopting such a quorum rule. Section 7(a) of the Act, which establishes NACOSH, sets forth the representational make-up of the committee but is silent with regard to a quorum. Similarly, section 5(b)(2) of the Federal Advisory Committee Act (FACA) requires a fair balance in the representational composition of advisory committees, but does not address any special procedures or requirements related to a quorum.

This quorum requirement, for NACOSH meetings, has created a difficult and unnecessary scheduling burden on OSHA. Since there are only two members each of the management and the labor groups in NACOSH, and at least one of each group must be in attendance to satisfy current quorum requirements, it is often very difficult to accommodate members' schedules and to set dates for NACOSH meetings. And once meetings are set, unforeseen changes in plans of even one member (if he is the only labor or management representative who was to attend) can defeat the quorum. This in turn creates problems for other committee members and the public.

Additionally, these issues were discussed at length at the December 2, 1982, meeting of NACOSH. By a vote of seven to two with one abstention, the committee after deliberation recommended amending the quorum requirement to be a simple majority (Transcript at 89). In light of the above, OSHA finds that the quorum requirements of § 1912a.6(a) for NACOSH present an unnecessary burden of scheduling meetings that could work to impede the orderly functioning of the committee and could prevent it from performing its important statutory function. A simple majority quorum will promote the orderly functioning of the Committee by reducing scheduling burdens placed on OSHA by the current representational requirements of the quorum. Nothing in this amendment will prevent any member's or group's full participation in Committee meetings. Achieving a balanced point of view in Committee recommendations is assured by the representational composition of the Committee and the protections of § 1912a.5 which assures that all views—majority, dissenting, and individual—will be included in any report by NACOSH, and assures that any committee member may submit his own views directly to the Secretary.

A similar quorum requirement for the Advisory Committee for Construction Safety and Health (the only existing § 7(b) committee) has not created scheduling difficulties since each representational group has five members on the committee. Hence no changes in these quorum regulations are warranted at this time.

OSHA, in accordance with Executive Order 12291 (46 CFR 13193), hereby states that this rulemaking does not constitute a "major rule" since its effect will not meet any of the definitional elements in section 1(b) of the Executive Order.

Notice of proposed rulemaking, public rulemaking procedures, and delay in effective date are not required for these amendments to Parts 1912 and 1912a since they relate solely to agency management and procedure.

Authority

This document was prepared under the direction of Thorne G. Auchter, Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue, NW., Washington, D.C.

List of Subjects in 29 CFR Parts 1912 and 1912a

Advisory committees, Occupational safety and health.

Accordingly, pursuant to sections 7 and 8(g) of the Occupational Safety and Health Act of 1970 (84 Stat. 1597, 1599, 29 U.S.C. 656, 657), 5 U.S.C. 553, and App. I, and Secretary of Labor's Order No. 8–76 (41 FR 25059), Parts 1912 and 1912a of Title 29, Code of Federal Regulations, are hereby amended as set forth below.

Signed at Washington, D.C. this 19 day of May, 1983.

Thorne G. Auchter,

Assistant Secretary of Labor.

PARTS 1912 AND 1912a—[AMENDED]

Parts 1912 and 1912a of Title 29 CFR are amended by revising §§ 1912.27, 1912a.6(a) and 1912a.7 to read as follows:

§ 1912.27 Notice of meetings.

Public notice of any meeting of an advisory committee shall be given by the officer or employee calling the meeting at least fifteen (15) days in advance of the meeting; except when it is impractical to do so, or in an emergency situation, in which event shorter advance notice may be given to the extent that any advance notice is practical. It shall, however, be a general policy to publish notices as far in advance of the meeting as circumstances will permit. Such notice shall be given by publication in the **Federal Register.** In addition, notice may be given by such other means as press releases.

§ 1912a.6 Quorum.

(a) A majority of the members of the Committee shall constitute a quorum.

* * * * *

§ 1912a.7 Notice of meetings.

Public notice of any meeting of the Committee shall be given by the person calling the meeting in accordance with § 1912a.4 or at his direction at least fifteen (15) days in advance of the meeting; except when it is impractical to do so, or in an emergency situation, in which event shorter advance notice may be given. Such notice shall be given by publication in the **Federal Register** as much in advance of the meeting as circumstances will permit. In addition, notice may be given by such other means as press releases.

BILLING CODE 4510-26-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 935

Removal of Certain Conditions on the Approval of the Ohio Permanent Regulatory Program and Approval of Amendments to the Regulatory Program and Abandoned Mine Land Reclamation Plan Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: This document amends 30 CFR Part 935 by: 1) removing certain conditions and modifying the deadline for Ohio to meet other conditions on the approval of the Ohio program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA); 2) approving additional amendments to the Ohio

VOL
48
ISS
101
MAY

1983
UMI

regulatory program and abandoned mine land reclamation (AML) plan; 3) adding two new conditions of approval concerning appeal rights and bond release requirements. Ohio received conditional approval of its permanent regulatory program and approval of its AML plan effective August 16, 1982.

EFFECTIVE DATE: The actions in this notice are effective May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Ms. Nina Rose Hatfield, Field Office Director, Columbus Field Office, Office of Surface Mining, Room 202, 2242 South Hamilton Road, Columbus, Ohio 43227; Telephone: (614) 866-0578.

SUPPLEMENTARY INFORMATION:

I. Background

The Ohio program was approved effective August 16, 1982, by notice published in the August 10, 1982, **Federal Register** (47 FR 34688). The approval was conditioned on the correction of 28 minor deficiencies contained in 11 conditions—(a), (b), (c), (d), (e), (f)(1)—(f)(10), (g), (h)(1)—(h)(3), (i)(1)—(i)(3), (j), and (k)(1)—(k)(5). In accepting the Secretary's conditional approval, Ohio agreed to correct deficiencies (a), (b), (c), (h)(1), and (k)(1) by August 8, 1983, deficiency (e) by September 16, 1982, and the remaining deficiencies by February 8, 1983. Information pertinent to the general background, revisions, modifications, and amendments to the Ohio program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program can be found in the August 10, 1982 **Federal Register**.

Ohio did submit to OSM on September 16, 1982, a revised program regulation satisfying condition (e). The Secretary approved the revised regulation and removed condition (e) on January 17, 1983 (48 FR 1957).

On February 1, 1983, Ohio requested an extension of the deadline for the State to meet conditions (k)(3), (k)(4), and (k)(5). These conditions were due February 8, 1983. On February 28, 1983, OSM published notice that it was considering modifying the deadline for Ohio to meet those parts of condition (k), and requesting public comment. The comment period closed March 15, 1983 and no comments were received. Accordingly, the Secretary is extending the deadline by which Ohio must meet conditions (k)(3), (k)(4), and (k)(5) to August 8, 1983.

II. Submission of Amendments

On January 6, 1983, Ohio submitted materials to OSM intended to: satisfy conditions (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k)(1) and (k)(2); amend the approved State program; and amend the approved Abandoned Mine Land Reclamation Plan. The materials submitted included two legislative bills (Amended Substitute Senate Bills 240 and 323) to amend the Ohio Revised Code (ORC); numerous regulation changes to the Ohio Administrative Code (OAC), and two policy statements from the Division of Reclamation.

On January 21, 1983, OSM published notice in the **Federal Register** announcing receipt of these provisions and inviting public comments (48 FR 2800).

On May 18, 1983, the Administrator of the Environmental Protection Agency transmitted written concurrence on the amendments to the Ohio program which were submitted January 6, 1983.

III. Secretary's Findings

Conditions of Approval

1. *Condition (a).* Condition (a) required the State to enact legislation amending the Ohio Revised Code (ORC) section 1513.01(G)(2) to eliminate the phrase "but not to include public roadways." As discussed in Finding 1.2 of the Secretary's approval (47 FR 34688), the State's definition of "coal mining operations" included this phrase, making it inconsistent with section 701(28)(b) of SMCRA.

The proposed program amendment in Am. Sub. SB 240 does not remove the phrase. Instead, language was added to qualify which public roadways are excluded. The amendment would exclude public roadways, "unless the roadway has been constructed for access to or haulage of coal from a coal mining and reclamation operation or unless public access to the roadway has been denied or restricted."

OSM has clarified the issue of when a road will be excluded from being considered a part of the affected area of a mine, in final rules published August 2, 1982 (47 FR 33430) and April 5, 1983 (48 FR 14814). For a public road to be excluded from the affected area of a mine, it must meet three criteria:

(1) The road has been designated as a public road pursuant to the laws of the jurisdiction in which it is located;

(2) The road is maintained with public funds, and constructed, in a manner similar to other public roads of the same classification within the jurisdiction in which it is located; and

(3) There is substantial (more than incidental) public use of the road.

The amended Ohio definition of "operation" does not include these criteria. Therefore, the amended Ohio language does not sufficiently prescribe which roads are public roads.

The Secretary finds that condition (a) has not been satisfied. However, because Ohio submitted material which it, in good faith, believed to be adequate to satisfy this condition, the Secretary has decided to allow the State until August 8, 1983 (the date originally set for this condition) to submit revised provisions. Such provisions could be an adoption of the criteria now set under the Federal definition or an assurance that such criteria will be utilized. On April 8, 1983, the State was advised of the need to further amend the Ohio Revised Code or otherwise amend its program to meet this condition. By letter dated April 27, 1983, the State agreed to do so by August 8, 1983. In the interim, Ohio has agreed to apply the above mentioned criteria to determine when a road may be excluded from being considered part of the affected area of a coal mining operation as defined in ORC 1513.01(G).

2. *Condition (b).* Condition (b) required the State to enact legislation or provide an opinion from the Ohio Attorney General limiting the effect of Section 5 of ORC Chapter 1513 to Federal courts with jurisdiction in the State. As discussed in Finding 1.12, the State provision would nullify the effect of SMCRA or the Federal regulations if a Federal court in a jurisdiction outside Ohio were to overturn a provision of the Federal Act or regulations.

In response to this condition, Am. Sub. SB 323 has repealed Section 5 and amended Section 4 to limit the effect of Section 4 to Federal courts with jurisdiction in Ohio. The Secretary finds that the amendment satisfies condition (b).

3. *Condition (c).* Condition (c) required the State to amend the Ohio Code and promulgate regulations to require work be performed by registered professional engineers in instances required by SMCRA and the Federal regulations. SMCRA requires that qualified registered professional engineers or, in some instances, professional geologists, design and certify certain cross-section maps or plans for a permit application. These requirements are found in SMCRA sections 507(b)(14), 515(b)(10)(B), 515(b)(22)(H), and 515(c)(3)(B)(vii). (See Finding 1.5, 47 FR 34690). Am. Sub. SB 240 amends ORC Chapter 1513 in several ways relating to this condition.

The proposed changes to ORC Chapter 1513 are as follows:

(1) In ORC section (1513.07(B)(2)(n)(i), the words "registered surveyor" have been deleted. The Secretary finds this change is consistent with SMCRA.

(2) In ORC section 1513.16(B)(3)(b)(vii), the words "registered surveyor" have been deleted. The Secretary finds this change is consistent with SMCRA.

(3) In ORC section 1513.07(B)(2)(n)(i), the following language was added, "Registered Surveyors shall be allowed to perform all plans, maps, and certifications under this chapter as they are authorized under ORC Chapter 4733 of the Ohio Revised Code". ORC Chapter 4733 provides for the registration of professional engineers and surveyors in Ohio. The Secretary finds this amendment would allow registered surveyors to perform duties which SMCRA requires be done by registered professional engineers, and allows surveyors to certify work which SMCRA provides only engineers or geologists certify. Therefore, the Secretary cannot approve this amendment.

The Secretary further notes that ORC section 1513.16(A)(10)(b)(ii) has not been amended to remove the authorization for registered surveyors to perform duties which SMCRA requires be performed by registered professional engineers, nor has the Ohio Administrative Code been amended as required by condition (c).

The Secretary approves the amendments deleting "registered surveyor" from ORC section 1513.07(B)(2)(n)(i) and 1513.16(B)(3)(b)(vii). The proposed amendment to ORC section 1513.07(B)(2)(n)(i), referencing ORC Chapter 4733, concerning registered surveyors, is disapproved. The Secretary finds that condition (c) has not been satisfied. However, because Ohio submitted material which it, in good faith, believed to be adequate to satisfy this condition, the Secretary has decided to allow the State until August 8, 1983 (the date originally set for this condition) to submit revised provisions. On April 8, 1983, the State was advised of the need to further amend the Ohio Revised Code and otherwise amend its program to meet this condition. By letter dated April 27, 1983, the State agreed to do so by August 8, 1983. In the interim, the State has agreed as a matter of policy to require that registered professional engineers certify work performed by registered surveyors in all cases where the Federal Act and regulations require such work to be done by registered professional engineers.

4. *Condition (d).* Condition (d) required the State to amend its rules to require the modification of existing structures under the circumstances specified in 30 CFR 701.11(d)(iii). Ohio has amended its rule 1501:13-1-01(E)(2) by substituting the word "shall" for the word "may", so that the rule now requires that an existing structure must be modified. The Secretary finds that the amendment satisfies condition (d) and is approving it.

5. *Condition (f)(1).* Condition (f)(1) required the State to amend its regulations to add a provision for regulating the disposal of coal waste in excess spoil fills, consistent with 30 CFR 816.71(k). Ohio has added rule OAC 1501:13-9-07(H) which provides that coal wastes shall not be disposed of in head-of-hollow or valley fills and may be disposed of in other excess spoil fills if certain requirements are met. The Secretary finds that the regulation is no less effective than 30 CFR 816.71(k) and thus satisfies condition (f)(1).

6. *Condition (f)(2).* Condition (f)(2) required the State to delete the portion of its rule allowing an exemption from contemporaneous reclamation where required by the "method of mining". Ohio has amended its rule OAC 1501:13-9-13(B) to delete the phrase "or where required by the method of mining." The Secretary finds that the revised rule satisfies condition (f)(2).

7. *Condition (f)(3).* Condition (f)(3) required the State to amend its rule OAC 1501:13-9-14(C)(4) to delete the provision allowing areas affected by underground mining operations that have become stabilized over the long term to be retained in their existing configuration. Ohio has deleted this provision and the Secretary finds that condition (f)(3) is statisfied.

8. *Condition (f)(4).* Condition (f)(4) required the State to promulgate regulations requiring resoiling as contemporaneously as practicable with mining. Ohio has added rule OAC 1501:13-9-13(A). The Secretary finds it is no less effective than 30 CFR 816.100, and thus satifies condition (f)(4).

9. *Condition (f)(5).* Condition (f)(5) required the State to promulgate regulations requiring notification to the Division of Reclamation of slides that may have a potential adverse effect on public property, health, safety, or the environment. Ohio has amended its rule OAC 1501:13-9-12(B) to require notification and to require compliance with any remedial measures. The Secretary finds the amended rule is no less effective than 30 CFR 816.99(b) and thus satisfies condition (f)(5).

10. *Condition (f)(6).* Condition (f)(6) required the State to promulgate regulations providing public notice of underground mining schedules consistent with 30 CFR 817.122. Ohio has amended its rule OAC 1501:13-12-02(B) to require such public notice. The Secretary finds that the amended rule satisfies condition (f)(6).

11. *Condition (f)(7).* Condition (f)(7) required the State to promulgate regulations requiring establishing the beginning of the period for extended responsibility under the performance bond requirements consistent with 30 CFR 816.116(b)(1) and to delete or limit the examples of normal management practices and minor regrading. Ohio has amended its rule OAC 1501:13-9-15(E)(5) to delete the two examples of normal management practices and minor regrading, and the Secretary finds that this part of condition (f)(7) has been satisfied. However, condition (f)(7) also required the State to establish the beginning of the period for extended responsibility consistent with the Federal rule. The Federal rule provides that the period begins at the last time of augmented seeding, fertilizing, irrigation or other work necessary to ensure successful revegetation, whereas the Ohio rule provides that the period begins "at the last time of *substantially* augmented seeding." * * *." Ohio has not deleted or defined the word "substantially" to enable the Secretary to conclude that the rule is consistent with Section 515(b)(20) of SMCRA and no less effective than the Federal rule. Therefore, the Secretary finds that condition (f)(7) has not been fully satisfied. The Secretary is amending condition (f)(7) to reflect that part of the condition has been satisfied. Because Ohio submitted material which it, in good faith, believed to be adequate to satisfy this condition, the Secretary has decided to allow the State until August 8, 1983, to submit revised provisions. The State was advised of the need to further amend its rules and by letter of April 27, 1983, agreed to do so by August 8, 1983. In the interim, the State has agreed to satisfy the terms of this condition as a matter of policy.

12. *Condition (f)(8).* Condition (f)(8) required the State to promulgate regulations amending its rule OAC 1501:13-9-09 to require inspection of coal waste banks consistent with 30 CFR 816.82. Ohio has added paragraph (I) to 1501:13-09-9, to require such inspections. The Secretary finds that the amended rule is no less effective than 30 CFR 816.82 and therefore condition (f)(8) is satisfied.

13. *Condition (f)(9).* Condition (f)(9) required the State to promulgate regulations amending OAC 1501:13-9-04(G)(18) to delete authority to grant a variance from applicable Federal and State effluent limitations at the time for

VOL

1983
UMI

removal of sediment ponds. Ohio has deleted the authority to grant such a variance. The Secretary finds the amended rule no less effective than 30 CFR 816.46(u) and therefore condition (f)(9) is satisfied.

14. *Condition (f)(10).* Condition (f)(10) required the State to amend its regulations to require subsidence control plans to include consideration of damage to streams, water, and associated structures, consistent with 30 CFR 817.126(a). Ohio has added subparagraph (D)(4) to OAC 1501:13–12–02, which provides for such consideration. The Secretary finds that the amended regulation is no less effective than 30 CFR 817.126(a) and satisfied condition (f)(10).

15. *Condition (g).* Condition (g) required the State to amend its regulations to delete the provision in OAC 1501:13–8–01(C), exempting persons who conduct coal exploration from complying with performance standards. Ohio has deleted paragraph (C) and (D) from OAC 1501:13–8–01. The Secretary thus finds that condition (g) is satisfied.

16. *Condition (h)(1).* Condition (h)(1) required the State to amend its program to revise the bonding system to provide assurance of more timely reclamation at the site of all operations upon which bond has been forfeited.

Ohio has enacted Senate Bill 323 which amends ORC Section 1513.09(A) to create the reclamation supplemental forfeiture special account (previously called the reclamation special account) and allow the Auditor of State to transfer $1 million annually (instead of the previous limit of $500,000) to replace funds spent from the account.

However, condition (h)(1) required revision to the current bonding system to provide assurance of more timely reclamation at the site of all operations upon which bond has been forfeited. Increasing the available amount of money to be annually transferred is a step toward more timely reclamation on sites upon which bond has been forfeited; however, this in itself is not an *assurance* of more timely reclamation of these sites. Ohio will have to provide assurance through an analysis of the revised bonding system to show that the system can achieve the objectives and purpose of the bonding program pursuant to SMCRA section 509(c), and ensure reclamation as contemporaneously as practicable without unreasonable delay of the postmining land use pursuant to SMCRA section 515(b)(2) and (b)(16).

The proposed amendment is approved, but the Secretary finds that it does not satisfy condition (h)(1), in that Ohio fails to provide assurance of more timely reclamation of sites upon which bond has been forfeited. However, because Ohio submitted material to satisfy this condition which the State, in good faith, believed to be adequate, the Secretary has decided to allow the State until August 8, 1983 (the date originally set for this condition) to submit new assurances. On April 8, 1983, the State was advised of the need to further amend its program to satisfy this condition. By letter dated April 27, 1983, the State agreed to do so by August 8, 1983.

17. *Condition (h)(2).* Condition (h)(2) required the State to promulgate regulations consistent with 30 CFR 800.11(b)(2), ensuring that bonds shall be filed at least 30 days prior to commencement of mining on the next incremental areas.

Ohio has added, at OAC 1501:13–7–01(B)((6)(b), a requirement that bonds be filed 30 days prior to commencement of mining on the next incremental area. The Secretary finds that the amended regulation is no less effective than 30 CFR 800.11(b)(2) and therefore condition (h)(2) is satisfied.

18. *Condition (h)(3).* Condition (h)(3) required the State to promulgate regulations consistent with 30 CFR 806.12(e)(6)(iii) assuring that an operator will not be allowed to operate without bond coverage beyond a reasonable period in order to replace coverage.

Ohio has amended OAC 1501:13–7–03(B)(5)(g) to remove the discretion to suspend the permit when the operator is without bond coverage. The amended rule now provides that the Chief "*shall* suspend all or any part of the permit until bond coverage is replaced."

The Secretary finds the amended rule is no less effective than 30 CFR 806.12(e)(6)(iii) and therefore condition (h)(3) is satisfied.

19. *Condition (i)(1),* Condition (i)(1) required the State to submit a statement of policy indicating that Ohio will develop and implement procedures for data coordination and exchange with State and Federal agencies.

Ohio has submitted a statement of policy by the Chief of the Division of Reclamation addressing data coordination and exchange as required by condition (i)(1). This condition referred to the requirements in 30 CFR 795.4, responsibilities under the Small Operator Assistance Program (SOAP). Since this condition was placed on Ohio's program, 30 CFR 795.4 has been revised and numbered 30 CFR 795.9(d), and now requires the program administrator to "develop procedures for interstate coordination and exchange of data." The Secretary finds that Ohio's policy statement of December 28, 1982, meets the requirements found in 30 CFR 795.9(d) and therefore satisfies conditions (i)(1) .

20. *Condition (i)(2).* Condition (i)(2) required the State to submit promulgated regulations requiring additional information to be submitted by SOAP applicants including: (i) The anticipated termination date of the operation, (ii) a statement of coal seam thickness, and (iii) the legal right of entry.

Ohio has amended OAC 1501:13–6–03(E) to require the applicant to provide the information in (i)(2) (i), (ii), and (iii). The Secretary finds that amended OAC 1501:13–6–03(E) (7), (10)(b), and (11) are no less effective than the Federal regulations and therefore condition (i)(2) is satisfied.

21. *Condition (i)(3).* Condition (i)(3) required the State to submit promulgated regulations requiring small operators to submit a permit application within one year of receiving approved SOAP reports.

Ohio has amended OAC 1501:13–6–03(J)(1)(b) to require small operators to submit a permit application within one year of receiving approved SOAP reports. The Secretary finds that amended OAC 1501:13–6–03(J) is no less effective than 30 CFR 795.12 and therefore condition (i)(3) is satisfied.

22. *Condition (j).* Condition (j) required the State of submit a statement of policy that costs to small operators for test borings, corings, and observation wells will be paid using funds other than SOAP operational funds provided by OSM.

Ohio has submitted a policy statement that no costs to small operators for test borings, corings, and observation wells will be paid from SOAP operational grant funds provided by OSM. The Secretary finds that the policy statement is acceptable and satisfies condition (j). The Secretary notes that since this condition was placed in Ohio's program, 30 CFR 795.9 has been revised to provide that observation well drilling costs may now be paid on a case-by-case basis by operational grant funds, so that Ohio may wish to revise its policy statement in accordance with revised Federal rule.

23. *Condition (k)(1).* Condition (k)(1) required the State to enact legislation and promulgate regulations to require the pre-payment of a civil penalty in order to contest either the amount or the fact of the violation.

Am. Sub. SB 240 revises ORC section 1513.02(F) (2) and (3) to eliminate the formal hearing by the Chief so that the first opportunity for formal review of an assessment is before the Reclamation Board of Review.

ORC section 1513.02(F)(3), as amended, requires that, at the time the petition for review of the proposed assessment is filed with the Secretary of the Reclamation Board of Review, the person shall forward the amount of the penalty to the Secretary of the Board. In addition, this amendment provides for an informal assessment conference to review the amount of the penalty. The conference is to be presided over by the Chief or his appointee, excluding the inspector that issued the notice of violation or order. The proposed penalty need not be paid prior to this informal conference.

The Secretary finds that the amendments to ORC section 1513.02(F) are consistent with SMCRA section 518(c) and 30 CFR 845.18 and are approved. The amendments satisfy condition (k)(1).

24. *Condition (k)(2).* Condition (k)(2) required the State to promulgate regulations eliminating the opportunity for a *de novo* hearing or providing safeguards against abuses to the record developed at the initial hearing in an administrative appeal to the Reclamation Board of Review.

Ohio has submitted Senate Bill 240 which amends ORC section 1513.02 and sections 1513.13 to eliminate and appeal to the Chief of the Division of Reclamation on notices, orders, and decisions. The first level of review is now the Reclamation Board of Review. Thus, the opportunity for *de novo* review has been eliminated, because the only administrative hearing is now before the Board. The Secretary approves the amendment and finds that condition (k)(2) is satisfied.

Other Regulatory Program Amendments

Ohio submitted Amended Substitute Senate Bills 240 and 323 (hereinafter referred to as Am. Sub. SB 240 or 323) which amend the Ohio Revised Code (ORC). The amendments and the Secretary's findings are discussed below.

1. *ORC Section 127.16(D)(8).* Am. Sub. SB 323 allows the Chief of the Division of Relcamation to contract reclamation work with an operator mining adjacent land. This applies to State funded projects or bond forfeitures from permits issued before and during the interim program. It does not impact upon the permanent program requirements of SMCRA. Consequently, the amendment is approved.

2. *ORC Section 1513.02(A)(4): Determination of the Probable Hydrologic Consequences and State Funding for S.O.A.P.* Am. Sub. SB 323 amends this section to clarify that an applicant must request the Chief to make a determination of the probable hydrologic consequences. The present language states that the Chief shall perform the hydrologic study.

Section 507(b)(11) of SMCRA requires that the permit application contain a determination of the probable hydrologic consequences (PHC) of the mining and reclamation operations * * * so that an assessment can be made by the regulatory authority of the probable cumulative impacts of all anticipated mining in the area upon the hydrology of the area. Section 507(b)(15) requires a statement of the results of test borings or core samplings to be submitted. Section 507(c) of SMCRA provides that the PHC is to be performed by a qualified laboratory and the cost is to be borne by the regulatory authority, for an operator whose total annual production will not exceed 100,000 tons.

The change in ORC section 1513.02(A)(4) would require the Chief to "make a determination" of the PHC within 60 days of submission of a permit application. Although section 1513.02 does not contain a specific power to enter into contracts with qualified laboratories for the performance of the PHC, section 1501:13–6–03(G)(2) of the Ohio Administrative Code (OAC) requires the PHC to be made by a qualified lab. Furthermore, section 1501:13–6–03(A)(4)(b) directs the Chief to pay to labs or reimburse eligible applicants for PHC determinations. The Secretary finds this proposed change is not inconsistent with section 507(b)(11) of SMCRA, with the understanding that applications may not be considered complete until they include the data and the PHC determination required by sections 507(b)(11) and 507(b)(15).

In addition, Ohio's Am. Sub. SB 323 deletes a provision authorizing the Chief to transfer up to $500,000 from the unreclaimed land special account to cover the cost of making PHC determinations and performing chemical analyses of test borings or core samplings for small operators who have a total annual production that does not exceed one hundred thousand tons. The Secretary finds this deletion is not inconsistent with section 507(c) of SMCRA, with the understanding that Federal funds may be used only to perform work for eligible operators under section 507(c), and may not be used for any other purpose.

3. *ORC Section 1513.02(A)(5): Authority to use up to $1 Million.* Am. Sub. SB 323 amends ORC section 1513.02(A) by adding subparagraph (5), which will allow the Chief to transfer up to $1 million annually from the coal mining and administration and reserve special account created in ORC section 1513.181 to the Reclamation Supplemental Forfeiture Special Account created in ORC section 1513.08.

In light of the number of present and potential reclamation defaults and bond forfeitures, the Secretary conditioned his approval of the Ohio permanent program, as stated in 30 CFR 935.11(h)(1), on Ohio amending its program to revise the current bonding system to provide assurance of more timely reclamation at the site of operations on which bond has been forfeited. While raising the amount available annually will reduce the reclamation backlog, the State must still demonstrate to the Secretary that the $1 million amount transferred annually into the Reclamation Supplemental Forfeiture Special Account provides the assurance of more timely reclamation on all forfeited operations.

The change from $500,000 to $1 million is not in conflict with SMCRA, but in itself does not satisfy condition 30 CFR 935.11(h)(1). The condition will not be removed until the State demonstrates the effect of the changed amount. (See also discussion on condition (h)(1)).

4. *ORC Section 1513.07(B)(2) (d) and (e): Permits.* Am Sub. SB 323 amends ORC section 1513.07(B)(2)(d) by requiring the applicant to provide a list of persons responsible for ensuring compliance with the requirements of the surface mining chapter. ORC section 1513.07(B)(2)(e), as amended by Am. Sub. SB 323, expands the provision to be more specific, wherein the applicant, owners, and managers must state whether they were ever owners or managers of another business entity that has had a permit suspended, revoked, or forfeited. This amendment is consistent with the requirements of SMCRA section 507(b) (4) and (5) and is approved.

5. *ORC Section 1513.07(B)(2)(q): Permits.* Am. Sub. SB 323 amends ORC section 1513.07(B)(2)(q) to include the requirement for liability insurance which had been covered under repealed ORC section 1513.06 (annual license requirements). The language of ORC section 1513.07(B)(2)(q) also includes notification of lapses in insurance policy, and allows the Chief to suspend permits until proper coverage is obtained. This amendment is consistent with SMCRA section 507(f) and is approved.

6. *ORC Section 1513.07(E): Permits.* ORC section 1513.07(E) has been amended by Am. Sub. SB 323 to: require a statement in the permit application

VOL
48
ISS
101
MAY
24
1983
UMI

that any civil penalties owed to the state for a violation and not subject to an appeal have been paid; require the Chief to deny a permit if he finds that persons in control of the company have ever forfeited a coal mining bond anywhere in the United States or materially failed to comply with ORC Chapter 1513; and provide that the Chief may deny a permit if persons in control of the company have had a permit suspended or revoked in the United States.

The amendments to ORC section 1513.07(E)(3) are consistent with SCMRA section 510 and are approved.

7. *ORC Section 1513.08(A): Bonds.* Am. Sub. SB 323 amends ORC section 1513.08(A) to provide that the bond shall cover areas of land affected by mining within, or immediately adjacent to, the permit area. This change will allow bond to be applied to any areas which may be affected outside the permit area, which was not previously allowed, with the result that surety companies claimed that they were not responsible for areas affected outside the permit during forfeiture proceedings. This amendment, which was not in response to a condition placed on the Ohio program, is found to be in accordance with SMCRA, and is, therefore, approved.

8. *ORC Section 1513.17: Need for permit.* Am. Sub. SB 323 adds the word "knowingly" to the violations listed in ORC section 1513.17(B), (C), and (D), and requires that strict criminal liability can be imposed. This change results in penalties no less stringent than those in SMCRA section 518(e) and is approved.

9. *ORC Section 1513.18: State special revenue fund.* Am. Sub. SB 323 amends section 1513.18 so that the Chief is authorized to contract with landowners, operators mining under valid permits, or contractors hired by the surety to complete reclamation without advertising for bid. This allows the Chief to contract for bond forfeiture work with anyone, including the operator who defaulted if the defaulted operator is the contractor hired by the surety. The provision is not inconsistent with SMCRA, and the amendment is approved.

10. *ORC Section 1513.27: Reclaiming damage to adjacent property. Section 1513.28: Reclamation grants, criteria contracts with applicants. Section 1513.32: Agreements.* Am. Sub. SB 323 amended ORC sections 1513.27, 1513.28, and 1513.32 regarding the administrative operation of the State "unreclaimed lands special account" which receives no Federal funding. As this account is entirely State-funded and separate from the approved abandoned mine land reclamation program for the State of Ohio, these proposed changes are amendments which are not inconsistent with SMCRA.

11. *ORC Section 1513.99: Penalties.* Am. Sub. SB 323 amends ORC section 1513.99, to incorporate ORC sections 1513.17(B), (C), (D) and (E) into the penalty section. These provisions are as follows:

(1) ORC section 1513.17(B)—mining without a permit;

(2) ORC section 1513.17(C)—knowingly violate a permit condition or exceed the limits of a permit;

(3) ORC section 1513.17(D)—knowingly fail to comply with a Chief's Order;

(4) ORC section 1513.17(E)—knowingly violate a requirement of ORC Chapter 1513 not specifically mentioned in the section.

This amendment was made in conjunction with the amendment to sections 1513.17(B), (C), (D), and (E). The amendment provides penalties that are no less stringent than the requirements of SMCRA section 518 and is approved.

12. *ORC Section 1513.02(A)(5): Authority to issue rules.* Am. Sub. SB 240 adds ORC section 1513.02(A)(5) which authorizes the Chief to receive, administer, and expend moneys from Federal agencies to implement the program. The amendment is not inconsistent with SMCRA and is approved.

13. *ORC Section 1513.02(D) (1) and (2): Authority to issue rules.* Am. Sub. SB 240 amends ORC section 1513.02(D) (1) and (2) to authorize the Reclamation Board of Review to modify, vacate, or terminate a cessation order. This authority is consistent with the requirements of SMCRA section 525(b) and is approved.

The amendment to ORC section 1513.02(D)(2) allows the State, by reference, to have the same requirements on abatement periods as 30 CFR Part 843. This is consistent with the Federal regulations, and is approved.

14. *ORC Section 1513.02 (I) and (J): Hearing Officers.* Am. Sub. SB 240 amends ORC section 1513.02 (I) and (J) by removing requirements to submit violation information required in ORC section 1513.06 (repealed) and eliminating the requirement for the Chief to appoint hearing officers. Both changes were due to other changes in Am. Sub. SB 240 and are not inconsistent with SMCRA, so they are approved.

15. *ORC Section 1513.05: Reclamation Board of Review.* Am. Sub. SB 240 amends ORC section 1513.05 by requiring the Reclamation Board of Review to appoint hearing officers and to adopt rules governing procedure of appeals. These amendments are not inconsistent with SMCRA and are approved.

16. *ORC Section 1513.06: Licenses.* Am. Sub. SB 240 repeals ORC section 1513.06, which required a license to conduct a coal mining and reclamation operation. All information required by this section is now required in a permit application. This amendment is not inconsistent with SMCRA and is approved.

17. *ORC Section 1513.07: Permits.*

(1) ORC section 1513.07(A)(1) is amended by Am. Sub. SB 240, in that a permit fee will not be collected for areas covered by an interim program permit if the same areas are contained in an application for a permanent program permit. Section 507(a) of SMCRA requires that an application fee may be less than but not exceed the actual or anticipated costs of reviewing, administering, and enforcing such permit. The Ohio amendment is not inconsistent with SMCRA section 507(a) and is approved.

(2) ORC section 1513.07(B)(2)(n)(i) is amended by Am. Sub. SB 240 to delete, "or potentiometric surface; and the anticipated final configuration of the water table or potentiometric surface." Since this language is more extensive than the requirements of Section 507(b)(14) of SMCRA, the Secretary finds this section of the Ohio Revised Code remains consistent with the requirements of SMCRA.

(3) ORC section 1513.07(B)(2)(q) is amended by Am. Sub. SB 240 to require the business phone number of the applicant. This amendment is approved.

(4) ORC section 1513.07(B)(6) is amended by Am. Sub. SB 240 to remove the requirement to include a copy of the license with the application for a permit. (See findings under ORC section 1513.06.) The amendment is approved.

(5) ORC section 1513.07(B) is amended by Am. Sub. SB 240 to remove the reference to a license application. (See findings under ORC section 1513.06.) The amendment is approved.

(6) ORC section 1513.07(E)(3) is amended by Am. Sub. SB 240 to require that the State regulatory authority (SRA) provide applicants with a listing for the past three years of all notices of violations of Chapter 1513 of the Revised Code. Section 510(e) of SMCRA requires the applicant to file such a listing with the application. The Secretary finds that it is not inconsistent with SMCRA to have the SRA furnish a listing of violations of Chapter 1513. It should be noted that the applicant would still be responsible for furnishing a listing of violations from other agencies as required by the approved State program. The amendment is approved.

(7) ORC section 1513.07(I) (3), (4) and (5) is amended by Am. Sub. SB 240 to change the appeal procedure on the Chief's decision on a permit application. The appeal will be heard by the Reclamation Board of Review instead of the Chief or his representative. See finding under ORC section 1513.13 (A), (B), and (C). The amendment is not inconsistent with SMCRA section 525 and is approved.

(8) Am. Sub. SB 240 amends ORC section 1513.07(J) by removing the reference to an annual license. This amendment is not inconsistent with SMCRA and is approved.

18. *ORC Section 1513.074: Adjacent area permit.* Am. Sub. SB 240 adds ORC section 1513.074 to classify a permit application adjacent to existing permits as an adjacent area permit application and to allow the applicant to incorporate by reference current information contained in the application for the original permit.

Section 511(a)(3) of SMCRA requires that any extension to the permit area, if not an incidental boundary revision, must be made by application for another permit. ORC section 1513.074 meets this requirement by assuring that the operator supplements information available for public inspection with additional information and makes the application subject to the standards for new applications.

The Secretary finds that this amendment is consistent with SMCRA section 511(a)(3) and is approved.

19. *ORC § 1513.13 (A)(1), (B) and (C): Appeal rights.* (1) The amendment to ORC section 1513.13(B) concerns elimination of the appeal to the Chief and establishes the Reclamation Board of Review to hear appeals. ORC section 1513.13(B)(3) allows a decision from appeal on a bond release to be made within 60 days. SMCRA does not establish a 60-day limit, but the Secretary finds that this is reasonable as long as the bond is not released because of the Board's failure to render a decision within the time period. The amendments to ORC section 1513.13(B) are consistent with SMCRA sections 514, 520, and 525 and are approved.

(2) Am. Sub. SB 240 amends ORC section 1513.13(A)(1) to allow any person to appeal any notice, order, or decision by the Chief by appealing to the Reclamation Board of Review. It eliminates the appeal to the Chief, and requires notice of appeal to be filed within 30 days after a notice, order, or decision is issued, which is a change from "receipt thereof". The amendment gives the Reclamation Board of Review exclusive original jurisdiction to hear and decide such appeals.

The change of time for appeal is inconsistent with SMCRA section 525(a)(1), which provides for appeal within 30 days from receipt of a notice or order. Since a notice, order, or decision may be mailed to an operator or other party, the change is significant in that it shortens the time in which the operator or other party may appeal. Therefore, the Secretary cannot approve this amendment. This deficiency could be corrected by an Attorney General's opinion or a policy statement. The other changes are consistent with SMCRA Section 525 and are approved.

(3) The amendment to ORC section 1513.13(C) eliminates the requirements concerning hearings by the Chief and temporary relief. It provides that the Chairman of the Board may, under conditions he prescribes, grant temporary relief he consider appropriate pending final determination of an appeal if (1) all parties to the appeal have been notified or given an opportunity to be heard, (2) the person requesting relief shows that there is a high likelihood that he will prevail on the merits, and (3) the relief will not adversely affect public health or safety or cause significant imminent environmental harm.

Section 525(c)(1) of SMCRA requires that a hearing be held in the locality of the permit area on the request for temporary relief in which all parties are given an opportunity to be heard. The amendment to ORC section 1513.13(C)(1) does not require that the hearing be in the locality of the permit area. This omission could hamper an operator or other party in their attempt to obtain temporary relief.

The Secretary finds that the amendment to ORC section 1513.13(C)(1) is not consistent with section 525(c)(1) of SMCRA in that it omits a requirement that the temporary relief hearing be held in the locality of the permit area. This deficiency could be corrected by a policy statement or an Attorney General's opinion.

(4) ORC section 1513.13(C), as amended by Am. Sub. SB 240, allows the Chairman of the Reclamation Board of Review to make determinations concerning the granting of temporary relief. The decision of the Chairman on temporary relief cannot, however, be appealed, because an Ohio appellate court has determined that appeals to it are limited to decisions of the Board, *Barack* v. *Call*, Seventh District Court of Appeals, Case No. 83–B–1 (1983). Thus, decisions of the Chairman not to grant temporary relief cannot be reviewed by an appellate court until the Board renders a decision on the merits.

The amendment is not consistent with SMCRA section 526, which provides for a judicial appeal of the decision relating to temporary relief.

Therefore, the Secretary finds that the proposed amendments to ORC 1513.13(A)(1) and 1513.13(C) are not fully consistent with SMCRA and hereby imposes an additional condition of program approval.

On April 8, 1983, the State was advised of the need to amend ORC 1513.13(A)(1) and 1513.13(C) so that these provisions are consistent with SMCRA Sections 525 (a)(1), (c)(1) and 526(c). By letter dated April 27, 1983, the State agreed to so amend its program by August 8, 1983. In the interim, Ohio has agreed as a matter of policy: (1) Not to challenge the time limit on an appeal brought within 30 days of the receipt of a notice, order or decision; (2) that hearings on requests for temporary relief will be held in the locality of the permit area; and (3) that all requests for temporary relief and subsequent decisions will be acted upon by the Reclamation Board of Review.

20. *ORC Section 1513.14: Review of orders by Board of Review and courts.* Am. Sub. SB 240 amends ORC section 1513.14 by removing the provision concerning appeal of decisions by the Chief and vests the exclusive jurisdiction on appeals in the Board of Review. This change is not inconsistent with section 525 of SMCRA.

However, the State must provide for appeal of the Chairman's decision on temporary, relief. See finding concerning ORC 1513.13.

21. *ORC Section 1513.16(F): Reclamation standards.* Am. Sub SB 240 makes the following changes to ORC section 1513.16(F):

(1) ORC section 1513.16(F) is amended to create two actions to be taken on a bond: "reduction" and "release." If only a certain amount of the bond is being reduced, it is a reduction. At the completion of the liability period, the bond is then "released." A bond is reduced upon completion of backfilling and regrading (phase one) and upon the beginning of the liability period (phase two) after reseiling and the establishment of vegetation.

The change from the phrase "bond release" to "bond reduction" for phase one and two release eliminates the requirement that the operator advertise and give public notice to allow for public participation and the right to file written objections concerning those phases. The result is that the Chief could release as much as 85% of the bond without any public notice or opportunity for public comment. This amendment is

VOL

01
MAY
24
1983
UMI

in conflict with SMCRA section 519(a), which clearly states that:

* * *the permittee may file a request with the regulatory authority for release of all or part of a performance bond or deposit * * *. The operator shall submit a copy of an advertisement placed at least once a week for four successive weeks in a newspaper of general circulation in the locality of the surface coal mining operation.

The "bond reduction" is still a release of the bond liability of the permittee, so that "bond reductions" are nevertheless "bond releases" as referred to in SMCRA section 519 and must meet the same requirements concerning public notice and the right to file written objections as required by section 519.

The Secretary finds that SMCRA does not allow for bond reductions as provided for by ORC section 1513.16(F), and therefore, conditions his approval of this amendment on a further revision to ORC section 1513.16(F).

On April 8, 1983, the State was advised of the need to amend ORC section 1513.16(F) to meet this condition by revising the ORC to require that all bond reductions must meet the same public participation requirements as bond releases consistent with section 519 of SMCRA. By letter dated April 27, 1983, the State agreed to amend its program by August 8, 1983. In the interim, Ohio agreed not to reduce or release any portion of a bond unless the bond release requirements specified in ORC section 1513.16(F) have been met.

(2) Revised ORC section 1513.16(F) also allows for an informal conference to be held by the Chief, if requested by interested parties, on bond releases. The conference proceedings are to be recorded unless waived by all parties. The revision eliminates the formal hearing by the Chief and directs any appeals from the conference to the Reclamation Board of Review. This is consistent with SMCRA section 519(g) and is approved.

(3) Amended ORC section 1513.16(F) eliminates resoiling as a requirement for approval of the first phase of bond reduction and reduces from 60% to 50% of the total bond to be released upon approval of the first phase of reclamation. Resoiling is now required as part of the second phase of reclamation before reduction. This provision is consistent with SMCRA section 519(c)(1) and (2) and is approved.

(4) The phase two reduction is also limited, in ORC section 1513.16(F), to 35% of the original bond deposited. Limiting the phase two bond release to 35% is not inconsistent with section 519(c) of SMCRA because, although it places an upper limit on the amount of the bond to be released, the Chief must still determine the amount of the bond which would be necessary for a third party to re-establish vegetation. This amendment is consistent with SMCRA and is approved.

22. *ORC Section 1513.16(H): Reclamation standards.* Am. Sub. SB 240 adds section (H) to ORC section 1513.16. This section gives the State the statutory authority for reclamation standards and procedures for bond release for permits issued prior to the effective date of revised Chapter 1513 for the permanent program, September 1, 1981. The standards and procedures had been deleted in that legislation by error, thereby requiring that interim program permits meet permanent bond release and forfeiture criteria. The addition of paragraph (H) reinstates interim program standards in permits issued prior to September 1, 1981. This change is not inconsistent with SMCRA and is approved.

23. *ORC Section 1513.131: Adjudicatory hearings.* Am. Sub. SB 240 amends ORC section 1513.131 to assign the duties of the Reclamation Board of Review to a hearing officer. This amendment is not inconsistent with SMCRA and is approved.

Abandoned Mine Land Reclamation Plan

ORC Section 1513.37: Abandoned mine special account. Am. Sub. SB 323 revises ORC section 1513.37(D)(2) to require the State board on unreclaimed strip mined lands to review all applications for administrative costs, imminent hazards, or emergency projects before the Chief may make application for such funds to the Secretary. This change is not in conflict with SMCRA and is approved, although the Secretary notes that any proposed projects must meet the criteria established in the approved Title IV program for Ohio.

Am. Sub. SB 323 also renumbers paragraph D(4) as D(5), while leaving the wording unchanged. A new paragraph D(4) is inserted to require the review and approval of the State board on unreclaimed strip mined lands of all specific reclamation project proposals prior to any expenditures of funds. This change does not conflict with SMCRA, and is approved, although the Secretary notes that any proposed projects using federal grant funds must meet the criteria established in the approved Title IV program for Ohio.

Am. Sub. SB 323 adds a new paragraph under section (J), which would require all contractors performing reclamation work under this section to pay its workers at the greater of their regular rate of pay or the average wage rate paid in the State for the same or similar location by private companies doing their own reclamation work. This amendment is not inconsistent with SMCRA and is approved.

Non-Substantive Amendments

Ohio has made numerous revisions tc the ORC and OAC to make non-substantive, primarily editorial, changes The Secretary finds the corrections consistent with SMCRA and 30 Chapter VII.

Effect of Secretary's Decision

Section 503 of SMCRA establishes that a State may not exercise jurisdiction under the Act unless the State program is approved by the Secretary. Similarly, the Secretary's regulations at 30 CFR 732.17(a) require that any alteration of an approved State program must be submitted to OSM as a program amendment. Thus, any changes to the program are not enforceable by the State until approved by the Secretary. The Federal regulations at 30 CFR 732.17(g) clearly prohibit any unilateral changes to approved State programs. In his oversight of the State program, the Secretary will recognize only the statutes and regulations approved by him, and will require the enforcement by the State of only such provisions. Therefore, the provisions that the Secretary is approving today will take effect today for purposes of the State program. Those provisions the Secretary has not approved today or has affirmatively disapproved may not be implemented by the State in any manner until such time as the Secretary approves them.

IV. Public Comments

Comments were solicited from Federal agencies pursuant to section 503(b) of SMCRA and 30 CFR 732.17(h)(10)(i). Of those agencies invited to comment, responses were received from the following: Bureau of Mines, Fish and Wildlife Service, Farmers Home Administration, Mine Safety and Health Administration, Environmental Protection Agency, Soil Conservation Service, and Corps of Engineers. The responses either offered no comments or offered ones directed to aspects of the approved Ohio program not included in the present rulemaking. The disclosure of Federal agency comments is made pursuant to section 503(b)(1) of SMCRA and 30 CFR 732.17(b)(10)(i).

No other comments were received in response to the January 21, 1983 Federal Register.

V. Approval

Accordingly, conditions (b), (d), (f)(1)–(f)(6), (f)(8)–(f)(10), (g), (h)(2)–(h)(3), (i)(1)–(i)(3), (j), (k)(1) and (k)(2) are hereby removed and 30 CFR Part 935 is amended to: (1) Indicate approval of the Ohio regulatory program and AML amendments; (2) modify condition (f)(7); (3) extend the time by which Ohio must satisfy conditions (f)(7), (k)(3), (k)(4), and (k)(5); and (4) impose two new conditions of program approval.

VI. Procedural Matters

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any new requirements; rather, it ensures that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 935

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, Part 935 of Title 30 is amended as set forth herein.

Dated: May 9, 1983.

Daniel N. Miller Jr.,

Assistant Secretary for Energy and Minerals.

PART 935—OHIO

1. 30 CFR 935.10 is revised to read as follows:

§ 935.10 State regulatory program approval.

The Ohio State regulatory program as submtted on February 29, 1980, and resubmitted on January 22, 1982, is conditionally approved, effective August 16, 1982. Beginning on that date, the Department of Natural Resources shall be deemed the regulatory authority in Ohio for all surface coal mining and reclamation operations on non-Indian and non-Federal lands. Only surface coal mining and reclamation operations on non-Indian and non-Federal lands shall be subject to the provisions of the Ohio permanent regulatory program. Copies of the approved program, as amended, are available at:

(a) Division of Reclamation, Ohio Department of Natural Resources, Fountain Square, Building B, Columbus, Ohio 43224; Telephone: (614) 265–6633.

(b) Office of Surface Mining, Room 5315, 1000 L Street, N.W., Washington, D.C. 20240; Telephone: (202) 343–4728.

2. 30 CFR 935.11 is amended by removing and reserving paragraphs (b), (d), (f)(1) through (f)(6), (f)(8) through (f)(10), (g), (h)(2), (h)(3), (i), (j), (k)(1), and (k)(2).

3. 30 CFR 935.11 is amended by revising paragraph (k)(3), (k)(4), and (k)(5) by substituting "August 8, 1983" for "February 8, 1983" each time it appears.

4. 30 CFR 935.11 is amended by revising paragraph (f)(7) and adding paragraphs (l) and (m) as follows:

§ 935.11 Conditions of State regulatory program approval.

* * * * *

(f) Steps will be taken to terminate the approval found in § 935.10:

* * * * *

(7) Unless Ohio submits to the Secretary by August 8, 1983, copies of promulgated regulations deleting the word "substantially" from OAC 1501:13–9–15(E)(5) to establish the beginning of the period of extended responsibility consistent with 30 CFR 816.116(b)(1).

* * * * *

(l) Steps will be taken to terminate the approval found in § 935.10 unless Ohio submits to the Secretary by August 8, 1983, copies of fully enacted legislation amending ORC sections 1513.13(A)(1) and 1513.13(C) to provide that:

(1) The time for filing a notice of appeal is within 30 days after receipt of a notice, order or decision; (2) a hearing on a request for temporary relief shall be held in the locality of the permit area; and (3) temporary relief decisions by the Chairman of the Reclamation Board of Review are judicially reviewable. Until the condition is satisfied, Ohio has agreed as a matter of policy not to challenge the time limit on an appeal brought within 30 days of the receipt of a notice, order or decision; that hearings on requests for temporary relief will be held in the locality of the permit area; and that all requests for temporary relief and subsequent decisons will be acted upon by the Reclamation Board of Review.

(m) Steps will be taken to terminate the approval found in § 935.10 unless Ohio submits to the Secretary by August 8, 1983, copies of enacted legislation amending ORC section 1513.16(F) to require that all bond reductions must meet the same public participation requirements as bond releases, consistent with Section 519 of SMCRA. Until the condition is satisfied, Ohio has agreed not to reduce or release any portion of a bond unless the bond release requirements specified in ORC section 1513.16(F) have been met.

5. Part 935 is amended by adding a new § 935.15 as follows:

§ 935.15 Approval of regulatory program amendments.

(a) The following amendment was approved effective January 17, 1983: Ohio revised rule OAC 1501:13–1–01, adopted September 16, 1982.

(b) The following amendments were approved effective January 31, 1983: Ohio revised rules OAC 1501:13–1–07, 1501:13–4–03, 1501:13–4–04, and 1501:13–4–05, adopted November 4, 1982.

(c) The following amendments were approved effective May 24, 1983:

(1) Ohio revised code (ORC), as amended by SB 240 and 323, adopted March 18, 1983, with the following exceptions: ORC Sections 1513.01(G)(2), 1513.07(B)(2)(n), 1513.13(A)(1), 1513.13(C), 1513.16(A)(10)(b)(ii) and 1513.16(F).

(2) Ohio revised rules, submitted January 6, 1983.

(3) Ohio policy statements dated December 28, 1982.

6. Part 935 is amended by adding a new § 935.25 as follows:

§ 935.25 Approval of AML plan amendments.

(a) The following amendments were approved effective May 24, 1983:

(1) Ohio revised code (ORC) section 1513.37(D)(2), (D)(4), (D)(5) and (J), adopted March 18, 1983.

(Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*)

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 701

Availability of Department of the Navy Records and Publication of Department of the Navy Documents Affecting the Public

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: This rule sets forth amended regulations pertaining to the Department of the Navy Freedom of Information Act Program. The rule reflects changes in the Secretary of the Navy Instruction 5720.42 series from which it is derived.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Mrs. Gwendolyn R. Aitken (Op–09B1P), Office of the Chief of Naval Operations, Washington, DC 20350, Telephone: (202) 694–2004.

SUPPLEMENTARY INFORMATION: Pursuant to the authority cited below, the Department of the Navy amends 32 CFR Part 701, Subparts A, B, C, and D, derived from the Secretary of the Navy Instruction 5720.42 series, which implements within the Department of the Navy the provisions of Department of Defense Directives 5400.7 and 5400.7–R series, Department of Defense Freedom of Information Act Program (32 CFR Part 286) pertaining to action on requests for release of departmental records under the Freedom of Information Act (5 U.S.C. 552). This rule is being published by the Department of the Navy for the guidance and interest of the public in accordance with 5 U.S.C. 552(a)(1). It has been determined that invitation of public comment on these changes to the Department of the Navy's implementing instruction prior to adoption would be impracticable and unnecessary, and it is therefore not required under the public rulemaking provisions of 32 CFR Parts 296 and 701, Subpart E. Interested persons, however, are invited to comment in writing on this amendment. All written comments received will be considered in making subsequent amendments or revisions to 32 CFR Part 701, Subparts A, B, C, and D, or the instruction upon which it is based. Changes may be initiated on the basis of comments received. Written comments should be addressed to Gwendolyn R. Aitken (Op–09B1P), Office of the Chief of Naval Operations, Washington, DC 20350. It has been determined that this final rule is not a "major rule" within the criteria specified in section 1(b) of Executive Order 12291 and does not have substantial impact on the public.

List of Subjects in 32 CFR Part 701

Administrative practice and procedure, Freedom of information, Privacy.

Accordingly, 32 CFR Part 701, Subparts A, B, C, and D are amended. Subparts E, F, and G remain unaffected by this amendment. Subpart C is amended by its removal, and that subpart is reserved for future use. Subparts A, B, C, and D are revised to read as follows:

PART 701—AVAILABILITY OF DEPARTMENT OF THE NAVY RECORDS AND PUBLICATION OF DEPARTMENT OF THE NAVY DOCUMENTS AFFECTING THE PUBLIC

Subpart A—Department of the Navy Freedom of Information Act Program

Sec.
701.1 Purpose.
701.2 Scope and effect.
701.3 Definitions.
701.4 Policy.
701.5 Responsibility and authority for determinations.
701.6 Format and procedures for requesting records.
701.7 Procedures for processing FOIA requests.
701.8 Appeals from denials of requests for records.
701.9 For Official Use Only (FOUO).

Subpart B—Guidelines on Matters Which Are Exempt From Public Disclosure

701.21 General rule.
701.22 Reasonably segregable matters.
701.23 Judicial review.
701.24 Specific exemptions.

Subpart C—[Reserved]

Subpart D—Guidelines for Assessment/ Waiver/Reduction of Fees

701.40 Purpose.
701.41 Fee Assessment.
701.42 Waiver/ reduction of fees.
701.43 Computation of fees.
701.44 Collection of fees.
701.45 Search and duplication fees.

Authority: 5 U.S.C. 552, 32 CFR Part 286.

Subpart A—Department of the Navy Freedom of Information Act Program

§ 701.1 Purpose.

Subparts A, B, and D of this Part 701 implement the Freedom of Information Act (5 U.S.C. 552), and the Department of Defense Directives 5400.7 and 5400.7–R series, Department of Defense Freedom of Information Act Program, (*See* 32 CFR Part 286) and outline the policies and procedures for the disclosure of records, establish mandatory time limits for Freedom of Information Act (FOIA) responses and explain how members of the public may inspect or obtain copies of Department of the Navy records.

§ 701.2 Scope and effect.

(a) *Applicability.* Subparts A, B, and D of this Part 701 apply throughout the Department of the Navy. They govern the disclosure of records to the general public, including military and civilian employees of the government acting as private citizens. Informal requests, requests for information other than naval records, and inquiries for which no record exists are not subject to the technical requirements of these subparts.

(b) *Requests from government officials.* Requests from officials of federal, state, or local governments for Department of the Navy records shall be honored on an expeditious basis whenever possible. For purposes of determining whether record(s) shall be provided, such officials acting in an individual capacity shall be considered the same as any other requester.

(c) *Requests from foreign governments.* Foreign governments seeking information from the Department of the Navy should use established official channels for obtaining information.

(d) *Exclusion of requests.* The following categories of requests are excluded from the scope of Subparts A, B, and D of this Part 701:

(1) Requests from the Congress, which are governed by Secretary of the Navy Instruction 5730.5 series, Procedures for the Handling of Naval Legislative Affairs and Congressional Relations:

(2) Requests from individuals, including Department of the Navy personnel, for records pertaining to themselves and located in "systems of records," which are governed by Secretary of the Navy Instruction 5211.5 series, Personal privacy and rights of individuals regarding records pertaining to themselves (32 CFR Part 701, Subparts F and G);

(3) Requests from the General Accounting Office (GAO) for records in connection with audits, which are governed by Secretary of the Navy Instruction 5741.2 series, Relations with the General Accounting Office, and;

(4) Court orders or subpoenas demanding production of records, discovery, or testimony of witnesses, which are governed by the Manual of the Judge Advocate General (JAGINST 5800.7A), Chapter XIII (32 CFR Part 720).

(e) *Publication and public availability of special classes of records.* The requirements of 5 U.S.C. 552 that certain classes of Department of the Navy

regulatory, rulemaking, and organizational records be published in the **Federal Register** for the guidance of the public and be made available for public inspection and copying, are implemented in 32 CFR Part 701, Subpart E.

(f) *Public affairs regulations.* Subparts A, B, and D of this Part 701 are intended to complement, not restrict, the conduct of Department of the Navy public affairs, media relations, community relations, internal relations functions and practices authorized in Secretary of the Navy Instruction 5720.44 series, Department of the Navy Public Affairs Regulations. Should the practices authorized in that regulation conflict in any respect with any provisions of these Subparts A, B, and D of Part 701, the provisions of these subparts shall be controlling.

(g) *U.S. Navy Regulations.* For the purposes of Article 1116.3, U.S. Navy Regulations (1973) (32 CFR 700.1116(c)), the release of a record to a member of the public under the Freedom of Information Act shall be deemed to have been done in the discharge of official duties. For the purposes of Article 1116.4 (32 CFR 700.1116(c)), the release of a record designated as FOR OFFICIAL USE ONLY to a member of the public upon a request shall be processed in accordance with instructions outlined in § 701.9.

(h) *Other directives.* The following directives, to the extent that they do not conflict with these Subparts A, B, and D of this Part 701, and serve to supplement it, include:

(1) Marine Corps Manual, paragraph 1015 (also, for Headquarters Marine Corps, HQO P5000.12G, Chapter 11)—release on information from the personnel records of members and former members of the Marine Corps.

(2) Federal Personnel Manual, Chapters 293, 294, 297, 335, 339, and 713—release of information from active and inactive civilian personnel records.

(3) Manual of the Medical Department, U.S. Navy NAVMED P–117, Chapter 23, Section III—release of information from active and inactive medical records.

§ 701.3 Definitions.

As used in Subparts A, B, and D of this Part 701 the following terms and meanings apply:

(a) *Administrative appeal.* An appeal made by a requester to the appellate authority (Judge Advocate General or General Counsel) or his/her designee to reverse a decision made by an initial denial authority in which all or part of a requested record was denied or a request for waiver/reduction of fees was denied. A requester may also file an administrative appeal on the basis of nonresponse to an FOIA request within the statutory time limit.

(b) *Agency records.* Information or products of data compilation, regardless of physical form or characteristics, (e.g., written documents, ADP storage media, computer printouts, etc.) made or received by a naval activity in connection with the transaction of public business and preserved by a naval activity as evidence of the organization, policies, functions, decisions, or procedures of the naval activity. The term "agency records" does not include:

(1) Library and museum material made, acquired, and preserved solely for reference or exhibition.

(2) Objects or articles, such as structures, furniture, paintings, sculpture, three-dimensional models, vehicles, equipment, and parts of wrecked aircraft, whatever their historical value, or value as evidence.

(3) Commercially exploitable resources, including but not limited to musical arrangements and compositions, formulae, designs, drawings, maps, and charts, map compilation manuscripts and map research materials, research data, computer programs, and technical data packages that were not created and are not utilized as primary sources of information about organizations, policies, functions, decisions or procedures of the Department of the Navy.

(4) Unaltered publications and processed documents, such as regulations, manuals, maps, charts, and related geographical materials, that are available to the public through an established distribution system with or without charges.

(5) Anything that is an intangible or documentary record, such as an individual's memory or oral communication.

(6) Supervisor's personal notes on his/her employees (which are not required to be prepared or maintained by any naval instruction or regulation), concerning their performance, etc., and used solely as a memory aid in preparing evaluation reports. These notes are not made available to other persons in the agency, are not filed with agency records, and are destroyed after the evaluation period by the individual who prepared them. Among this category of notes are Division Officer's notebooks and Marine Corps Unit Leader's notebooks, etc.

(c) *Appellate authority.* The Judge Advocate General or the General Counsel are the naval officials having jurisdiction over administrative appeals or partial denials of FOIA requests under their cognizance as delineated in § 701.8.

(d) *FOIA request.* A written request for Department of the Navy records made by a member of the public, or an organization, business, etc., that either explicitly or implicitly invokes 5 U.S.C. 552, Department of Defense Directives 5400.7 and 5400.7–R series, Department of Defense Freedom of Information Act Program (*see* 32 CFR Part 286) and/or Subparts A, B, and D of this Part 701. The written request must also contain a reasonable description of the record(s) being sought and contain some statement as to the requester's willingness to pay all fees or those up to a specified amount. A record must exist and be in the possession and control of the Department of the Navy at the time of the request to be considered subject to Subparts A, B, and D of this Part 701. There is no requirement to create or complile a record not already in existence.

(e) *Initial Denial Authority (IDA).* An official who has been granted authority to withhold records, either in whole or in part, which are requested under the FOIA based on one or more of the nine FOIA exemptions. IDA's may also grant requests for reduction/waiver of fees. A list of IDA's are contained in § 701.5.

§ 701.4 Policy.

In accordance with the spirit and intent of 5 U.S.C. 552, Department of Defense Directives 5400.7 and 5400.7–R series, Department of Defense Freedom of Information Act Program (*see* 32 CFR Part 286) the Department of the Navy will make available to any person the maximum information concerning its operations, activities, and administration. The FOIA does not permit agencies to distinguish between U.S. citizens and foreign citizens. A naval record shall be withheld only when it is exempt from disclosure under the FOIA. In the event a requested record is exempt under the FOIA, it may nonetheless be released when it is determined that no governmental interest will be jeopardized by the release of the record. Therefore, subject to the conditions of Subparts A and B of this Part 701 concerning exemptions and the requester's compliance with prescribed minimum requirements, records requested by the public will be made available promptly, fully, and willingly, as a matter of right.

(a) *Requests for Records.* Naval activities receiving written or oral requests from members of the public are responsible for advising the requester of the correct means for obtaining

VOL 48 ISS 101 MY 24 1983 UMI

permission to examine or copy records at appropriate times and at locations where they are held, or for obtaining copies of such records. Minimum requirements are prescribed in § 701.6.

(b) *Time limits.* Each naval activity is responsible for developing procedures for ensuring the expeditious handling and prompt retrieval and review of the requested records. The cognizant official having responsibility for the record(s) has 10 working days (excluding Saturdays, Sundays, and legal holidays) to respond to the requester regarding the FOIA request. The 10 working day time limit commences upon receipt of the request by the cognizant activity. If the cognizant official is unable to meet the statutory time limit of 10 working days, he/she may, in limited instances, seek a time extension (*See* § 701.7).

(c) *Identification of records.* Subject to the provisions of Subparts A, B, and D of this Part 701, requests shall be honored for records which are "reasonably described." A "reasonably described" record provides sufficiently accurate and specific descriptions (i.e., memorandum, title, index citation, subject area, date the record was created, originator, type and location of incident) which enable naval personnel to locate and identify particular records with a reasonable amount of effort. A record must exist and be in the possession and control of the Department of the Navy at the time of the request to be considerd subject to Subparts A, B, and D of this Part 701. Mere possession of a record does not presume departmental control and such records, or identifiable portions thereof, shall be referred to the originating agency or activity for direct response to the requester. There is no obligation to create, compile, or obtain a record not already in existence to satisfy an FOIA request.

(d) *Fee assessment.*—(1) In addition to reasonably describing the record(s), the requester should make a clear statement that he/she is willing and able to pay all fees or those up to a specified amount, or satisfactorily show that he/she is entitled to a waiver/reduction of fees, if the fees for reproduction and/or search of the requested record(s) are expected to exceed the $30 minimum fee waiver threshold. Fees may not be used as a means to discourage requesters from seeking records. Collection of fees is limited to the charges associated with direct document search and duplication efforts. Computer search is based on direct cost of the central processing unit, input-output devices, and memory capacity of the actual computer configuration. Documents shall be furnished without charge or at a reduced rate when the naval activity determines that a waiver or reduction of fees is in the public interest because furnishing the information is considered as primarily benefiting the general public. Minimum fees shall not be charged. *See* 32 CFR Part 701, Subpart D for determining fees.

(2) In order to be as responsive as possible to FOIA requests, while minimizing unwarranted costs to the taxpayer and meeting the 10 working day response time, naval activities shall adhere to the following procedures:

(i) If the requester declares an unwillingness to pay fees and does not substantiate a request for waiver/reduction of fees, and it appears that the direct search and reproduction costs associated with the request shall exceed the automatic fee waiver threshold, the request need not be processed and the requester shall be so informed.

(ii) If the requester declares a willingness to pay fees up to a specified amount and does not substantiate a request for waiver/reduction of fees, then the specified amount or the automatic fee waiver threshold, whichever is greater, shall not be exceeded without the consent of the requester.

(iii) If the requester makes no declaration concerning fees and does not substantiate a request for waiver/reduction of fees, and if it appears that the direct search and reproduction fees to be assessed shall exceed the automatic fee waiver threshold, the request shall not be processed until the requester is advised of anticipated charges and agrees to pay them.

(iv) Activities may require payment of all or a portion of estimated fees before processing extensive or costly requests.

(v) Subsequent requests from persons who have failed to pay fee obligations need not be processed until previous obligations have been met or waived.

(vi) The response to the requester should contain information concerning the fee status of the request. Generally, the information shall reflect one or more of the following conditions:

(A) All fees have been received.

(B) Fees have been waived because they fall below the automatic fee waiver threshold.

(C) A request for waiver has been denied.

(D) Fees have been waived or reduced from a specified amount to another specified amount because the rationale provided in support of a request for waiver has been accepted.

(E) Fees due in a specified amount have not been received.

§ 701.5 Responsibility and authority for determinations.

(a) *Release authorities.* Commanding officers and heads of all Navy and Marine Corps activities (departmental and field) are authorized to furnish copies of records under their cognizance, or to make such records available for examination, upon proper request, subject to the exceptions noted in paragraphs (c) (2) and (3) of this section. Coordination with officials having cognizance over the subject matter of the requested record is advised when there is a question as to its releasability. If it is determined that a requested record should not be released in whole or in part, the release authority should forward the request, a copy of the requested document(s) and his/her recommendations, to the initial denial authority in the chain of command for release determination. For records which are part of record systems governed by the Privacy Act, the record custodian specified in the systems notice published annually by the Chief of Naval Operations is the appropriate authority to respond to an initial request for a record.

(b) *Initial Denial Authorities (IDA's).* The following chief officials, their respective vice commanders, deputies, and those principal assistants specifically designated by the chief official are authorized to deny, as well as grant requests, either in whole or in part, for documents or records; to grant a one 10 working day extension to the time limits for responding to FOIA requests; and to deny requests to waive or reduce FOIA fees, when the information sought relates to matters within their respective areas of responsibility:

(1) For the Navy Department: The Civilian Executive Assistants; the Chief of Naval Operations; the Commandant of the Marine Corps; the Chief of Naval Material; the Chief of Naval Personnel; the Commanders of Naval Systems Commands; the Commanders of the Naval Intelligence Command, Naval Security Group Command, and Naval Telecommunications Command; the Chief, Bureau of Medicine and Surgery; the Auditor General of the Navy; the Naval Inspector General; the Assistant Deputy Chief of Naval Operations (Civilian Personnel/Equal Employment Opportunity); the Chief of Naval Education and Training; the Chief of Naval Reserve; the Chief of Naval Research; the Chief of Naval Development; the Commander, Naval Oceanography Command; the Director, Naval Civilian Personnel Command; the heads of Department of the Navy Staff Offices, Boards, and Councils; the Assistant Judge Advocate General (Civil Law); and the Assistant Judge Advocate General (Military Law). The Judge Advocate General and his Deputy, and the General Counsel and his Deputies are excluded from this grant of authorization, but the Assistant Judge Advocates General, the Assistants to the General Counsel and the Director, Litigation Office, Office of the General Counsel, are so authorized.

(2) For the shore establishment:

(i) All officers authorized pursuant to Article 22, UCMJ, or designated as empowered in section 0103d, Manual of the Judge Advocate General, to convene general courts martial.

(ii) The Director, Naval Investigative Service, the Assistant Commander (Management and Operations), Naval Legal Service Command, and the Director of Navy Laboratories.

(3) In the operating forces: All officers authorized pursuant to Article 22, UCMJ, or designated as empowered in section 0103d, Manual of the Judge Advocate General, to convene general courts martial.

(c) *Responsibility for acting on requests.*

(1) General rule. Subject to § 701.7(c) when a Department of the Navy official receives a request for a copy of, or permission to examine a record under his/her cognizance, that official is responsible for acting on the request in the time and manner prescribed in Subparts A, B, and D of this Part 701.

(2) If an official receives a request for records that he/she holds, but which were originated by another naval activity, the official shall ordinarily refer the FOIA request and copies of the requested documents to that activity for direct response, after direct coordination and obtaining concurrence from the activity. The naval activity that initially received the request has the responsibility for notifying the requester of the referral. That naval activity shall not, in any case, release or deny such records without prior consultation with the other naval activity.

(3) The following actions shall be taken with regard to requests for:

(i) Classified records.—(A) If a naval activity receives an FOIA request or mandatory declassification review request for information whose existence or nonexistence is itself classifiable under the provisions of Executive Order 12356, the naval activity shall refuse to confirm or deny the existence or nonexistence of the requested information.

(B) If a naval activity receives a request for documents in its custody that were classified by another agency, it shall refer the request and copies of the requested documents to the originating agency for processing, and may, after consultation with the originating agency inform the requester of the referral. Referred records shall only be identified to the extent consistent with security requirements. In cases in which the originating agency determines in writing that a response under paragraph (c)(3)(i)(A) of this section is required, the referring agency shall respond to the requester in accordance with that paragraph.

(C) If a naval activity receives a request which includes classified records originated by another naval activity for which the head of the activity is not the classifying authority in accordance with OPNAV Instruction 5510.1 series, Department of the Navy Information Security Program Regulation, the request and copies of the requested documents shall promptly be readdressed and forwarded to the official having classification authority for the subject matter. The appropriate official will then review and make a determination as to the releasability of the classified portions of the records and so notify the requester within 10 working days after he/she has received the request. The naval activity that initially received the request has the responsibility for notifying the requester of the referral. Referred records shall only be identified to the extent consistent with security requirements.

(ii) NIS reports—a request for a Naval Investigative Service report or any portion thereof shall promptly be readdressed and forwarded to the Director, Naval Investigative Service, for review and release determination. The naval activity that initially received the request has the responsibility for notifying the requester of the referral. Direct liaison with NIS prior to the referral is encouraged.

(iii) JAG Manual investigative reports—a request for a JAG Manual investigative report shall promptly be readdressed and forwarded to OJAG, Code 21, for review and release determination except as provided in section 1331(b)(1) of the Manual of the Judge Advocate General (JAGINST 5800.7A) (§ 720.31(b)(1) of this chapter). The naval activity that initially received the request has the responsibility for notifying the requester of the referral.

(iv) Mishap investigation reports—a request for a mishap investigation report shall promptly be readdressed and forwarded to the Commander, Naval Safety Center, for review and release determination. The naval activity that initially received the request has the responsibility for notifying the requester of the referral.

(v) Naval Audit Service reports—a request for a Naval Audit Service report shall promptly be readdressed and forwarded to the Naval Audit Service Headquarters (Code OPS) for review and release determination. The naval activity that initially received the request has the responsibility for notifying the requester of the referral.

(vi) Technical documents controlled by distribution statements—a request for a technical document to which "Distribution Statement B" is affixed shall promptly be readdressed and forwarded directly to the "controlling DoD office" in accordance with Chief of Naval Material Instruction 5200.29 series, Distribution Statements on Technical Documents, for review and release determination. The naval activity that initially received the request has the responsibility for notifying the requester of the referral. Direct liaison with the cognizant official prior to referral is encouraged.

(vii) Records originated by other government agencies—When a request for records is received which was originated by an agency outside the Department of the Navy, promptly readdress it, forward the request and copies of the requested documents to the cognizant agency having the responsibility for acting on the request and notify the requester of the readdressal. This may be accomplished by sending a copy of the readdressal letter to the requester. The 10 working day time limit commences when the request is received by the cognizant agency. If additional guidance is required, contact the Chief of Naval Operations (OP-09B1P) or the Commandant of the Marine Corps (Code PAP), as appropriate. Direct liaison with the agency having cognizance over the record is encouraged for ensuring the expeditious handling of the request.

(d) *Misdirected requests.* Misdirected/misaddressed requests received for copies of or permission to examine Department of the Navy records shall be promptly readdressed and forwarded directly to the cognizant naval activity having the responsibility for acting on the request. Although the 10 working day time limit does not commence until the request is received by the cognizant official, telephonic liaison is encouraged to alert the official that the request is being referred. The naval activity that initially received the request is responsible for notifying the requester of the readdressal.

(e) *Records on Non-U.S. Government Source.* When a request is received for a

VOL
48
ISS
101
MY
24
1983
UMI

record that was obtained from a non-U.S. Government source, or for a record containing information clearly identified as having been provided by a non-U.S. Government source, the source of the record or information normally shall be notified promptly of the request and afforded reasonable time to present any objections concerning the release unless it is clear that there can be no valid basis for objection. If for example, the record or information was provided with actual or presumptive knowledge of the non-U.S. Government source and that it would be made available to the public upon request, there is no obligation to notify the source. Any objections shall be evaluated. When a substantial issue has been raised, the official may seek additional information from the source of the information and afford the source and requester reasonable opportunities to present their arguments on the legal issues involved prior to making an agency determination. When the source advises it will seek a restraining order or take court action to prevent release of the record or information, the requester shall be notified and action on the request normally shall not be taken until after the outcome of the court action is known.

§ 701.6 Format and procedures for requesting records.

(a) *Minimum requirements.* To qualify as an FOIA request within the technical requirements of Subparts A, B, and D of this Part 701, a request for copies of, or for permission to examine Department of the Navy records must, at a minimum:

(1) Be in writing and indicate expressly, or by clear implication, that it is a request made under 5 U.S.C. 552, Department of Defense Directives 5400.7 and 5400.7–R series, Department of Defense Freedom of Information Act Program (*See* 32 CFR Part 286) or Subparts A, B, and D of this Part 701.

(2) Contain a reasonable description of the particular record(s) requested. For example, provide details of the subject matter, type and location of incident, dates, originator, etc., to enable naval personnel to locate or identify the particular record(s) desired with a reasonable amount of effort; and,

(3) Contain a clear statement that the requester is willing and able to pay all fees or fees up to a specified limit, or provide satisfactory evidence that he/she is entitled to a waiver/reduction of such fees in accordance with 32 CFR Part 701, Subpart D, if the documents to be released are expected to exceed the minimum fee waiver threshold.

Note: Fees totaling $30 or less normally waived (*See* 32 CFR Part 701, Subpart D).

(b) *Treatment of request not meeting minimum requirements.*—(1) Requests which do not conform to the minimum requirements should, if possible, be answered within 10 working days after receipt. Whenever possible, the response should attempt to assist the requester in obtaining the desired records in accordance with the provisions of Subparts A, B, and D of this Part 701. For example, if the requester has not provided a reasonable description of the desired record(s), assist the requester in framing a new request in a way which might facilitate identification of the record(s). If the requester fails to offer to pay fees, furnish the requester with a reasonable estimate of any search and reproduction costs associated with the processing of the request. Activities are encouraged to contact the requester, if practicable, to clarify what he/she is seeking.

(2) If a request fails to qualify for treatment within the technical requirements of Subparts, A, B, and D of this Part 701, but the requested record is available and is releasable in its entirety, the responding official may provide a copy of the record if he/she determines it to be in the best interests of the activity to do so. The application of this provision shall be within the sole and exclusive discretion of the responsible official of the activity concerned and shall not be construed as creating an exception to, or grounds for, waiver of the minimum requirements.

§ 701.7 Procedures for processing FOIA requests.

(a) *Administrative controls.* Upon receipt of a written request for examination or copies of records, the naval activity will immediately ensure that action is taken to control the request and provide for its priority and expeditious handling, and for responding to the requester within the 10 working day limit (excluding Saturdays, Sundays, and legal holidays).

(b) *Time limits for determinations.* Once the request is received by the official having responsibility for acting on it, a response shall be made to the requester within 10 working days (excluding Saturdays, Sundays, and legal holidays), unless an extension of the time limit is needed to complete the processing of the request.

(1) Extension of Time Limits.—(i) Statutory extensions of time limits are only authorized in accordance with the following conditions:

(A) The need to search for and collect records that are located in whole or part at places separate from the activity processing the request;

(B) The need to search for, collect, and examine a substantial number of records responsive to a request; or,

(C) The need to consult with another naval activity or another agency which has a substantial subject-matter interest in the determination of the request.

(ii) When a statutory extension of time is needed, the IDA shall acknowledge the request in writing, within the 10 working day period, decribe the circumstance(s) requiring the delay, and indicate the anticipated date for a substantive response.

(iii) If it appears to be a substantial possibility that the request might be ultimately denied, in whole or in part, the Judge Advocate General (Code 14) or the General Counsel, as appropriate, may be consulted by expeditious means prior to authorizing such extension.

(iv) When it is anticipated that the normal statutory time limits (including the statutory time extension) are insufficient to provide a response, the IDA shall acknowledge the request in writing prior to the expiration of the normal statutory time limits (including the statutory time extension), describe the circumstance(s) requiring the dalay, and indicate the anticipated date for the substantive response. The requester shall be advised that he/she may appeal to the designee of the Secretary of the Navy within 45 days or await a substantive determination by a specified date. It shall be made clear that such an agreement does not prejudice the right of the requester to appeal an adverse substantive determination.

(v) As an alternative to the taking of formal extensions of time as described in paragraphs (b)(1)(i) (A) through (C) of this section, the official having responsibility for the release of requested information may negotiate informal extensions of time with requesters where appropriate, as an alternative to the procedure described in paragraph (b)(1) (i) or (iv) of this section.

(2) [Reserved.]

(c) *Action by officials who are not IDA's.* When the head of the activity responsible for acting on a request is not authorized under § 701.5(b) to deny requests, that official shall, within the applicable time limit, take one of the following actions:

(1) If it has been determined that the requested record is releasable in its entirety and is available, and the fees for search and duplication have either been met or waived, forward a copy of the requested record directly to the requester. However, if search and duplication fees exceed the minimum fee waiver threshold, the requester may

be instructed to forward payment prior to the record(s) being provided.

(2) If it has been determined that the requested record is releasable in its entirety but is not yet available, notify the requester that the request has been approved and that the requested record will be forwarded by a specified date, subject to appropriate directions concerning the payment of fees.

(3) If it has been determined that the request for examination of records is approved, notify the requester of the time and place where the records may be examined, subject to appropriate directions concerning the payment of fees, if any, incurred for searching for the records.

(4) If it has been determined that the request for records has been misaddressed or that the records being sought are held by another naval activity or government agency, promptly readdress it and advise the requester of the action taken.

(5) If it has been determined that the requested record should not be released in whole or in part, forward the request, a copy of the requested record(s), and the recommendation for denial (which briefly states the applicable exemption(s) and whether a governmental interest would be jeopardized by its release) to the next superior in the administrative chain of command authorized under § 701.5(b).

(d) *Action by IDA's.* When an IDA receives a request referred by a subordinate official or receives any other request to which he/she may respond, the IDA shall, within a 10 working day time limit, take one of the following actions:

(1) Execute one of the actions specified in paragraph (c) (1) through (4) of this section or, if appropriate, direct a subordinate to do so.

(2) If the processing of a request cannot be completed within the applicable time limit, explain the reason(s) for the delay to the requester, with notification that he/she may treat this delay as an initial denial with a right to submit an administrative appeal to the designee of the Secretary of the Navy (Judge Advocate General or General Counsel) within 45 days, or that the requester may agree to await a substantive determination by a specified date. It shall be made clear that any such agreement does not prejudice the right of the requester to appeal an adverse substantive determination.

(3) If the IDA determines that the requested record contains information which is not releasable under the FOIA, and the releasable information contained in the record is not reasonably segregable from the nonreleasable information, notify the requester of the determination, the reasons therefor, and the name(s) and title(s) of the person(s) responsible for the denial. Such notification shall also include the specific citation of the exemption(s) upon which the denial is based, a brief discussion that there is a jeopardy to the governmental interest served by invoking the exemption(s), and advisement of the requester's right to appeal to the designee of the Secretary of the Navy (Judge Advocate General or General Counsel) within 45 days. Additionally, if the denial is based, in whole or in part, on a security classification, the notification shall include a summary of the particular provisions of paragraph 5–101 of OPNAV Instruction 5510.1 series, Department of the Navy Information Security Program Regulation, which contains the rationale for the correct classification of the requested record.

(4) If the IDA determines that the requested record contains releasable information that is reasonably segregable from the nonreleasable information, he/she shall:

(i) With respect to the releasable information of the record, take the actions indicated in paragraph (c)(1) through (3) of this section; and,

(ii) With respect to the nonreleasable information of the record, take the action indicated in paragraph (d)(3) of this section.

(5) If the requester relies upon a claimed entitlement to a waiver/reduction of applicable fees, the IDA shall, if he/she determines that the requester's entitlement to such waiver/reduction is not warranted, notify the requester of such determination, the reason(s) therefor, the name(s) and title(s) of the person(s) responsible for the determination, and the right of the requester to appeal the determination to the designee of the Secretary of the Navy (Judge Advocate General or General Counsel), within 45 days. If the requester appeals the denial to waive/reduce fees, the release of the records may be withheld until the fee is paid or the appellate authority grants a waiver/reduction of fees.

(e) *Other reasons.* Other reasons that an FOIA request cannot be acted upon, but which are not considered to be denials are:

(1) The referring official is unable to make a determination as to the releasability of a requested record within the applicable time limit because the record has not been located or obtained.

(2) The information requested is not a record within the meaning of the FOIA and Department of Defense Directives 5400.7 and 5400.7–R series, Department of Defense Freedom of Information Act Program (*See* 32 CFR Part 286).

(3) A record has not been described with sufficient particularity to enable it to be located by conducting a reasonable search.

(4) The requester has failed to comply with procedural requirements concerning time, place, or fees. Note: Officials who are not IDA's may not deny requests for waiver or reduction of search and duplication fees.

(5) The activity has determined through knowledge of its files and a reasonable search effort that it does not hold the requested record.

(f) *Consultation encouraged.* Consultation with officials in other naval activities or other government agencies having a substantial interest in or useful advice concerning the determination of requests under the purview of Subparts A, B, and D of this Part 701 is encouraged wherever practicable, and, in some instances, is required.

(1) Consultation is required with other naval activities or agencies having substantial interest in the subject matter of requested records which may be withheld under the exemptions cited in 32 CFR Part 701, Subpart B.

(2) Consultation with the Office of the Judge Advocate General, the Office of the General Counsel, or the appropriate naval attorney in the field is encouraged concerning the interpretation and application of the technical provisions of Subparts A, B, and D of this Part 701, or where a denial of a request is expected to be appealed or judicially challenged.

(3) Consultation with a public affairs officer or the Chief of Information (OP–007) is encouraged when the requested records are considered newsworthy; a request is received from a news media representative; or, a denial of a request is expected to be publicly challenged. Further, the Chief of Information shall be notified of any release having evident public affairs implications.

(4) In the case of a denial of a request, in whole or in part, under Subparts A, B, and D of this Part 701 or a denial of waiver/reduction of fees, the IDA shall maintain a legible copy of the case file containing all pertinent correspondence and the requested record for prompt forwarding, upon request, to the Judge Advocate General or the General Counsel, in the event of an appeal.

(g) *Mailing lists.* Frequent FOIA requests are received which seek mailing lists of the home addresses and/or duty station addresses of naval personnel.

VOL 48 ISS 101 MAY 24 1983 UMI

(1) A request for a mailing list of home addresses is not releasable without the individuals' consent. This is construed to be a clearly unwarranted invasion of the individual' privacy and therefore may be withheld from disclosure under 5 U.S.C. 552(b)(6).

(2) A request for a mailing list for names and duty station addresses may be releasable, however certain facts must be brought to the attention of the requester prior to releasing the list. For example, many existing duty station address listings do not contain sufficient information to enable either the U.S. Postal Service or Navy-operated mail and distribution facilities to ensure delivery. These incomplete addresses would necessitate directory service which is often not available. As a result, such mailings will normally be endorsed as undeliverable and returned to the sender or otherwise disposed of. Further, if during the processing of a mailing list request it is determined that the duty station address is insufficient to effect delivery, the requester should be advised by letter of the potential for nondelivery. Fees associated with the processing of mailing list requests are determined in accordance with 32 CFR Part 701, Subpart D.

§ 701.8 Appeals from denials of requests for records.

(a) *Responsibility and authority.*—(1) Delegation of authority. The Judge Advocate General and the General Counsel are authorized to determine appeals made to the Secretary of the Navy on denials of requests for copies of Department of the Navy records or portions thereof, or refusals to waive or reduce fees, concerning matters which are within their respective areas of cognizance for legal services. This shall include the authority to release or withhold records, or portions thereof, waive fees, and to perform such other acts as may be required of the Secretary of the Navy in connection with the appeals made under 5 U.S.C. 552 and Subparts A, B, and D of this Part 701.

(2) Respective areas of cognizance. As delineated in Secretary of the Navy Instructions 5430.25 and 5430.27 series, the respective areas of cognizance of the Judge Advocate General and the General Counsel for providing legal services for the Department of the Navy are:

(i) Judge Advocate General—In addition to military law, all matters except those falling under the cognizance of the General Counsel.

(ii) General Counsel—

(A) the business and commercial law aspects of matters relating to:

(*1*) The acquisition, custody, management, transportation, taxation, and disposition of real and personal property and the procurement of services, including the fiscal, budgetary, and accounting aspects thereof; excepting, however, tort claims and admiralty claims arising independently of contracts, and matters relating to the naval petroleum reserves;

(*2*) Operations of the Military Sealift Command, excepting tort and admiralty claims arising independently of contracts;

(*3*) The Office of the Comptroller of the Navy;

(*4*) The Naval Data Automation Command;

(*5*) All matters in the fields of patents, inventions, trademarks, copyrights, royalty payments, and similar matters;

(*6*) Procurement aspects of foreign military sales, co-production and cooperative research and development and related agreements, NATO standardization agreements and matters relating to the Arms Exports Control Act.

(*7*) Department of the Navy litigation before the Armed Services Board of Contract Appeals; and,

(B) Civilian personnel law matters pertaining to the employment of present and former Navy civilian employees.

(b) *Addresses for appeals.* Appeals to the Secretary of the Navy under the provisions of 5 U.S.C 552 and Subparts A, B, and D of this Part 701 should be addressed to the appropriate authority as noted above. The appropriate mailing addresses are:

(1) The Judge Advocate General (Code 14), Navy Department, 200 Stovall Street, Alexandria, VA 22332.

(2) The General Counsel, Navy Department, Washington, DC 20360.

(c) *Time and format for filing appeals.* To be effective for the purposes of the provisions of 5 U.S.C. 552 and Subparts A, B, and D of this Part 701, an appeal from an initial denial, in whole or in part, for requested records or a refusal to waive/reduce fees, must be in writing and be received by the appellate authority not more than 45 days following the date of transmittal of the notification of the initial denial. Additionally, such appeal must clearly state that it is an appeal from a denial of a request made under the "Freedom of Information Act" or Subparts A, B, and D of this Part 701, and must attach a copy of the letter denying the request.

(d) *Time limits for determining appeals.*—(1) Normal requirement. A final determination on an appeal to the Secretary of the Navy normally shall be sent to the appellant within 20 working days after the appeal is received in the Office of the Judge Advocate General or the General Counsel.

(2) Extension of time limits. If additional time is needed due to unusual circumstances (*See* § 701.7(b)(1)(i)(A) through (C), the final decision may be delayed for the number of working days (not to exceed 10), that were not utilized as additional time for responding to the initial request. If, however, a determination cannot be made and the requester notified within 20 working days, the appellate authority may acknowledge to the requester, in writing, the date of receipt of the appeal, the circumstances surrounding the delay, and the anticipated date for substantive response. Requesters may be advised that, if the delay exceeds the statutory extension provision or is for reasons other than "unusual circumstances" they may consider their administrative remedies exhausted. Further, requesters should be advised that they may await a substantive response without prejudicing their right to judicial remedy. The appellate authority shall continue to process the case expeditiously whether or not the requester seeks a court order for release of the record(s). A copy of any response provided subsequent to filing of a complaint shall be forwarded to the Department of Justice.

(e) *Action upon receipt.* Upon receipt of an appeal, the Judge Advocate General or the General Counsel shall inform the IDA who shall expeditiously forward the case file with such comments and recommendations as he/she or other interested officials may deem appropriate. The Director of Naval Intelligence (OP–009DX) may be consulted, when appropriate, in appeal cases to resolve inconsistences or disputes involving classified records. All naval activities are directed to provide rapid and responsive assistance, as required, for facilitating correct and timely determinations of appeals. Direct liaison with appropriate officials within the Department of the Navy and other interested federal agencies is authorized at the discretion of the appellate authority, who also shall be responsible for coordinating with appropriate officials of the Departments of Defense and Justice in such manner as may be prescribed by directives of the Secretary of Defense. The Secretary of the Navy or appropriate Civilian Executive Assistants shall be consulted and kept advised of cases having unusual implications, and the Chief of Information shall be consulted and kept advised on cases described in § 701.7(f)(3).

(f) *Notification of final determination.* Upon resolving the issue(s) involved, the appellate authority shall provide the appellant with a written notification of the final determination made on the appeal. If the determination has the effect of granting a request, in whole or part, the appellate authority shall cause the requested records, or the releasable portions thereof, to be made promptly available to the appellant. If the final determination has the effect of denying a request, in whole or part, the notification shall contain the name(s) and title(s) of the individual(s) reponsible for such denial, an advisement of the requester's right to seek judicial review, and the following additional matters, as applicable:

(1) An explanation of the exemption(s) upon which the determinaton is based and the governmental interest that will be jeopardized by its release.

(2) If the determination is based, in whole or part, upon a security classification, a statement be provided that based on a declassification review it is determined that the record meets specified criteria and rational of OPNAV Instruction 5510.1 series, Department of the Navy Information Security Regulation.

§ 701.9 For Official Use Only (FOUO).

(a) *General.*—(1) *For Official Use Only* applies to information, records, and other materials which have not been given a security classification under the criteria of an Executive Order, but which contain information which may be withheld from the public for one or more of the reasons cited in FOIA exemptons 2 throught 9. No other materials shall be considered or marked FOR OFFICIAL USE ONLY (FOUO), as FOUO is not authorized as a form of classification to protect national security interests.

(2) Prior FOUO application. The prior application of FOUO markings is not a conclusive basis for withholding a record requested under the FOIA. When such a record is requested, the information in it shall be evaluated to determine whether, under current circumstances, FOIA exemptions apply in withholding all or part of the record. Information which is "reasonably segregable" and does not fall under an FOIA exemption(s) must be considered for release to the requester. In the event any exemption(s) applies(y), it may nonetheless be released when it is determined that no governmental interest will be jeopardized by its release.

(3) Historical papers. Documents such as notes, working papers, and drafts properly considered to be "records" under the FOIA and retained as historical evidence of Department of the Navy actions enjoy no special status apart from their exemptions under 5 U.S.C. 552.

(4) Unauthorized disclosure. The unauthorized disclosure of FOUO records does not constitute an unauthorized disclosure of Department of the Navy information classified for security purposes. However, appropriate administrative action shall be taken to the extent feasible, and appropriate disciplinary action shall be taken against those responsible. Unauthorized disclosure of FOUO information that is protected by the Privacy Act may also result in criminal and civil sanctions against the responsible person(s). The naval activity that originated the FOUO information shall be informed of its unauthorized disclosure.

(b) [Reserved.]

Subpart B—Guidelines on Matters Which are Exempt From Public Disclosure

§ 701.21 General rule.

No record or portion thereof shall be withheld from disclosure to the public unless it falls within the scope of one or more of the nine FOIA exemptions listed in § 701.24. Notwithstanding that a record falls under one or more FOIA exemptions, the record (or a reasonably segregable portion thereof) is releasable and shall be made available to the requester unless the cognizant official determines that a governmental interest would be jeopardized by its release. In no event, however, shall information be denied because its release might embarrass the Department of the Navy or its military or civilian officials in the performance of their duties.

§ 701.22 Reasonably segregable matters.

If a record contains both releasable and nonreleasable information, the releasable information shall be made available if it is reasonably segregable from the nonreleasable information in the record. Releasable information is "reasonably segregable" if it provides the requester with meaningful and undistorted information after the nonreleasable information is excised and if it can be reasonably assumed that a skillful and knowledgeable person could not reconstruct the nonreleasable information of the record. Further, all information in a record is releasable and shall be made available to a member of the public, unless in the judgment of the official making the determination:

(a) The release of the information would be inconsistent with a statutory requirement or OPNAV Instruction 5510.1 series, Department of the Navy Information Security Program Regulation; or,

(b) The release of the information would jeopardize a governmental interest.

§ 701.23 Judicial review.

All total and partial denials of information are subject to both administrative and judicial appeals. In the event of a judicial review, a U.S. District Court may examine the withheld record or portions thereof in their entirety to determine whether the record or portions thereof are exempt from disclosure. Therefore, extreme care should be taken when claiming an exemption to ensure that a governmental interest does exist for the withholding of the information.

§ 701.24 Specific exemptions.

The following types of matters may be withheld from public disclosure unless otherwise prescribed by law:

(a) *"Exemption 1" Matters (5 U.S.C. 552(b)(1)).* Refers to information which is currently and properly classified under criteria established by Executive Order 12356 and is authorized to remain classified in the interest of national security. The withholding of such information is implemented in the U.S. Navy in OPNAV Instruction 5510.1 series, Department of the Navy Information Security Program Regulation. If a requested record is classified in accordance with the OPNAV Instruction 5510.1 series, the record must be reviewed for the basis of the security classification. The following general rules are applicable:

(1) The request must be referred, with information and recommendations, to an official who is authorized under Sec. 701.5, to deny requests and who has cognizance of the classified matters in the record, if the basis of the classification is:

(i) An approved security classification guide promulgated in accordance with the OPNAV Instruction 5510.1 series;

(ii) Resource document originated by another naval activity or government agency;

(iii) An original classification determination for which there is written justification for classification, and the justification remains valid; or,

(iv) Not readily identifiable, but classification is believed to be warranted on the basis of classification criteria contained in the OPNAV Instruction 5510.1 series.

(2) If the original classifier of a record within his/her classification jurisdiction receives a request for the recorded and,

VOL 48 ISS 101 MAY 24 1983 UMI

upon review, determines that there is no basis for continued classification, either in whole or part, the record should be declassified, in whole or in part, and reviewed to determine whether any other FOIA exemptions are applicable to the declassified information, and, if so whether a governmental interest would be jeopardized by its release.

(b) *"Exemption 2" Matters (5 U.S.C 552(b)(2)).* Refers to information containing or constituting rules, regulations, orders, manuals, directives, and instructions relating to the internal personnel rules or practices of the Department of the Navy if their release to the public would substantially hinder the effective performance of a significant function of the Department of the Navy and they do not impose requirements directly on the general public. Examples include:

(1) Operating rules, guidelines and manuals for investigators, inspectors, auditors, or examiners, and certain schedules or methods of operation which would reveal:

(i) Negotiating and bargaining techniques;

(ii) Bargaining limitations and positions;

(iii) Inspection schedules and methods, and

(iv) Audit schedules and methods.

(2) Personnel and other administrative matters, such as examination questions and answers used in training courses or in the determination of the qualifications of candidates for employment, entrance to duty, advancement, or promotion.

(c) *"Exemption 3" Matters (5 U.S.C. 552(b)(3)).* Refers to information which is specifically exempted from disclosure by statute that permits no discretion on the issue, or in accordance with criteria established by that statute for withholding or referring to the particular types of information to be withheld. Such authorization or requirement may be found in the terms of the statute itself or in Executive Orders or regulations authorized by, or in implementation of, a statute. The Privacy Act, 5 U.S.C. 552a, is not considered an applicable statute under 5 U.S.C. 552(b)(3). Examples include:

(1) Public Law 86–36 (50 U.S.C. 402 note)—National Security Agency information.

(2) 35 U.S.C. 181–188—any records containing information relating to inventions that are the subject of patent applications on which Patent Secrecy Orders have been issued.

(3) 42 U.S.C. 2162—Restricted Data and Formerly Restricted Data.

(4) 18 U.S.C. 798—Communication Intelligence.

(5) 50 U.S.C. 402(d)(3) and (g)—Intelligence sources and methods.

(6) 21 U.S.C. 1175—Drug abuse prevention/rehabilitation.

(7) 42 U.S.C. 4582—Alcohol abuse prevention/rehabilitation.

(d) *"Exemption 4" Matters (5 U.S.C. 552(b)(4)).* Refers to trade secrets or commercial or financial information obtained from a person or organization outside the government with the understanding that the information or record will be retained on a privileged or confidential basis in accordance with the customary handling of such records. Records falling under this exemption must contain trade secrets, or commercial or financial records, the disclosure of which is likely to cause substantial harm to the competitive position of the source providing the information; impair the government's ability to obtain necessary information in the future; or, impair some other legitimate government interest. Examples include records that contain:

(1) Commercial or financial information received in confidence in connection with loans, bids, contracts or proposals, as well as other information received in confidence or privileged, such as trade secrets, inventions and discoveries, or other proprietary data.

(2) Statistical data and commercial or financial information concerning contract performance, income, profits, losses, and expenditures, if offered and received in confidence from a contractor or potential contractor.

(3) Personal statements given in the course of inspections, investigations, or audits, where such statements are received in confidence from the individual and retained in confidence because they reveal trade secrets or commercial or financial information normally considered confidential or privileged.

(4) Financial data provided in confidence by private employers in connection with locality wage surveys that are used to fix and adjust pay schedules applicable to the prevailing wage rate employees within the Department of the Navy.

(5) Scientific and manufacturing processes or developments concerning technical or scientific data or other information submitted with an application for a research grant, or with a report while research is in progress.

(e) *"Exemption 5" Matters (5 U.S.C 552(b)(5)).* Refers to internal advice, recommendations, and subjective evaluations, as contrasted with factual matters, that are reflected in records pertaining to the decision-making process of an agency, whether within or among agencies or within or among Department of Defense and the Department of the Navy components, except as provided in paragraph (e)(2) through (5) of this section.

(1) Examples include:

(i) The nonfactual portions of staff papers, to include after-action reports and situation reports containing staff evaluations, advice, opinions, or suggestions.

(ii) Advice, suggestions, or evaluations prepared on behalf of the Department of the Navy by individual consultants or by boards, committees, councils, groups, panels, conferences, commissions, task forces, or other similar groups that are formed for the purpose of obtaining advice and recommendations.

(iii) Those nonfactual portions of evaluations by Department of the Navy personnel of contractors and their products.

(iv) Information of a speculative, tentative, or evaluative nature on such matters as proposed plans to procure, lease, or otherwise acquire and dispose of materials, real estate, facilities, or functions, when such information would provide undue or unfair competitive advantage to private personal interests or would impede legitimate government functions.

(v) Trade secrets or other confidential research development, or commercial information owned by the government, where premature release is likely to affect the government's negotiating position or other commercial interests.

(vi) Records that are exchanged among agency personnel and within and among Department of the Navy, Department of Defense, or other agencies as part of the preparation for anticipated administrative proceeding by an agency or litigation before any federal, state, or military court, as well as records that qualify for the attorney-client privilege.

(vii) Those portions of official reports of inspections, reports of the Inspector Generals, audits, investigations or surveys pertaining to safety, security, or the internal management, administration, or operation of the Department of the Navy, when these records have traditionally been treated by courts as privileged against disclosure in litigation.

(2) If any such intra- or interagency record or reasonably segregable portion of such record would hypothetically be made available through the "discovery process" (i.e., the legal process by which litigants obtain information from each other that is relevant to the issues in a trial or hearing) in the course of litigation with the Department of the Navy, such record, should not be withheld even though discovery has not been sought in actual litigation. If, however, the information hypothetically would only be made available through the discovery process by special order of the court based on the particular needs of a litigant, balanced against the interests of the Department of the Navy in maintaining its confidentiality, the record or document need not be made available.

(3) Intra- or interagency memoranda or letters that are factual, or those reasonably segregable portions that are factual, are routinely made available through "discovery," and shall be made available to a requester, unless the factual material is otherwise exempt from release, inextricably intertwined with the exempt information, so fragmented as to be uninformative, or so redundant of information already available to the requester as to provide no new substantive information.

(4) A direction or order from a superior to a subordinate, though contained in internal communication, generally cannot be withheld from a requester if it constitutes policy guidance or a decision, as distinguished from a discussion of preliminary matters or a request for information or advice that would compromise the decision-making process.

(5) An internal communication concerning a decision that subsequently has been made a matter of public record must be made available to a requester when the rationale for the decision is expressly adopted or incorporated by reference in the record containing the decision.

(f) *"Exemption 6" Matters (5 U.S.C 552(b)(6)).* Refers to information in personnel and medical files as well as similar personal information in other files, that, if disclosed, to the requester would result in a clearly unwarranted invasion of personal privacy.

(1) Examples of files containing personal information similar to that contained in personnel and medical files include:

(i) Those compiled to evaluate or adjudicate the suitability of candidates for civilian employment or membership in the Armed Forces, and the eligibility of individuals (civilian, military, or contractor employees) for security clearances, or for access to particularly sensitive classified information.

(ii) Files containing reports, records, and other material pertaining to personnel matters in which administrative action, including disciplinary action, may be taken.

(2) This exemption is relevant to a request for information that is intimate to an individual or that possibly could have adverse effects upon that individual or his/her family if disclosed. Section 701.105 lists several examples of nonderogatory information about the official character of a naval member or employee that can routinely be disclosed to a member of the public, without constituting a clearly unwarranted invasion of the personal privacy of the individual concerned. The determination of whether disclosure of other information about an individual would constitute a "clearly unwarranted" invasion of his/her right of personal privacy is a subjective judgment requiring careful weighing of the privacy interest to be protected—including consideration of the nature of the information requested, the degree of its sensitivity from the standpoint of the individual or his/her family, and its potential for being misused to the harm, embarrassment, or inconvenience of the individual or his/her family—against the importance of the requester's expressed or inferred purposes for seeking the information. In no event shall information be denied because its release might embarrass the Department of the Navy or its military or civilian officials in the performance of their duties.

(3) When the only basis for withholding information is protection of the personal privacy of an individual who is the subject of the record, information should not be withheld from that individual or from his/her designated representative. A clearly unwarranted invasion of the personal privacy of others discussed in that record may, however, constitute a basis for deleting reasonably segregable portions of the record even when providing it to the subject of the record. Note: This exemption shall not be used to protect the privacy of a deceased person, since deceased persons do not have a right to privacy. Information, however, may be withheld under this exemption to protect the privacy of the next of kin of the deceased person.

(g) *"Exemption 7" Matters (5 U.S.C. 552(b)(7)).*—(1) Refers to investigative records compiled for the purpose of enforcing civil, criminal, or military law, including the implementation of executive orders, or regulations issued pursuant to law, but only to the extent that their release would:

(i) Interfere with enforcement proceedings (5 U.S.C. 552(b)(7)(A));

(ii) Deprive a person of the right to a fair trial or an impartial adjudication (5 U.S.C. 552(b)(7)(B));

(iii) Constitute an unwarranted invasion of personal privacy of a living person, including surviving family members of an individual identified in such a record (5 U.S.C. 552(b)(7)(C));

(iv) Disclose the identity of a confidential source; disclose confidential information furnished only from a confidential source and obtained by a criminal law enforcement authority in a criminal investigation by an agency conducting a lawful national security intelligence investigation (5 U.S.C. (b)(7)(D));

(v) Disclose investigative techniques and procedures not already in the public domain and requiring protection from public disclosure to ensure their continued effectiveness (5 U.S.C. 552(b)(7)(E)); or,

(vi) Endanger the life or physical safety of law enforcement personnel or their families (5 U.S.C. 552(b)(7)(F)).

(2) Examples include:

(i) Statements of witnesses and other material developed during the course of the investigation and all materials prepared in connection with related government litigation or adjudicative proceedings.

(ii) The identity of firms or individuals being investigated for alleged irregularities involving contracting with the Department of Defense and Navy when no indictment has been obtained nor any civil action filed against them by the United States.

(iii) Information obtained in confidence, expressed or implied, in the course of a criminal investigation by a criminal law enforcement agency or office within the Navy, or a lawful national security intelligence investigation conducted by an authorized agency or office within the Department of the Navy. National security intelligence investigations include background security investigations and those investigations conducted for the purpose of obtaining affirmative or counterintelligence information.

(h) *"Exemption 8" Matters (5 U.S.C. 552(b)(8)).* Refers to information contained in or related to examination, operation, or condition reports prepared by, on behalf of, or for the use of any agency responsible for the regulation or supervision of financial institutions.

(i) *"Exemption 9" Matters (U.S.C. 552(b)(9)).* Refers to geological and geophysical information and data (including maps) concerning wells.

VOL 48 ISS 101 MAY 24 1983 UMI

Subpart C—[Reserved]

Subpart D—Guidelines for Assessment/Waiver/Reduction of Fees

§ 701.40 Purpose.

The fees described in this subpart apply to FOIA requests. They reflect direct search and duplication costs, recovery of which are permitted by 5 U.S.C. 552, Department of Defense Directives 5400.7 and 5400.7–R series, Department of Defense Freedom of Information Act Program.

§ 701.41 Fee assessment.

(a) *Minimum fees.* Minimum fees shall not be charged. When direct search and duplication costs for a single FOIA request total $30 or less, fees shall be waived automatically. Naval activities, however, may set aside the automatic fee waiver provision when, on the basis of good evidence, the activity can demonstrate that the waiver of fees is not in the public interest. Multiple requests from a single requester or from those acting on behalf of a single requester in an effort to take advantage of the waiver may create a situation in which a waiver should be denied. The automatic fee waiver is not applicable when the full costs for search and duplication exceed $30. For example, if the search and duplication costs total $45, the fee assessment charged to the requester is $45.

(b) *Decisions to waive or reduce fees.* Decisions to waive or reduce fees that exceed the automatic fee waiver threshold of $30, shall be made on a case-by-case basis. The following circumstances, however, describe the most common instances in which waiver or reduction of fees are most likely to be warranted:

(1) No record is located or all records are denied. However, fee charges are appropriate if the requester insists upon a search and agrees to such fees after being informed that the search is likely to be nonproductive or that the records are all likely to be exempt from release.

(2) A record is voluntarily created to preclude an otherwise burdensome effort to provide voluminous amounts of available records, including additional information not requested.

(3) The records are to be made available in response to a news media requester whose requests are reasonable in scope and frequency. Fee charges are appropriate for news media requesters and may be assessed when:

(i) The charges exceed the fee waiver threshold of $30; and,

(ii) The requester record does not contain information that can be considered as primarily benefiting the general public, or the search for the requested record requires an inordinate amount of naval personnel time, and impacts adversely on the naval activity concerned in accomplishing its primary functional missions.

(iii) When news media requests are broad in scope and are considered unreasonable by the head of the naval activity, a response should be forwarded to the requester, advising that the requester provide greater specificity. An estimate of fee charges may be included in the specificity letter, if practicable, or provided after receiving a reframed request.

(4) The record is for a nonprofit public interest group and the subject of the requested record is known to be of wide public interest, and furnishing the information can be considered as primarily benefiting the general public.

(5) A previous denial is reversed in whole or in part and the search and reproduction costs involved are not substantial.

§ 701.42 Waiver/reduction of fees.

(a) The principal fee waiver policy objectives of the Freedom of Information Act are twofold:

(1) To strengthen the ability of citizens to exercise their rights to understand, and by lawful means establish, support, modify, or terminate national laws, programs, policies of all kinds; and,

(2) To strengthen major aspects of national life in well-recognized areas of public concern where such strengthening will significantly benefit the general public.

(b) A request for a reduction or waiver of fees may be denied when:

(1) There is no definitive evidence to suggest the requested information contains significant potential for benefiting the general public, or releasing the information would not result in any such potential benefits actually being received by the general public; or,

(2) The requester fails to provide indication of his/her expertise on the subject, or the ability to extract and convey potentially beneficial information from the data provided, or the ability to effectually disseminate any extracted information; or,

(3) An inordinate amount of time is required to respond to the request, thus causing an adverse impact on the activity's mission. Cases which involve masses of information or data, (e.g., wide-ranging requests), are examples of cases requiring extraordinary time expenditure.

§ 701.43 Computation of fees.

The fee schedule contained in this subpart is used to compute the search and duplication costs associated with processing a given FOIA requests. Search fees shall be computed based on time actually spent. Neither time-based nor dollar-based minimum charges for search and duplication are authorized.

§ 701.44 Collection of fees.

Collection of fees need not be made in advance of rendering the service unless the costs are expected to exceed the minimum fee waiver threshold and the requester has not indicted a willingness in writing to pay. It frequently is more practical to collect fees at the time of providing the service to the recipient when the requester specifically states that the cost involved shall be acceptable up to a specified limit that covers anticipated costs. Collection of fees in advance is an appropriate requirement when the requester has not agreed in writing to pay the anticipated fee; has not honored previous commitments to pay fees that were owed the naval activity; or, when substantial costs are involved.

§ 701.45 Search and duplication fees.

(a) *Search fees.* The following delineates the fees authorized to be assessed to the requester seeking information concerning the Department of the Navy:

(1) Manual Search

Type	Grade	Hourly rate
Clerical	E8/GS8 and below	$8
Professional	01–06/GS9–GS15	16
Executive	07/GS16,ES1 and above	26

(2) Computer search is based on direct cost of the central processing unit, input/output devices, and memory capacity of the actual computer configuration.

(3) Actual cost of transporting records of personnel to the computer site/location may be included.

(b) *Duplication fees*

Type	Cost per page
Printed material	$.01
Office copy	.10
Microfiche	.25

(c) *Audiovisual documentary material.* Search costs are computed as for any other record. Duplication cost is the actual direct cost of reproducing the material, including the wage of the person doing the work. Audiovisual materials provided to a requester need not be in reproducible format or quality.

(d) *Other records.* Direct search and duplication costs for any record not described above will be computed in the manner described for audiovisual documentary material.

Dated: May 19, 1983.

F. N. Ottie,

Lieutenant Commander, JAGC, U.S. Navy, Alternate Federal Register Liaison Officer.

[FR Doc 83-13925 Filed 5-23-83; 8:45 am]

BILLING CODE 3810-AE-M

32 CFR Parts 730 and 770

Administrative Discharges and Related Matters Concerning Separation From the Naval Service—Subpart B—Marine Corps; and Rules Limiting Public Access to Particular Installations—Subpart A—Hunting and Fishing at Marine Corps Base, Quantico, Va.; Miscellaneous Amendments

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending 32 CFR Part 730 by removal of Subpart B thereof, whose publication is not required in that it relates to internal management and personnel rules and practices and does not affect the public. Removal of the subpart will not cancel the underlying source directives upon which it is derived. Additionally, miscellaneous amendments are made to 32 CFR Part 770, Subpart A, to reflect revisions to the underlying directive upon which it is derived.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Major G. B. Roberts, USMC, Headquarters Marine Corps (Code JAR), Washington, D.C. 20380. Telephone: (202) 694–1513.

SUPPLEMENTARY INFORMATION: Pursuant to the authority cited below, the Department of the Navy amends 32 CFR Parts 730 and 770. It has been determined that these final rules are not major rules within the criteria specified in section 1(b) of Executive Order 12291 and do not have substantial impact on the public. It has further been determined in accordance with 32 CFR Parts 296 and 701 that publication of these amendments for public comment prior to adoption is impractical, unnecessary, and contrary to the public interest.

List of Subjects

32 CFR Part 730

Administrative practice and procedure, Conscientious objectors, Military personnel.

32 CFR Part 770

Federal buildings and facilities, National defense, Restricted access areas, Security measures.

Accordingly, 32 CFR Chapter VI is amended as follows:

PART 730—[AMENDED]

1. The authority citation for Part 730 reads as follows:

Authority.—Secs. 280, 1162, 1163, 6291–6298, 70A Stat. 14, 89, 391–393, as amended, 76 Stat. 508, 517, sec. 301, 80 Stat. 379; 5 U.S.C. 301; 10 U.S.C. 133, 280, 1162, 1163, 1168, 6291–6298, unless otherwise noted.

§§ 730.50–730.163 [Subpart B, Removed]

2. 32 CFR Part 730 is amended by removing Subpart B, §§ 730.50–730.163.

PART 770—[AMENDED]

3. The authority citation for Part 770 reads as follows:

Authority.—5 U.S.C. 301; 10 U.S.C. 6011; 32 CFR 700.702; 32 CFR 700.714, unless otherwise noted.

4. 32 CFR Part 770 is amended as follows:

a. Section 770.2 is amended by revising paragraph (b)(2), (c), and (d)(2) to read as follows:

§ 770.2 Licenses.

* * * * *

(b) * * *

(2) The privilege cards are effective for the same period as the Virginia hunting and fishing licenses.

(c) All hunters must obtain a Base hunting permit, and a parking permit, if applicable, from the Game Warden for each day of hunting. The hunting permit must be carried by the hunter and the parking permit must be displayed on the left dashboard of parked vehicles. The hunting and parking permits must be returned within one hour after either sunset or the hour hunting is secured on holidays or during special season.

(d) * * *

(2) Attendance at a safety lecture given daily except Sunday during the hunting season given at the Game Checking Station located at the intersection of Russell Road and MCB–1. The lectures commence an hour before sunrise, 0800, and 1200;

* * * * *

b. Section 770.3 is amended by removing the last sentence in paragraph (a) and adding in its place the following sentence which reads: "A Base Fishing Privilege Card is required for all persons aged 16 to 65."

c. Section 770.3 is amended in the last sentence of paragraph (b) by adding ", Building 5–9," between the words "Headquarters" and prior".

d. Section 770.3 is amended in paragraph (c)(2) by removing the word "trout" and adding in its place the word "trot".

e. Section 770.3 is amended in paragraph (c)(3) by removing the semicolon at the end of the sentence and adding a period in its place. After that sentence add the following sentence as follows: "All Large Mouth Bass under this size will be immediately returned to the water."

f. Section 770.3 is amended by revising paragraph (c)(4) to read as follows:

§ 770.3 Fishing regulations.

* * * * *

(c) * * *

(4) No Striped Bass will be taken, creeled or possessed under the size of twenty (20) inches in length. All Striped Bass under this size will be immediately returned to the water;

* * * * *

g. Section 770.3 is amended in paragraph (c)(5) by removing the remainder of the paragraph after the word "card" in line 4 and adding a period after the word "card". After that sentence add the following language:

* * * * *

(c) * * *

(5) * * * The card may be obtained from the report boxes located in the vicinity of all fishing areas. The creel report must be completed at the conclusion of the day's fishing and returned to any fishing report box.

§ 770.6 [Amended]

h. Section 770.6 is amended in paragraph (b) by removing the remainder of the paragraph after the word "adult" and adding in its place the following language:

* * * * *

(b) * * * (18 years of age or older) while hunting or in a hunting area. The adult is limited to a maximum of two underage hunters, and must stay within sight and voice contact and no more than 100 yards away from the underage hunters.

i. Section 770.6 is amended in paragraph (c) by adding the following language after the last sentence:

* * * * *

(c) * * * Those personnel who are authorized to hunt on Base, desiring to train or exercise dogs other than deer

VOL

MAY
24
1983
UMI

dogs between 2 September and 28 February, may do so by obtaining clearance to enter training areas at the Range Control Office. This clearance is not permission to hunt, and carrying weapons under these conditions is prohibited.

j. Section 770.6 is amended in paragraph (d) by removing the remainder of the paragraph after the word "sunset" in line 3 and adding a period after the word "sunset". After that sentence add the following sentence which reads: "The hours of sunrise and sunset are posted daily at the Game Checking Station."

§ 770.8 [Amended]

k. Section 770.8 is amended by removing the term "Game Warden's Office" and adding in its place the term "Game Checking Station".

l. Section 770.8 is amended in the last sentence by adding between the words "game" and "killed" a comma and the words "not requiring a tag,".

§ 770.9 [Amended]

m. Section 770.9 is amended by adding the following sentence prior to the first sentence: "Hunters are encouraged to build and use tree blinds for hunting deer."

Dated: May 19, 1983.

F. N. Ottie,

Lieutenant Commander, JACC, U.S. Navy, Alternate Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Department of the Air Force

32 CFR Part 888h

Separation Documents and General Separation Procedures

AGENCY: Department of the Air Force, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Air Force is amending its Military Personnel regulations by removing Part 888h—Separation Documents and General Separation Procedures, of Chapter VII, Title 32. The source document, Air Force Regulation (AFR) 35-6 has been revised. It is intended for internal guidance and has no applicability to the general public. This action is a result of departmental review in an effort to insure that only regulations which substantially affect the public are maintained in the Air Force portion of the Code of Federal Regulations.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Lopez, HQ Air Force Military Personnel Center, MPCAKP, Randolph AFB, TX 78150, telephone (512) 652-2148.

SUPPLEMENTARY INFORMATION: Accordingly, 32 CFR is amended by removing Part 888h.

List of Subjects in 32 CFR Part 888h

Military personnel, Aliens, Records, Military law.

Authority: 10 U.S.C. 8012.

Winnibel F. Holmes,

Air Force Federal Register Liaison Officer.

[FR Doc. 83-13940 Filed 5-23-83; 8:45 am]

BILLING CODE 3910-01-M

DEPARTMENT OF EDUCATION

34 CFR Part 318

Training Personnel For the Education of the Handicapped

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary issues these regulations for the implementation of Part D of the Education of the Handicapped Act (EHA), as amended. The Training Personnel for the Education of the Handicapped program provides financial assistance through grants to State educational agencies, institutions of higher education, and other nonprofit institutions or agencies to increase the quantity and to improve the quality of personnel available to educate handicapped children. The existing regulations were reviewed for regulatory burden reduction. These regulations are issued as a result of that review.

EFFECTIVE DATE: Unless the Congress takes certain adjournments, these regulations will take effect 45 days after publication in the **Federal Register**. If you want to know the effective date of these regulations call or write the Department of Education contact person. At a later date, the Secretary will publish a notice in the **Federal Register** stating the effective date of these regulations.

FOR FURTHER INFORMATION CONTACT: Dr. William R. Peterson, (202) 245-9491.

SUPPLEMENTARY INFORMATION: The Training Personnel for the Education of the Handicapped program was originally established under Pub. L. 89-10 in 1966 and is currently authorized under Part D of the Education of the Handicapped Act, as amended (20 U.S.C. 1431, 1432, and 1434). Proposed amended regulations were published as a notice of proposed rulemaking in the **Federal Register** on November 23, 1982 (47 FR 52948). That notice's preamble fully described the background and major issues.

These final regulations provide, among other things, for the distribution of program funds among the following seven priorities to eligible institutions and agencies: preparation of special educators; preparation of leadership personnel; preparation of related services personnel; State educational agency programming; special projects; specialized training of regular educators; and preparation of trainers of volunteers, including parents.

These final regulations implement the provisions of sections 631, 632, and 634 of Part D of the Education of the Handicapped Act (EHA), and the Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 78).

There are differences between the notice of proposed rulemaking and these final regulations. Section 318.10(b)(3) has been changed to clarify that the list of related services personnel who may be trained under this program is illustrative, not exhaustive. Section 318.10(c) has been changed to show that when the Secretary annually selects training priorities, the Secretary may elect not to identify the personnel preparation priority as preservice, inservice, or both. Section 318.43(a) has been changed to permit payment of stipends to part-time students with no reference to length of enrollment. Section 318.44 has been changed to permit payment of stipends to students who join the program at any point during the academic year.

The application notice that established the closing date for transmittal of Fiscal Year 1983 applications, published in the **Federal Register** on November 23, 1982 (47 FR 52743), advised applicants to prepare new applications in accordance with the November 23, 1982 proposed regulations.

Potential applicants were additionally advised that if there were any substantive changes in the final regulations they would be afforded the opportunity to amend or resubmit their applications. The changes in the final regulations are not sufficiently significant to classify as substantive.

The Department of Education received some public comments on the proposed regulations. Following is a summary of those comments and the Secretary's responses:

Section 318.1 General.

Comment. One commenter recommended that the word "educate" in the third line can be replaced by a clause "provide education and related services to" to reflect more closely the program's scope.

Response. No change has been made. In the context of these regulations the term "educate" can be construed broadly to encompass "related services".

Section 318.2 Eligibility.

Comment. One commenter recommended that only State educational agencies be eligible for Federal assistance under the grant program.

Response. No change has been made. The statute specifically authorizes federal assistance for institutions of higher education or other nonprofit institutions or agencies, in addition to State educational agencies (20 U.S.C. 1431, 1432, 1434). Limiting grants to State educational agencies would undesirably reduce competition by limiting the pool of eligible applicants.

Comment. Several commenters recommended that eligibility specification for institutions of higher education be qualified by prescribing regionally accredited institutions of higher education with State approved programs of teacher education.

Response. No change has been made. The statute does not require institutions of higher education to be regionally accredited or to have State approved programs of teacher education. It is anticipated that the majority of applications received from institutions of higher education will be from institutions that have State approved programs of teacher education. Federally mandating such requirements, however, would increase prescriptiveness and decrease flexibility contrary to current burden reduction policies. The proposed added qualifications could cause an otherwise worthy application to be declared unacceptable solely on grounds that the submitting institutions of higher education was not regionally accredited, State approved, or both.

Comment. One commenter recommended the addition of the word "organizations" for the clarity of eligibility to apply for grants in § 312.2(c).

Response. No change has been made. The phrase "nonprofit institutions and agencies" is taken from the statute, is generic, and therefore includes "organizations".

Section 318.4 Definitions.

Comment. Several commenters recommended that a § 318.4(b) be added with definitions for preservice and inservice preparation, training, or both.

Response. No change has been made. Definitions are unnecessary as these terms are in common use.

Section 318.10 Training Priorities.

Comment. One commenter recommended that the criteria, procedures, or both to be used by the Secretary to select priorities be included in this regulation.

Response. No change has been made. The procedures used to establish and implement priorities are included in EDGAR, specifically 34 CFR 75.105, and the restatement of them in this regulation would be redundant. The seven priorities included in these regulations were selected on the basis of program experience in training personnel to educate handicapped children.

Comment. One commenter recommended that § 318.10(a) be amended in the final clause to permit doctoral and post-doctoral preparation of personnel under the related services personnel priority in addition to the leadership personnel and special projects priorities.

Response. No change has been made. Doctoral and post-doctoral preparation of professional personnel under the leadership personnel priority includes training of "other specialists" (§ 318.10(b)(2)); consequently, it encompasses all professional personnel specified in the related services personnel priority (§ 318.10(b)(3)).

Comment. Several commenters recommended that a minimum funding allocation of five to eight percent be made to each of the seven training priorities with Secretarial discretion for the remaining 44 to 65 percent

Response. No change has been made. The specification of a fixed minimum percentage for each training priority would undesirably limit the discretion of the Secretary to make awards congruent with the selection criteria for award of a grant (§ 318.30).

Comment. Several commenters recommended that "quality indicators" for imaginative and innovative criteria for the special projects training priority be defined.

Response. No change has been made. It is unnecessary to define these terms. Doing so could undermine the purpose of the criteria.

Comment. Several commenters recommended that institutions of higher education be included as eligible to apply for grants in the State educational agency programming priority (§ 318.10(b)(4)) to promote statewide collaborative personnel preparation efforts.

Response. No change has been made. Where or when unique statewide training is needed to provide comprehensive service to handicapped children, the State educational agency can work collaboratively with other agencies under this priority. While Federal regulations can support that collaboration, it is preferable that the collaboration be initiated by the State educational agency.

Comment. Several commenters recommended that 90% of Federal funding under the specialized training of regular educators training priority be restricted to deans or equivalent administrators at institutions of higher education.

Response. No change has been made. The specification of a fixed percentage of funds for award to any one class of applicants under this training priority would undesirably limit the discretion of the Secretary to make an award congruent with the selection criteria for award of a grant (§ 318.30).

Comment. Several commenters recommended reconsideration of the exclusion of inservice training under five of the seven training priority areas specified in the notice of closing date announcement for transmittal of Fiscal Year 1983 new applications (47 FR 52743, November 23, 1982).

Response. A change has been made. The announcement of Fiscal Year 1983 new applications did exclude inservice training under five of the seven training priorities. However, § 318.10(c) has been changed to make it clear that the Secretary may include or exclude annually any priority from preservice or inservice preparation, or both.

Comment. Two commenters recommended either the addition of an eighth training priority for "bilingual, rural minority populations" or the specification of a minimum percentage of funds for such populations in each of the seven priorities.

Response. No change has been made. The designation of an eighth priority for "bilingual, rural minority populations" or a percentage specification within the seven priorities would tend to isolate such populations and would be overly prescriptive. The selection criteria in §§ 318.30(b)(2)(v) and 318.30(c)(2)(iv) for the evaluation of applications require a clear description of how an applicant will provide equal access and treatment for members of groups who have been traditionally underrepresented and

VOL 48 ISS 101 MAY 24 1983 UMI

evidence of encouraging applications for employment from members of such groups.

Comment. One commenter asked if an institution of higher education that does not award doctoral degrees but does award Educational Specialist (Ed.S) degrees may submit an application under the preparation of leadership personnel priority (§ 318.10(b)(2)).

Response. No change has been made. The leadership personnel priority supports only doctoral and post-doctoral preparation. Preparation of personnel for the Education Specialist degree is included under other priorities, including the preparation of special educators.

Comment. One commenter recommended that both vocational educators and career educators be included in both the special educators (§ 318.10(b)(1)) and the related services personnel (§ 318.10(b)(3)) preparation priorities.

Response. No change has been made. Vocational education programs at times must be specifically designed to enable a handicapped student to benefit fully from these programs; consequently, vocational educators are included in the priority for preparation of special educators. Career education is a more generic and less academic term with trainees therefore being trained to provide guidance, career counseling, and other related servies.

Comment. One commenter asked if vocational educators are included under the term "regular classroom teachers" in § 318.10(b)(6).

Response. Vocational educators who are not included in the term "special educators" because they do not work primarily with handicapped children are included in the term "regular classroom teachers" as used in § 318.10(b)(6).

Comment. One commenter recommended that the priority for preparation of trainers of volunteers, including parents (§ 318.10(b)(7)) not be identified as either preservice or inservice preparation.

Response. A change has been made. Section 318.10(c) has been reworded to add a phrase providing for the Secretary to identify *where appropriate* priorities in paragraphs § 318.10(b) (1) to (7) as preservice or inservice preparation, or both.

Comment. One commenter recommended that the specialized training of regular educators priority should be focused on the preparation of regular classroom teachers and not on deans and equivalent administrators.

Response. No change has been made. The quality of education for handicapped children who receive part of their education in regular classes is more efficiently effectuated by training the leaders of regular classroom teachers.

Comment. One commenter recommended that the State educational agency programming priority (§ 318.10(b)(4)) be reworded to specify support groups included under this training priority. The commenter suggested that the support groups include, as a minimum, local educational agencies institutions of higher education, and appropriate parent coalition groups.

Response. No change has been made. Specification of support groups is overly prescriptive and unnecessary.

Comment. One commenter recommended the addition of the clause "speech-language pathologists, audiologists", following "school psychologists" in § 318.10(b)(3) on the ground that "Pub. L. 94-142 regulations include speech-language pathology as both 'special education' and 'related services' ".

Response. A change has been made. The lists of personnel being prepared in the special educators and related services personnel priorities are not exhaustive. In the second sentence of § 318.10(b)(3) which identifies personnel who may be trained under the priority, the phrase "and other related services personnel" has been added at the end of the sentence to clarify the intent of this priority.

Comment. One commenter recommended that § 318.10(c) be deleted on the ground that the Secretary should not have authority to prescribe the mode of training, preservice versus inservice.

Response. No change has been made. Changes in national personnel preparation needs justify permitting the Secretary to allocate scarce Federal resources among the seven training priorities and to specify, as appropriate, preservice, inservice, or both preparation modes. Also, the discretion permitted the Secretary is based on both the wording and intent of the governing statute (20 U.S.C. 1431, 1432, 1434).

Comment. One commenter recommended that the Secretary's authority to select annually priorities for funding be changed to either biennially or triennially to enhance stability and quality of Federally assisted personnel preparation programs.

Response. No change has been made. Changing to a less frequent than annual selection of priorities would unduly restrict the Secretary's flexibility to address changing needs.

Comment. One commenter recommeded that each of the seven training priorities include provisions that require the use of general and child psychiatrists as consultants to provide preparation in rehabilitation and child psychiatry to personnel being trained.

Response. No change has been made. Mandating the employment of particular consultants for every grant awarded would be overly prescriptive. The participation and program content selection criteria, in § 318.30 (g) and (i) respectively, are sufficient interdisciplinary regulatory requirements.

Section 318.30 Selection Criteria

Comment. Two commenters recommended that more specific and concrete steps be prescribed to better assure that applicants will provide equal access and treatment of project participants who are members of traditionally underrepresented groups (§ 318.30(b)(2)(v)) and that applicants shall encourage the recruitment and employment of such persons (§ 318.30(c)(2)(iv)).

Response. No change has been made. Section 318.30(c)(2)(iv) provides adequate information on how the applicant intends to provide equal access and treatment. More detailed Federal specification would be overly prescriptive.

Comment. One commenter recommended that the ten selection criteria be weighted instead of unweighted.

Response. No change has been made. The selection criteria are not weighted because they are all of equal importance given the range of activities that this program supports.

Comment. One commenter recommended that an eleventh selection criterion entitled "Accreditation" be added as § 318.30(k). The commenter's proposed wording includes "[p]riority for awarding preservice grants" to applicants "that have received accreditation from agencies recognized by the Council on Postsecondary Accreditation (COPA) and/or the Department of Education".

Response. No change has been made. Addition of an accreditation selection criterion would unnecessarily increase Federal prescriptiveness and decrease flexibility contrary to the current burden reduction policy. The proposed additional criterion could cause an otherwise worthy application to be rejected solely on grounds that the applicant was not accredited at the time application was submitted.

Section 318.43 Financial assistance: part-time students

Comment. One commenter recommended that the "at least two days per week" clause in § 318.43(a) be amended to alternatively prescribe an appropriate number of class hours per week for part-time students to be eligible for financial assistance. The commenter's explanation to justify the change is that some training is conducted for several hours once per week that often equals or exceeds the total hours in twice per week training sessions.

Response. A change has been made. That portion of § 318.43(a) which reads "Students enrolled for less than a full calendar year or a full-time academic year but for at least four hours per week may receive a daily stipend" has been amended to read "Students enrolled for less than a full calendar year or a full-time academic year may receive a stipend". This change will allow greater flexibility to the grantee to train part-time students in accordance with State or local circumstances.

Section 318.44 Financial Assistance Adjustments

Comment. One commenter recommended that funds accrued as the result of a financially assisted student's withdrawal or dismissal be permitted to pay partial awards to new students who "join the program at any point during the academic year", in addition to students currently enrolled.

Response. A change has been made. The word "currently" has been deleted. The criteria for student financial assistance stated in §§ 318.41 and 318.43 would not exclude the payment of stipends to students who "join the program at any point during the academic year".

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291.

They are classified as non-major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. These regulations are more flexible and less prescriptive than the existing regulations and it is expected that more small entities will apply to participate in the program.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the absence of comment on this matter and the Department's own review, it has been determined that the regulations in this document do not require information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 318

Education, Education of handicapped, Grant programs—education, Student aid, Teacher.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed amended regulations.

Dated: May 18, 1983.

T. H. Bell,

Secretary of Education.

(Catalog of Federal Domestic Assistance No. 84.029, Handicapped Personnel Preparation Program)

Part 318 of Title 34 of the Code of Federal Regulations is revised as follows:

PART 318—TRAINING PERSONNEL FOR THE EDUCATION OF THE HANDICAPPED

Subpart A—General

Sec.

318.1 Training personnel for the education of handicapped program.
318.2 Who is eligible for a grant under Training Personnel for the Education of Handicapped program?
318.3 What regulations apply to training personnel for the education of handicapped program?
318.4 What definitions apply to the training personnel for the education of the handicapped Program?
318.5–318.9 [Reserved]

Subpart B—What Kinds of Projects Does the Secretary Assist Under This Program?

318.10 What types of training priorities are considered for support by the Secretary under this part?
318.11 How does the Secretary use priorities?
318.12–318.19 [Reserved]

Subpart C—[Reserved]

Subpart D—How Does the Secretary Make a Grant?

318.30 What are the selection criteria used to award a grant?
318.31–318.39 [Reserved]

Subpart E—What Conditions Must Be Met by a Grantee Under the Student Financial Assistance Program?

318.40 Is student financial assistance authorized?
318.41 What are the student financial assistance criteria?
318.42 What amount of assistance is authorized?
318.43 What financial assistance is authorized for part-time students?
318.44 What is required for a financially assisted student who withdraws or is dismissed?
318.45–318.49 [Reserved]

Authority: Secs. 631, 632, 634, Pub. L. 91-230, 84 Stat. 184 (20 U.S.C. 1431, 1432, 1434), unless otherwise noted.

Subpart A—General

§ 318.1 Training Personnel for the Education of Handicapped program.

This program serves to increase the quantity and improve the quality of personnel available to educate handicapped children through the provision of grants to eligible agencies that have or will develop personnel preparation programs.

(20 U.S.C. 1431, 1432, 1434)

§ 318.2 Who is eligible for a grant under the Training Personnel for the Education of Handicapped program?

The following agencies are eligible for assistance under this part—

(a) State educational agencies.

(b) Institutions of higher education.

(c) Other appropriate nonprofit institutions or agencies.

(20 U.S.C. 1431, 1432, 1434)

§ 318.3 What regulations apply to the Training Personnel for the Education of Handicapped program?

The following regulations apply to assistance under the Training Personnel for the Education of the Handicapped program—

(a) The regulations in this Part 318.

(b) The Education Department General Administration Regulations (EDGAR) established in Title 34 of the Code of Federal Regulations in—

(1) Part 74 (Administration of Grants);

(2) Part 75 (Direct Grant Programs);

(3) Part 77 (Definitions); and

(4) Part 78 (Education Appeal Board).

(20 U.S.C. 1431, 1432, 1434; 20 U.S.C. 1221e-3(a)(1))

§ 318.4 What definitions apply to the Training Personnel for the Education of Handicapped program?

Definitions in EDGAR. The following terms used in this part are defined in 34 CFR Part 77:

Applicant.

(20 U.S.C. 1431, 1432, 1434; 20 U.S.C. 1221e-3(a)(1))

§§ 318.5—318.9 [Reserved]

Subpart B—What Kinds of Projects Does the Secretary Assist Under This Program?

§ 318.10 What types of training priorities are considered for support by the Secretary under this part?

(a) Projects supported under this part which meet a priority as described in paragraphs (b) and (c) of this section may provide training to degree, non-degree, certified, and non-certified personnel except that doctoral and post-doctoral preparation can be supported only under the priorities described in paragraph (b)(2) and (b)(5) of this section.

(b) The Secretary may select annually one or more of the following priority areas for funding:

(1) *Preparation of special educators.* This priority supports projects designed to provide training for personnel engaged or preparing to engage in employment as special educators of handicapped children ages 0–21 years or as supervisors of such educators. The priority includes the preparation of early childhood specialists, special educators of the handicapped, special administrators and supervisors, speech-language pathologists, audiologists, physical educators, and vocational educators.

(2) *Preparation of leadership personnel.* This priority supports doctoral and post-doctoral preparation of professional personnel to conduct training of teacher trainers, researchers, administrators, and other specialists.

(3) *Preparation of related services personnel.* This priority supports the preparation of individuals who provide developmental, corrective, and other supportive services as may be required to assist a handicapped child to benefit from special education. The priority supports the preparation of paraprofessional personnel, career educators, recreation specialists, health services personnel, school psychologists, social service providers, physical therapists, occupational therapists, and other related services personnel.

(4) *State educational agency programming.* This priority supports projects dealing with unique State-wide training in all of several of the need areas identified by the Comprehensive System of Personnel Development (CSPD) and may include training in management and organizational design which enhance the ability of States to provide comprehensive services to handicapped children. Only State educational agencies are eligible to submit applications under this priority.

(5) *Special projects.* This priority supports the development, evaluation, and distribution of imaginative or innovative approaches to personnel preparation, and includes development of materials to prepare personnel to educate handicapped children.

(6) *Specialized training of regular educators.* This priority supports projects that provide deans or equivalent administrators from institutions of higher education or local educational agency officials the skills necessary to promote development of regular classroom teachers, administrators, and supervisors. The purpose is to provide quality education to handicapped children who receive part of their education in regular classes.

(7) *Preparation of trainers of volunteers, including parents.* This priority supports the preparation of trainers of volunteers, including parents, to assist in the provision of educational services to handicapped students. In addition to the preparation of volunteers and parents by experienced professionals, this priority may support projects which emphasize the training of parents by parents.

(c) The Secretary will select annually priorities authorized to be addressed and also will identify, where appropriate, the priorities that include only preservice or inservice preparation, or both.

(20 U.S.C. 1431, 1432, 1434)

§ 318.11 How does the Secretary use priorities?

(a) The Secretary establishes a separate competition for each priority selected for support in a given year. Activities proposed by eligible applicants which do not address selected annual priorities will not be considered for competition.

(b) If an application contains activities which address both a priority and a non-priority area, the Secretary considers for support only those activities that address a selected priority.

(20 U.S.C. 1431, 1432, 1434)

§§ 318.12–318.19 [Reserved]

Subpart C—[Reserved]

Subpart D—How Does the Secretary Make a Grant?

§ 318.30 What are the selection criteria used to award a grant?

The Secretary uses the criteria in this section to evaluate applications for new awards. The criteria are not weighted.

(a) *Extent of need for the project.* (1) The Secretary reviews each application for information that shows the project meets the needs recognized in Part D of the Act.

(2) In conducting this review, the Secretary looks for information that—

(i) Describes the needs addressed by the project;

(ii) Specifies the personnel needs identified by each State educational agency for each State served under the proposed project;

(iii) Describes how the project relates to personnel needs identified by each State educational agency and any other needs data source; and

(iv) Describes the benefits to be gained by meeting those personnel needs.

(b) *Plan of operation.* (1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(c) *Quality of key personnel.* (1) The Secretary reviews each application for information that shows the quality of the key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director (if one is to be used);

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (c)(2) (i) and (ii) of this section plans to commit to the project; and

(iv) The extent to which the applicant, as part of its non-discriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(3) To determine the qualifications of a person, the Secretary considers evidence of past experience and training in fields related to the objectives of the project, as well as other information that the applicant provides.

(d) *Budget and cost effectiveness.* (1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(e) *Evaluation plan.* (1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project. (See 34 CFR § 75.590, *Evaluation by the grantee.*)

(2) The Secretary reviews each application for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(f) *Adequacy of resources.* The Secretary reviews each application for information that shows—

(1) The applicant plans to devote adequate resources to the project;

(2) The facilities that the applicant plans to use are adequate; and

(3) The equipment and supplies that the applicant plans to use are adequate.

(g) *Participation.* The Secretary reviews each application for information on—

(1) The extent to which program philosophy, program objectives, and activities implemented to attain program objectives are related to the educational needs of handicapped children; and

(2) The extent to which the applicant involves students, employing agencies and other concerned individuals in program planning, implementation, and evaluation.

(h) *Evaluation design.* The Secretary reviews each application for information that shows the extent to which the evaluation design and procedures—

(1) Provide for assessment of the effectiveness and efficiency of the use of program resources in the attainment of program objectives; and

(2) Provide for the collection of quantifiable program performance information including—

(i) The number of personnel prepared;

(ii) The number of personnel placed in positions relevant to the education of handicapped children; and

(iii) The type of locations and positions accepted by program graduates.

(3) Describe procedures for assessing the impact of the program. In the case of an application for continuation support, provide evidence of the impact of the program upon other related programs within the institution, upon community programs for the education of handicapped children, and upon improvement of services for handicapped children at the local, State, and/or national level.

(i) *Program content.* The Secretary reviews each application for information that shows—

(1) The extent to which the application includes a delineation of competencies that each program graduate will acquire and how the competencies will be evaluated;

(2) The extent to which substantive content and organization of the program—

(i) Are appropriate for the student's attainment of professional knowledge and competencies that are necessary for the provision of quality educational services for handicapped children; and

(ii) Demonstrate an awareness of relevant methods, procedures, techniques, and instructional media or materials that can be used in the preparation of personnel who serve handicapped children;

(3) The extent to which appropriate practicum facilities are accessible to the applicant and students and are used for observation, participation, practice teaching, laboratory or clinical experience, internship, and other supervised experiences of adequate scope, combination and length.

(j) *Contributions.* The Secretary reviews each application for information that shows—

(1) The amount of fiscal and other effort the applicant will contribute to the program; and

(2) A delineation of the procedures that will be implemented for the increase of this effort over a specified time period in relationship to the amount of Federal funds awarded for the support of the program.

(20 U.S.C. 1431, 1432, 1434)

§§ 318.31–318.39 [Reserved]

Subpart E—What Conditions Must Be Met by a Grantee Under the Student Financial Assistance Program?

§ 318.40 Is student financial assistance authorized?

A grantee may use any portion of a grant awarded under this Part to pay direct financial assistance to students.

(20 U.S.C. 1431, 1432, 1434)

§ 318.41 What are the student financial assistance criteria?

Direct financial assistance may be paid to students only if—

(a) The student is qualified for admission to the program of study;

(b) The student maintains acceptable progress in a course of study;

(c) The student demonstrates need for financial assistance as determined by criteria established by the grantee; and

(d) The student is a citizen or a national of the United States, or is legally in the United States for other than a temporary purpose and intends to become a permanent resident.

(20 U.S.C. 1431, 1432, 1434)

§ 318.42 What amount of assistance is authorized?

Subject to the limitations stated in §§ 318.43 and 318.44, grantees shall disburse financial assistance to students in amounts consistent with established grantee policies for providing financial assistance for various levels of study, and for policies relevant to providing financial assistance to part-time and full-time students.

§ 318.43 What financial assistance is authorized for part-time students?

(a) Students enrolled for less than a full calendar year or a full-time academic year may receive a stipend. Such short-term students are not eligible for allowances for dependents.

(b) Students who are receiving calendar year or full-time academic year assistance at the time of their short-term study are not eligible for financial assistance under this section.

(20 U.S.C. 1431, 1432, 1434)

1983
UMI

§ 318.44 What is required for a financially assisted student who withdraws or is dismissed?

A grantee shall make financial adjustments when the student withdraws or is dismissed before the end of the program. In those instances where students withdraw from graduate and undergraduate academic year and short term programs, a grantee may give the remaining funds as a partial award to another student who is enrolled in the program assisted under this part. The Secretary considers the funds made available as a result of a financial adjustment as an overpayment, unless these funds are used as a partial award or are used in ways otherwise consistent with the requirements of this Part.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 431

Medicaid Program; Freedom of Choice; Waivers of and Exceptions to State Plan Requirements

AGENCY: Health Care Financing Administration (HCFA), HHS

ACTION: Final rule.

SUMMARY: These final rules clarify and amend regulations published on October 1, 1981, that implement section 2175 of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35). Those regulations revised several of the requirements regarding a Medicaid beneficiary's right to choose among participating providers of covered items or services.

Based on the comments received on those regulations, we are making changes that provide further direction to States, beneficiaries and providers with regard to freedom of choice requirements while at the same time maintaining State flexibility in administering their Medicaid programs.

We are also amending the October 1, 1981 regulations to implement section 137 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248). That section makes several technical changes to section 2175 of Pub. L. 97–35 with respect to a Medicaid beneficiary's right to choose among participating providers of covered items or services.

EFFECTIVE DATE: These regulations are effective June 22, 1983.

FOR FURTHER INFORMATION CONTACT: Stanley Katz, (301) 594–9595.

SUPPLEMENTARY INFORMATION:

I. Background

We issued interim final regulations with comment period on October 1, 1981 (46 FR 48524) that implemented paragraphs (a), (b), (d), (e), and (f) of section 1915 of the Social Security Act (Act). Under section 1915(a), a State will not be found out of compliance with otherwise applicable requirements solely because it enters into certain arrangements to purchase laboratory services or medical devices through competitive bids or otherwise, or if, under certain circumstances, it restricts for a reasonable period of time a specific beneficiary's choice of providers or the participation of a specific provider. (Previously existing statutory provisions concerning beneficiaries served by prepayment health care organizations and rural health clinics were also transferred to section 1915(a).) Under section 1915(b), the Secretary may waive certain statutory requirements, to the extent the Secretary finds State proposed improvements in the provision of services to be cost-effective and efficient, and consistent with the purposes of the medicaid program. Sections 1915(d), 1915(e), and 1915(f) of the Act govern how waivers granted under section 1915(b) are to be approved, monitored, and terminated.

Sections 1915(a), (b), (d), and (e) were effective with enactment on August 13, 1981. Section 1915(f) was effective 90 days after enactment.

In order to have regulations in place as close as possible to the effective date of the law, we waived proposed rulemaking and published the regulation in interim final form with a comment period allowing for public participation. In general, in developing the regulations, we tried to afford States the greatest possible flexibility and opportunity for innovation in administering their Medicaid programs, consistent with the statutory requirements. We, therefore, minimized Federal prescription of definitions and procedures in implementation of these provisions. It was our intention that the Secretary's waiver authority should not be used to impose restrictions on the States beyond those contained in the statute, or to compel them to meet unnecessary and burdensome regulatory requirements in order to receive or qualify for waivers. Therefore, whenever possible, we permitted each State to determine its own program content and administration, consistent with the law.

Specifically, the interim final rule amended regulations at 42 CFR 431.50 and 431.51 that implement the Statewideness (section 1902(a)(1) of the Act) and free choice (section 1902(a)(23) of the Act) provisions, respectively, and regulations at 42 CFR 440.200 and 440.250 that implement the comparability provision (section 1902(a)(10) of the Act), to reference the appropriate waivers or exceptions applicable under section 1915. A new § 431.54, Exceptions to certain State plan requirements, was added to implement section 1915(a) of the Act concerning exceptions, and a new § 431.55, Waiver of other medicaid requirements, was added to implement section 1915(b) of the Act concerning waivers.

A. Exceptions

With regard to the exceptions allowed under section 1915(a), the regulations provided that a State shall not be deemed to be out of compliance with the requirements of sections 1902(a)(1), (10), and (23) solely by reason of certain allowable exceptions set forth below.

1. *Services on a Prepayment Basis.* If a Medicaid agency contracts on a prepayment basis with an organization that provides services additional to those offered under the State plan, the agency may restrict the provision of the additional services to beneficiaries who live in the area served by the organization and wish to obtain services from it. (§ 431.54(b))

2. *Rural Health Clinics.* The State Medicaid agency may require in its State plan that payment will be made for rural health clinic services only if those services are provided by a rural health clinic. (§ 431.54(c))

3. *Competitive Arrangements.* The Medicaid agency may enter into arrangements to purchase through a competitive bidding process or otherwise, certain laboratory services (including X-ray) and medical devices. The State must submit a report assuring, and the Secretary must find, that adequate services or devices are available to beneficiaries under the arrangements. The State must also assure and the Secretary must find that laboratory services purchased are supplied through hospital or independent laboratories meeting Medicare conditions for coverage. These laboratories can have no more than 75 percent Medicare and Medicaid utilization. (§ 431.54(d))

4. *Lock-in of Beneficiaries Who Overutilize Services.* A Medicaid agency may lock-in chronic overutilizers of services, as determined in accordance with utilization guidelines established by the State, to a single physician or limited group of providers for a reasonable period of time. The agency must give the beneficiary notice and opportunity for a hearing before implementation of lock-in and must assure that the beneficiary has reasonable access (taking into account geographic location and reasonable travel time) to Medicaid services of adequate quality. (§431.54(e))

5. *Lock-out of Providers Who Abuse the Medicaid Programs.* A Medicaid agency may restrict, for a reasonable period of time, either through suspension or otherwise, the participation of providers in their Medicaid programs. This restriction can be imposed if, after notice and opportunity for hearing, the State determines that the provider, in a significant number or proportion of cases, provided services to beneficiaries when the services were not medically necessary (as determined in accordance with utilization guidelines established by the agency) or of a quality not meeting professionally recognized standards of care. The agency must assure that beneficiaries do not lose reasonable access to services of adequate quality as a result of those restrictions and must give general notice to the public of the restriction, its basis, and its duration. (§431.54(f))

6. *Reporting Requirements.* States must report to HCFA regarding program changes under section 1915(a) no later than the end of the calendar quarter in which a State first implements these changes. (In the case of competitive arrangements discussed in section 3 above, the report must be submitted, and a positive finding made by the Secretary before the arrangements can be implemented.) The report must describe how the program change meets the statutory requirements for an exception. Exceptions for services provided on a prepayment basis or through an RHC will not require a report.

B. Waivers

With respect to waivers under section 1915(b), the regulations authorized the Secretary to waive the requirements of sections 1902 and 1903(m) of the Act to the extent he or she finds proposed improvement in the provision of services under Medicaid to be cost-effective, efficient, and consistent with the objectives of the Medicaid program. (See section C following for recent amendments regarding waiver of the requirements of section 1903 (m).)

1. *Case-management System.* A State may implement a case-management system or a specialty physician services arrangement which restricts the provider from or through whom a beneficiary can obtain primary care services (other than in emergency circumstances) provided that those restrictions do not substantially impair access to services of adequate quality where medically necessary. (See section C following regarding recent amendments with respect to case-management systems.) The agency must assure that a specific person or agency will be responsible for locating, coordinating, and monitoring Medicaid services on behalf of a beneficiary. (§ 431.55(c))

2. *Locality as Central Broker.* A State may allow a locality to act as a central broker in assisting individuals in selecting among competing health care plans. (§431.55(d))

3. *Sharing of Cost Savings.* A State may share with beneficiaries (through the provision of additional services) cost savings resulting from use by the beneficiary of more cost-effective medical care. (§ 431.55(e))

4. *Restriction of Beneficiaries to Selected Cost-effective Providers.* A State may restrict a beneficiary's freedom of choice to a provider or providers who demonstrate effectiveness and efficiency in providing those services; undertake to provide the covered care or medical services needed; and comply with State plan standards for reimbursement, quality, and utilization. States may qualify for these waivers only if:

(a) Their applicable State standards are consistent with access, quality, and efficient and economic provision of covered care and services; and

(b) The restrictions they impose do not discriminate among classes of providers on grounds unrelated to their demonstrated effectiveness and efficiency in providing those services. (§ 431.55(f))

5. *Conditions Applicable to all Section 1915(b) Waivers.* In applying for a waiver, a Medicaid agency must document the cost-effectiveness of the project, the effect on beneficiaries regarding access to quality care, and the projected impact of the program. Waivers approved under section 1915(b) may extend for no more than two years, unless the State requests continuation of the waiver. The Secretary will monitor the implementation of waivers granted to assure that the requirements for those waivers are being met. After notice and opportunity for a hearing, the Secretary must terminate a waiver if the Secretary finds noncompliance has occurred. The agency will then be given a specified date by which it must demonstrate that it meets the applicable requirements of sections 1902 and 1903(m) of the Act. (§ 431.55(b))

C. Tax Equity and Fiscal Responsibility Act of 1982 (TEFBA)

Section 137 of Pub. L. 97–248, enacted on September 3, 1982, made several changes to section 1915 of the Act. It deleted the Secretary's authority under section 1915(b) to waive the requirements contained in section 1903(m) of the Act. However, this change in the Secretary's waiver authority does not apply where a waiver was granted by the Secretary and waivered arrangements were in place before August 10, 1982. This exemption extends only for the period for which the waiver was initially approved.

Section 137 also amended statutory language in section 1915(b)(1) to specify that this section applies specifically to "primary care case-management systems" rather than "case-management systems" and to specify that the Secretary could waive certain requirements of the Act to implement primary care case-management systems or specialty physician service arrangements which restrict the provider from (or through) whom an individual can obtain medical care services (the statute previously used the term "primary care services" instead of "medical care services").

II. Final Regulations

We received comments on our interim final rule from 31 provider organizations and organizations representing beneficiaries, professional amd medical societies, and State and local agencies. Generally the comments can be grouped into two categories: Those that challenged our interim final regulations on procedural grounds with regard to the requirements of the Administrative Procedures Act (APA), Regulatory Flexibility Act (RFA) and Executive Order 12291; and those that, while supportive, had suggestions for ways we might further clarify the regulations.

Based on the comments received and the amendments required by section 137 of Pub. L. 97–248, we are making changes in current regulations as set forth below. (The specific comments received and our responses to these comments are discussed in section IV.

Public Comments

A. General

We are amending regulations located at § 431.51(d) to:

VOL 48 ISS 101 MAY 24 1983 UMI

—Require States (in lieu of the State report describing how program changes meet the statutory requirements for an exception) to cerfity to HCFA that statutory safeguards and requirements will be complied with when the State implements a project for competitive bidding, lock-in, or lock-out.

We are amending regulations located at § 431.55(a) and (c) through (f), and adding paragraph (h) (Paragraph (g) was added by the final rule published February 8, 1983, 48 FR 5733, that implements section 131 of TEFRA regarding cost sharing under Medicaid.) to:

—Specify that the requirements of section 1903(m) of the Act may be waived by the Secretary under section 1915(b) of the Act only where a waiver of such requirements was granted by the Secretary and the arrangement was in place before August 10, 1982. Such a waiver may remain in effect only for the period for which it was initially approved.

(Alternative arrangements to section 1903(m) waivers may be available to States that would largely meet their objectives consistent with the law and the intent of Congress. HCFA is prepared to assist States in developing alternative arrangements)

We are amending regulations located at § 431.55(b) to:

—Specify that HCFA will consider only waiver requests submitted by or through the Governor, State cabinet members responsible for State Medicaid agency activities, director of the State Medicaid agency, or someone with the authority to act on behalf of the director (this clarification is a result of several inquiries as to who may submit a waiver); and

—Require that States maintain certain data to assist HCFA in determining whether statutory requirements for waivers are met.

B. Competitive Arrangements

We are amending regulations located at § 431.54(d) to clarify which laboratories are subject to competitive bidding and what categories of services provided in those laboratories qualify for competitive bidding. We are also making a technical correction to paragraph (d)(3) to clarify that services are purchased *from* laboratories rather than *for* laboratories.

C. Lock-in

We are amending regulations located at § 431.54(e) to:

—Clarify that this provision does not apply to emergency services furnished to a beneficiary.

D. Lock-out

We are amending regulations located at § 431.54(f) to:

—Require that a State notify HCFA when it imposes restrictions;

—Specify that an agency may not impose restrictions under this provision which would result in denying beneficiaries access to emergency services (this is consistent with the intent of the statute that beneficiaries have access to necessary services); and

—Clarify what must be taken into account with respect to a beneficiary's access to services of adequate quality (this is a statutory requirement).

E. Case-management System

We are amending regulations located at § 431.55(c) to:

—In accordance with TEFRA, insert "primary care" before "case-management system", replace "primary care services" with "medical care services" and to make conforming changes where necessary;

—Specify that several persons (e.g., a group practice) may perform the primary care case-management function; and

—Distinguish between a primary care case-management system and a specialty physician services arrangement.

F. Locality as Central Broker

We are amending regulations located at § 431.55(d) to:

—Define locality;

—Clarify that a locality may utilize any agency or agent, public or private, profit or nonprofit, on its behalf in carrying out its central broker function; and

—Include the statutory safeguard that beneficiaries have access to services of adequate quality.

G. Sharing of Cost Savings

We are amending regulations located at § 431.55(e) to specify what "additional services" may include.

H. Restriction to Cost-effective Providers

We are amending regulations located at § 431.55(f) to:

—Specify that this provision does not apply to a beneficiary's access to emergency services;

—Define demonstrated effectiveness and efficiency;

—Specify that this provision does not apply to beneficiaries residing at a long-term care facility when a restriction is imposed unless the State arranges for reasonable and adequate beneficiary transfer; and

—Require that standards providers must meet under the waiver be included in a State's waiver request.

We have also redrafted § 431.55(f) for clarity and to conform more consistently with statutory language.

III. Applicability of the Regulations

The limitations permitted by these regulations pertain to the Medicaid program only. Individuals who are eligible under both the Medicare and Medicaid programs will not be subject to these regulations with respect to services provided to the individual under Medicare.

IV. Public Comments

The specific comments received on our interim final rule and our responses are as follows:

1. General

Comment:

Four commenters suggested that we withdraw the interim final rule and replace with an NPRM. The commenters believed that our publication of an interim final rule was inconsistent with the APA in that it abrogated the right of those affected to participate in the rulemaking process. They also believed that waiver of the NPRM was inconsistent with Congressional intent stated in the Conference Report which indicated that regulations should be issued "consistent with hearing and comment requirements". (H.R. Report No. 97–208, p. 964)

Response:

Authority for State action under section 1915 of the Act is based on the statute itself, not the regulations. As stated earlier, sections 1915(a), (b), (d) and (e) were effective with enactment on August 13, 1981. Section 1915(f) which was effective November 11, 1981 specifies that if the Secretary, within 90 days, fails to either deny a waiver request or inform the State that additional information is required, the waiver request is automatically "deemed granted". It is impossible to reconcile an NPRM process with Congress' explicit intent to give the statutory provisions immediate effect.

It is precisely because the statute had immediate effect that it was in the public interest to issue an interim final rule with comment period. Without regulations, States could conceivably have implemented programs without sufficient regard to statutory requirements. The regulations merely restate the statute with the stipulations that States may not implement programs that impinge on a beneficiary's reasonable access to services of adequate quality or restrict access to emergency services. Without regulations, HCFA could have been inundated with inappropriate waiver requests, many of which would have become effective if HCFA did not have the administrative resources to complete action on the requests within 90 days.

The pertinent section of the Conference Report reads:

> The conferees recognize the Secretary may begin granting waivers under this section shortly after enactment. They intend, however, that regulations be issued as soon as possible, consistent with hearing and comment requirements, so that States will receive guidance concerning the standards for waiver requests the Secretary will apply.

The interim final rule with comment period procedure allows for public participation. Various changes to the interim regulations show not only that public comments were considered, but often were adopted into the regulations. Thus, the interim final rule with comment period served the purpose of the APA as well as Congressional intent for immediate implementation "consistent with hearing and comment requirements".

Comment:

Several commenters believed that HCFA did not give adequate guidance to States either by failing to sufficiently clarify or "flesh out" the legislation or by failing to define specific terms (for example, "cost-effective" and "efficient"). One commenter believed that HCFA, therefore, was declining to exercise any of the prerogatives of a regulator.

Response:

We agree that certain portions of the regulations could be clarified or expanded upon. For instance, we have revised § 431.54(d) on competitive bidding to clarify which laboratories are subject to competitive bidding and have expanded upon the procedures an agency must follow before implementing lock-out. We have also made several other clarifying changes which are set forth in Section II, Final Regulations, and discussed in these comments.

However, in general HCFA has exercised its administrative discretion by determining to regulate less, thereby reducing administrative burdens on the States to the extent possible. We believe that in many cases statutory safeguards are sufficient and require no further expansion. HCFA's policy is to afford States maximum flexibility within statutory constraints. We believe this policy is both proper and reasonable and reflects Congressional intent.

With respect to defining specific terms, differences in State Medicaid programs and varying circumstances within each State often make it impractical to develop a uniform quantifiable definition for all States. We have amended regulations to define certain terms: *cost-effective* means reducing costs or slowing the rate of increase while *efficiency* means maximizing output or outcomes per unit of cost. Other terms which we have defined are discussed in the appropriate sections of these comments.

Comment:

Several commenters believe that limitations on freedom of choice could result in States steering Medicaid patients toward certain providers over others. This limitation on freedom of choice could adversely affect the physician-patient relationship and the physician's right to use certain services.

Response:

It is the intent of Congress and of these regulations to allow States to limit freedom of choice, but States are precluded from restricting freedom of choice if it results in a reduction in the quality of services provided.

Comment:

One commenter suggested that before a State limits access to particular providers under the exception and waiver provisions, the State should publish criteria it uses for selecting such providers and make the criteria subject to public review and comment.

Response:

States must give general notice to the public of the restrictions it imposes under the lock-out provisions of § 431.54(f). Although States may voluntarily submit proposals for public review and comment, nothing in the statute requires that they do so.

Under the waiver provisions, it could contravene States' flexibility, the efficient implementation of the regulations, and Congressional intent to require States to submit proposals for public review and comment.

Comment:

Four commenters suggested that exceptions under § 431.54 be treated as State plan amendments and receive HCFA approval before implementation. One of these commenters suggested the same treatment for waivers under § 431.55 and, further, that HCFA should establish performance standards for evaluating States' proposed exception and waiver requests.

Response:

To require State submissions to be in the form of State plan amendments would be contrary to the intent of the statute since the new section 1915 of the Act is not framed as a State plan requirement. Preprinted State plans have been amended to allow for exceptions and waivers.

With regard to prior approval, had Congress intended HCFA to approve all projects in advance, there would have been no need to distinguish in the statute between the waiver provisions of section 1915(b) and the exception provisions of section 1915(a). All waivers require approval. However, the only affirmative findings required by the exception provisions in section 1915(a) of the Act pertain to competitive bidding processes; the regulations reflect this requirement

Performance standards are not required for the exceptions under § 431.54. Waiver requests under § 431.55 must be evaluated on a State-by-State basis, bearing in mind special circumstances that may apply in each State. In general, HCFA's standards require that waiver requests hold out promise of being more cost-effective, do not impair beneficiary access to services, and are not contrary to statutory intent. HCFA is developing general standards for issuance as administrative guidelines under § 431.55(f), to be used by States in assessing their waiver proposals.

Comment:

One commenter objected to the reports required for competitive bidding arrangements and lock-in and lock-out projects. In connection with reporting, one commenter believed that the same 90-day period that applies to consideration of waiver requests should also apply to consideration of the report required for competitive bidding under § 431.54(d).

Response:

We, too, are concerned with the burden of reporting requirements. Therefore, we have amended regulations to require only that a State certify to HCFA that statutory requirements and safeguards are met. States will no longer be required to describe in a detailed report to HCFA specifically how program changes meet the statutory requirements for exceptions. See *Section*

VOL 48 ISS 101 MAY 24 1983 UMI

VI. Clearance of Reporting Requirements regarding the Office of Management and Budget's clearance of reporting requirements contained in § 431.51. Under final regulations a State's certification, in the case of competitive bidding, will suffice for the Secretary's positive finding that statutory requirements are met unless we determine otherwise, at a later date, through the State assessment process. Therefore, in this context we believe the 90-day approval period suggested by the commenter is no longer material.

Comment:

Two commenters were concerned that long-term care facilities will experience great financial difficulty as a result of the regulations and may revert to less-than-adequate care situations. They believe that with minimal supervision by the Federal government, States will limit beneficiary's freedom of choice and direct beneficiaries to the least costly providers. Consequently, the commenters believe that the regulations will impair the ability of long-term care providers to offer quality services.

Response:

The intent of Congress was that provision of services be made more cost-effective while quality and beneficiary access to services are maintained. HCFA will not approve waiver rquests that do not assure reasonable access to quality services.

Additionally, HCFA regional offices are charged with monitoring the implementation of waiver projects. Failure to continue to comply with the requirements for a waiver will result in termination of the waiver. These waivers may be approved only for a period of two years. If there are serious problems with a waiver project, HCFA can refuse to extend it beyond two years.

Comment:

Some commenters believed that an agency, in establishing the fees it will pay for Medicaid services and setting reasonable standards relating to the qualifications of providers and utilization review guidelines, should develop those fees, standards, and guidelines in conjunction with providers. One commenter suggested that States provide HCFA their utilization guidelines for purposes of lock-out.

Response:

The language relating to fees and standards in § 431.51(c)(1) and (2) was taken verbatim from freedom of choice regulations previously located at § 431.51(d). HCFA does not intend to attach additional requirements to pre-existing regulatory language. However, as in the past, States are free to work with providers in developing standards.

With regard to utilization guidelines, the statute gives States authority to develop guidelines unilaterally. We expect that State agencies would consult with local medical societies in developing these guidelines, but the regulations will not require it. With respect to States providing HCFA their utilization guidelines, the statute is designed so that States may implement programs without first obtaining approval from HCFA.

2. Competitive Bidding

Comment:

Two commenters objected to classifying X-ray procedures as a laboratory service under the competitive bidding process. They believe that HCFA has exceeded the intent of Pub. L. 97–35, since there is no mention of X-rays as a laboratory service in the statute.

Response:

The statute refers to section 1905(a)(3) of the Act, which specifies "other laboratory and X-ray services." Laboratory and X-ray services are closely related, in that both are designed to produce findings used in evaluating the state of a person's health. This close relationship is demonstrated in both the statute (section 1905(a)(3)) and the regulations at 42 CFR 440.30, in that "other laboratory and X-ray" comprises a single phrase preceding "services" (as opposed to, for instance, "other laboratory services or X-ray services"). Therefore, we believe it is the intent of Congress to allow competitive bidding among both laboratory and X-ray facilities, as a means of increasing efficiency and reducing costs.

Comment:

Two commenters believed that HCFA has not faithfully represented the intent of Congress, in that it has not made reference to Congressional intent that monopolies be avoided under the competitive bidding arrangements. Also one commenter believed that due to the unique nature of certain prosthetic devices, competitive bidding would be inappropriate.

One commenter questioned whether competitive bidding arrangements are limited solely to laboratory services and medical devices.

Response:

Congressional language (H.R. Report No. 97–158, Vol. II, pp. 300–301) reads: "* * * it is the Committee's expectation that States making arrangements with providers of laboratory services under the legislation would generally not make such arrangements with only one provider of such services in any large health care delivery area * * *. If a State does determine that restriction of providers is appropriate, the Committee emphasizes that the test of availability of quality services should be stringently enforced." (Emphasis added)

The Committee language does not preclude arrangements with a single provider. If circumstances warrant, a State may use a single provider. The determining criterion is availability of quality services.

We agree that successful arrangements for competitive bidding for prosthetic devices could pose special problems for the States; for example, we expect that only rarely would a State find it feasible to engage in competitive bidding for certain orthopedic devices such as artificial limbs which must be custom-made and custom-fitted. Moreover, Congress gave States flexibility to exercise judgment in applying this provision. States are under no obligation to implement competitive bidding arrangements. Presumably, a State will not engage in competitive bidding arrangements which are less cost-effective and efficient than current arrangements.

Competitive bidding is limited to laboratory and X-ray services and medical devices. However, as indicated in H.R. Report No. 97–208, pp. 963–964, competitive bidding for drugs is permissible under the waiver provisions of § 431.55(f).

Comment:

One commenter requested clarification as to which laboratories are subject to competitive bidding. Further, interstate laboratories winning a competitive bid to serve beneficiaries across State lines must meet standards set forth under the Clinical Laboratory Improvement Act of 1967 (Pub. L. 90–174), and, therefore, should be approved by the Center for Disease Control or the College of American Pathologists (CAP). This should be stated in the regulations.

Response:

We have clarified regulations to state that laboratories able to engage in competitive bidding are independent laboratories, hospital laboratories (in- or out-patient) That provide services to non-hospital patients, and physician laboratories that process at least 100 specimens during any calendar year from other physicians' patients. Hospital and physician laboratories may only participate in competitive bidding with regard to the outside referrals accepted.

With regard to interstate laboratories, in 1979 HCFA assumed the licensing function previously performed by the Center for Disease Control. The regulations will specify that, in order to participate in competitive bidding, laboratories requiring an interstate license must be licensed by HCFA or receive an exemption from the licensing requirement by the College of American Pathologists.

Comment:

One commenter suggested that care be taken in reviewing "waiver requests" for competitive bidding arrangements to assure that States select only qualified and proximate laboratories for Medicaid beneficiaries.

Response:

Competitive bidding arrangements do not fall under the waiver provisions of section 1915(b). However, HCFA is requiring under these final regulations that States certify that safeguards and requirements will be complied with when implementing a project under section 1915(a). Among these is the assurance that adequate services are available to beneficiaries under competitive arrangements. Therefore, to the extent that proximity of laboratories affects the availability of services in competitive arrangements, this would be a consideration. We believe this sufficiently addresses the commenter's concerns.

3. Lock-in of Beneficiaries

Comment:

One commenter believed that it is important to know how States will identify chronic overutilization and exactly how "overutilization" will be defined. Another commenter stated that patients who have varied and complex medical problems may be identified and penalized based on the primary diagnosis rather than on a complete medical review. Utilization review guidelines have yet to be developed that cover a patient's appropriateness of care based on varied and complex medical problems.

Response:

The statute gives each State the authority to set its own utilization guidelines. As a matter of Federal policy, States will not be required to divulge their tolerance rules or detection procedures. However, any lock-in arrangement must ensure beneficiary access to all necessary medical care.

Comments:

Some commenters suggested that a "reasonable period of time" for lock-in should be limited to 12 months. After a lock-in period, a State should review a beneficiary's utilization and reinstitute a lock-in if necessary.

One commenter also suggested that if a State restricts beneficiaries to specific providers, the State should make provision to pay other providers who provide emergency services to the beneficiary, or services where the beneficiary conceals information regarding his or her assignment to a particular provider or providers.

Response:

It is the intent of Congress to afford States greater flexibility in the operation of their Medicaid program. Therefore, with regard to a reasonable length of time for a lock-in, we believe that time frames should be determined by the State.

With respect to the provision of emergency services, we have amended regulations to require beneficiary access to emergency services; therefore, States must reimburse for these services. In other than these circumstances, we would expect that States would reimburse providers upon a showing that services were furnished in good faith (the provider did not have reason to know that there was a restriction in place) when beneficiary action was in appropriate or improper.

Comment:

One commenter suggested that the regulations should state that the Secretary encourages States to waive, during the start-up period, State regulations that may impede the development of cost-effective lock-in programs.

Response:

We recognize that lock-in provisions may, in certain instances, conflict with existing State regulations. In such cases, the State must decide whether it can or will waive other regulations in order to implement a lock-in program.

Comment:

Two commenters believe that regulations should specify that the hearing processes under lock-in (and lock-out) need not be completed before restrictions are imposed. Action may be taken after the affected party has been notified of relevant findings and given a chance to respond.

Response:

Under the statute, States are charged with the responsibility for establishing adequate notice and hearings processes. Therefore, we do not believe it appropriate to contravene States' flexibility with regard to the hearings process.

4. Lock-out of Providers

Comment:

One commenter believes that lock-out should apply to both institutional and non-institutional providers. Three other commenters requested that we clarify how the lock-out provision applies to an institutional provider.

Four commenters believe that the regulations should specify that lock-out provisions apply to physicians and practitioners, but not to institutional providers since the latter are judged under an established certification process based on Federal conditions of participation and associated State licensure requirements, enforcement, and due process provisions.

Response:

There is no indication in either the statute or legislative history that Congress intended to exclude institutional providers from the lock-out provisions. Therefore, the provision will apply to both institutional and non-institutional providers.

We note, however, that the lock-out provisions apply only in those situations where a provider has furnished services at a frequency or amount that is not medically necessary or of a quality that does not meet professionally recognized standards of health care. These regulations do not apply to other circumstances warranting adverse action. Additionally, the statute protects beneficiaries by prohibiting a lock-out which would deprive them of reasonable access to services.

Comment:

One commenter suggested that we provide lock-out guideline criteria to the States and establish criteria to evaluate effects on beneficiary access. One other commenter requested specific regulatory guidance on how to ensure reasonable access.

Response:

We recently published regulations on the suspension of health care professionals which include additional guidance to be used by States in arriving at appropriate provider sanctions. (48 FR 3742, January 8, 1983)

VOL 48 ISS 101 MAY 24 1983 UMI

We will evaluate effects on beneficiary access via procedures contained in HCFA's *State Assessment Guide*. With regard to a regulatory definition of reasonable access, we believe that because of the infinite number of combinations of facts and circumstances, reasonable access is best determined only on a case-by-case basis.

Comment:

One commenter stated that the statute did not require that a general notice be given to the public regarding the basis and duration of a lock-out and, therefore, our regulations should not require it. One other commenter believed that this requirement could result in legal action against the State due to damage to a provider's reputation.

Response:

Although section 1915(a)(2)(B) does not require a general notice, HCFA believes it is necessary to keep the public informed concerning provider restrictions. Further, in all program restrictions HCFA imposes, we provide public notice (e.g., the newspaper notice required under 42 CFR 420.102(b)(4)). HCFA does not believe that States will be subject to legal action as a result of the notification since it will not be issued until after the provider is given an opportunity to rebut State allegations.

Comment:

One commenter was concerned that regulations provide adequate protection for providers that are suspended from program participation, including adequate notices, hearings, and appeals.

Response:

As indicated above, under the statute, States are charged with the responsibility for establishing adequate notice and hearing processes. However, we have amended regulations to require that States notify HCFA when it imposes a restriction.

5. Waiver Provisions—General

Comment:

Four commenters suggested that States be required to give general notice to the public of specific waiver requests, allow for public review of State proposals, and submit to HCFA a summary of public comments along with each waiver request. They believe also that States should be required to make public the basis for selecting or limiting providers and establish a reasonable and timely opportunity for appealing State decisions. One commenter suggested that waiver requests under consideration be published by HCFA in the **Federal Register** for comment.

Response:

We do not believe that the suggested restrictions would be helpful. Congress intended to streamline the waiver process and to enhance rather than restrict State flexibility. However, we believe that as a practical matter, States will adopt procedures for making information regarding selection of providers available to the public. Publication by HCFA of a **Federal Register** notice of each waiver request would delay waiver implementation and could prevent compliance with the 90-day statutory deadline for approving or disapproving a waiver request.

Comment:

One commenter believes that we should impose additional reporting requirements on States and that HCFA should retain State survey and certification capacity at current levels.

Response:

Legislative intent was to grant flexibility to the States, not place new reporting requirements upon them. However, HCFA will continue to monitor how States implement their projects under these regulations. HCFA will monitor the implementation of waivers through its State assessment procedures or other review procedures. We have also amended regulations to require that States maintain certain data to assist HCFA in determining whether statutory requirements for waivers are met.

Comment:

Several commenters stated that waivers should not reduce the quality of care or beneficiary access to that care.

One commenter also suggested that the provision for HCFA to monitor the implementation of waivers should include a procedure for the general public to petition HCFA for a compliance review. The public should be notified and given the opportunity to participate in noncompliance hearings.

Response:

We agree that quality health care must be maintained. Therefore, our regulations require that a State must ensure continued beneficiary access to quality health care. Waivers will not be approved where there is insufficient provider participation to assure reasonable access. However, in developing their selection process, States must take a cost effective approach in selecting providers of care without hampering beneficiary access to quality services. As stated previously, HCFA will monitor approved waivers through methods including its State assessment procedures.

HCFA is always open to considering information from the public with respect to compliance with program requirements and we do not believe a separate special process need be established for this purpose in connection with waivers.

6. Case-management

Comment:

One commenter stated that the initiation of a case-management program could result in short-term increases in expenditures (e.g., "start-up money"). The commenter believed that regulations should specify that an initial increase in expenditures is acceptable given the long-term potential for savings.

Response:

Savings over the entire period of the waiver will be considered by HCFA in reviewing waiver proposals. However, we do not believe it is necessary to amend the regulations for this purpose.

Comment:

Two commenters suggested that the agency, in assigning a specific person or agency to act as a case manager, must ensure that the case manager has the necessary medical expertise for monitoring health-related services.

One commenter believes that regulations should include qualifications or certification requirements for case managers.

Response:

We are revising the requirement that a single person or agency act as the case manager to specify also that several persons may act as a case manager. This is because we do not want to preclude those situations where it may be more appropriate to have more than one manager; for example, in a group practice where several members may assume this responsibility at various times. We believe that selection of a case manager is a matter for the State to decide based on its own assessment as to what qualifications are needed. We do not believe that the legislation contemplated specific prescribed certification standards for case managers.

Comment:

One commenter believes that terms such as "provider" and "specialty physician services" should be defined. This commenter urges that regulations prohibit discrimination among types of health providers for purposes of case-management. It also urged a provision whereby a patient may reject a State-selected provider, since decisions concerning health care must reside with the patient. The patient should have the right to terminate an unsatisfactory or unproductive patient-practitioner relationship.

Response:

A change to section 1915(b)(1) of the Act brought about by Pub. L. 97-248 revises "case-management system" to "primary care case-management system". In general, terms used in § 431.55(c) on primary care case-management arrangements are fairly common, non-technical terms. Consequently, we believe it is unnecessary to define them within the regulation itself.

We do agree, however, that the distinction between "primary care case-management system" and "specialty physician services arrangements" should be clarified in the regulations. Under a primary care case-management system, a case manager is responsible for locating, coordinating, and monitoring primary care or primary care and other medical care and rehabilitative services on behalf of a beneficiary. The specialty physician services arrangement differs from a case-management system in that it allows States to restrict beneficiaries to providers of specialty physician services for those specialty services regardless of whether such restriction is part of a case-management system. The regulations have been expanded to reflect this distinction.

Congress intended that case-management selection be a State prerogative. Therefore, it would be inappropriate to prohibit discrimination among types of providers, since the objective of a case-management system is to limit beneficiary access to specified primary care providers. Similarly, it would be inappropriate to allow a beneficiary to reject a State-selected provider, since such a stipulation could prevent the implementation of a case-management system, which inherently places restrictions on a beneficiary's freedom of choice.

7. Locality as Central Broker

Comment:

Several commenters believe that clarification of regulations was necessary in the following areas:

a. Two commenters requested that "locality" be defined.

b. One commenter believes that the regulations should require that all health care plans be considered on a fair and equitable basis.

c. One commenter suggested that the regulations should state that the central broker concept be limited to public or non-profit groups.

d. Two commenters stated that the regulations should describe what criteria the Secretary will apply in judging applications for this waiver, e.g., specify minimum benefits that must be offered by competing health care plans.

Response:

We have taken the following action:

a. We have amended the regulations to define "locality" as any defined jurisdiction, e.g., district, town, city, borough, county, parish, or State.

b. We believe the States are in the best position to determine the basis for evaluating alternative plans.

c. We have amended the regulations to specify that public or non-profit groups may act on a locality's behalf in carrying out its central broker function. However, we will not require that localities be limited to these groups.

d. We are not specifying the minimum benefits that must be offered by competing health care plans. However, States are responsible for ensuring that their State plan obligations are met irrespective of whether competing plans partially or totally supplant the current Medicaid program.

Comment:

One commenter stated that there are no controls upon a locality's ability to "coerce" individuals to select prepaid plans. States should be required to develop training, certification, and monitoring procedures to ensure fair performance by central brokers.

Response:

The purpose for using a locality as a central broker is to inform beneficiaries so that they can choose from among available plans. It is not intended that States use this waiver to "coerce" beneficiaries. We believe that States are in the best position to determine the procedures necessary to ensure fair performance by central brokers.

8. Restriction to Selected Cost-efficient Providers

Comment:

One commenter had the following suggestions:

(1) Regulations should contain requirements that States specify their standards for allowing providers to participate under the waiver.

(2) Regulations should be expanded to establish criteria for assuring that adequate access to services is provided.

(3) States should not be allowed to impose bed quotas.

Response:

We agree with the commenter and have amended the regulations to require that States specify, in their waiver requests, their standards with regard to provider participation.

With regard to establishing specific criteria for assuring adequate access, it is the intent of Congress to afford States greater flexibility in the operation of their Medicaid programs. Since circumstances vary in each State, HCFA would perpetuate current inefficiency by determining standard criteria to fit differing State circumstances. It is up to the States to demonstrate that reasonable access to care is protected. Waivers that do not show that access to services will be maintained will not be approved.

HCFA will not approve waiver requests that seek to restrict all provider agreements to a specified percentage or number of otherwise Medicaid certified beds.

Comment:

One commenter suggested that where State and Federal law requires hospitals to participate in Medicaid, a State should provide a hearing and appeal mechanism for settling disputes that arise over reimbursement, quality, and utilization standards. The commenter is concerned that the State may set arbitrary and unfair standards.

Response:

As a practical matter, it would appear to be inconsistent for a State which requires participation of qualifying hospitals to seek a waiver which would have the effect of excluding those same hospitals from participation. The commenter did not provide examples of State laws that require participation, or what impact those laws would have in a waiver situation. The providers, as well as the beneficiaries, are protected from the application of arbitrary standards. HCFA in granting a waiver, reviews the proposed State standards to assure that they are consistent with the purposes of title XIX, as well as with access, quality, efficiency, and economic provisions of covered care and services, and that they do not discriminate among classes of providers on grounds unrelated to their demonstrated effectiveness and efficiency in providing those services. Therefore, we believe that no change in regulations is necessary.

VOL 48 ISS 101 MAY 24 1983 UMI

Comment:

One commenter believes that the regulations should contain criteria HCFA will use in determining whether a waiver will be "consistent with access, quality, and efficient and economic provisions of * * * services" and "not discriminate among classes of providers on grounds unrelated to their demonstrated effectiveness and efficiency".

Response:

Because of differing circumstances in the various States, we believe specific, quantifiable standards are not appropriate. We intend to issue general standards as administrative guidelines for use by States in determining whether their proposals are acceptable.

As stated earlier in the preamble, in general, HCFA's standards require that waiver requests hold out promise of being more cost-effective, do not impair beneficiary access to services and are not contrary to statutory intent. HCFA will rely on these principles in evaluating waiver requests, and administrative guidelines issued by HCFA will also reflect these principles.

Comment:

Two commenters were opposed to States having the right to bar qualified providers from the program despite their compliance with all rules and regulations and willingness to accept the Medicaid rate as payment in full. They believed that the regulations do not manifest Congressional intent in this regard and want appropriate clarification.

Response:

The mere fact that a provider complies with all rules and regulations and is willing to accept the Medicaid rate in full does not guarantee that the provider is cost-efficient and efficient since reimbursement and utilization rates vary from provider to provider. It is the intent of Congress to allow States to conserve Medicaid funds by selecting providers that offer quality services in a most cost-effective and efficient manner. States may select among classes of providers. Restrictions must be based solely on cost-effectiveness and efficiency considerations as long as access to quality services is maintained.

Comment:

One commenter requested that the phrases "classes of providers" and "demonstrated effectiveness and efficiency" should be clarified.

Response:

We have not clarified the term "classes of providers" in the regulation because we do not believe that a definition fully encompassing the kinds of discrimination meant to be prohibited can be drafted. States may not discriminate among classes of providers on any basis unrelated to their demonstrated effectiveness and efficiency. Examples of classes could include distinctions based on the nature of the provider's ownership (e.g. non-profit vs. for profit) or professional qualifications (e.g. physicians vs. physical therapists) or numerous other factors.

The regulations have been changed to clarify that the term "demonstrated effectiveness and efficiency" refers to reducing costs or slowing the rate of increase and maximizing outputs or outcomes per unit of cost.

Comment:

One commenter believed in general that economic concerns of the States may override their concern for the beneficiary, especially with regard to protecting residents of long-term facilities. The commenter thought that States would engage in mass transfers of patients out of these facilities despite absence of appropriate beds for these patients.

Another commenter suggested that the regulations should state that Medicaid would continue to pay for, and would not transfer, beneficiaries in long-term care facilities that are restricted from program participation under these regulations. Resident transfers should be done only in accordance with a specific and detailed relocation plan.

Response:

States must show that beneficiaries continue to have access to services of adequate quality. This will be one determining criterion in evaluating waiver requests. If States are unable to assure reasonable access to services, a waiver request will not be approved. With regard to mass transfers, we have amended regulations so that they do not apply to beneficiaries residing in a long-term care facility when a restriction is imposed unless the State arranges for reasonable and adequate beneficiary transfer. In order to minimize disruption to beneficiaries we would expect States, under this requirement, to provide beneficiaries and their families with sufficient advance notice to allow them to prepare for the transfer. However, the regulations will not require a specific and detailed relocation plan.

Comment:

One commenter indicated that the regulations should explicitly exclude emergency services from any freedom of choice restrictions as the statute requires.

Response:

We agree and have amended the regulations accordingly.

V. Impact analysis

Executive Order 12291

We have determined that neither the interim final nor the final regulations which clarify and amend the interim regulations, will result in an annual economic impact of $100 million or meet any of the other threshold criteria of section 1(b) of the Order.

Several commenters believed that a regulatory impact analysis was required because the impact would be greater than $100 million. Upon review of 50 waiver requests and the approval of 22 waivers, we have determined that the annual cumulative economic effect of individual State actions, may exceed $100 million. For example, one regional office estimates that one State's request to procure hospital services for its Medicaid recipients, could result in State savings of $140 million in fiscal 1984. The other approved waivers are estimated to produce smaller savings. However, there is potential for States' actions to result in an impact exceeding the $100 million threshold.

However, as noted in the October 1, 1981 regulation, the actions States may take under section 1915 do not result from the provisions of these regulations, but on the provisions of section 1915 itself. Therefore, the economic impact generated by State decisions result from the Omnibus Budget Reconciliation Act of 1981 and not these regulations, and a regulatory impact analysis is not required.

Regulatory Flexibility Act

The Secretary certifies under 5 U.S.C. 605(b), enacted by the Regulatory Flexibility Act (Pub. L. 96-354), that neither the interim final regulations nor these final regulations, which would clarify and amend the interim regulations, will result in a significant impact on a substantial number of small entities.

The primary impact of these interim final and final regulations is on the States, which are not "small entities" within the meaning of the Act. However, several commenters did suggest that many providers would be significantly impacted, but no specific evidence was provided supporting their contention. And as discussed in the Executive Order analysis, any such impact on providers would be the result of the statute and not these regulations. Section 2175 of the Omnibus Reconciliation Budget Act of 1981 (Pub. L. 97-35), was expressly designed to allow States to place restrictions on the beneficiary's free choice of medical providers. As stated in the preamble, the interim final and the final regulations merely implement the intent of Congress. We would encourage States that are developing section 1915 waiver requests to consider their effect on small entities and to analyze alternative choices. We believe that States are best qualified to determine whether a given adverse effect on small entities is appropriate in view of the benefits offered by a waiver request that is consistent with the provisions of these regulations.

Further, in view of the provisions of section 1915, while a State may consider the effect on small entities before submitting a request, we may not consider this effect in reviewing the request. Accordingly, a regulatory flexibility analysis is not required.

VI. Clearance of Reporting Requirements

In the preamble to the interim final rule published October 1, 1981, a statement was made that the reporting requirements contained in §§ 431.51, and 431.55 of the regulations would not be effective until the Office of Management and Budget (OMB) approved the reporting. OMB has completed its review of the reporting requirements contained in § 431.51. Under OMB No. 0938-0193, OMB has approved this section of the regulations only as a certification. A certification would not be considered to have any reporting burden. Regulation § 431.51(d) under this rule meets this OMB requirement.

With respect to § 431.55, again, under section 3507 of the Paperwork Reduction Act, reporting/recordkeeping would not be required until OMB approval has been obtained. This will also apply with respect to the reporting/recordkeeping contained in § 431.54(f)(3). We will notify States of the effective date of the reporting/recordkeeping requirements when approval has been obtained.

VII. List of Subjects in 42 CFR Part 431

Administrative practice and procedure, Contracts (Agreements), Fair hearings, Federal financial participation, Grant-in-Aid program—health, Health facilities, Health maintenance organizations (HMO), Indians, Information (Disclosure), Medicaid, Mental health centers, Prepaid health plans, Privacy, Quality control, Reporting and recordkeeping requirement.

PART 431—STATE ORGANIZATION AND GENERAL ADMINISTRATION

The authority citation for Part 431 reads as follows:

Authority: Sec. 1102 of the Social Security Act, (42 U.S.C. 1302), unless otherwise noted.

42 CFR Part 431, Subpart B is amended as set forth below:

Subpart B—Administrative Requirements: General Program Services

1. Section 431.51 is amended by revising paragraphs (c)(3) and (d) to read as follows:

§ 431.51 Free choice of providers.

* * * * *

(c) *Limitations on applicability.* Paragraph (b) of this section does not prohibit the agency from—* * *

(3) Restricting recipients' free choice of providers in accordance with one or more of the exceptions provided for under § 431.54, or under a waiver as provided for under § 431.55.

(d) *Certification requirement.* If a State implements a project under one of the exceptions allowed under § 431.54 (d), (e) or (f), it must certify to HCFA that the statutory safeguards and requirements for an exception under section 1915(a) of the Act are met. The certification must be submitted by the end of the quarter in which the State implements the project, except that the certification must be submitted prior to instituting the project in the case of an exception under § 431.54(d), for which the Secretary must make certain findings before the project may be initiated.

2. Section 431.54 is amended by revising paragraphs (d), (e), and (f) to read as follows:

§ 431.54 Exceptions to certain State plan requirements.

* * * * *

(d) *Competitive bidding or other arrangements.* The Medicaid agency may enter into arrangements to purchase medical devices or laboratory and X-ray tests (as defined in § 440.30) through a competitive bidding process or otherwise, if the State assures in the certification required under § 431.51(d), and the Secretary finds, that adequate services or devices are available to recipients under the arrangements. In addition, the State must certify and the Secretary must find that:

(1) Laboratory services purchased under such arrangements are provided through independent laboratories, hospital laboratories (in-or-outpatient) that provide services for non-hospital patients, and physician laboratories that process at least 100 specimens during any calendar year from other physicians. These laboratories must meet the requirements of Part 405, Subpart J or Part 405, Subpart M of this chapter. Laboratories requiring an interstate license under 42 CFR Part 74 must be licensed by HCFA or receive an exemption from the licensing requirement by the College of American Pathologists. (Hospital and physician laboratories may participate in competitive bidding only with regard to services to non-hospital patients and other physicians' patients, respectively.)

(2) Any laboratory from which a State purchases services under this section has no more than 75 percent of its charges based on services to beneficiaries or recipients of Medicaid or Medicare.

(e) *Lock-in of recipients who over-utilize Medicaid services.* If a Medicaid agency finds that a recipient has utilized Medicaid services or items at a frequency or amount that is not medically necessary, as determined in accordance with utilization guidelines established by the State, the agency may restrict that recipient for a reasonable period of time to obtain Medicaid services or items from designated providers only. The agency may impose these restrictions provided that:

(1) The agency gives the recipient notice and opportunity for a hearing (in accordance with procedures established by the agency) before such restrictions are imposed.

(2) The agency assures that the recipient has reasonable access (taking into account geographic location and reasonable travel time) to Medicaid services of adequate quality.

(3) The restrictions will not apply to emergency services furnished to the recipient.

(f) *Lock-out of providers.* If a Medicaid agency finds that a provider of items or services under the State plan has abused the Medicaid program, the agency may restrict the provider, through suspension or otherwise, from participating in the Medicaid program for a reasonable period of time. The agency may impose these restrictions subject to the following limitations:

(1) Before imposing any restriction, the agency gives the provider notice and

VOL 48 ISS 101 MAY 24 1983 UMI

opportunity for a hearing, in accordance with procedures established by the agency.

(2) The agency must find, before restricting a provider, that in a significant number or proportion of cases, the provider has:

(i) Provided Medicaid items or services at a frequency or amount not medically necessary, as determined in accordance with utilization guidelines established by the agency; or

(ii) Provided Medicaid items or services of a quality that does not meet professionally recognized standards of health care.

(3) The agency must—

(i) Notify HCFA when it imposes a restriction; and

(ii) Give a general notice to the public of the restriction and its duration.

(4) The agency may not impose restrictions which would result in denying recipients reasonable access (taking into account geographic location and reasonable travel time) to Medicaid services of adequate quality, including emergency services.

3. Section 431.55 is revised to read as follows:

§ 431.55 Waiver of other Medicaid requirements.

(a) Basis and purpose. This section implements section 1915(b) of the Act, as added by section 2175 of Pub. L. 97–35 and as amended by section 137 of Pub. L. 97–248, which authorizes the Secretary to waive the requirements of sections 1902 and 1903(m) (as permitted under paragraph (h) of this section) of the Act to the extent he or she finds proposed improvements in the provision of services under Medicaid to be cost-effective, efficient, and consistent with the objectives of the Medicaid program. This section also implements sections 1915 (d), (e), and (f) of the Act, which govern how such waivers are to be approved, continued, monitored, and terminated. Additionally, paragraph (g) of this section implements section 1916(a)(3) and (b)(3) of the Act, which authorizes the Secretary to waive the requirement in those sections that cost-sharing amounts be nominal.

(b) *General requirements.*

(1) HCFA will consider only waiver requests submitted to HCFA by or through the Governor, State cabinet members responsible for State Medicaid agency activities, director of the State Medicaid agency, or by someone with the authority to submit waiver requests on behalf of the director.

(2) In applying for a waiver to implement an approvable project under paragraphs (c), (d), (e), or (f) of this section, a Medicaid agency must document in the waiver request and maintain data regarding:

(i) The cost-effectiveness of the project;

(ii) The effect on recipients regarding access to care and quality of services; and

(iii) The projected impact of the program.

(3) No waiver under this section may be granted for a period longer than 2 years, unless the agency requests a continuation of the waiver.

(4) HCFA will monitor the implementation of waivers granted under this section to assure that requirements for such waivers are being met.

(i) Where monitoring demonstrates evidence that the agency is not in compliance with the requirements for a waiver under this section, the agency shall be given notice and opportunity for a hearing.

(ii) If, after a hearing, HCFA finds an agency to be out of compliance with the requirements of a waiver, that waiver shall be terminated, and the agency shall be given a specified date by which it must demonstrate that it meets the applicable requirements of sections 1902 and 1903(m) of the Act.

(c) *Case-management system.* Waivers of appropriate requirements of sections 1902 and 1903(m) (as permitted under paragraph (h) of this section) of the Act may be authorized for a State to implement a primary care case-management system or specialty physician services arrangements which restricts the provider from or through whom a recipient can obtain medical care services (other than in emergency circumstances) provided that those restrictions do not substantially impair access to such services of adequate quality where medically necessary.

(1) Under a primary care case-management system the agency assures that a specific person or persons or agency will be responsible for locating, coordinating, and monitoring all primary care or primary care and other medical care and rehabilitative services on behalf of a recipient.

(2) A specialty physician services arrangement allows States to restrict recipients of specialty services to designated providers of such services, even in the absence of a primary care case-management system.

(d) *Locality as central broker.* Waivers of appropriate requirements of sections 1902 and 1903(m) (as permitted under paragraph (h) of this section) of the Act may be authorized for a State to allow a locality to act as a central broker in assisting individuals (eligible for medical assistance under this title) in selecting among competing health care plans.

States must ensure that access to medically necessary services of adequate quality is not substantially impaired.

(1) A locality is any defined jurisdiction, e.g., district, town, city, borough, county, parish, or State.

(2) A locality may utilize any agency or agent, public or private, profit or nonprofit, to act on its behalf in carrying out its central broker function.

(e) *Sharing of cost savings.* Waivers of appropriate requirements of section 1902 and 1903(m) (as permitted under paragraph (h) of this section) of the Act may be authorized for a State to share (through provision of additional services) with recipients of medical assistance under the State plan cost savings resulting from use by the recipient of more cost-effective medical care.

Additional services include those offered by plans selected by recipients, as well as those offered expressly by a State as an inducement for recipients to participate in a primary care case-management system, a "competing health care plan", or other arrangements that result in more cost effective medical care.

(f) Restriction of freedom of choice. Waiver of appropriate requirements of sections 1902 and 1903(m) (as permitted under paragraph (h) of this section) of the Act may be authorized for States to restrict recipients to obtaining services from (or through) qualified providers or practitioners that meet, accept, and comply with the State reimbursement, quality and utilization standards specified in the State's waiver request.

(1) An agency may qualify for such a waiver only if——

(i) Its applicable State standards are consistent with access, quality and efficient and economic provisions of covered care and services;

(ii) The restrictions it imposes do not discriminate among classes of providers on grounds unrelated to their demonstrated effectiveness and efficiency in providing those services; and

(iii) The restrictions it imposes do not apply in emergency circumstances.

(2) Demonstrated effectiveness and efficiency refers to reducing costs or slowing the rate of increase and maximizing outputs or outcomes per unit of cost.

(3) The provisions of this section do not apply to recipients residing at a long-term care facility when a restriction is imposed unless the State arranges for reasonable and adequate recipient transfer.

(g) *Cost sharing requirement.* Beginning October 1, 1982, under sections 1916(a)(3) and (b)(3), the Secretary may permit by waiver, copayments of up to double the nominal amount, as described in § 447.54, to be imposed on nonemergency services furnished in a hospital emergency room.

(1) Nonemergency services are those services that do not meet the definition of emergency services at § 447.53(b)(4).

(2) In order for a waiver to be approved under this provision, the State must establish to the satisfaction of HCFA, that alternative sources of nonemergency, outpatient services are available and accessible to eligible individuals.

(3) Although, in accordance with paragraph (b)(2) of this section, a waiver will generally be granted for a 2 year duration, HCFA will re-evaluate approved waivers if the State increases the nominal copayment amounts in effect when the waiver was approved.

(h) *Section 1903(m) waivers.* Appropriate requirements under section 1903(m) of the Act are waived only where a waiver of those requirements was granted by the Secretary and the arrangements were in place before August 10, 1982. Such a waiver may remain in effect only for the period for which it was initially approved.

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance Program)

Dated: March 15, 1983.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

Approved: April 26, 1983.

Margaret M. Heckler,

Secretary.

BILLING CODE 4120-03-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6386

[NEV-058307]

Nevada; Partial Revocation of Public Land Order 3035

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes PLO No. 3035 which withdrew land for a Bureau of Mines Administrative Site in Boulder City, Nevada. The surface and mineral estate of the .606 acre involved are now in private ownership. The remaining 17.481 acres of the site will remain withdrawn.

EFFECTIVE DATE: June 21, 1983.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Nevada State Office, 702–784–5703.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. PLO No. 3035, dated April 15, 1963, which withdrew land for use by the Bureau of Mines as an administrative site, is hereby revoked insofar as it affects the following described land:

Mount Diablo Meridian, Nevada

T. 23 S., R. 64 E.,
Sec. 8, lots 30, 31, 32 and 33, Block 10 as shown on the Plat of Boulder City, Nevada, dated July 15, 1959 (X300460, Sheet 9 and 20), on file at City Hall, Boulder City, Clark County, Nevada; except the north approximately 5 feet of lot 30 as shown on the unrecorded Record of Survey, prepared on September 14, 1976, by Elmer S. Radig, Registered land Surveyor, Nevada Certificate No. 2878) 581 Avenue "C," Boulder City.

The area described aggregates approximately .606 acre within the city limits of Boulder City in Clark County, Nevada.

The above described land, including all minerals, is now in private ownership.

Inquiries concerning the land should be addressed to Chief, Division of Operations, Nevada State Office, Branch of Lands and Minerals Operations, 300 Booth Street, P.O. Box 12000, Reno, Nevada 89520.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

May 16, 1983.

43 CFR Public Land Order 6387

[C-1269]

Colorado; Revocation of Public Land Order 5029; Partial Revocation of Executive Order 5327 and Public Land Order 4522

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes Public Land Order 5029 in its entirety and partially revokes Executive Order 5327 and Public Land Order 4522 as to 1,066,880 acres of public and national forest lands withdrawn for oil shale classification purposes. This order will restore approximately 508,640 acres to operation of the public land laws, including mining and mineral leasing, and 258,040 acres to such forms of disposition as may by law be made of national forest lands. The remaining 300,000 acres are privately owned and will not be affected by this action.

EFFECTIVE DATE: June 21, 1983.

FOR FURTHER INFORMATION CONTACT: Richard D. Tate, Colorado State Office, 303–837–2535.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order 5029, dated March 11, 1970, is hereby revoked in its entirety; Executive Order 5237, dated April 15, 1930, as amended, and Public Land Order 4522, dated September 13, 1968, are hereby revoked as far as they affect the following described lands:

Secs. 1 thru 3, 10 thru 15, 22 thru 35.
T. 9 S., R. 95 W.,
Secs. 4 thru 6.
T. 11 S., R. 95 W.,
Secs. 1 thru 4, 7 thru 36.
T. 12 S., R. 95 W.,
Secs. 1 thru 22, 28 thru 31.
T. 9 S., R. 96 W.,
Secs. 11 thru 15.
T. 11 S., R. 96 W.,
Secs. 22 thru 36.
T. 12 S., R. 96 W.,
Secs. 1 thru 27, 33 thru 36.
T. 12 S., R. 97 W.,
Secs. 1 thru 4, 9 thru 16, 22 thru 24.

Approximately 247,000 acres of national forest land.

4. At 10 a.m. on June 21, 1983, the land described in paragraph one shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All applications received at or prior to 10 a.m. on June 21, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

5. At 10 a.m. on June 21, 1983, the land described in paragraph one shall be open to location under the United States mining laws. Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Section 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a rights of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

6. At 10 a.m. on June 21, 1983, the land described in paragraph three shall be open to nonmetalliferous mineral location and entry under the United States mining laws, subject to valid existing rights, and the requirements of applicable regulations. The land has been and remains open to metalliferous mineral location under the United States mining laws and to applications and offers under the mineral leasing laws.

7. At 10 a.m. on June 21, 1983, the land described in paragraphs 1 and 2 shall be open to applications and offers for sodium leasing under the mineral leasing laws. The land has been and remains open to leasing for minerals other than sodium.

8. The land described in paragraph 3, which was withdrawn by Executive Order 5327 only, remains open to all mineral leasing, including sodium leasing.

9. At 10 a.m. on June 21, 1983, the land described in paragraphs 2 and 3 will be open to such forms of surface appropriation as may by law be made of national forest land.

10. Approximately 300,000 acres are privately owned and will not be affected by this action.

Inquiries concerning these lands should be directed to the State Director, Bureau of Land Management, 1037 - 20th Street, Denver, Colorado 80202.

Garrey E. Carruthers,
Assistant Secretary of the Interior.
May 16, 1983.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6388

[W-29044]

Wyoming; Partial Revocation of Reclamation Project Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order partially revokes four orders as they affect 21,519 acres of public lands withdrawn for the Eden Reclamation Project. This action constitutes record clearing only as lands are within an oil shale withdrawal and, as such, will remain closed to surface entry and mining. The lands have been and remain open to mineral leasing, except for oil shale.

EFFECTIVE DATE: June 21, 1983.

FOR FURTHER INFORMATION CONTACT:
W. Scott Gilmer, Wyoming State Office, 307–772–2540.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 US.C. 1714, it is ordered as follows:

1. The Secretarial Orders of July 18, 1940, and April 14, 1941, and the Commissoners' Orders of January 24, 1952, and August 19, 1954, which withdraw lands for the Eden Reclamation Project are hereby revoked insofar as they affect the following described land:

Sixth Principal Meridian, Wyoming

The area described contains 21,519.37 acres in Sublette and Sweetwater Counties, Wyoming.

2. The lands described above will remain closed to operation of the surface land laws, and the United States mining laws since they lie within an overlapping oil shale withdrawal. The lands have been and will remain open to applications and offers under the mineral leasing laws, except for oil shale.

The Bureau of Land Management will assume administrative jurisdiction of the lands and will recognize all rights-of-way, and easements previously granted by the Bureau of Reclamation.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyoming 82001.

Garrey E. Carruthers,
Assistant Secretary of the Interior.
[FR Doc. 83-13903 Filed 5-23-83; 8:45 am]
BILLING CODE 4310-84-M

43 CFR Public Land Order 6389

[U-31071]

Utah; Partial Revocation of Reclamation Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order partially revokes a Secretarial Order as to 785,850.04 acres of land withdrawn for the Glen Canyon Unit, Colorado River Storage Project, Utah. A total of 207,483.94 acres will be restored to surface entry. This portion has been and will remain open to mining and mineral leasing. The remaining 578,366.10 acres will continue to be withdrawn for the Glen Canyon National Recreation Area.

EFFECTIVE DATE: June 21, 1983.

FOR FURTHER INFORMATION CONTACT:
Ken Latimer, Utah State Office, 801–524–4245.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, and it is ordered as follows:

1. The Secretarial Order of June 11, 1954, is hereby revoked as it pertains to the following lands:

Salt Lake Meridian

Glen Canyon National Recreation Area

The areas described aggregate 785,850.04 acres in Garfield, Kane, and San Juan Counties.

2. At 10 a.m. on June 21, 1983, 207,483.94 acres of public lands located outside on the Glen Canyon National Recreation Area shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable laws. The lands have been and will remain open to mineral leasing and mining location. All valid applications received at or prior to 10 a.m. on June 21, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The above described lands lying within the Glen Canyon National Recreation Area remain segregated from operation of the public land laws generally, including the United States Mining laws, and are open to such leasing as may be allowed under the Act of October 27, 1972. Therefore, this revocation will have no effect on these lands except to clear the records.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, 136, East South Temple, University Club Building, Salt Lake City, Utah 84111.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

May 16, 1983.

BILLING CODE 4310-84

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 65

National Flood Insurance Program; Changes in Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Modified base (100-year) flood elevations are finalized for the communities listed below.

These modified elevations will be used in calculating flood insurance premium rates for new buildings and their contents and for second layer coverage on existing buildings and their contents.

DATES: The effective dates for these modified base flood elevations are indicated on the following table and amend the Flood Insurance Rate Map(s) (FIRM) in effect for each listed community prior to this date.

ADDRESSES: The modified base flood elevations for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed on the following table.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of modified flood elevations for each community listed. These modified elevations have been published in newpaper(s) of local circulation and ninety (90) days have elapsed since that publication. The Associate Director, State and Local Programs and Support has resolved any appeals resulting from this notification.

Numerous changes made in the base (100-year) flood elevations on the Flood Insurance Rate Maps (FIRM) for each community make it administratively infeasible to publish in this notice all of the changes contained on the maps. However, this rule includes the address of the Chief Executive Officer of the community, where the modified base flood elevation determinations are available for inspection.

The modifications are made pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968, (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR Part 65.

For rating purposes, the revised community number is shown and must be used for all new policies and renewals.

The modified base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or to remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State or regional entities.

These modified base flood elevations shall be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer coverage on existing buildings and their contents.

The changes in the base flood elevations are in accordance with 44 CFR 65.4.

BILLING CODE 6718-03-M

44 CFR Part 65

[Docket No. FEMA-6520]

Identification and Mapping of Special Flood Hazard Areas; Changes in Special Flood Hazard Areas Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Interim rule.

SUMMARY: This rule lists those communities where modification of the base (100-year) flood elevations is appropriate because of new scientific or technical data. New flood insurance premium rates will be calculated from the modified base (100-year) elevations for new buildings and their contents and for second layer insurance on existing buildings and their contents.

DATES: These modified elevations are currently in effect and amend the Flood Insurance Rate Map (FIRM) in effect prior to this determination.

From the date of the second publication of notice of these changes in a prominent local newspaper, any person has ninety (90) days in which he can request through the community that the Associate Director, State and Local Programs and Support reconsider the changes. These modified elevations may be changed during the 90-day period.

ADDRESSES: The modified base (100-year) flood elevation determinations are available for inspection at the office of the Chief Executive Officer of the community, listed in the fifth column of the table. Send comments to that address also.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The numerous changes made in the base (100-year) flood elevations on the Flood Insurance Rate Map(s) make it administratively infeasible to publish in this notice all of the modified base (100-year) flood elevations contained on the map. However, this rule includes the address of the Chief Executive Officer of the community where the modified base (100-year) flood elevation determinations are available for inspection.

Any request for reconsideration must be based on knowledge of changed conditions, or new scientific or technical data.

These modifications are made pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR Part 65.4.

For rating purposes, the revised community number is listed and must be used for all new policies and renewals.

These base (100-year) flood elevations are the basis for the flood plain

management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time, enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities.

The changes in the base (100-year) flood elevations are in accordance with 44 CFR 65.4.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have significant economic impact on a substantial number of small entities. This rule provides routine legal notice of technical amendments made to designated special flood hazard areas on the basis of updated information and imposes no new requirements or regulations on participating communities.

BILLING CODE 6718-03-M

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are finalized for the communities listed below.

The base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, National Flood Insurance Program, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the **Federal Register** for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base (100-year) flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. No appeal was made during the 90-day period and the proposed base flood elevations have not been changed.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1170

[Ex Parte No. MC-161; Sub-No. 1]

Employee Protection—Motor Passenger Carriers

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: This document contains final rules that implement Section 27 of the Bus Regulatory Reform Act of 1982. Section 27 deals with reemployment rights of employees of motor passenger carriers who lose their jobs because of discontinuances or reductions of regular-route bus services. This proceeding was instituted by a notice of proposed rulemaking served on November 19, 1982, and published at 47 FR 53297 (November 24, 1982). The rules adopted establish procedures for determining the eligibility of individual employees for protection under the statute, and for publishing a periodic listing of jobs available with class I motor passenger carriers.

EFFECTIVE DATE: These rules will be effective June 23, 1983.

FOR FURTHER INFORMATION CONTACT:
Public Assistance Branch, (202) 275–7863
James L. Brown, (202) 275–7898
Howell I. Sporn, (202) 275–7691.

SUPPLEMENTARY INFORMATION: Section 27 of the Bus Regulatory Reform Act of 1982 ("Bus Act") gives certain preferential rights to those employees of motor passenger carriers who lose their jobs because of discontinuances or reductions in regular-route passenger services in both interstate and intrastate commerce. We proposed rules that would implement this section at 47 FR 53297, November 24, 1982. Section 27 requires a carrier, when it has a position available, to rehire its own laid off employees whose jobs were lost because of a termination or reduction of service authorized by the Bus Act. Section 27 also requires carriers to consider for hiring a person who had worked for any carrier and lost his or her job under the same circumstances. The Commission is required to gather and publish a list of jobs available with class I carriers. The Commission does not, however, have direct enforcement powers under the statute. Commission authority is limited to determining the eligibility of individual employees for protection and publishing a list of available jobs. The rules published on November 24 proposed to implement these responsibilities.

Comments on the proposed rules were filed by American Bus Association [ABA], Greyhound Lines, Inc., the Commission's Office of the Special Counsel, United Transportation Union [UTU], and WMA Interstate Motor Lines, Inc. For the most part, these parties supported the thrust and content of the proposed rules. Each, however, requested clarification of some provisions, and noted areas that needed additional spelling out of rights and obligations. The comments are discussed, in the context of each proposed rule, below.

The applications. We proposed that applications filed under these rules be subject to a $10 filing fee for each individual covered by the application. The Special Counsel and UTU question whether any filing fee is appropriate in these cases. The applicants will be unemployed individuals, to whom any filing fee—no matter how small—can be expected to be a significant economic burden. At the same time, the proposed $10 fee is too low to defray any significant portion of the Commission's processing costs.

We are persuaded that the filing fee should be deleted for these applications. The costs to the Commission of processing applications of this sort will be minimal in comparison with other cases within our jurisdiction. Unemployed individuals should be spared the burden of any minimal processing expenses.

For the same reasons, we will adopt the suggestion of the Special Counsel that applicants not be rquired to sent a copy of the application to any carrier other than the one with whom the applicant was formerly employed. The additional notification of other carriers with whom the individual is seeking employment does not provide enough benefit to balance the burden which would be imposed on the applicant. Other carriers have the duty only to consider eligible individuals for employment—not an obligation to give them priority in hiring—and the individual need only provide the carrier a copy of our certification of eligibility in order to inform the carrier of his or her eligibility. We have also simplified the rules to make it easier for individuals to file their own applications without legal representation.

The Special Counsel also suggested that our rules require that statements submitted in these cases be verified under oath. It argues that, in the absence of a verification requirement, the Commission may find that it is unable to resolve factual controversies where the individual and the carrier present conflicting versions of the circumstances surrounding the termination of the individual's employment. We are not persuaded that the burden which a verification requirement would impose on the individual applicants is warranted in these circumstances. Any potential factual dispute would be no less difficult to resolve simply because the statements had been verified. Accordingly, we will not adopt a verification rquirement. The Special Counsel desires that the Commission undertake special efforts to inform employees of passenger carriers of their rights under Section 27. We are

VOL 48 ISS 101 MY 24 1983 UMI

considering this suggestion, but note that such an undertaking does not require adoption of procedural rules.

The priority reemployment and consideration rights are, by the terms of the statute, valid only in the occupational specialty of the individual. Greyhound requests that the Commission's certifications of eligibility specify the occupational specialty covered, and ABA suggests that the individual's application be required to identify the occupational specialty.

Although it may develop that there is some ambiguity in the definition of various occupational specialties, we see merit in these suggestions and will incorporate them in the final rules. We do not intend, however, that minor technical discrepancies in the terminologies which might be used to describe an occupational specialty be construed against an individual. Descriptions which have substantially the same meaning are to be considered identical, regardless of the actual wording used.

Hiring from within. Greyhound and ABA question whether "hiring from within" a company is subject to the priority rights of eligible persons. They take the position that when a carrier hires and promotes from within its own employee ranks it is not "hiring additional employees" within the ambit of Section 27 of the Bus Act, and thus the carrier has no duty to consider eligible employees. They note that recall of furloughed employees is not subject to the priority rights, by the explicit terms of the statute. ABA suggests that we incorporate a provision in our regulations to exempt "hiring from within" from coverage of the law.

We agree with this position, but we do not think it necessary or practical to define "hiring additional employees" in the rules. If problems arise in the context of actual cases, we will decide them on a case-by-case basis or, if needed, develop standards or definitions.

Employee qualification. ABA asks whether an individual must remain "qualified" for the job he or she is seeking. It argues that an employer can lawfully require a driver seeking priority reemployment to prove he or she continues to be qualified for the position sought, and suggests the addition of a regulation to that effect. A carrier may, in good faith, require that an individual be currently qualified for a position sought, notwithstanding the priority to which he or she may otherwise be entitled. We do not, however, conclude that it is necessary to incorporate this concept specifically into our procedural rules. Certainly, it is not possible for us to determine the individual's qualifications (particularly for the entire time the determination may be valid). Rather, the carrier's own employment application procedures provide the most appropriate means for the applicant to show his or her conformity with legitimate job qualifications.

Term of eligibility. Several parties ask how long a determination of eligibility for protection is valid. Greyhound suggests a fixed one-year term, subject to a simplified renewal procedure. UTU asserts that an individual should not be required to file a new application each time he or she seeks and is denied reemployment. ABA argues that the priority rights afforded by the statute should terminate once the individual does, in fact, find employment within the individual's occupational specialty.

We conclude that ABA's position on this issue is correct. Once we determine that an individual is eligible for protection, that determination remains effective for as long as it takes for that individual to find reemployment or new employment in his or her occupational specialty (subject to the statutory expiration date of November 18, 1994). It is not intended that the individual file a separate application each time he or she applies for employment with a new carrier; the first determination of eligibility is valid for any number of job applications by that individual with any number of motor passenger carriers. Only when the individual finds reemployment in his or her occupational specialty may the eligibility be considered to be fulfilled and thus at an end. If the individual's new employment is later terminated, the individual could file a new application (if the new employment is with the same carrier and the other criteria for eligibility are again satisfied). In general, once the eligibility has been fulfilled, however, the statutory protection has been satisfied and the eligibility cannot be retained or renewed.

Decision timetable. Both the Special Counsel and UTU ask that our projected timetable for deciding eligibility applications (60 days to issue a decision in unopposed cases; 120 days in contested cases) be shortened. UTU suggests 30 days for an unopposed application and 60 days for a contested application. The Bus Act does not provide deadlines for Comission decisions of eligibility. Nevertheless, we are persuaded that our proposed timetable can be shortened. Accordingly, in the final rules we will provide 30 days for issuing decisions in unopposed cases and 60 days for issuing decisions in contested proceedings.

Selection criteria. UTU suggests that the Commission specify the selection procedure to be used by carriers among job applicants with the same priority eligibility. We find this suggestion to be an inappropriate intrusion into carrier management discretion. Should a pattern of difficulty actually arise in this area that warrants our intervention, we will consider it at that time.

Enforcement power. In our notice of proposed rulemaking, we stated that the statute does not give the Commission direct enforcement power in relation to the priority rights and duties. UTU complains that we are inappropriately trying to avoid enforcement of the statute. UTU argues that the law does not limit the Commission's enforcement power in this area and points to the Commission's power to protect rail employees as an example of a similar enforcement power.

UTU fails to describe the specific enforcement actions it wishes us to take. Clearly, our functions in determining individuals' eligibility are greatly different in scope from those we exercise in connection with railroads. The parallels between the abandonment of rail lines and the discontinuance of regular-route bus services is superficial in this context, because many—if not most—of the bus service reductions which may give rise to priority rights in affected employees will be accomplished by the carriers without the need for a decision by us to authorize such action. More importantly, legal remedies available through the courts provide greater relief for the aggrieved individual than we have the power to fashion, given the confines of our jurisdiction. In the absence of some clear suggestion of a proper and meaningful remedy which we have the power to grant, we are not prepared to undertake further consideration of enforcement powers at this time.

List of available jobs. We proposed that individuals with pending applications for determination of eligibility would receive free copies of the periodical list of available jobs. Special Counsel and UTU suggest that we include all individuals who have been found eligible for protection under the statute; the Special Counsel suggests free copies be sent for six months, while UTU does not indicate any time limitation. We find merit in these suggestions. We will enter a 6 month subscription to the periodical list for each person who has been found eligible for protection by a Commission decision. Upon request, the free six month subscription of an eligible person may be renewed.

Publication schedule. We proposed that the periodical list of available jobs be published on a monthly basis, with the due date for the filing of information by the carriers falling midway between the publication dates. WMA Interstate and ABA raised the concern that a monthly reporting requirement would create an unreasonable paperwork burden. The Special Counsel, on the other hand, argues that the job information which would be contained in a monthly publication would not be timely, since most job opportunities are likely to be filled before the periodical list can be published, no matter how frequently the publication may be scheduled.

Both of these positions have merit, and we will undertake to minimize the burdens of the reporting requirement and make the Commission more responsive to qualified employee needs. We will modify the proposed rules to allow carriers to transmit the job information either orally or in writing. Furthermore, if a carrier does not have any new job opening in a monthly period, it need not transmit a report to the regional office. Reporting will be greatly facilitated by making it a matter between the carrier and the appropriate regional offices of the Commission. The details of the reporting method can be arranged between each carrier and the regional offices so as to be as simple and convenient as possible. The regional offices will transmit the job information to headquarters for preparation of the monthly publication. We stress again that the submission of this information is required only of class I carriers, and creates no burden on smaller carriers.

The Special Counsel advocates that the Commission establish a toll-free telephone number to supply more current job availability information than can be published in the periodical list. We expect that the regional offices which are gathering the job listings will make this information available to interested persons in the regional offices or by telephone. The establishment of a toll-free service would exceed the Commission's available resources at this time. The Commission will monitor the use of the employee protection provisions and propose changes in our rules if they are required.

Energy and Environmental Considerations

This decision will not significantly affect the quality of the human environment or the conservation of energy resources.

Regulatory Flexibility Statement

The notice of proposed rulemaking certified that these rules would not have a significant economic impact on small business. No comments have been received concerning regulatory flexibility issues. We affirm our prior conclusions in this regard.

List of Subjects in 49 CFR Part 1170

Employment, Buses.

It is ordered:

Title 49 of the Code of Federal Regulations is amended by the addition of a new Part 1170 in the manner described in the appendix to this decision.

This decision is issued pursuant to 49 U.S.C. 10321, 5 U.S.C. 553, and Pub. L. 97-261, section 27.

Decided: May 13, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

Appendix

Title 49 of the Code of Federal Regulations is amended by adding a new Part 1170, to read as follows:

PART 1170—RULES GOVERNING EMPLOYEE PROTECTION FOR MOTOR PASSENGER CARRIERS

Subpart A—Determination of Eligibility

Sec.

1170.1 General provisions.
1170.2 Filing an application.
1170.3 Contesting the application.
1170.4 Replies and motions.
1170.5 Commission action.
1170.6 Appeals.
1170.7 Miscellaneous.

Subpart B—Lists of Available Jobs

1170.11 Filing of information.
1170.12 Publication of list.

Authority: 49 U.S.C. 10321, 5 U.S.C. 553, and Pub. L. 97-261 § 27.

Subpart A—Determination of Eligibility

§ 1170.1 General provisions.

Section 27 of the Bus Regulatory Reform Act of 1982 is designed to protect employees of bus companies who lose their jobs because of reduction or discontinuance of regular-route bus service. These rules govern applications under Section 27 by individuals seeking a determination of eligibility for protection. To be eligible for protection in the form of priority in seeking reemployment, the individual must establish that he or she worked for a bus company on or before September 20, 1980, and was fired after September 20, 1982, because of a reduction or discontinuance of regular-route bus operations. Furloughed employees who have a right of recall by their employer are not eligible for this protection.

§ 1170.2 Filing an application.

(a) There is no application form. The application may be in the form of a letter or other written statement, typed or written legibly in dark ink.

(b) The top of the first page of the application, should state: "Bus Employment Protection Application".

(c) The application shall include all the evidence upon which the individual intends to rely. (Note: the former employer has the right to contest the facts which are set forth in the application.) The application must, at least, include the following information:

(1) The name and address of the individual;

(2) The name of the motor passenger carrier by whom the individual was employed (giving the carrier's full name and "MC" number, if known);

(3) The dates on which the individual's employment with that carrier began and terminated;

(4) The reasons for the termination;

(5) The specific discontinuance or reduction of regular-route service which caused the termination of employment;

(6) The occupational specialty of the individual; and

(7) The name(s) and address(es) of the applicant's representative(s) (if any), to whom opposition statements and the Commission's decision should be sent.

(d) A copy of the application must be sent to the carrier by whom the individual was employed. Every effort must be made to ensure that the carrier receives this copy at the same time as the application is filed with the Commission. The application shall state that the copy was sent, and the date and manner in which it was sent.

(e) The original and one copy of the application shall be sent to the Interstate Commerce Commission, Office of the Secretary, Washington, DC 20423. The lower left corner of the envelope should state: "Bus Employment Protection Application:", followed by the full name of the applicant. (If the application is made on behalf of more than one individual, list only the name of the first individual, and indicate the number of others.)

(f) An applicant must notify the Commission promptly of any change in his or her address.

VOL
48
ISS
101
MAY
24
1983
UMI

§ 1170.3 Contesting the application.

(a) Any interested party may contest the application by filing a letter or other written statement within 20 days after the application is filed.

(b) A letter or statement contesting an application shall include all the evidence upon which the party contesting the application intends to rely. Evidence must be submitted to show that discontinuance or reduction in service was not a contributing factor causing termination of the applicant's employment, and/or that the applicant or the circumstances are not covered by the statutory criteria.

(c) At the end of the letter or statement, the following must appear:

(1) The name(s) and address(es) of the contesting party or his representative(s) (if any); and

(2) A statement that a copy of the letter or statement has been sent, and the date and means by which it was sent, to the applicant (and to the applicant's representative, if any).

(d) Every effort must be made to ensure that the applicant and/or his representative receives this copy at the same time as the letter or statement is filed with the Commission.

(e) The original and one copy of the letter or statement shall be sent to the Interstate Commerce Commission, Office of the Secretary, Washington, DC 20423. The lower left corner of the envelope, should state: "Bus Employment Protection Opposition:", followed by the full name of the applicant. (If the application was made on behalf of more than one individual, list only the name of the first individual, and indicate the number of others.)

§ 1170.4 Replies and motions.

(a) Applicant may reply to any letter or statement contesting the application within 15 days after the contesting letter or statement is filed. At the end of the reply, applicant must state that a copy of the reply has been sent or delivered to the party contesting the application.

(b) If a party wishes to file a motion relating to any other pleading, the motion must be filed within 15 days after the filing date of the pleading toward which the motion is directed.

§ 1170.5 Commission action.

(a) If no letters or statements are filed contesting the application, service of a decision may be expected within 30 days after the application is filed.

(b) If any interested person files a letter or statement contesting the application, service of a decision may be expected within 60 days after the application is filed.

§ 1170.6 Appeals.

Appeals are governed by 49 CFR 1115.2. Information on appellate procedures can also be obtained from Commission regional and field offices.

§ 1170.7 Miscellaneous.

(a) If an applicant wishes to withdraw an application, of if a person contesting an application wishes to withdraw the opposition, such a request shall be made in writing. The request shall be directed to the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423, and shall identify the full name of the applicant.

(b) When a person wishes to contact another party or serve a pleading on that party, it shall do so through the party's representative (if any).

(c) All pleadings filed with the Commission shall include an original and one copy.

Subpart B—List of Available Jobs

§ 1170.11 Filing of information.

(a) Each carrier having annual gross revenues from operations as a motor common carrier of passengers in excess of $3,000,000 shall supply orally or in writing to any regional office of the Commission, a monthly list of jobs it has available. If a carrier has no new job openings in a monthly reporting period, the carrier is not required to transmit a report.

(b) The list must include a job description and identify the job location and the required skills, for each available position.

(c) The list may also be submitted voluntarily by any other motor common carrier of passengers.

§ 1170.12 Publication of list.

The Commission will publish a comprehensive list of available jobs and related information based on the data supplied each month by the carriers.

(a) Information about the published list and updated information on job vacancies will be available at each Commission field and regional office by telephone or personal visit.

(b) A copy of the published list will be mailed to each individual who has a pending application for determination of eligibility for protection. A copy of the list will also be sent directly to each individual who has been found eligible, for a six month period following the Commission's determination of that individual's eligiblity subject to renewal upon the request of the qualified individual.

(c) Additional copies of the published list will be available by paid subscription.

BILLING CODE 7035-01-M

Proposed Rules

Federal Register
Vol. 48, No. 101
Tuesday, May 24, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

GENERAL ACCOUNTING OFFICE

DEPARTMENT OF JUSTICE

4 CFR Parts 101, 102, 103, 104 and 105

[Order No. 1014-83]

Federal Claims Collection

AGENCIES: General Accounting Office; and Department of Justice.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the Federal Claims Collection Standards issued jointly by the Department of Justice and the General Accounting Office to reflect changes to the fundamental claims collection authority made by the Debt Collection Act of 1982 (Pub. L. 97-365), which was enacted on October 25, 1982. The proposed amendment also makes a number of technical changes made necessary because of the recent codification of a number of laws, including the former Federal Claims Collection Act into title 31, U.S.C.

It is therefore necessary to amend the existing Federal Claims Collection Standards in order to reflect the changes made by the Debt Collection Act of 1982, and to offer guidance on the meaning of some ambiguous provisions of the Act.

DATE: Comments must be received by July 25, 1983.

ADDRESS: U.S. General Accounting Office, Office of General Counsel, Associated General Counsel Rollee Efros, Room 7041, 441 G Street, N.W., Washington, D.C. 20548.

FOR FURTHER INFORMATION CONTACT: Chris Farley, Jr., U.S. General Accounting Office, Accounting and Financial Management Division, Claims Group, (202) 275-8145.

SUPPLEMENTARY INFORMATION: Public Law 97-365, the Debt Collection Act of 1982, was enacted on October 25, 1982. As its legislative history indicates, its primary purpose was to enhance the capability of Federal agencies to collect money or property owed to them by persons as a result of their participation in Federal programs or activities. To this end, Federal agencies were given new or broader authorities to collect debts by administrative offset; by offset against the salary of Federal employees; by encouraging the use of credit bureaus; by specifically authorizing agencies to contract for commercial collection services; and to assess interest, processing and handling costs, and penalty charges, under specified conditions. At the same time, the Act provided a number of new procedures and safeguards, designed to assure that alleged debtors will be provided appropriate due process protections if they dispute the merits of the debt or the amount or terms for its collection.

While the primary responsibility for promulgating detailed implementing regulations lies with each individual Federal agency, their regulations must be consistent with the Federal Claims Collection Standards published jointly by the General Accounting Office and the Department of Justice. It is therefore necessary to amend the existing Federal Claims Collection Standards in order to reflect the changes made by the Debt Collection Act of 1982, and to offer guidance on the meaning of some ambiguous provisions of the Act.

While we are not proposing amendments to all of the Standards at this time but only to those necessary to implement Pub. L. 97-365, we shall consider comments received regarding any of the Standards, whether new, amended or unchanged. The principal changes are as follows:

Collection by Administrative Offset

The term "administrative offset" is defined in the Debt Collection Act as "the withholding of money payable by the United States to or held by the United States on behalf of a person to satisfy a debt owed to the United States by that person." While administrative offset has always been a useful debt collection tool for agencies, exercised by virtue of a common law right to offset debts which is reflected in existing regulations, the new act provides specific procedures which must be followed when exercising this right, to ensure due process protections for the debtor. The procedures, however, do not apply when the debtor is a Federal, State, or local government agency since the Act defines the term "person" as excluding such entities. Finally, the Act permits collection of a claim by administrative offset for a period up to 10 years, even though the 6-year statute of limitations for bringing an action on the claim has expired.

All these new procedures are set forth for guidance of the individual Federal agencies who are required by the Act to issue their own regulations, consistent with these Standards, before attempting to collect claims by administrative offset against persons.

Collection of debts by offset against the current salary of Federal employees is beyond the scope of these Standards. Agencies should be aware that regulations dealing with salary offset under 5 U.S.C. 5514(a) must be approved by the Office of Personnel Management. See 5 U.S.C. 5514(b)(1) and Executive Order 11609, 3 U.S.C. 301 note.

Contracting for Collection Services

While § 102.6 closely follows the requirements of the Act, preliminary questions from some agencies indicated a degree of confusion about whether use of commercial collection organizations to collect debts was authorized, in the absence of specific authority in advance in an appropriation act. This section interprets section 13 of the Act as restricting only the use of contingency fee arrangements in collection contracts with such organizations in the absence of authority in an appropriation act. The authority is necessary to exempt the agency from the requirements of 31 U.S.C. 3302, which would otherwise require all receipts collected from debtors to be deposited, without deductions of any kind, in the miscellaneoous receipts account of the Treasury.

Limitation on Agency Compromise Authority

The law requires that claims which exceed $20,000 can only be compromised by the Department of Justice. This requirement has been interpreted quite literally for many years by Federal agencies, in a manner that serves no useful purpose under the law. The Department of Justice points out that regardless of the overall amount of the claim, if the debtor has offered a sum in compromise that brings the total

VOL
48
ISS
1
01
MY
24
1983
UMI

amount still in dispute well below the $20,000 ceiling, referral to the Department of Justice seems completely unnecessary. Section 103.1 reflects this view.

Referrals to Department of Justice or GAO

Section 105.1—In the interest of expediting the collection of claims through litigation, this section makes it clear that prior referral to the General Accounting Office is required only when the claim arose from an audit exception taken by the GAO to an agency expenditure, or when the merits of the claim, the amount owed, or the propriety of accepting a proposed compromise, suspension, or termination of a claim is in doubt.

The existing regulations require referral of uncollectible claims to GAO, unless GAO grants an exception. GAO has liberally authorized exceptions in recent years, and the routine referral of uncollectible claims to GAO has decreased considerably as GAO has worked with the agencies to facilitate direct referrals to the Department of Justice. The proposed regulation recognizes this trend and, with the two exceptions noted, eliminates the requirement for routine referral to GAO. The proposed regulation also instructs agencies to use the "Claims Collection Litigation Report" developed by the Department of Justice and recently distributed to all Federal agencies.

This proposed amendment is not a "major rule" as defined in Executive Order 12291 dated February 17, 1981, because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with Foreign-based enterprises in domestic or export markets.

The Attorney General certifies that this regulation will not have a significant economic impact on a substantial number of small entities, including small business, small organizational units and small governmental jurisdictions.

List of Subjects

4 CFR Part 101

Antitrust, Claims, Fraud, General Accounting Office, Taxes.

4 CFR Part 102

Administrative practice and procedure, Claims, Military personnel, Penalties, Privacy.

4 CFR Part 103

Claims.

4 CFR Part 104

Claims.

4 CFR Part 105

Claims.

Accordingly, we propose to revise 4 CFR Parts 101–105 as follows:

PART 101—SCOPE OF STANDARDS

Sec.

101.1 Prescription of standards.
101.2 Omissions not a defense.
101.3 Fraud, antitrust, and tax claims excluded.
101.4 Compromise, waiver, or disposition under other statutes not precluded.
101.5 Conversion claims.
101.6 Subdivision of claims not authorized.
101.7 Required administrative proceedings.
101.8 Referral of litigation.

Authority: 31 U.S.C. 3711

§ 101.1 Prescription of standards.

The regulations in this chapter, issued jointly by the Comptroller General of the United States and the Attorney General of the United States under 31 U.S.C. 3711(e)(2), prescribe standards for the administrative collection, compromise, termination of agency collection, and the referral to the General Accounting Office, and to the Department of Justice for litigation, of civil claims as defined by 31 U.S.C. 3701(b), by the Federal Government for money or property. Additional guidance is contained in Title 4 of the General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies. Regulations prescribed by the head of an agency pursuant to 31 U.S.C. 3711(e)(1) will be reviewed by the General Accounting Office as part of its audit of the agency's activities.

§ 101.2 Omissions not a defense.

The standards set forth in this chapter shall apply to the administrative handling of civil claims of the Federal Government for money or property but the failure of an agency to comply with any provision of this chapter shall not be available as a defense to any debtor.

§ 101.3 Fraud, antitrust, and tax claims excluded.

The standards set forth in this chapter do not apply to the handling of any claim as to which there is an indication of fraud, the presentation of a false claim, or misrepresentation on the part of the debtor or any other party having an interest in the claim, or to any claim based in whole or in part on conduct in violation of the antitrust laws. Only the Department of Justice has authority to compromise or terminate collection action on such claims. However, matters submitted to the Department of Justice for consideration without compliance with the regulations in this chapter because there is an indication of fraud, the presentation of a false claim, or misrepresentation on the part of the debtor or any other party having an interest in the claim, may be returned to the agency forwarding them for further handling in accordance with the regulations in this chapter if it is determined that action based upon the alleged fraud, false claim, or misrepresentation is not warranted. Tax claims, as to which differing exemptions, administrative considerations, enforcement considerations, and statutes apply, are also excluded from the coverage of this chapter.

§ 101.4 Compromise, waiver, or disposition under other statutes not precluded.

Nothing contained in this chapter is intended to preclude agency disposition of any claim under statutes other than subchapter II of chapter 37 of Title 31 of the United States Code, providing for the compromise, termination of collection action, or waiver in whole or in part of such a claim. See, *e.g.*, "The Federal Medical Care Recovery Act," 76 Stat. 593, 42 U.S.C. 2651 *et seq.*, and applicable regulations, 28 CFR 43.1 *et seq.* The standards set forth in this chapter should be followed in the disposition of civil claims by the Federal Government by compromise or termination of collection action (other than by waiver pursuant to statutory authority) under statutes other than subchapter II of chapter 37 of Title 31 of the United States Code, to the extent such other statutes or authorized regulations issued pursuant thereto do not establish standards governing such matters.

§ 101.5 Conversion claims.

The instructions contained in this chapter are directed primarily to the recovery of money on behalf of the Government and the circumstances in which Government claims may be disposed of for less than the full amount claimed. Nothing contained in this chapter is intended, however, to deter an agency from demanding the return of specific property or from demanding, in the alternative, either the return of property or the payment of its value.

§ 101.6 Subdivision of claims not authorized.

Claims may not be subdivided to avoid the monetary ceiling established by 31 U.S.C. 3711(a)(2). A debtor's liability arising from a particular transaction or contract shall be considered a single claim in determining whether the claim is one of less than $20,000, exclusive of interest, penalties, and administrative costs, for purposes of suspension or termination of collection action (§ 104.1 of this chapter), or in determining the applicability of the $20,000 limit with respect to compromise (§ 103.1 of this chapter).

§ 101.7 Required administrative proceedings.

Nothing contained in this chapter is intended to require an agency to omit or foreclose administrative proceedings required by contract or by law.

§ 101.8 Referral for litigation.

As used in this chapter, "referral for litigation" means referral to the Department of Justice for appropriate legal proceedings, unless the agency concerned has statutory authority for handling its own litigation.

PART 102—STANDARDS FOR THE ADMINISTRATIVE COLLECTION OF CLAIMS

Sec.

102.1 Aggressive agency collection action.
102.2 Demand for payment.
102.3 Collection by administrative offset.
102.4 Administrative offset against amounts payable from Civil Service Retirement and Disability Fund and similar funds.
102.5 Use of consumer reporting agencies.
102.6 Contracting for collection services.
102.7 Personal interview with debtor.
102.8 Contact with debtor's employing agency.
102.9 Suspension or revocation of license or eligibility.
102.10 Liquidation of collateral.
102.11 Collection in installments.
102.12 Exploration of compromise.
102.13 Interest, penalties, and administrative costs.
102.14 Analysis of costs.
102.15 Documentation of administrative collection action.
102.16 Automation.
102.17 Prevention of overpayments, delinquencies, and defaults.
102.18 Use and disclosure of mailing addresses.
102.19 Exemptions.
102.20 Additional administrative collection action.

Authority: Subchapter II of chapter 37 of Title 31, United States Code.

§ 102.1 Aggressive agency collection action.

(a) The head of an agency or his designee shall take aggressive action, on a timely basis with effective followup, to collect all claims of the United States for money or property arising out of the activities of, or referred to, his agency in accordance with the standards set forth in this chapter. However, nothing contained in this chapter is intended to require the General Accounting Office or the Department of Justice to duplicate collection actions previously undertaken by any other agency, or to perform collection actions which should have been undertaken by any other agency in accordance with the standards set forth in this chapter.

(b) All agencies are expected to cooperate with one another in their debt collection activities.

§ 102.2 Demand for payment.

(a) Appropriate written demands shall be made upon a debtor of the United States in terms which inform the debtor of the consequences of his failure to cooperate. Three progressively stronger written demands at not more than 30-day intervals will normally be made unless a response to the first or second demand indicates that further demand would be futile and the debtor's response does not require rebuttal. However, in determining the timing of demand letters, agencies should give due regard to the need to act promptly so that ordinarily referrals to the Department of Justice for litigation are made within 6 months of the agency's final determination of the fact and the amount of the debt. Written demand may be waived where necessary to protect the Government's interests (for example, to prevent the statute of limitations, 28 U.S.C. 2415, from expiring).

(b) The initial notification should inform the debtor of (1) the basis for the indebtedness, (2) the applicable requirements for assessing interest, administrative costs, and penalties (§ 102.13), and (3) the date by which payment is to be made, which normally should be not more than 30 days from the date of the initial notification. Apart from this, there is no prescribed format for the demand letters. Agencies should utilize demand letters and demand procedures that will lead to the earliest practicable determination of whether the debt can be resolved administratively or must be referred for legal action. As appropriate to the circumstances, agencies may consider including, either in the initial letter or in subsequent letters, such items as the agency's willingness to discuss alternative methods of payment, policies with respect to use of consumer reporting agencies (§ 102.5) and collection services (§ 102.6), the agency's intentions with respect to referral of the debt to the Department of Justice for litigation and, depending on agency policy and legal requirements, the debtor's entitlement to consideration of waiver.

(c) Agencies should respond promptly to communications from the debtor, and should advise debtors who dispute the debt to furnish available evidence to support their contentions.

(d) If an agency determines, either prior to the initiation of or during the demand cycle, that collection by offset is feasible, then the procedures specified in § 102.3 or § 102.4, as applicable, should be followed.

§ 102.3 Collection by administrative offset.

(a) Collection by administrative offset will be undertaken in accordance with these standards and implementing regulations established by the head of each agency on claims which are liquidated or certain in amount in every instance in which this is feasible and not otherwise prohibited. For purposes of this section, the term "administrative offset" has the meaning provided in 31 U.S.C. 3701(a)(1).

(b) When collecting debts by administrative offset under the authority of 31 U.S.C. 3716, the standards in this paragraph shall apply.

(1) Agencies shall prescribe regulations for the exercise of administrative offset.

(2) At a minimum, agency regulations shall establish procedures for providing a debtor, before the offset is made, with full due process rights prescribed by 31 U.S.C. 3716, including: written notice of the nature and amount of the debt and the agency's intention to collect by offset; opportunity to inspect and copy agency records pertaining to the debt; opportunity to obtain review within the agency of the determination of indebtedness; and opportunity to enter into a written agreement with the agency to repay the debt.

(3) Agencies may not inititate administrative offset to collect a debt under this subsection more than 10 years after the Government's right to collect the debt first accrued, unless facts material to the Government's right to collect the debt were not known and could not reasonably have been known by the official or officials of the Government who were charged with the responsibility to discover and collect such debts.

(4) The procedures set forth in this paragraph do not apply to debts owed by agencies of the United States or by any State or local government, nor do

VOL
48
ISS
1
01
MAY
24
1983
UMI

they apply in any case in which collection of the type of debt involved by administrative offset is explicitly provided for or prohibited by another statute.

(c) When collecting debts by offset under any other statutory authority, agencies shall provide to the debtor such notice and opportunity to be heard as are prescribed in the governing statute or in regulations implementing that statute.

(d) Appropriate use should be made of the cooperative efforts of other agencies in effecting collections by offset, including use of the Army Holdup List.

(e) Collection by offset against a judgment obtained by the debtor against the United States shall be accomplished in accordance with 31 U.S.C. 3728.

(f) Whenever the agency holding the debt is not the agency which is responsible for making the payment against which administrative offset is sought the latter agency shall not initiate the requested administrative offset until it has been provided by the agency holding the debt with an appropriate written certification that the debtor owes a debt (including the amount and basis of the debt and the date on which payment is or was due) and that the provisions of this section have been fully complied with.

§ 102.4 Administrative offset against amounts payable from Civil Service Retirement and Disability Fund, and similar funds.

(a) Unless otherwise prohibited by law, agencies may request that moneys which are due and payable to a debtor from the Civil Service Retirement and Disability Fund, or other similar funds, be administratively offset in reasonable amounts in order to collect debts owed to the United States by that debtor. Such requests shall be made to the appropriate officials of the Office of Personnel Management, or of other administering agencies as appropriate.

(b) When making a request for administrative offset under paragraph (a) of this section, an agency shall include a written certification that:

(1) The debtor owes the United States a debt, including the amount and basis of the debt, and the date on which payment is or was due;

(2) The requesting agency has complied with the applicable statutes, regulations, and procedures of the agency that administers the fund or program against which administrative offset is sought;

(3) The requesting agency has complied with the requirements of § 102.3 of this chapter; and

(4) If the debtor requested waiver or review of the indebtedness, the requesting agency has accorded him a reasonable opportunity for a pre-offset hearing in accordance with this section.

(c) Agencies shall accord the debtor a reasonable opportunity for a pre-offset oral hearing when (1) the debtor requests waiver of the indebtedness and the waiver determination turns on an issue of credibility or veracity, or (2) the debtor requests reconsideration of the debt and the head of the agency or his designee determines that the question of the indebtedness cannot be resolved by review of the documentary evidence, for example, when the validity of the debt turns on an issue of credibility or veracity.

(d) Paragraph (c) of this section does not require pre-offset oral hearings with respect to debt collection systems in which determinations of indebtedness or waiver rarely involve issues of credibility or veracity and where the agency has determined that review of the written record is ordinarily an adequate means to correct prior mistakes. In administering such a system, the agency is not required to sift through all of the requests received in order to accord oral hearings in those few cases which may involve issues of credibility or veracity.

(e) In cases where a pre-offset oral hearing is not required, the agency shall nevertheless accord the debtor a "pre-offset paper hearing," that is, the agency will make its determination on the request for waiver or reconsideration based upon a review of the written record.

(f) This section does not require or authorize the Office of Personnel Management, or other administering agency, to review the merits of the requesting agency's determination with respect to the amount and validity of the debt or the determination to provide or not provide a pre-offset oral hearing.

§ 102.5 Use of consumer reporting agencies.

(a) Agencies shall develop and implement procedures for reporting delinquent debts to consumer reporting agencies. For purposes of this section:

(1) The term "consumer reporting agency" has the meaning provided in 31 U.S.C. 3701(a)(3); and,

(2) A debt is considered delinquent if it has not been paid by the date specified in the agency's initial written notification (§ 102.2), unless satisfactory payment arrangements have been made by that date, or if, at any time thereafter, the debtor fails to satisfy his obligations under a payment agreement with the creditor agency.

(b) In developing procedures under paragraph (a) of this section, agencies must have due regard for compliance with the Privacy Act of 1974, as amended, 5 U.S.C. 552a. However, consumer reporting agencies themselves are not subject to the privacy Act.

(c) Agency procedures developed under paragraph (a) of this section shall be consistent with the requirements of 31 U.S.C. 3711(f).

§ 102.6 Contracting for collection services.

(a) All agencies have authority to contract for collection services, provided that the following conditions are satisfied:

(1) The authority to resolve disputes, compromise claims, terminate collection action, and refer the matter for litigation (§ 105.1) must be retained by the agency;

(2) The contractor shall be subject to the Privacy Act of 1974, as amended, to the extent specified in 5 U.S.C. 552a(m), and to applicable Federal and State laws and regulations pertaining to debt collection practices, such as the Fair Debt Collection Practices Act, 15 U.S.C. 1692; and

(3) The contractor must be required to account strictly for all amounts collected.

(b) If and to the extent provided in advance in appropriation acts, agencies may include, as part of a collection service contract, a provision permitting the contractor to deduct his fee from amounts collected under the contract. The fee may be based on a percentage of the amount collected, consistent with prevailing commercial practice. If an agency has not received advance authority in its appropriation act or other legislation, then, unless otherwise specifically provided by law, it must deposit all amounts recovered under collection service contracts (or by agency employees on behalf of the agency) in the Treasury as miscellaneous receipts, pursuant to 31 U.S.C. 3302, and may pay for collection service contracts only by using available agency appropriations.

§ 102.7 Personal interview with debtor.

Agencies will undertake personal interviews with their debtors when this is feasible, having regard for the amounts involved and the proximity of agency representatives to such debtors.

§ 102.8 Contact with debtor's employing agency.

When a debtor is employed by the Federal Government or is a member of the military establishment or the Coast Guard, and collection by offset cannot be accomplished in accordance with 5 U.S.C. 5514, the employing agency will be contacted for the purpose of arranging with the debtor for payment of the indebtedness by allotment or otherwise in accordance with section 206 of Executive Order 11222 of May 8, 1965, 30 FR 6469.

§ 102.9 Suspension or revocation of license or eligibility.

Agencies seeking the collection of statutory penalties, forfeitures, or debts provided for as an enforcement aid or for compelling compliance will give serious consideration to the suspension or revocation of licenses or other privileges for any inexcusable, prolonged or repeated failure of a debtor to pay such a claim and the debtor will be so advised. Any agency making, guaranteeing, insuring, acquiring, or participating in loans will give serious consideration to suspending or disqualifying any lender, contractor, broker, borrower or other debtor from doing further business with it or engaging in programs sponsored by it if such a debtor fails to pay its debts to the Government within a reasonable time and the debtor will be so advised. The failure of any surety to honor its obligations in accordance with 31 U.S.C. 9305 is to be reported to the Treasury Department at once. Notification that a surety's certificate of authority to do business with the Federal Government has been revoked or forfeited by the Treasury Department will be forwarded by that Department to all interested agencies.

§ 102.10 Liquidation of collateral.

An agency holding security or collateral which may be liquidated and the proceeds applied on debts due it through the exercise of a power of sale in the security instrument or a nonjudicial foreclosure should do so by such procedures if the debtor fails to pay his debt within a reasonable time after demand, unless the cost of disposing of the collateral will be disproportionate to its value or special circumstances require judicial foreclosure. Collection from other sources, including liquidation of security or collateral, is not a prerequisite to requiring payment by a surety or insurance concern unless such action is expressly required by statute or contract.

§ 102.11 Collection in installments.

Claims, with interest in accordance with § 102.13, should be collected in full in one lump sum whenever this is possible. However, if the debtor is financially unable to pay the indebtedness in one lump sum, payment may be accepted in regular installments. The size and frequency of such installment payments should bear a reasonable relation to the size of the debt and the debtor's ability to pay. If possible, the installment payments should be sufficient in size and frequency to liquidate the Government's claim in not more than 3 years. Installment payments of less than $25 per month should be accepted in only the most unusual circumstances. An agency holding an unsecured claim for administrative collection should attempt to obtain an executed confess-judgment note, comparable to the Department of Justice form USA-70a, from a debtor when the total amount of the deferred installments will exceed $750. Such notes may be sought when an unsecured obligation of a lesser amount is involved. Security for deferred payments, other than a confess-judgment note, may be accepted in appropriate cases. An agency may accept installment payments notwithstanding the refusal of a debtor to execute a confess-judgment note or to give other security, at the agency's option.

§ 102.12 Exploration of compromise.

Agencies will attempt to effect compromise (preferably during the course of personal interviews), in accordance with the standards set forth in Part 103 of this chapter in all cases in which it can be ascertained that the debtor's financial ability will not permit payment of the claim in full, or in which the litigative risks or the costs of litigation dictate such action.

§ 102.13 Interest, penalties, and administrative costs.

(a) Except as provided in paragraph (h) of this section, agencies shall assess interest, penalties, and administrative costs on debts being collected under this chapter. Before assessing these charges, an agency must mail or hand-deliver a written notice to the debtor explaining the agency's requirements concerning the charges (§ 102.2).

(b) Interest shall accrue from the date on which notice of the debt and the interest requirements is first mailed or hand-delivered to the debtor (on or after October 25, 1982), using the most current address that is available to the agency. If an agency uses an "advance billing" procedure—that is, if it mails a bill before the debt is actually owned—it can include the required interest notification in the advance billing, but interest may not start to accrue before the debt is actually owed.

(c) The rate of interest assessed shall be the rate of the current value of funds to the United States Treasury (*i.e.*, the Treasury tax and loan account rate), as prescribed and published by the Secretary of the Treasury in the **Federal Register** and the Treasury Fiscal Requirements Manual Bulletins annually or quarterly, in accordance with 31 U.S.C. 3717. An agency may assess a higher rate of interest if it reasonably determines that a higher rate is neccessary to protect the interests of the United States. The rate of interest, as initially assessed, shall remain fixed for the duration of the indebtedness, except that where a debtor has defaulted on a repayment agreement and seeks to enter into a new agreement, the agency may set a new interest rate which reflects the current value of funds to the Treasury at the time the new agreement is executed. Interest should not be assessed on interest, penalties, or administrative costs required by this section. However, if the debtor defaults on a previous repayment agreement, charges which accrued but were not collected under the defaulted agreement shall be added to the principal to be paid under a new repayment agreement.

(d) An agency shall assess against a debtor charges to cover administrative costs incurred as a result of a delinquent debt—that is, the additional costs incurred in processing and handling the debt because it became delinquent. For purposes of this paragraph, the term "delinquent" has the same meaning as provided in § 102.5(a)(2). Calculation of administrative costs should be based upon actual costs incurred or upon cost analyses establishing an average of actual additional costs incurred by the agency in processing and handling claims against other debtors in similar stages of delinquency.

(e) An agency shall assess a penalty charge, not to exceed 6 percent a year, on any portion of a debt that is delinquent, as defined in § 102.5(a)(2), for more than 90 days.

(f) When a debt is paid in partial or installment payments, amounts received by the agency shall be applied first to outstanding penalty and administrative cost charges, second to accrued interest, and third to outstanding principal.

(g) An agency shall waive the collection of interest if the debt is paid within 30 days after the date on which interest began to accrue. An agency may extend this 30-day period, on a case-by-case basis, if it reasonably determines that such action is appropriate. Also, an agency may waive the collection of interest, penalties, and administrative costs assessed under this section under the criteria specified in Part 103 of this chapter relating to the compromise of

VOL 48 ISS 101 MAY 24 1983 UMI

claims (without regard to the amount of the debt), or if the agency determines that collection of these charges would be against equity and good conscience or not in the best interests of the United States. Waiver under the first sentence of this paragraph is mandatory. Under the second and third sentences, it may be exercised only in accordance with regulations issued by the agency identifying the standards and appropriate circumstances for waiver.

(h) Interest, penalty, and administrative cost charges under this section shall not apply:

(1) To debts owed by any agency of the United States or of any State or local government;

(2) To debts arising under contracts which were executed prior to, and were in effect on, October 25, 1982; and

(3) To debts where an applicable statue, a regulation required by statute, a loan agreement, or a contract, either prohibits such charges or explicitly fixes the charges that apply to the debts involved.

§ 102.14 Analysis of costs.

Agency collection procedures should provide for periodic comparison of costs incurred and amounts collected. Data on costs and corresponding recovery rates for debts of different types and in various dollar ranges should be used to compare the cost effectiveness of alternative collection techniques, establish guidelines with respect to the points at which costs of further collection efforts are likely to exceed recoveries, assist in evaluating offers in compromise, and establish minimum debt amounts below which collection efforts need not be taken. Cost and recovery data should also be useful in justifying adequate resources for an effective collection program, and in determining appropriate charges for administrative costs under § 102.13(d)

§ 102.15 Documentation of administratvie collection action.

All administrative collection action shall be documented and the bases for compromise, or for termination or suspension of collection action, should be set out in detail. Such documentation shall be retained in the appropriate claims file.

§ 102.16 Automation.

Agencies should automate their debt collection operations to the extent it is cost effective and feasible.

§ 102.17 Prevention of overpayments, delinquencies, and defaults.

Agencies should establish procedures to identify the causes of overpayments, delinquencies, and defaults and the corrective actions needed.

§ 102.18 Use and disclosure of mailing addresses.

(a) When attempting to locate a debtor in order to collect or compromise a debt under this chapter, and agency may send a written request to the Secretary of the Treasury or his designee in order to obtain a debtor's mailing address from the records of the Internal Revenue Service.

(b) An agency may disclose a mailing address obtained under subsection (a) of this section to other agents, including collection service contractors, in order to facilitate the collection or compromise of debts under this chapter, except that a mailing address may be disclosed to a consumer reporting agency only for the limited purpose of obtaining a commercial credit report on the particular taxpayer.

(c) Each agency shall ensure, by appropriate regulations and contract administration, that the agency and its agents, including consumer reporting agencies and collection service contractors, comply with the provisions of 26 U.S.C. 6103(p)(4) and applicable regulations of the Internal Revenue Service.

§ 102.19 Exemptions.

(a) The preceding sections of this Part, to the extent they reflect authority newly granted by Pub. L. 97–365, such as administrative offset (§ 102.3), use of consumer reporting agencies (§ 102.5), contracting for collection services (§ 102.6), and interest, penalties, and administrative costs (§ 102.13), do not apply to claims or debts arising under the Internal Revenue Code of 1954 as amended (26 U.S.C. 1 *et seq.*), the Social Security Act (42 U.S.C. 301 *et seq.*), or the tariff laws of the United States.

(b) This section should not be construed as prohibiting use of these authorities or requirements when collecting debts owed by persons employed by agencies administering the laws cited in the preceding paragraph unless the debt "arose under" those laws.

§ 102.20 Additional administrative collection action.

Nothing contained in this chapter is intended to preclude the utilization of any other administrative remedy which may be available.

PART 103—STANDARDS FOR THE COMPROMISE OF CLAIMS

Sec.
103.1 Scope and application.
103.2 Inability to pay.
103.3 Litigative probabilities.
103.4 Cost of collecting claim.
103.5 Enforcement policy.
103.6 Joint and several liability.
103.7 Settlement for a combination of reasons.
103.8 Further review of compromise offers.
103.9 Restrictions.

Authority: 31 U.S.C. 3711.

§ 103.1 Scope and application.

The standards set fourth in this part apply to the compromise of claims, pursuant to 31 U.S.C. 3711. The head of an agency or his designee may exercise such compromise authority with respect to claims for money or property arising out of the activities of his agency where the difference between the amount offered in settlement by the debtor and the amount owed to the Government, exclusive of interest, penalties, and administrative costs, does not exceed $20,000, prior to the referral of such claims to the General Accounting Office or to the Department of Justice for litigation. The Comptroller General or his designee may exercise such compromise authority with respect to claims referred to the General Accounting Office prior to their further referral for litigation. Only the Comptroller General or his designee may effect the compromise of a claim that arises out of an exception made by the General Accounting Office in the account of an accountable officer, including a claim against the payee, prior to its referral by that Office for litigation.

§ 103.2 Inability to pay.

(a) A claim may be compromised pursuant to this part if the Government cannot collect the full amount because of (1) the debtor's inability to pay the full amount within a reasonable time, or (2) the refusal of the debtor to pay the claim in full and the Government's inability to enforce collection in full within a reasonable time by enforced collection proceedings.

(b) In determining the debtor's inability to pay, the following factors, among others, may be considered:

(1) Age and health of the debtor;

(2) Present and potential income;

(3) Inheritance prospects;

(4) The possibility that assets have been concealed or improperly transferred by the debtor; and

(5) The availability of assets or income which may be realized upon by enforced collection proceedings.

(c) The agency will give consideration to the applicable exemptions available to the debtor under State and Federal law in determining the Government's ability to enforce collection. Uncertainty as to the price which collateral or other property will bring at forced sale may properly be considered in determining the Government's ability to enforce collection. A compromise effected under this section should be for an amount which bears a reasonable relation to the amount which can be recovered by enforced collection procedures, having regard for the exemptions available to the debtor and the time which collection will take.

(d) Compromises payable in installments are to be discouraged. However, if payment of a compromise by installments is necessary, an agreement for the reinstatement of the prior indebtedness less sums paid thereon and acceleration of the balance due upon default in the payment of any installment should be obtained, together with security in the manner set forth in § 102.11 of this chapter, in every case in which this is possible.

(e) If the agency's files do not contain reasonably up-to-date credit information as a basis for assessing a compromise proposal, such information may be obtained from the individual debtor by obtaining a statement executed under penalty of perjury showing the debtor's assets and liabilities, income and expenses. Forms such as Department of Justice Form DJ 35 may be used for this purpose. Similar data may be obtained from corporate debtors by resort to balance sheets and such additional data as seems required.

§ 103.3 Litigative probabilities.

A claim may be compromised pursuant to this Part if there is a real doubt concerning the Government's ability to prove its case in court for the full amount claimed either because of the legal issues involved or a *bona fide* dispute as to the facts. The amount accepted in compromise in such cases should fairly reflect the probability of prevailing on the legal question involved, the probabilities with respect to full or partial recovery of a judgment, paying due regard to the availability of witnesses and other evidentiary support for the Government claim, and related pragmatic considerations. Proportionate weight should be given to the probable amount of court costs which may be assessed against the Government if it is unsuccessful in litigation, with regard to the litigative risks involved. See 28 U.S.C. 2412.

§ 103.4 Cost of collecting claim.

A claim may be compromised pursuant to this Part if the cost of collecting the claim does not justify the enforced collection of the full amount. The amount accepted in compromise in such cases may reflect an appropriate discount for the administrative and litigative costs of collection, paying heed to the the time which it will take to effect collection. Costs of collecting may be a substantial factor in the settlement of small claims. The cost of collecting claims normally will not carry great weight in the settlement of large claims.

§ 103.5 Enforcement policy.

Statutory penalties, forfeitures, or debts established as an aid to enforcement and to compel compliance may be compromised pursuant to this Part if the agency's enforcement policy in terms of deterrence and securing compliance, both present and future, will be adequately served by acceptance of the sum to be agreed upon. Mere accidental or technical violations may be dealt with less severely than willful and substantial violations.

§ 103.6 Joint and several liability.

When two or more debtors are jointly and severally liable, collection action will not be withheld against one such debtor until the other or others pay their proportionate shares. The agency should not attempt to allocate the burden of paying such claims as between the debtors but should proceed to liquidate the indebtedness as quickly as possible. Care should be taken that compromise with one such debtor does not release the agency's claim against the remaining debtors. The amount of a compromise with one such debtor shall not be considered a precedent or as morally binding in determining the amount which will be required from other debtors jointly and severally liable on the claim.

§ 103.7 Settlement for a combination of reasons.

A claim may be compromised for one or for more than one of the reasons authorized in this part.

§ 103.8 Further review of compromise offers.

If an agency holds a debtor's firm written offer of compromise which is substantial in amount and the agency is uncertain as to whether the offer should be accepted, it may refer the offer, the supporting data, and particulars concerning the claim to the General Accounting Office or to the Department of Justice, The General Accounting Office or the Department of Justice may act upon such an offer or return it to the agency with instructions or advice.

§ 103.9 Restrictions.

Neither a percentage of a debtor's profits nor stock in a debtor corporation will be accepted in compromise of a claim. In negotiating a compromise with a business concern, consideration should be given to requiring a waiver of the tax-loss-carry-forward and tax-loss-carry-back rights of the debtor.

PART 104—STANDARDS FOR SUSPENDING OR TERMINATING COLLECTION ACTION

Sec.
104.1 Scope and application.
104.2 Suspension of collection activity.
104.3 Termination of collection activity.
104.4 Transfer of claims.

Authority: 31 U.S.C. 3711(a)(3)

§ 104.1 Scope and application.

The standards set forth in this part apply to the suspension or termination of collection action pursuant to 31 U.S.C. 3711(a)(3) on claims which do not exceed $20,000, exclusive of interest, penalties, and administrative costs, after deducting the amount of partial payments or collections, if any. The head of an agency or his designee may suspend or terminate collection action under this part with respect to claims for money or property arising out of activities of his agency prior to the referral of such claims to the General Accounting Office or to the Department of Justice for litigation. The Comptroller General or his designee may exercise such authority with respect to claims referred to the General Accounting Office prior to their further referral for litigation.

§ 104.2 Suspension of collection activity.

(a) Collection action may be suspended temporarily on a claim when the debtor cannot be located after diligent effort and there is reason to believe that future collection action may be sufficiently productive to justify periodic review and action on the claim, having consideration for its size and the amount which may be realized thereon. The following sources may be of assistance in locating missing debtors: Telephone directories; city directories; postmasters; drivers' license records; automobile title and license records; state and local governmental agencies; the Internal Revenue Service (§ 102.18 of this chapter); other Federal agencies; employers, relatives, friends; credit agency skip locate reports, and credit bureaus. Suspension as to a particular debtor should not defer the early liquidation of security for the debt. Every reasonable effort should be made to locate missing debtors sufficiently in advance of the bar of the applicable statute of limitations, such as 28 U.S.C. 2415, to permit the timely filing of suit if such action is warranted. If the missing

VOL
48
ISS
101
MY
24
1983
UMI

debtor has signed a confess-judgment note and is in default, referral of the note for the entry of judgment should not be delayed because of his missing status.

(b) Collection action may also be suspended temporarily on a claim when the debtor owns no substantial equity in reality and is unable to make payments on the Government's claim or effect a compromise thereof at the time but his future prospects justify retention of the claim for periodic review and action, and:

(1) The applicable statute of limitations has been tolled or started running anew, or

(2) Future collection can be effected by offset, notwithstanding the statute of limitations, with due regard to the 10-year limitation prescribed by 31 U.S.C. 3716(c)(1), or

(3) The debtor agrees to pay interest on the amount of the debt on which collection action has been temporarily suspended at the time he has agreed to pay the debt, and such temporary suspension is likely to enhance the debtor's ability to pay the debt in full, with interest, at a later time.

(c) Collection action may also be suspended pending agency action on requests for administrative review or waiver based upon appropriate consideration by the agency head or his designee, on a case-by-case basis, as to whether:

(1) There is a reasonable possibility that waiver will be granted, or that the debt (in whole or in part) will be found not owing from the debtor;

(2) The Government's interests would be protected, if suspension were granted, by reasonable assurance that the debt could be recovered if the debtor does not prevail;

(3) Collection of the debt will cause undue hardship; and

(4) The applicable statutes and regulations would not authorize refund by the agency to the debtor of amounts collected, should the agency act favorably on the debtor's request.

§ 104.3 Termination of collection activity.

The head of an agency or his designee may terminate collection activity and consider the agency's file on the claim closed under the following standards:

(a) *Inability to collect any substantial amount.* Collection action may be terminated on a claim when it becomes clear that the Government cannot collect or enforce collection of any significant sum from the debtor, having due regard for the judicial remedies available to the Government, the debtor's future financial prospects, and the exemptions available to the debtor under State and Federal law. In determining the debtor's inability to pay, the following factors, among others, may be considered: Age and health of the debtor; present and potential income; inheritance prospects; the possibility that assets have been concealed or improperly transferred by the debtor; the availability of assets or income which may be realized by enforced collection proceedings.

(b) *Inability to locate debtor.* Collection action may be terminated on a claim when the debtor cannot be located, there is no security remaining to be liquidated, the applicable statute of limitations has run, and the prospects of collecting by offset, notwithstanding the bar of the statute of limitations, is too remote to justify retention of the claim.

(c) *Cost will exceed recovery.* Collection action may be terminated on a claim when it is likely that the cost of further collection action will exceed the amount recoverable thereby.

(d) *Claim legally without merit.* Collection action should be terminated on a claim whenever it is determined that the claim is legally without merit.

(e) *Claim cannot be substantiated by evidence.* Collection action should be terminated when it is determined that the evidence necessary to prove the claim cannot be produced or the necessary witnesses are unavailable and efforts to induce voluntary payment are unavailing.

§ 104.4 Transfer of claims.

When an agency has doubt as to whether collection action should be suspended or terminated on a claim, it may refer the claim to the General Accounting Office for advice. When a significant enforcement policy is involved in reducing a statutory penalty or forfeiture to judgment, or recovery of a judgment is a prerequisite to the imposition of administrative sanctions, such as the suspension or revocation of a license or the privilege of participating in a Government sponsored program, an agency may refer such a claim for litigation even though termination of collection activity might otherwise be given consideration under § 104.3(a) or (c). Claims on which an agency holds a judgment by assignment or otherwise will be referred to the Department of Justice for further action if renewal of the judgment lien or enforced collection proceedings are justified under the criteria discussed in this Part, unless the agency concerned has statutory authority for handling its own litigation.

PART 105—REFERRALS TO DEPARTMENT OF JUSTICE OR GAO

Sec.

105.1 Prompt referral.
105.2 Current address of debtor.
105.3 Credit data.
105.4 Report of prior collection actions.
105.5 Preservation of evidence.
105.6 Minimum amount of referrals to the Department of Justice.
105.7 Preliminary referrals to GAO.

Authority: 31 U.S.C. 3711.

§ 105.1 Prompt referral.

(a) Except as provided in paragraphs (b) and (c) of this section, claims on which aggressive collection action has been taken in accordance with Part 102 of this chapter and which cannot be compromised, or on which collection action cannot be suspended or terminated, in accordance with Parts 103 and 104 of this chapter, shall be promptly referred to the Department of Justice for litigation. Referrals should be made as early as possible, consistent with aggressive agency collection action and the observance of the regulations contained in this chapter, and in any event, well within the period for bringing a timely suit against the debtor. Ordinarily, referrals should be made within 6 months of the agency's final determination of the fact and the amount of the debt.

(b) Claims arising from audit exceptions taken by the General Accounting Office to payments made by agencies must be referred to the General Accounting Office for review and approval, prior to referral to the Department of Justice for litigation, in accordance with 31 U.S.C. 3702, unless the agency concerned has been granted an exception by the General Accounting Office.

(c) When the merits of the Government's claim, the amount owed on the claim, or the propriety of acceptance of a proposed compromise, suspension, or termination are in doubt, the agency concerned should refer the matter to the General Accounting Office for resolution and instructions prior to proceeding with collection action and/or referral to the Department of Justice for litigation.

(d) The Claims Collection Litigation Report (CCLR), which was officially implemented by the General Accounting Office on January 20, 1983, shall be used to refer all administratively uncollectible claims either to the Department of Justice for litigation and enforced collection or to the General Accounting Office.

§ 105.2 Current address of debtor.

Referrals to the Department of Justice for litigation will be accompanied by the current address of the debtor or the name and address of the agent for a corporation upon whom service may be made. Reasonable and appropriate steps will be taken to locate missing parties in all cases. Referrals to the Department of Justice for the institution of foreclosure or other proceedings, in which the current address of any party is unknown, will be accompanied by a listing of the prior known addresses of such a party and a statement of the steps taken to locate him.

§ 105.3 Credit data.

(a) Claims referred to the Department of Justice for litigation will be accompanied by reasonably current credit data indicating that there is a reasonable prospect of effecting enforced collections from the debtor, having due regard for the exemptions available to the debtor under State and Federal law and the judicial remedies available to the Government.

(b) Such credit data may take the form of: (1) A commercial credit report, (2) an agency investigative report showing the debtor's assets and liabilities and his income and expenses, (3) the individual debtor's own financial statement executed under penalty of perjury reflecting his assets and liabilities and his income and expenses, or (4) an audited balance sheet of a corporate debtor.

(c) Such credit data may be omitted if: (1) A surety bond is available in an amount sufficient to satisfy the claim in full, (2) the forced sale value of the security available for application to the Government's claim is sufficient to satisfy its claim in full, (3) the referring agency wishes to liquidate loan collateral through judicial foreclosure but does not desire a deficiency judgment, (4) the debtor is in bankruptcy or receivership, or (5) the debtor's liability to the Government is fully covered by insurance, in which case the agency will furnish such information as it can develop concerning the identity and address of the insurer and the type and amount of insurance coverage.

§ 105.4 Report of prior collection actions.

A checklist or brief summary of the actions previously taken to collect or compromise a claim will be forwarded with the claim upon its referral to the Department of Justice. If any of the administrative collection actions enumerated in Part 102 of this Chapter have been omitted, the reason for their omission must be given with the referral. The Department of Justice may return or retain claims at it option when there is insufficient justification for th omission of one or more of the administrative collection actions enumerated in Part 102 of this chapter.

§ 105.5 Preservation of evidence.

Care will be taken to preserve all files, records, and exhibits on claims referred or to be referred to the Department of Justice for litigation.

§ 105.6 Minimum amount of referrals to the Department of Justice.

Agencies will not refer claims of less than $600, exclusive of interest, penalties, and administrative costs, for litigation unless: (a) Referral is important to a significant enforcement policy or (b) the debtor has not only the clear ability to pay the claim but the Government can effectively enforce payment, having due regard for the exemptions available to the debtor under State or Federal law and the judicial remedies available to the Government.

§ 105.7 Preliminary referrals to GAO.

Preliminary referrals of claims to the General Accounting Office, as required by § 105.1 (b) and (c), will be in accordance with instructions, including monetary limitations, contained in the General Accounting Office Policy and Procedures Manual for the Guidance of Federal Agencies, and the provisions of § 105.2 through § 105.5.

Dated: May 19, 1983.

Charles A. Bowsher,

Comptroller General of the United States.

Dated: May 20, 1983.

William French Smith,

Attorney General of the United States.

Amdt. 251

Food Stamp Program, Work Registration, Job Search, and Voluntary Quit

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would change the Food Stamp Program's work registration, job search and voluntary quit provisions in accordance with the 1981 Food Stamp Act Amendments and the Food Stamp Act Amendments of 1982. As required by the 1981 Food Stamp Act Amendments, the rule proposes disqualifying participating households whose primary wage earners voluntarily quit their jobs, denying food stamp participation to households containing a member who failed to comply with comparable work registration requirements in the Work Incentive Program or unemployment compensation programs, as well as other changes. As required by the Food Stamp Act Amendments of 1982, the rule lengthens the disqualification period for noncompliance from 60 to 90 days; allows State agencies an option to apply job search requirements at the time of application; and requires the second parent in a household where there is another able-bodied parent subject to work requiremtns to register for work when the youngest child reaches six. The rule also proposes changes in the Program intended to simplify the administration of the work registration and job search procedures and to allow State agencies more flexibility in administering these procedures. In addition, the rule proposes that State welfare agencies advise and monitor work registrants in their search for jobs. This change is intended to give State agencies more flexibility and control in administering the work registration and job search requirements of the Food Stamp Act.

DATES: Comments on the proposed rulemaking must be received on or before July 25, 1983, to be assured of consideration.

ADDRESS: Comments should be submitted to Thomas O'Connor, Supervisor, Policy and Regulations Section, Program Standards Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302. All written comments will be open to public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday), at 3101 Park Center Drive, Alexandria, Virginia, Room 708.

FOR FURTHER INFORMATION CONTACT: Questions regarding this proposed rulemaking should be directed to Mr. O'Connor at the above address or by telephone at (703) 756-3429.

SUPPLEMENTARY INFORMATION:

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting or recordkeeping provisions contained in this proposed rule have been approved by the Office of Management and Budget. (OMB approval numbers: 0584-0246.)

Classification

This rule has been reviewed under Executive Order No. 12291 and Secretary's Memorandum No. 1512–1. This action will not result in an annual effect on the economy of $100 million or more or a major increase in costs or prices for consumers, individuals, Federal, State or local governments, or geographical regions. The proposed action will result in an increase in costs to State agencies due to the requirement that they monitor work registrants in their search for jobs. The administration of job search activities was previously done by the Dpartment of Labor (DOL). We estimate that under DOL administration the cost of operating job search in Fiscal Year 1982 would have been $75 million. As this proposed action includes only the requirements and procedures for monitoring job search and as State agencies will assume 50% of the costs, the transfer of this function to State agencies will not result in a major cost shift to State agencies. The proposed action would reduce federal costs by temporarily disqualifying households who fail to comply with particular work requirements, and by limiting the exemptions from work registration. Additionally, this rule will not have significant effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, the Department has determined that this rule is not major.

This action has also been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, 94 Stat. 1164, September 19, 1980). Robert Leard, Acting Administrator of the Food and Nutrition Service, has certified that this rule does not have a significant impact on a substantial number of small entities. This action would disqualify food stamp households who fail to comply with specific additional work requirements and would amend certain work registration procedures and exemptions. State and local welfare agencies will be affected to the extent that they administer the Program. Those most affected will be potential and current participants who are or would be required to register and search for work as a condition of food stamp eligibility.

Work requirements

This rule proposes significant modifications in the area of work registration and job search. To place these changes in context, it is helpful to review the Food Stamp Program's work requirements. The work requirements consist of two separate components. The first, work registration/job search, encompasses the following requirements: (1) Registering for work at time of application and once every twelve months; (2) reporting to and cooperating with the State agency administering the work registration requirements; (3) conducting job search, i.e., contacting a designated number of employers and attending periodic follow-up reviews; (4) accepting and continuing suitable employment; and (5) not voluntarily quitting a job without good cause. These requirements must be complied with by Program applicants and participants not otherwise exempt in order to maintain eligibility for the Program and are the subject of this proposed rule.

The second component of the Food Stamp Program's work requirements is workfare, an optional program for State agencies and political subdivisions which actually places work registrants in assigned jobs. Details of workfare can be found in the **Federal Register** of October 8, 1982.

The Department of Health and Human Services has similar work requirements for the Aid to Families with Dependent Children Program (AFDC). Work registration in the Food Stamp Program is paralleled in AFDC by the Work Incentive Program (WIN). Win participation satisfies the Food Stamp Program work registration requirement. Workfare is paralleled in AFDC by the Community Work Experience Program (CWEP).

State agency operated work registration and job search

Section 6(d) of the Food Stamp Act of 1977, as amended, requires work registrants to "fulfill whatever reasonable reporting and inquiry about employment requirements as are prescribed by the Secretary." In light of State Employment Service Agencies' (SESA's) expertise in interviewing and placing job applicants, the Department had contracted with DOL to have SESA's assist work registrants in carrying out their job search responsibilities. The Department has assumed the full cost of funding SESA administered job search activities. In addition, section 6 required that to the extent SESA's are involved in these activities, the Department should issue regulations on work registration/job search jointly with DOL. Section 160 of the 1982 Food Stamp Amendments (Pub. L. 97–253, 96 Stat. 763, September 28, 1982) removes the requirement for joint issuance of regulations on work registration by the Secretary of Agriculture and the Secretary of Labor. This section also eliminates the requirement that food stamp work registration rules be patterned after those issued for WIN. Given these statutory changes, the Department is proposing to change the way the work registration requirements are administered. The responsibility for carrying out job search activities would continue to be that of food stamp work registrants in conducting these activities. The Department believes this change will be more successful and cost effective in producing jobs for work registrants, and will give State agencies more flexibility and an opportunity to take greater control in registering work eligibles and advising them in finding employment. The deletion of the requirement to issue regulations jointly with DOL facilitates the Department's plans to allow State flexibility in administering work registration and monitoring job search activities, potentially through agencies other than Labor Department supervised SESA's.

The deletion of the requirement that work registration rules be patterned after WIN rules does not alter the need to make food stamp work registration requirements as consistent as possible with WIN requirements. Indeed, consistency with WIN will be increasingly important as certain food stamp work registration/job search functions are assumed by State agencies which are now handling similar functions for their public assistance containing WIN registrants.

This proposed rule would have State agencies advise and monitor work registrants in their job search. The proposal would adopt many of the procedures currently used by the SESA's to administer job search. To understand the rationale for these procedures, it may thus be helpful to refer to the Department's rules on job search published in the January 16, 1981 **Federal Register** (46 FR 4622).

Work registration

Record of registration. Because State agencies would no longer be required to forward work registration forms containing information about registrants to the SESA's the Department believes it is no longer necessary to mandate use of a specific registration form. State agencies should be able to record and keep track of employment related information about registrants by annotating application forms or work sheets, or by utilizing a form of their own design. The applicant may complete work registration records for

other household members. However, the initial record of registration must contain the applicant's signature stating that he or she agrees to explain to the registered members of the household their work requirements and the consequences of failure to comply. The Department believes that the signature of the applicant signifies an acknowleged awareness of the work responsibilities. Because the Food Stamp Act requires a 12 month work registration period the proposal specifies that household members would be registered when an identifiable, signed, work registration form is submitted to the State agency or when the signed registration of these members is otherwise annotated or recorded.

Reregistration for employment. Current rules at 273.7(a) require households who are not exempt by § 273.7(b)(1) to register for employment at the time of application and once every six months after initial registration, as a condition of eligibility. Section 1310 of the 1981 Food Stamp Amendments (Pub. L 97–98, 95 Stat. 1282, Dec. 22, 1981) changes this procedure to require reregistration once every twelve months after initial registration. The proposed rule would implement this legislative provision.

Exemptions from work registration. Current rules at § 273.7(b)(1)(iv) exempt from the work registration requirement a parent or other household member who is responsible for the care of a dependent child under twelve or an incapacitated person. Section 1311 of the 1981 Food Stamp Amendments changes current procedures to exempt only those responsible for the care of either a child under six or an incapacitated person. Current rules at §§ 273–7(b)(1)(v) and 273.22(e)(1) also exempt from work registration and workfare a second parent or caretaker of a child under 18 in a household where another parent is registered for work. Section 159 of the Food Stamp Act Amendments of 1982 repeals this latter exemption for work registrants by requiring a second parent to begin seeking employment when the youngest child becomes six. The legislation did not eliminate this exemption for households subject to workfare requirements. The proposed rule would implement that above legislative changes with regard to work registration and would make the necessary conforming changes to the workfare provision at 273.22(e)(1)(iii) of current regulations.

Job Search

Job search requirements. The proposed rules would require State agencies to inform work registrants that they must perform job search activities continuously instead of in one 8 week job search period as currently required. This change reflects the Department's belief that a registrant's obligation to search for work should not end after a short, concentrated, but unsuccessful job search. The proposed rule would require registrants to contact a number of potential employers each month as determined by the State agency. The number of required contacts should be linked to the immediate employability of the individual and could vary from month to month. State agencies would thus be given the flexibility to intensify the number of required job contacts in the period immediately following registration and, thus, increase the registrant's ability and chances to find employment as quickly as possible. The State agency would have the flexibility to intensify a registrant's job search activities in periods of favorable economic conditions or reduce a registrant's job search activities in periods of unfavorable economic conditions. The Department is anxious to receive comments on this provision.

Current rules require work registrants to be placed in one of three job search categories based on their capabilities and characteristics. The Department is proposing to delete this requirement, and instead, to allow State agencies to establish the guidelines they wish to use in this area. The State agency would thus make a decision on how feasible it is to require intensive job search efforts on the part of each work registrant. The determination should be made on such criteria as distance the registrant lives from the place of employment, the capabilities of the participant, including age and physical condition, and the job market situation in the area. The State agency would thus be able to set up it's own system of categorization on job readiness if it so desires.

State agencies would be given the option of determining how many job contacts a registrant must make in a month based on information collected either at the time of application or at an assessment interview scheduled within 2 weeks of the household's being certified. If the State agency chooses not to schedule assessment interviews, decisions on how many job contacts are required would be made when the household is certified. To preclude unnecessary trips to the food stamp office by exempt participants, State agencies that use a system of assessment interviews would determine exempt status before scheduling an assessment interview. Registrants who are not determined exempt would be informed either at the application interview or by letter of the date of their assessment interview, that attending the interview is a condition for participation in the Food Stamp Program, and that failure to attend the interview without good cause or without first contacting the State agency will cause the State agency to take steps to disqualify the household. The Department believes it is the work registrant's responsibility to contact the State agency if he or she is unable to attend the scheduled interview. The proposed rule thus provides that if the registrant fails to attend the interview without good cause or has not contacted the State agency in advance to reschedule it, the household would be sent a notice of adverse action and would be disqualified at the end of the advance notice period unless the household contacted the State agency prior to this time either to reschedule the interview or to request a fair hearing. The State agency would also enclose along with the notice of adverse action a written explanation of the household's obligation to contact the State agency prior to the expiration of the advance notice period to reschedule the missed interview and of the consequences of failing to do so. The proposed rule would allow for this cure of a missed interview once—if the work registrant missed the second interview, the State agency would send the household a notice of adverse action informing them of the pending disqualification.

The proposal would require State agencies to notify work registrants in writing of their job search responsibilities, procedures to be followed, manner in which job contacts should be reported, and consequences of failure to comply. This notice would be provided at the time of the assessment interview or when the number of assigned job contacts is determined.

The State agency would also be given the option of providing or contracting with State or private employment agencies to provide work registrants with such services as referrals to employment, training opportunities and/or Job Finding Clubs. Job Finding Club activities include instruction on how to prepare for interviews, where to look for jobs and also include actual interviews with employers. Referrals to such services would be considered job contacts for food stamp purposes. The number of required independent job contacts plus State agency referrals could not exceed the numerical limits set forth above.

Follow-up and reassessment activities. The proposal would allow State agencies to schedule periodic

VOL 48 ISS 101 MY 24 1983 UMI

follow-up interviews for such purposes as reviewing job contacts made by the work registrant, reviewing job listings for potential referrals, and assisting the work registrant in establishing his or her future plans for seeking employment. The follow-up interviews could also be used to reassess the number of monthly job contacts required for each work registrant. The proposal does not restrict the frequency with which follow-up interviews are scheduled. It gives State agencies the flexibility to take into account the likelihood of a registrant's job readiness having changed.

Job contact. The proposed rule does not change the definition of job contact. To make a valid job contact, the work registrant must present himself or herself as available for work to a prospective employer who ordinarily employs persons in areas of work that meet the suitability requirements discussed in § 273.7(i) and for which the registrant is reasonably qualified.

Reporting job contacts. The proposal would require work registrants to report their job contacts in writing in a manner prescribed by the State agency. State agencies would be responsible for informing work registrants about the manner in which job contacts should be reported. State agencies would be required to give work registrants a reasonable period of time following the end of each month in which to submit the written report. This reporting requirement is intended to give State agencies flexibility to coordinate the reporting of job contacts with the household's monthly reporting obligations under the Monthly Reporting and Retrospective Budgeting (MRRB) system which State agencies will be implementing in the near future.

Evaluating job contacts. The proposed rule would require State agencies to evaluate work registrants' reported job contacts to determine whether the required number of contacts were completed. Registrants who had good cause for failing to complete the required number of contacts would be excused from completing these contacts. Work registrants who failed to complete the required number of contacts without good cause would not be permitted to make up incomplete contacts. Work registrants would be allowed to make up contacts only if the State agency failed to accept, for reasons such as suitability or manner of contact, job contacts reported by the work registrants. In this case, the State agency would send the registrants a letter explaining which job contacts were disallowed and why the contacts were not accepted. The letter would also inform the registrants that they would be allowed two weeks from the receipt of the letter to make up the disallowed contacts and to report these contacts to the State agency. The State agency would determine how the registrants would report the made up contacts.

Optional job search at time of application. Section 157 of the Food Stamp Act Amendments of 1982 permits State agencies to apply job search requirements at the time households apply for participation in the Program. Previously, the law required able bodied food stamp recipients to engage in job searches. The proposed rules reflect this change and allow State agencies this option. The Department wants to stress that if a State agency opts to require job search at time of application, this requirement must not be allowed to delay the application processing. The Department continues to expect all applicatios to be processed as expeditiously as possible. Each State agency may set up its own system for applicants' reporting of job contacts. Failure to comply with this requirement is discussed later in this preamble.

Contracting with employment agencies. The proposed rule would allow State agencies to contract with public or private employment agencies to administer the job search requirements of this section. State agencies which choose to contract with employment agencies would be responsible for ensuring that the work registration and job search procedures are administered in accordance with food stamp regulations.

Additional Work Requirements

Current rules at § 273.7(e) require work registrants to accept and continue suitable employment to which they are referred by the State Employment Service Agency (SESA). Failure to comply results in disqualification of the registrants' households. Because the proposed job search rules would require many registrants to make their own contacts with employers in addition to following up on any State agency referrals, the proposal makes clear that registrants would be required to accept and continue suitable employment regardless of whether they were referred to the employer or found the job on their own.

Noncompliance/Sanctions

We are retaining current rules at § 273.7(g) which provide that if a household member fails to comply with work registration requirements, including the job search requirements, then the entire household shall be ineligible to participate until the member complies or for 60 days, whichever occurs earlier. In response to 1982 legislation changing the 60 day disqualification period for voluntary quit to 90 days, the Department is proposing several changes in the regulations on disqualification.

The proposed rule applies the 90 day disqualification period to all work registration requirements. While Congress has never legislated the length of the general work registration penalty, the Department has always, in the interest of consistency, applied the same disqualification penalty to all components of the work registration requirements. The proposed rule reflects that premise.

Current rules also specify that the disqualification period shall begin with the first month following the expiration of the adverse notice period, unless a fair hearing is requested. The proposed rules retain this provision with three modifications. One modification is necessitated by Section 157 of the Food Stamp Act Amendments of 1982 which permits State agencies to apply job search requirements at time of application. If a State agency opts to require job search at application and an applicant does not comply, then any failure to comply with this requirement would result in a disqualification of 90 days, calculated from the day of application in those instances where noncompliance is determined before certification. If noncompliance is discovered after certification the disqualification period would run 90 days or 3 months from the first of the month after all normal procedures for taking adverse action have been taken. If the 90 day period would cover months of more or less than 30 days each, the 90 day disqualification period would be 3 calendar months for participating households to coincide with the current monthly issuance procedure.

The second modification in the proposed rule allows a delay of the beginning of the disqualification period not only if a fair hearing is requested but also if, in the case of a missed interview, a rescheduled interview is requested. This allows the household one chance to correct a missed interview.

The third change is language in the proposed rule which specifies that in the event a household leaves the Program before the sanction can be levied, the sanction shall not be imposed until the household returns to the Program. Current rules permit the imposition and continuation of a sanction even when the household leaves the Program. This change is consistent with the optional workfare rules published on October 6, 1982, in the **Federal Register** at 47 FR 44692. The disqualification process is discussed in greater detail later in this preamble in the section on voluntary quit.

Ending Work Registration/Job Search Noncompliance Disqualification

Current rules at § 273.7(h) provide that eligibility may be reestablished during a disqualification period and the household shall, if otherwise eligible, be permitted to resume participation if the noncomplying member becomes exempt from the work registration requirements or is no longer a member of the household. If the noncomplying individual joins another household during the disqualification period then the household receiving the member shall be subject to disqualification for the remainder of the disqualification period. In addition, eligibility may be reestablished if the noncomplying member "cures" the violation by complying with the provision that he or she violated. For example, an individual who refused to respond to a request for supplemental information regarding employment status or availability for work could cure this noncompliance by responding to the request. The cure provision was intended to encourage noncomplying household members to take corrective action.

The proposed rule would continue to permit the household to reestablish its eligibility during the disqualification period if the noncomplying member becomes exempt from the work registration requirements, but not if the noncompliant member leaves the household. This rule specifically addesses the situation where a household to be sanctioned splits into two or more households. When any household member leaves the household the sanction will follow all the original household members and will begin for all members once the sanction can be levied against any one. Consequently, if one household member leaves the household and the program, the remaining household members would be ineligible to receive benefits for the sanction period. If the household member returns after the sanction has concluded, then that household member would have, in effect, already been sanctioned. If the departing household member has joined another food stamp household, that member would be ineligible to participate for the sanction period. However, that member's income and all of that member's resources would be included in their entirety in determining the new household's benefits. Applying the sanctions in this manner ensures that the whole household, as it existed during the time of noncompliance, is penalized, just as it would have been if the household did not separate. To permit the remaining household member to avoid the penalty by only applying it to the noncomplying members would encourage household breakup. The Department believes this possible consequence was not Congress' intent and should be avoided. As with the voluntary quit disqualification, discussed later in this preamble, the proposed rule permits State agencies to accept applications from such households during the third month of the disqualification period. In these cases, the same application would be used for the denial of the month of application and the determination of eligibility for subsequent months.

Suitable employment

Current rules at § 273.7(i) provide that employment offered within the first 30 days of registration shall be considered unsuitable if it is not in the household member's major field of experience. This provision would be deleted by the proposed rule. We believe that this provision could stand in the way of recipients finding and accepting employment which would otherwise be considered suitable.

The Department would hope that in areas where referrals are made, registrants, when possible, would be referred to available employment opportunities in their major field before they would be referred to opportunities outside of their major field.

Unreasonable distance

Current rules at § 273.7(l)(1)(iv) provide that employment shall be considered unsuitable if the distance from the household member's home to the place of employment is considered unreasonsable. Similarly, the job search rules at 273.7(f)(1)(ii)(C) provide that work registrants shall be classified as exempt from job search activities if they reside an unreasonable distance from potential employers. The two provisions specify that a distance shall be considered unreasonable if daily commuting time exceeds 2 hours. The Department believes that a given hourly limit is not always a valid indicator of an unreasonable distance. Therefore, the proposed rule would delete current provisions which specifically define a distance to be unreasonable if the round trip commuting time exceeds 2 hours. The proposed change gives State agencies the flexibility to consider all relevant factors in determinig whether the distance from a household member's home to places of employment is unreasonable.

Alternate work registration procedures

Section 273.7(k)(1) requires State agencies to request approval from FNS to substitute State or local procedures for work registration for PA households not subject to the WIN registration requirement or for GA households. State agencies may also substitute, with prior FNS approval, work requirements imposed on refugees participating in refugee resettlement programs. The Department believes that a State agency should be permitted to substitute, without prior FNS approval, any State or Federal work procedures for any food stamp work registration requirement. This change will make the work registration requirement more flexible for State agencies and will reduce the administrative approval process at all levels. The Department is including this suggested change in the proposed rule. Although advance approval would no longer be necessary, the alternate procedures could only be substituted if they are comparable to the food stamp work registration requirements and the conditions specified below are met. The registrant's activities must be monitored so that appropriate sanctions would be applied when necessary provided that a household shall not be sanctioned for the failure of a member to comply with an alternate requirement that exceeds the requirements of the food stamp work registration rules. Households which are being sanctioned are entitled to, and must be accorded, the same fair hearing rights as households which are found to have violated the food stamp work registration rules. Finally, all household members who were not exempt by food stamp rules must be subject to these alternative rules.

Failure to comply with a comparable WIN, Unemployment Compensation or alternate work registration procedures requirement

Current rules at § 273.7(k)(2) exempt from work registration household members who are subject to and complying with WIN or Unemployment Compensation work registration requirements. If a household member fails to comply with the WIN or Unemployment Compensation work registration rules, that member loses his or her food stamp work registration exemption and is required to register for work in accordance with food stamp regulations. Unlike a participant who is work registered with the Food Stamp Program, the participant who fails to comply with the work requirements of the alternate program would not be disqualified from food stamp

VOL

1983
UMI

participation. To correct this unequal treatment of participants, Section 1311 of the 1981 Food Stamp Act Amendments mandates that if a household contains a member who was exempted from the food stamp work registration requirements because he or she was subject to and complying with a work registration requirement under Title IV of the Social Security Act or a State or Federal unemployment compensation program's work registration requirements, and if the member fails to comply with a requirement which is comparable to a food stamp work registration or job search requirement, the household shall be treated as though the member had failed to comply with the corresponding food stamp requirement. The proposed rule would implement this statutory provision and to promote consistency this policy would also be applied to a household member who fails to comply with other alternate work registration procedures (discussed in the preceding section). Thus, if a household member fails to comply with the comparable WIN, Unemployment Compensation or alternate procedures requirement, the entire household would be disqualified from food stamp participation. The proposed rule makes clear, however, that the household would not be disqualified if the noncomplying member was exempt from the food stamp work registration requirements in accordance with one of the provisions of § 273.7(b) other than the exemptions for compliance with WIN, unemployment compensation or alternate procedures work registration or job search requirements. For example, a 17 year old participant would be exempt from the food stamp work registration requirements in accordance with § 273.7(b)(1). However, this individual would not necessarily be exempt form WIN. Thus, if this participant failed to comply with WIN work registration procedures, he or she would not be disqualified from the Food Stamp Program because of this non-compliance. Similary, the household would not be disqualified if a member failed to comply with a work registration requirement which was not comparable to one of the Department's requirements. The requirement would not be comparable if it placed responsibilities on the individual which exceeded those imposed by the food stamp work registration and job search rules. For example, if in accordance with the requirements of this rule a State agency chooses to refer food stamp work registrants to training opportunities, it would not disqualify a participant who failed to comply with the training requirement of the WIN Program. If a member failed to comply with a non-comparable requirements, he or she would have to register for work and fulfill the Food Stamp Program job search requirements if not otherwise exempt.

The proposed rule also provided that households found to have failed to comply with the WIN, unemployment compensation, or alternate procedures requirements and which as a result, are disqualified from particpation in the Food Stamp Program, shall be entitled to the same fair hearing procedures as households who are found to have violated the food stamp work registration rules. The proposal would also require that a State agency representative be available to participate at the hearing if appropriate.

Determining good cause

The Food Stamp Act of 1977, Pub. L. 95–113, September 29, 1977, provided that no household would be eligible for food assistance if it contained a member who refused without good cause to accept a suitable offer of employment. The House Report on the Act explained that the good cause criteria would apply to failure to comply with the other work registration and job search requirements as well. H.R. Rep. No. 95–464, 95th Cong. 1st Sess., 168 (1977). The Department's rules thus contain one set of criteria governing determination of good cause for noncompliance with any of the work registration or job search requirements. Under current rules at §§ 273.7(g) and 273.7(m), households containing members who had good cause for failing to comply with the Department's work registration and job search requirements shall not be disqualified.

Section 1311 of the 1981 Food Stamp Act Amendments adds the requirement that good cause for refusing to accept an offer of suitable employment shall include the lack of adequate child care for children who have reached the age of six but are under the age of twelve. Because of the previously mentioned legislative intent that the good cause criteria apply to other instances of noncompliance, the proposed rule incorporates the 1981 Food Stamp Act Amendments' example of good cause for failure to accept a suitable offer of employment and also applies it to failure to comply with the other work registration and job search requirements.

Voluntary Quit

Application of voluntary quit provisions. There are several proposed changes to the current regulations on voluntary quit resulting from legislative action. Currently, the voluntary quit provisions apply only to applicant households. Section 1311 of the 1981 Food Stamp Amendments mandates that where the head of a participating household voluntarily quits his or her job without good cause the entire household shall be disqualified from participation. The House Report makes it clear that the Department's traditional practice of interpreting "head of household" to mean the household's primary wage earner would apply to the 1981 Food Stamp Amendments provision as well (H.R. Rep. No. 97–106 97th Cong. 1st Sess. 139 (1981)). Thus, under the proposed rule, whenever a household applies or a participating household reports the loss of a source of income, the State agency would be required to determine whether or not the household's primary wage earner voluntarily quit his or her employment without good cause.

Section 158(b) of the 1982 Food Stamp Amendments extends the definition of a voluntary quit without good cause (and the attendant period of ineligibility) to include Federal, State, or local government employees who have been dismissed from their jobs because of participation in a strike against the government entity involved. This proposed rule would extend the voluntary quit provisions to these individuals.

Disqualification due to voluntary quit/ending disqualification. The proposed rule would revise the procedures used to disqualify applicant households whose primary wage earners voluntarily quit their jobs without good cause, and, pursuant to Pub. L. 97–98, the proposal would subject participating households to these disqualification procedures. The procedures for ending the disqualification period also contain several modifications. Under current rules, when a household files an application, the State agency must determine whether the household's primary wage earner voluntarily quit his or her job within the last 60 days. If such a quit is established, the household is denied participation for a period of two months beginning with the month of the quit. Section 158 of the 1982 Food Stamp Amendments increased from 60 to 90 days the disqualification period for recipients and applicants who voluntarily quit their jobs and it deleted the language in the law which specified when the disqualification will begin.

This change permits the Secretary to determine when the 90 day disqualification period will begin for a household when the head of household voluntarily quits a job. The prior legislative language, which tied the disqualification period to the date of the quit, presented problems if applied to participants because the 60 day penalty period could end before a voluntary quit would be discovered, notice sent and disqualification of the household begun. Congress believes that while tying the start of the disqualification period to the date of the quit should continue for applicants, more flexibility is needed for sanctions for participants to ensure that all noncomplying households will be disqualified for a three calendar month period (S. Rep. No. 97–504, p. 39). The proposed rule thus changes the disqualification period from 60 to 90 days (or 3 calendar months as discussed above) and modifies when the disqualification would begin.

In the case of an applicant who voluntarily quits a job the disqualification period would begin from the date of the quit. The proposal also clarifies the current rule to explain that if the State agency learns that an applicant household lost a source of earned income after the date of application but before the household was certified, it will determine whether a voluntary quit occurred. At the time of application the State agency shall also explain to the applicant the consequences of the household's primary wage earner's voluntarily quitting his or her job without good cause.

In the case of a participant voluntarily quitting, the disqualification period would be 90 days (or three months), beginning the first of the month after all normal procedures for taking adverse action have been followed. For those households which leave the Program before the sanction can be levied, the sanctions shall not be imposed until the household returns to the Program. In the case of participating households, when a loss of income is reported State agencies would be required to determine whether or not a voluntary quit occurred. If a voluntary quit is found, the household must be sent a notice of adverse action within 10 days after the loss of income is reported. The notice would contain the proposed period of disqualification and would specify that the household may reapply at the end of the disqualification period. The household would have at least 10 days after the date the notice was mailed to request a fair hearing. The State agency would not be able to take action to terminate the household's benefits until the time to request a fair hearing expired. The Department believes that this advance notice period is necessary to protect participants' due process rights. If the participating household receives a fair hearing and the State agency is upheld, then the 90 day disqualification period would begin the first of the month after the decision is rendered. As mentioned earlier in this preamble, the 90 day disqualification period mandated by the Act would be converted to 3 calendar months only for participating households if necessary to better coincide with the current procedure of issuing benefits based on monthly periods. The rule makes clear that a participating member will not be considered to have voluntarily quit if, at the time of the quit, he or she was exempt from the work registration provisions.

As mentioned earlier, under current rules the State agency must determine whether a voluntary quit by the primary wage earner has occurred within the last 60 days. This 60 days time period was specified by the Department to provide some time limit within which to make this determination. The 60 days was selected because it was consistent with the legislated 60 day disqualification period. Now that the disqualification period has been changed from 60 to 90 days, the time period within which to determine if a voluntary quit has occurred will also be changed from 60 to 90 days. The proposed rules thus specify that a State agency will determine if the primary wage earner in an applicant household has voluntarily quit his or her job in the last 90 days. If the State agency determines that the primary wage earner in a participant household has voluntarily quit a job at any time during Program participation, the household shall be disqualified.

The proposed rule would also extend the good cause and verification provisions of § 273.7(n)(3) and (n)(4), currently pertaining to the voluntary quit of applicant households, to participating households as well.

Following the end of the disqualification period, a disqualified household would be permitted to resume participation in the Program if it applied again and was determined eligible. The proposed rule would permit a disqualified household to resume participation during the disqualification period if the member who caused the disqualification cures the voluntary quit by returning to the job that he or she quit at the same weekly earnings or by securing any other employment which yields weekly earnings equivalent to the terminated job. The rule would also permit the household to resume participation during the disqualification period if the primary wage earner becomes exempt from the work registration requirements in accordance with one of the exemptions provided in § 273.7(b) other than the exemptions provided in paragraphs (b)(1)(iii) and (b)(1)(vi) of that section. These two paragraphs exempt individuals who are participating in work registration procedures in the WIN and Unemployment Compensation Programs. The Department does not believe that a household should be able to terminate the disqualification merely because its primary wage earner has begun to participate in a work registration system operated by another assistance program. In addition, as described earlier in this preamble, the proposed rule would provide that if a quitting primary wage earner leaves the household, the household continues to be disqualified for the remainder of the disqualification period.

In accordance with current rules at 7 CFR 273.10(a) on application processing, the proposed rule would require State agencies to accept, during the third month of disqualification, applications from households which are ineligible to reestablish eligibility during the disqualification period. In such cases the same application would be used for the denial for the month of application and the determination of eligibility for subsequent months.

Reporting requirements

Currently, information from the work registration form is entered into the Employment Service Automated Reporting System (ESARS) by the SESA. With State agencies assisting and monitoring work registrants' job search activities, information will no longer be entered into the ESARS. The Department believes that it is necessary to collect enough information about the functioning of this proposed work registration system to be able to evaluate the system. Consequently, the Department is proposing some general reporting requirements in this rule. The Department is proposing to require State agencies to maintain information on the number of individuals registered for work, the number of registrants actively engaged in job search, the number of registrants who find jobs, and the number of participants disqualified because of noncompliance with any of the work registration requirements. The specifics on how this information is collected and stored would be left up to each State agency. This information would be submitted annually to FNS Regional Offices.

Miscellaneous—In 273.7(b)(1)(vii), (in current rules viii), a portion of a

VOL 48 ISS 101 MAY 24 1983 UMI

sentence dropped in error by prior rulemaking was added. Conforming language in §§ 273.1(b)(2)(v), 273.9(b)(3) and 273.11(c)(1) has been added to indicate that failure to comply with work registration or job search requirements will result in sanctions equal to those for failure to comply with workfare.

Implementation

The proposal would require State welfare agencies to implement the provisions of this rulemaking no later than the first of the month 90 days following publication of final regulations. The Department is interested in the earliest possible implementation and believes that this is a reasonable time period within which to expect implementation. The Department is especially interested in receiving comments on this implementation schedule.

List of Subjects

7 CFR Part 272

Alaska, Civil rights, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR Part 273

Administrative practice and procedure, Aliens, Claims, Food stamps, Fraud, Grant programs—social programs, Penalties, Reporting and recordkeeping requirements, Social security, Students.

Accordingly, it is proposed that 7 CFR Parts 272 and 273 be amended as follows:

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

1. In § 272.1, a new paragraph (g)(63) is added to read as follows:

§ 272.1 General terms and conditions

* * * * *

(g) Implementation * * *

(*63*) Amendment No. 251. State Welfare agencies shall implement the provisions of this amendment no later than the first of the month 90 days following publication of final regulations.

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

2. In § 273.1 a new paragraph (v) is added to paragraph (b)(2) to read as follows:

§ 273.1 Household Concept.

* * * * *

(b) *Nonhousehold and exludes household members.* * * *

(2) *Excluded household members.*

* * *

(v) *Work Registration/Job Search Sanctioned.* Individuals against whom a sanction was imposed while they were participating in a household disqualified for failure to comply with work registration or job search requirements, in accordance with § 273.7.

* * * * *

§ 273.7 [Amended]

3. In § 273.7, paragraph (a) is amended by removing the word "six" in the second sentence and inserting in its place the word "twelve". In addition, the third and fourth sentences of paragraph (a) are revised to read as follows:

§ 273.7 Work registration requirements.

(a) *Persons required to register.* * * * Registrants who move out of a project area shall register at their new location. Under the provisions of § 273.1(f)(1), the registration form need not be completed by the member required to register.

* * * * *

4. In § 273.7(b)(1), paragraph (iv) is amended by removing the "12" in the first sentence and the "12th" in the second sentence and substituting in their places "6" and "6th", paragraph (v) is removed and paragraphs (vi) through (ix) are redesignated (v) through (viii) respectively. Newly redesignated paragraph (b)(1)(vii) is amended by adding the words "as determined by averaging such activity over the certification period" before the word "shall" in the last sentence. In addition, paragraph (b)(2)(i) is revised to read as follows:

* * * * *

(b) *Exemptions from work registration.* * * *

(2)(i) Persons losing exemption status due to any changes in circumstances that are subject to the reporting requirements of § 273.12 (such as a loss of employment that also results in a loss of income of more than $25 a month, or departure from the household of the sole dependent child for whom an otherwise nonexempt household member was caring) shall register for employment when the change is reported. If the State agency does not use a work registration form, it shall annotate the change in the member's exemption status. If a work registration form is used, the State agency shall provide the participant with a work registration form when the change it reported. Participants shall be responsible for returning the form to the State agency within 10 calendar days from the date the form was handed to the household member reporting the change in person, or the date the State agency mailed the form. If the household fails to return the form, the State agency shall issue a notice of adverse action stating that the household is being terminated but that the household can avoid termination by returning the form.

* * * * *

5. In § 273.7, paragraph (c) is revised to read as follows:

* * * * *

(c) *State agency responsibilities.*—(1) *Registration procedures.* Upon reaching a determination that an applicant or a member of the applicant's household is required to register, the State agency shall explain to the applicant the work registration and job search requirements, his or her rights and responsibilities, and the consequences of failure to comply. The State agency shall permit the applicant to complete a record or form for each household member required to register for employment in accordance with paragraph (a) of this section. The applicant must sign a form attesting that he or she will inform the work registrants in the household that a record has been completed on their behalf, and that they will describe the work registration and job search requirements and the consequences of failure to comply to those registrants. Household members are considered to have registered when an identifiable work registration form is submitted to the State agency or when the registration of these members is otherwise annotated or recorded by the State agency.

(2) *Other responsibilities.* After the household is certified, the State agency shall be responsible for taking the following actions:

(i) Establishing, and monitoring the job search requirements established in § 273.7(f) of this section.

(ii) Disqualifying work registrants who fail to comply, with good cause, with either the job search requirements established in § 273.7(f) or the additional work requirements established in § 273.7(e).

(iii) Deregistering those work registrants who obtain employment or otherwise become exempt from the work registration requirement subsequent to registration, who are no longer certified for participation in the Program, or who move from the area.

(3) *Reporting requirements.* The State agency shall collect and maintain information on the number of individuals registered for work, the number of registrants actively engaged in job search, the number of registrants who find jobs, and the number of participants disqualified because of noncompliance with any of the work registration requirements. This information shall be reported annually to FNS Regional Offices.

* * * * *

6. In § 273.7, paragraph (d) is removed and reserved.

7. In § 273.7 paragraph (e)(1) is amended by removing the words "appropriate State employment service office" and inserting, in their place, the words "State agency." Paragraphs (e)(2) and (e)(3) are amended by removing the words "State employment service office" and inserting in their place, the words "State agency." In addition, paragraph (e)(4) and the first sentence of paragraph (e)(5) are revised to read as follows:

* * * * *

(e) *Additional work requirements.*

* * *

(4) Accept a bona fide offer of suitable employment, as defined in paragraph (i) of this section, whether referred by the State agency or located by the registrant; and

(5) Continue suitable employment.

* * *

* * * * *

8. In § 273.7 paragraph (f) is revised to read as follows:

* * * * *

(f) *Job search.* Persons required to register for work shall be subject to the appropriate job search requirements discussed below. The State agency may require Program applicants to conduct job search. Failure to comply with the job search requirements, without good cause, shall result in household disqualification or denial as established in paragraph (g) of this section. A State agency opting to require job search of applicants shall not delay disposition of the application pending proof of compliance with this requirement. For the remainder of section (f) the term "State agency" shall be interpreted as the agency or organization designated by the State agency administering the Food Stamp Program to administer the job search requirements.

(l) *Job search assignment.* (i) Based on the immediate employability of the participant, which may include such factors as his or her age, physical condition, ability or inability to speak English, current enrollment in job training programs, and recent employment history, as well as the distance he or she lives from potential employers and the job market situation in the area, the State agency shall require each work registrant to contact an assigned number of potential employers per month. The State agency may thus intensify the registrants' job search activities at the time(s) it believes the job search would be most effective, taking into account such factors as job market conditions and the registrant's skills and experience. The State agency may reduce the number of required contacts for particular registrants if economic or personal circumstances warrant. The State agency could suspend job search and then resume it later if factory closings or other circumstances made it likely that the job search period for that individual would be most productive at a subsequent time.

(ii) The State agency shall determine the number of job contracts required of work registrants based on information collected at the time of application or it may schedule a subsequent assessment interview after the household is certified to determine the work registrant's job contact assignment. If the State agency chooses to schedule assessment interviews, the interview shall be held and a determination of the number of job search contacts to be required shall be made within two weeks of the date the household is certified. To preclude unnecessary trips to the local food stamp office, those persons who are exempt from job search shall not be required to report to an interview. Accordingly, the determination of exempt status shall be made before an assessment interview is scheduled. To schedule an assessment interview, the State agency shall send the registrant a letter informing the registrant of the date of the interview, that appearance for an interview is a condition of participation in the Food Stamp Program, that failure to attend the interview without good cause or without first contacting the State agency will result in the State agency taking action to disqualify the entire household.

(iii) If the work registrant fails without good cause to appear for the interview or has not contacted the State agency in advance to reschedule the interview, the State agency shall send the household a notice of adverse action. The State agency shall include with the notice of adverse action a written explanation of the household's obligation to contact the State agency prior to the expiration of the advance notice period to reschedule the missed interview and of the consequences of failing to do so. If the work registrant does not contact the State agency to reschedule the interview or to request a fair hearing before the advance notice period expires, the State agency will disqualify the household in accordance with paragraph (g) of this section. The State agency may establish alternative methods for scheduling or rescheduling interviews as long as the registrant is afforded an opportunity to reschedule a missed interview and the timeframes established by this paragraph and by paragraph ii are met. A missed interview shall be rescheduled only once; if the rescheduled interview is missed, the State agency shall send the household a notice of adverse action notifying the household of the disqualification and of their right to a fair hearing.

(iv) The State agency shall provide work registrants with written notification regarding their job search requirements, procedures to be followed, and consequences of failure to comply. Work registrants shall also be informed about the manner in which job contacts must be reported to the State agency in accordance with paragraph (f)(5) of this section. The notification required in this paragraph shall be provided either at the time of the assessment interview or shall be mailed to the household when the job search assignment is determined. This notification shall be provided at the time of application, if the State agency opts to require job search of applicants as well as of recipients.

(2) *Requirements.* (i) The job search requirements are effective for 12 months starting with the month of initial registration or, at the time of application if the State Agency chooses to require job search activities to be conducted by Program applicants. Once an individual is deregistered, any new registration for that individual constitutes a new 12 month timeframe for which new job search assignments would be made. A participant would be reregistered, for example, after losing a work registration exemption or reentering the Food Stamp Program after a period of absence. If the State agency is aware that a registrant has been registered more than once in a 12-month period, it shall consider the registrant's previous job search activity during the 12-month period, and the anticipated impact of additional job search, in determining the registrant's new job search requirements.

(ii) Registrants subject to the job search requirements must take the following actions:

(A) Contact, as required by the State agency, a specified number of prospective employers each month. A referral to an employer, SESA, or a training program as authorized in paragraph (f)(5) of this section, shall be considered a job contract or job contracts for Food Stamp Program purposes, provided the registrant presents himself/herself to the employer, SESA or training program as

VOL 48 ISS 101 MY 24 1983 UMI

described in paragraph (f)(4) of this section.

(B) Report job contacts to the State agency. Job contacts shall be reported in writing to the State agency as specified in paragraph (f)(5) of this section.

(C) Attend follow-up or reassessment interviews which may be scheduled by the State agency in accordance with paragraph (f)(3) of this section.

(3) *Follow-up and reassessment activities.* (i) State agencies may schedule periodic follow up interviews for such purposes as reviewing job contacts made by the work registrant, reviewing job listings for potential referrals, and assisting the work registrant in establishing his or her future plans for seeking employment. State agencies may also schedule interviews to reassess the number of job contacts the work registrant is required to make. The follow-up interviews could also be used to reassess work registrants' job contact assignments.

(ii) To schedule a follow-up interview the State agency shall send the registrant a letter informing the registrant of the date of the interview, that appearance for the interview is a condition of participation in the Food Stamp Program, and that failure to attend the interview without good casue will result in the State agency taking action to disqualify the entire household. If the work registrant fails to appear for the interview without good cause or has not contacted the State agency in advance to reschedule this interview, the State agency shall send the household a notice of adverse action. The State agency shall also include with the notice of adverse action a written explanation of the household's obligation to contact the State agency prior to the expiration of the advance notice period to reschedule the missed interview and the consequences of failing to do so. If the work registrant does not contact the State agency to reschedule the interview or to request a fair hearing before the advance notice period expires, the State agency shall disqualify the household in accordance with paragraph (g) of this section.

(4) *Job contact.* To qualify as a job contact, two conditions must be met. First, the work registrant must present himself or herself to a prospective employer as available for work. Second, the prospective employer must ordinarily employ persons in areas of work that meet the suitability requirements discussed in paragraph (i) of this section and for which the work registrant is reasonably qualified by means of experience, training or ability. Depending upon the position being sought, the job contact requirement may be fulfilled by either a personal visit to the prospective employer or another method of aplication which is considered by the State agency to be generally accepted practice. The work registrant cannot contact the same employer in subsequent weeks unless the initial contact indicated that vacancies in suitable job positions may soon exist.

(5) *Reporting job contacts.* Job contacts shall be reported in writing in a manner prescribed by the State agency. At the time of the assessment interview or at the time the job contact assignment is determined, the work registrant shall be told about the manner of reporting. States agencies may confirm one or more of the reported contacts with the listed employers. The State agency shall give the work registrant a reasonable period of time following the end of each month in which job contacts were required to submit the written report.

(6) Evaluating job contacts. The State agency shall evaluate on a monthly basis the work registrant's monthly job contact report to determine whether the work registrant has completed the assigned number of contacts in the month for which the report was submitted. The work registrant who failed to complete the required number of contacts without good cause shall not be allowed additional time to complete the required contacts unless the State agency fails to accept, for reasons such as suitability or manner of contact, job contact(s) reported by the registrant. In this case, the State agency shall send the registrants a letter explaining which job contacts were disallowed and why these contacts were not accepted. The letter shall also inform the registrants that they would be allowed two weeks from the receipt of this letter to make up the disallowed contacts and to report these contacts to the State agency. The State agency shall provide the registrants with a form on which to report the made up contacts.

(7) Optional State agency referrals. State agencies may provide the work registrant with job market information (such as a list of job market opportunities) and/or referrals to available employment, Job Finding Clubs, and/or training opportunities. However, the number of State agency referrals added to the number of required independent job contacts shall not exceed the limitations set forth in paragraph (f)(2)(A) of this section.

(8) *Contracting with employment agencies.* State agencies may contract with State Employment Security Agencies (SESA's) or other public or private employment agencies to proivde the work registration and job search services required by this section. State agencies which choose to contract with employment agencies shall be responsible for ensuring that the work registration and job search procedures are administered in accordance with the requirements of this section.

* * * * *

9. In § 273.7, paragraph (g) is revised to read as follows:

* * * * *

(g) *Failure to comply.* (1) If a State agency opts to require job search at time of application, and the State agency determines, prior to certification, that a registrant required to job search has not complied, without good cause, then the household's application shall be denied for a period of 90 days beginning with the date of application. The household shall be advised of the reason for the denial and of its right to reapply and/or to request a fair hearing. If the applicant's noncompliance is determined after certification then disqualification shall be calculated as for any other participating household as described in paragraph (g)(2) of this section.

(2) If the State agency determines that a household member has refused or failed without good cause to comply with the requirements of this section, the entire household shall be ineligible to participate for 90 days or 3 calendar months, as provided in this paragraph. The 90 day disqualification period may be converted to a 3 calendar month period only for participating households. Such ineligibility shall continue as outlined in paragraph (h) of this section. Prior to disqualifying the household, the State agency shall be responsible for contacting the work registrant to determine whether good cause existed for the noncompliance, as discussed in paragraph (m) of this section. However, in cases where a work registrant fails to attend a scheduled assessment or follow-up interview without first contacting the State agency, it shall be the household's responsibility to contact the State agency to demonstrate good cause for not being able to attend an interview or to reschedule the missed interview. Within 10 days from the date the State agency determines that a work registrant has failed to comply with the requirements of this section, the State agency shall provide the household with a notice of adverse action, as specified in § 273.13. Such notification shall contain the proposed period of disqualification and shall specify that the household may reapply at the end of the disqualification period. Information shall also be included with the notification on the procedures and requirements to end the disqualification as contained in paragraph (h) of this section. The disqualification period for participating households shall begin with the first of the month following the expiration of the adverse notice period, unless a fair hearing is requested, or, in the case of a missed first interview, a rescheduled interview is requested. For those households which leave the Program before the sanction can be levied, the sanction shall not be imposed until the household returns to the Program.

(3)(i) Each household has a right to a fair hearing to appeal a denial, or termination of benefits due to a determination of nonexempt status, or a determination of failure to comply with the work registration and job search requirements of this section. The household can appeal such actions as State agency refusal to accept an action as a job search contact, or refusal to make a finding of good cause, if the household believes that a finding that the household has failed to comply has resulted from improper decisions on these matters.

(ii) If the administration of the work program is contacted out, and a fair hearing is scheduled, the State agency shall provide the agency administering the work program sufficient advance notice to either permit the attendance of an agency representative or ensure that an agency representative will be available for questioning over the phone during the hearing. The administering agency shall be available to participate in the hearing through one of these means. The availability of an agency representative for questioning over the phone shall be sufficient, unless the hearing official determines prior to the hearing (after examining the facts of the case and pursuant to a request for such a ruling by the household) that, taking into account the nature of the issues in dispute and the nature and importance of the evidence to be given by the agency representative, fairness requires that the household be given an opportunity to confront the agency representative in person. Such a determination should be necessary in only a very small number of cases. A household shall be allowed to examine the casefile maintained by the agency administering the work program at a reasonable time before the date of the fair hearing, except for confidential information (which may include test results) that the agency determines should be protected from release. Information not released to a household may not be used by the State agency or the agency administering the work program at the fair hearing.

* * * * *

10. In § 273.7, paragraph (h) is revised to read as follows:

* * * * *

(h) *Ending disqualification.* Following the end of the 90 day or 3 month disqualification period for noncompliance with the work registration, job search, or comparable WIN, unemployment compensation, or alternate procedures requirements prescribed under paragraphs (e), (f), and (k)(2) of this section, a household may resume participation if it applies again and is determined eligible. Eligibility may be reestablished during a disqualification period and the household shall (if otherwise eligible) be permitted to resume participation if the member who caused the disqualification becomes exempt from the work requirement in accordance with paragraph (b) of this section or is willing to comply with § 273.7 of these regulation. In these cases, the household shall be permitted to file an application before the end of the disqualification period. Should a household which has been determined to be noncompliant without good cause split into more than one household, the sanction shall follow all the members of the household at the time of the noncompliance. None of those household members shall be eligible to participate in the food stamp program for the length of the sanction beginning at the point when the sanction can be placed against any one of them. If a sanctioned household member joins another food stamp household, that household's eligibility and benefit level shall be determined by treating the sanctioned member's income and resources as specified in paragraph 273.11(c) for treating the income and resources of household members excluded because of disqualification for intentional Program violation or for failure to comply with workfare requirements. If an application for participation in the Program is filed in the third month of disqualification, the State agency shall in accord with § 273.10(a)(3) use the same application for the denial of benefits in the remaining month of disqualification and certification for any subsequent month(s) if all other eligibility criteria are met.

* * * * *

11. In § 273.7, paragraph (i)(2)(iii) is removed and paragraphs (i)(2)(iv) and (i)(2)(v) are redesignated as paragraphs (i)(2)(iii) and (i)(2)(iv) respectively. In addition the second sentence of newly designated paragraph (i)(2)(iii) is removed.

12. In § 273.7, the title of paragraph (k) and the introductory text of paragraph (k)(1) are revised, a title is added to paragraph (k)(1), paragraph (k)(1)(i) is revised, paragraph (k)(1)(iii) is redesignated as (k)(1)(iv), a new paragraph (k)(1)(iii) is added, and paragraph (k)(2) is revised. The revisions and additions read as follows:

* * * * *

(k) *Alternate work registration procedures.* (1) *Requirements for substituting alternate procedures.* State agencies may, in accordance with the provisions of this paragraph, substitute State or local procedures for work registration procedures. Work requirements imposed on refugees participating in refugee resettlement programs, including but not limited to the Indochinese Refugee Assistance Program, may also be substituted. The alternate requirements shall only be substituted however, under the following conditions:

(i) The alternate requirements are not less stringent than food stamp work registration requirements.

* * * * *

(iii) Households who are being disqualified for failure to comply with the alternate requirements are provided the same fair hearing rights as households who are found to have violated the food stamp work registration requirements.

* * * * *

(2) *Failure to comply with a comparable WIN, unemployment compensation or alternate procedures work requirement.* A household containing a member who was exempted from work registration in accordance with paragraph (b)(1)(iii) or (b)(1)(vi) of this section because he or she was registered for work under WIN, unemployment compensation or alternate procedures work requirements and who fails to comply with a WIN, unemployment compensation, or alternate procedures requirement comparable to a food stamp work registration or job search rule shall be treated as though the member had failed to comply with the corresponding food stamp requirement.

(i) If the State agency is informed by the agency administering the comparable work requirement that a household member has refused or failed without good cause to comply with a WIN work registration or an alternate procedures requirement, the State agency shall determine whether the requirement was comparable. Similarly,

VOL
48
ISS
1
0
1
M Y
2 4
1983
UMI

if the household reports the loss or denial of unemployment compensation or if the State agency otherwise learns of such loss or denial, the State agency will determine whether the loss or denial was caused by a determination by the administering agency that a household member refused or failed without good cause to comply with an unemployment compensation work registration requirement and, if so, whether the requirement was comparable to a food stamp work registration or job search requirement. The WIN, unemployment compensation, or alternate procedures requirement would not be considered comparable if it placed responsibilities on the household which exceeded those imposed by the food stamp work registration rules.

(ii) If the State agency determines that the requirement was comparable, the entire household shall be disqualified in accordance with the following provisions. The State agency shall provide the household with a notice of adverse action as specified in § 273.13 within 10 days after being informed, by the agency administering the work requirement, of the WIN noncompliance or 10 days after learning of the household member's noncompliance with the unemployment compensation or alternate work registration procedures requirement. The notice shall comply with the requirements of paragraph (g) of this section. A household shall not be disqualified from participation if the noncomplying member meets one of the work registration exemptions provided in § 273.7(b) other than the exemptions provided in paragraphs (b)(1)(iii) and (b)(1)(vi). Household members who fail to comply with a non-comparable WIN, unemployment compensation, or alternate procedures requirement, shall lose their exemption under paragraph (b) of this section and must register for work if required to do so in paragraph (a) of this section.

(iii) If a determination by the agency administering the work requirement that a household member failed to comply with a comparable WIN, unemployment compensation or alternate work registration requirement leads to a denial, or termination of the household's food stamp benefits, the household has a right to a fair hearing in accordance with the provisions of paragraph (g) of this section.

(iv) A disqualified household may resume participation in the program in accordance with paragraph (h) of this section.

* * * * *

13. In § 273.7, paragraph (m) is revised to read as follows:

* * * * *

(m) *Determining good cause.* The State agency shall be responsible for determing good cause in those instances where the work registrant has failed to comply with the work registration, job search, and voluntary quit requirements of this section. In determining whether or not good cause exists, the State agency shall consider the facts and circumstances, including information submitted by the household member involved and the employer. Good cause shall include circumstances beyond the member's control, such as, but not limited to, illness, illness of another household member requiring the presence of the member, a household emergency, the unavailability of transportation, or the lack of adequate child care for children who have reached age six but are under age 12.

* * * * *

14. In § 273.7, the introductory text of paragraph (n), the title of paragraph (n)(1), and paragraph (n)(1)(i) are revised; a title is added to paragraph (n)(1)(ii); paragraph (n)(1)(iii) is revised; paragraph (n)(1)(iv) is removed; paragraph (n)(2) is revised, and new paragraphs (n)(5) and (n)(6) are added. The revisions and additions read as follows:

* * * * *

(n) *Voluntary Quit.* No household whose primary wage earner voluntarily quit his or her most recent job without good cause shall be eligible for participation in the Program as specified below. At the time of application, the State agency shall explain to the applicant the consequences of the household's primary wage earner quitting his or her job without good cause.

(1) *Processing applications and reporting forms.*—(i) *Determining whether a voluntary quit occurred.* When a household files an application for participation, and when a participating household reports the loss of a source of income, the State agency shall determine whether any household member quit his or her job. Quitting a job means quitting employment which involves 20 hours or more per week or which provides weekly earnings equivalent to the Federal minimum wage multiplied by 20 hours. Changes in employment status that result from reducing hours of employment while working for the same employment enterprise or resigning from a job at the demand of the employer will not be considered a voluntary quit for purpose of this subsection. An employee of the Federal government, or of a State or local government who participates in a strike against such government, and is dismissed from his or her job because of participation in the strike shall be considered to have voluntarily quit his or her job without good cause.

(A) In the case of an applicant household, the State agency shall determine whether any currently unemployed (i.e, employed less than 20 hours per week or receiving less than weekly earnings equivalent to the Federal minimum wage multiplied by 20 hours) household member who is required to register for work has voluntarily quit his or her most recent job within the last 90 days. If the State agency learns that a household has lost a source of income after the date of application but before the household is certified, the State agency shall determine whether a voluntary quit occurred.

(B) In the case of a participating household, the State agency shall determine whether any household member voluntarily quit his or her job while participating in the program.

(ii) *Determining whether the voluntary quit was by the household's primary wage earner.* * * *

(iii) *Determining good cause.* Upon a determination that the primary wage earner voluntarily quit employment, the State agency shall determine whether the voluntary quit was with good cause as defined in paragraph (n)(3) of this section.

(2) *Exemption from voluntary quit provisions.* Person who are exempt from the full time work registration provisions as stated in § 273.7(b) shall be exempt from the voluntary quit provisions.

* * * * *

(5) *Disqualification period.* If the State agency determines that the voluntary quit of a household's primary wage earner was not for good cause, the household shall be denied participation in the program as specified below.

(i) If the State agency determines that the primary wage earner of an applicant household voluntarily quit his or her job, within the last 90 days the household's application shall be denied for a period of 90 days beginning with the date of the quit. The household shall be advised of the reason for the denial and of its right to reapply and/or to request a fair hearing.

(ii) If the State agency determines that the primary wage earner of a participating household voluntarily quit his or her job, while participating in the Program, the State agency shall provide the household with a notice of adverse action as specified in § 273.13 within 10 days after the loss of a source of income was reported. Such notification shall contain the proposed period of disqualification and shall specify that the household may reapply at the end of the disqualification period. The disqualification period shall be for three months or 90 days beginning with the first of the month after all normal procedures for taking adverse action have been followed. The 90 day disqualification period may by converted to a three calendar month period only for participating households. For those households which leave the Program before the sanction can be levied the sanction shall not be imposed until the household returns to the Program. Each household has a right to a fair hearing to appeal a reduction or termination of benefits due to a determination that the household's primary wage earner voluntarily quit his or her job without good cause. If the participating household requests a fair hearing and the State agency determination is upheld, the disqualification period shall begin the first of the month after the hearing decision is rendered. Eligibility may be reestablished during the disqualification period, however, in accordance with paragraph (n)(6)(ii) of this section.

(6) *Ending disqualification.* (i) Following the end of the disqualifcation period, a household may begin participation in the program if it applies again and is determined eligible.

(ii) Eligibility may be reestablished during a disqualification period and the household shall (if otherwise eligible) be permitted to resume participation if the member who caused the disqualification returns to the terminated employment at the same wages if still available, secures any other employment which yields earnings per week equivalent to the terminated job, or becomes exempt from the work registration requirement in accordance with one of the exemption provided in § 273.7(b) other than the exemptions provided in paragraphs (B)(1)(ii) and (b)(1)(vi) of that section. Should a household which has been determined to be noncompliant without good cause split into more than one household, the sanction shall follow all the members of the household at the time of the noncompliance, None of those household members shall be eligible to participate in the food stamp program for the length of the sanction beginning at the point when the sanction can be placed against any one of them. If a sanctioned household member joins another food stamp household, that household's eligibility and benefit level shall be determined by treating the sanctioned household member's income and resources in accordance with the procedures in § 273.11(c) for treating the income and resources of excluded household members.

(iii) If an application for participation in the Program is filed in the third month of disqualification, the State agency shall in accordance with § 273.10(a)(3) use the same application for the denial of benefits in the remaining month of disqualification and certification for any subsequent month(s) if all other eligibility criteria are met.

15. In § 273.9, the first sentence of paragraph (b)(3) is revised as follows:

§ 273.9 Income and deductions.

* * * * *

(b) *Definition of income.* * * *

(3) The earned or unearned income of an individual disqualified from the household for intentional Program violation, in accordance with § 273.16, or as a result of a sanction imposed while he/she was participating in a household disqualified for failure to comply with workfare requirements, in accordance with § 273.22, or in a household disqualified for failure to comply with work registration or job search requirements, in accordance with § 273.7, shall continue to be attributed in their entirety to the remaining household members. * * *

* * * * *

16. In § 273.11 the first sentence of paragraph (c) is revised to read as follows:

§ 273.11 Action on houssholds with special circumstances.

* * * * *

(c) *Treatment of income and resources of disqualified members.* Individual household members may be disqualified for failing to comply with work registration, job search or workfare requirements, for fraud, for refusal to obtain or to provide an SSN, or for being an ineligible alien. * * *

* * * * *

17. In § 273.11, paragraph (c)(1) is revised to read as follows:

* * * * *

(c) *Treatment of income and resources of excluded members.* * * *

(1) *Excluded for intentional Program violation disqualification or workfare, work registration or job search sanction.* The eligibility and benefit level of any remaining household members of a household containing individuals excluded because of disqualification for intentional Program violation or due to imposition of a sanction while they were participating in a household disqualified for failure to comply with workfare, work registration or job search requirements shall be determined as follows: * * *

* * * * *

18. In paragraph § 273.22, paragraph (e)(1)(iii) is revised as follows:

§ 273.22 Optional workfare program.

* * * * *

(e) *Household responsibilities.* * * *

(1) *Persons subject to workfare* * * *

(ii) A parent or other caretaker of a child under 18 in a household where there is another able-bodied parent who is subject to the workfare requirements shall be exempt from workfare requirements. If a child has its 18th birthday within a certification period, the parent or caretaker must fulfill the workfare requirement as part of the next scheduled recertification process, unless the parent or caretaker qualifies for another exemption.

Flue-Cured Tobacco Acreage Allotment and Marketing Quota Regulations and Burley Tobacco Marketing Quota Regulations

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Proposed rules; extension of comment period.

SUMMARY: On April 22, 1983, proposed rules were published in the **Federal Register** (48 FR 17528 and 48 FR 17532) to implement the provisions of the No Net Cost Tobacco Program Act of 1982 with respect to the sale or forfeiture of burley tobacco quotas and flue-cured tobacco acreage allotments and marketing quotas which are established for farms owned by persons other than individuals. This document extends the comment period period with regard to those proposed rules. Several requests have been made to extend the comment period in order to allow ample time for evaluation of the proposals by those who may be affected.

DATE: Comments must be received on or before June 22, 1983 in order to be assured of consideration.

ADDRESS: Send comments to the Director, Tobacco and Peanuts Division, ASCS, Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. All written submissions made pursuant to the proposed rules will be made available for public inspection in Room 5750 South Building, USDA, between the hours of 8:15 a.m. and 4:45 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Jack S. Forlines, Agricultural Program Specialist, Tobacco and Peanuts Division, USDA–ASCS, P.O. Box 2415, Washington, D.C. 20013: (202) 382–0200.

SUPPLEMENTARY INFORMATION: The proposed rules published on April 22, 1983 provided that written comments must be submitted on or before May 23, 1983 in order to be assured of consideration. Several requests have been made to extend the comment period in order to allow ample time for evaluation of the proposals by those who may be affected. Therefore, the comment period is being extended an additional 30 days from May 23, 1983.

Signed at Washington, D.C. on May 20, 1983.

Merrill Marxman,

Acting Administrator, Agricultural Stabilization and Conservation Service.

BILLING CODE 3410-05-M

FEDERAL TRADE COMMISSION

16 CFR Part 437

Termination of Proposed Trade Regulation; Rule on Food Advertising

AGENCY: Federal Trade Commission.

ACTION: Termination or rulemaking proceeding.

SUMMARY: The Federal Trade Commission has decided to terminate its rulemaking proceeding concerning food advertising, 39 FR 39842 (November 11, 1974); 40 FR 23686 (May 28, 1975); 41 FR 8980 (March 2, 1976). However, the areas which would have been covered by the proposed rule will continue to be scrutinized by the Commission on a case-by-case basis.

FOR FURTHER INFORMATION CONTACT: Andrew Sacks, Attorney, Division of Advertising Practices, Federal Trade Commission, Washington, D.C. 20580 (202) 724–1524.

SUPPLEMENTARY INFORMATION: On December 17, 1982, the Commission decided to terminate its proposed trade regulation rule on food advertising. The proposed rule would have regulated energy and weight control claims, fatty acid and cholesterol claims, and "natural food" claims. The termination includes all phases of the rulemaking proceeding. However, the areas which would have been covered by the proposed rule will continue to be scrutinized by the Commission on a case-by-case basis.

In addition, the Director of the Bureau of Consumer Protection was instructed to submit a Report to the Commission within six months, recommending an overall strategy to approaching this matter on a case-by-case basis, with an emphasis on potential actions, if warranted, in the fatty acid and cholesterol claims area.

By direction of the Commissions.

Carol M. Thomas,

Secretary.

Separate Statement of Chairman James C. Miller III

In view, it is entirely appropriate for the Commission to scrutinize nutrition claims of the kind the proposed rule would regulate. Consumers can be deceived by misleading nutritional advertising because it is often difficult to evaluate such claims. However, I do not think that a rulemaking proceeding is the appropriate way for the Commission to address this problem. In my view, a rule should be promulgated only when there is evidence that the problems it addresses are so widespread that the benefits of the rule justify the regulatory burdens it would impose. The record does not support the conclusion that the nutritional claims in food advertising fall into this category.

The alternative to a rulemaking proceeding is to deal with the problems that exist on a case-by-case basis, vigorously pursuing individual violations as they are identified. Such an approach is likely to provide more protection for consumers, more quickly, with less risk of offsetting harm to consumers and unjustified burden on businesses.

The advantages of a case-by-case approach are most apparent in considering the staff's proposal which would require advertising discussing the link between diet and heart disease to disclose that the subject is not free from controversy. Certainly, we should act against advertising that overstates the evidence concerning the diet-heart relationship, since consumer injury may result from such advertising. We cannot, however, conclude that all advertising that mentions the relationship overstates it. There is no evidence that consumers are unaware of the controversy, or that they misinterpret the simple statement that many doctors recommend less cholesterol. Moreover, it is doubtful whether consumers will correctly understand the disclosure that some experts disagree. If consumers interpret this disclosure to mean that new evidence casts the hypothesis in greater doubt, our rule would mislead them.

In any case, despite controversy, numerous public health authorities have recommended a prudent diet, with less fat and cholesterol. Even if it turns out that there is no relationship between diet and heart disease, the consequences of mistakenly following the prudent diet appear to be insignificant. On the other hand, if consumers are dissuaded from following such a diet and a relationship to heart disease is substantiated, more people will die. Forcing all ads to mention the controversy could reduce this type of advertising substantially, or make it less effective. In either case, fewer consumers might resort to the prudent diet, to their detriment. Our responsibility to the public requires that we not take this risk. Less advertising about this important problem could injure consumers, not protect them.

Closely related to this concern is the possible chilling effect of requiring advertisers to mention that foods with reduced cholesterol nevertheless contain fat. There is no evidence that consumers misinterpret advertising references to no cholesterol. Moreover, to the extent this rule would discourage references to cholesterol levels, it would deprive consumers of useful information to help them distinguish products that contain both cholesterol and fat from those that are at least low in cholesterol.

The proposed rule would also define "natural" foods as those with no artificial ingredients and only minimal processing. Quite aside from the significant difficulties that would be posed in enforcing this rule, a fundamental problem exists by virtue of the fact that the context in which "natural" is used determines its meaning. It is unlikely that consumers expect the same thing from a natural apple as they do from natural ice cream. The proposed rule assumes, without any evidence, that "natural" means the same thing in every context. We should concentrate our resources on more serious consumer protection problems than addressing whether a claim that "milk is a natural," is deceptive.

The last section of the rule concerns energy and calorie claims. The most significant information this section would provide is that foods that provide energy also contain calories. For those who are interested, this information is readily available on product labels. Those who are not interested now are unlikely to find the same information more useful in advertising.

Finally, we should keep in mind that the proposed rule concerns advertising, *not* labeling. Significant information, such as the specific number of calories in foods advertised as low calorie, is already contained on product labels. Thus, consumers have ready access to much of the information covered in the food rule at the point of sale, where it is of most value to the decision to purchase.

Separate Statement of Commissioner Michael Pertschuk

Two years ago, this Commission approved in principle a modest proposal aimed at food advertising claims which appealed to the public's concern about diet and health. The thrust of the rule was straightforward:

advertisements promoting beneficial health and diet features of food products could not deceptively cover up adverse health and diet facts about those products.

The evidence has not changed in the last two years. The policy considerations have not changed in the last two years. If anything, rising popular and medical concern with diet and health makes action in this area all the more important. I saw no basis for a reconsideration of the decisions we made two years ago. I was, however, willing to consider amendments to meet concerns other Commissioners might have had. Now there is no longer a majority on the Commission to support *any* form or part of a rule, however modified and however modest, and it would be pointless to maintain the facade of an "active" rulemaking proceeding. Therefore, I reluctantly agreed to terminate it.

This abdication invites a free-for-all for deceptive health claims for food—claims which will cynically exploit and distort growing public concern with diet and health. Advertisers will continue to spend fortunes to promote high fat foods as healthful, highly processed foods as natural, and high calorie foods as "dietetic" or as miracle energy tonics. The very fact that these claims continue to proliferate is evidence that they are effective in getting consumers to buy—and often to pay a premium. We do not need lawyers or economists to obscure the plain evidence of our senses.

It may well be a cornerstone of a free market that consumers have an inalienable right to clog up their arteries if they want to do so. But it seems to me that there are two modest proposals that should go along with that freedom. One is that consumers, particularly those looking for healthful alternatives, not be misled by deceptive health claims for food. The other is that consumers should be informed about the risks associated with those choices.

I cannot say I'm entirely surprised to find the Commission abandoning those goals today. While professing general support for the Commission's consumer education program, the Reagan deregulators at the FTC oppose the role of the FTC as a "consumer educator" in the food area. They obstensibly prefer such education to come from voluntary groups like the Network for Better Nutrition, which is a broad coalition of consumers, food manufacturers, and nutritional experts organized to promote better nutrition. Unfortunately, the Reagan administration, including Chairman Miller, withheld critical support for the Network for Better Nutrition and the effort collapsed. Nutrition education is being left to the magic of the marketplace. Coming from an administration that once proposed ketchup as a nutritional vegetable, this policy is hardly surprising.

Preventing deception won't cure the nation's coronary disease epidemic. But the claims that are a part of this record certainly do not help. For all of his concerns about cost, Chairman Miller ignores the costs of not acting. How many millions of dollars will now be spent by consumers under the illusion they are buying the good health that food ads promise but can't deliver?

I do not disagree with Chairman Miller's belief that a regulation should be issued only if there is proof that the proposed rule is needed and that the benefits will exceed the costs. Indeed, the FTC was engaging in exactly such a careful balancing of costs and benefits long before his arrival.

My fundamental disagreement is with the application of this standard. The novel evidentiary standard for rulemaking embraced by the Chairman would require every issue to be independently supported by statistical evidence of nearly scientific purity. In rejecting the food advertising rule, the majority of the Commission indicated that it was not adopting those evidentiary standards. In my view, that is a wise choice, since those standards would likely prevent the Commission, or any decision-maker, from ever having sufficient evidence to do anything.

BILLING CODE 6750-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76-158 (Texas—28)]

High-Cost Gas Produced From Tight Formation; Correction

May 19, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking; correction.

SUMMARY: This document corrects a notice of proposed rulemaking that concerned high-cost gas produced from tight formations, Docket No. RM79-76-158 (Texas—28). The notice of proposed rulemaking appeared in the **Federal Register** on January 5, 1983 (48 FR 423); and contained an incorrect acreage description.

FOR FURTHER INFORMATION CONTACT: Steven Ross, Office of General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, (202) 357–8571.

The following restates and corrects the description of the recommendation as well as the delineation of the formation, in FR DOC. 83–1250, appearing on pages 423 and 424, respectively. On page 423, the first paragraph of the description of the formation should read as follows:

"II. Description of Recommendation

Texas recommends that the Vicksburg (12,000 Boyt Sand) Formation in Hidalgo County, Texas, Railroad Commission District 4, be designated as a tight formation. The recommended area is within a 2.5 mile radius, centered roughly 1670 feet south of the CNG Producing Company Boyt No. 1 well and consisting of approximately 12,000 acres. The center point of this radius is located 18,725 feet south and 1,800 feet east of the northwest corner of the Dyonisio Ramirez Porcion 78, Abstract No. 563, Hidalgo County, Texas."

On page 424, the delineation of the formation should read as follows:

"(154) *Vicksburg (12,000' Boyt Sand) Formation in Texas.* RM79–76–158 (Texas—28).

(i) *Delineation of formation.* The Vicksburg (12,000' Boyt Sand) Formation is located in Hidalgo County, Texas, Railroad Commission District 4. The designated area is within a 2.5 mile radius the center point of which is located 18,725 feet south and 1,800 feet east of the northwest corner of Dyonisio Ramirez Porcion 78, Abstract No. 563."

Kenneth F. Plumb,

Secretary.

High-Cost Gas Produced From Tight Formations; Notice of Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of Colorado that the Dakota Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on July 5, 1983. Public Hearing: No public hearing is scheduled in this

docket as yet. Written requests for a public hearing are due on June 3, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Victor Zabel, (202) 357–8616.

SUPPLEMENTARY INFORMATION:

I. Background

On April 22, 1983, the State of Colorado Oil and Gas Conservation Commission (Colorado) submitted to the Commission as recommendation, in accordance with § 271.703 of the Commission's regulations (45 *FR* 56034, August 22, 1980), that the Dakota formation located in Mesa County, Colorado, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Colorado's recommendation that the Dakota Formation be designated a tight formation should be adopted. The United States Department of the Interior, Bureau of Land Management concurs with Colorado's recommendation. Colorado's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The Dakota Formation is located 20 miles east of the city of Grand Junction, Colorado, and underlies Township 11 South, Range 95 West, Sections 1 through 36, and Township 11 South Range 96 West, Sections 1 through 36, 6th P.M. The recommended area contains approximately 50,830 acres, of which 87% is federal land and 13% is fee land.

The Dakota Formation is defined as the formation that occurs between the top of the Morrison Formation and the base of the Mancos Shale. The top of the Dakota Formation is found at a depth of 7,300 to 8,900 feet in the recommended area and the average depth to the top of the formation is 8,100 feet. The average thickness of the Dakota Formation is 200 feet and the formation is of Cretaceous age.

III. Discussion of Recommendation

Colorado claims in its submission that evidence gathered through information and testimony presented at a public hearing in Cause No. NG–41 convened by Colorado on this matter demonstrates that:

(1) The average *in situ* gas permeability thoughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Colorado further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Colorado that the Dakota Formation, as described and delineated in Colorado's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E. Washington, D.C. 20426, on or before July 5, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76–197 (Colorado–36), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 3, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Colorado's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by paragraph (d)(177) to read as follows:

[Docket No. RM79–76–198 (Colorado-37)]

High-Cost Gas Produced From Tight Formations; Notice of Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of Colorado that the Morrison Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on July 5, 1983. Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on June 3, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Victor Zabel, (202) 357–8616.

SUPPLEMENTARY INFORMATION:

I. Background

On April 22, 1983, the State of Colorado Oil and Gas Conservation Commission (Colorado) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commisson's regulations (45 FR 56034, August 22, 1980), that the Morrison Formation located in Mesa and Garfield Counties, Colorado, be designated as a tight formation. Pursuant to § 271.793(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Colorado's recommendation that the Morrison Formation be designated a tight formation should be adopted. The United States Department of the Interior, Bureau of Land Management concurs with Colorado's recommendation. Colorado's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The Morrison Formation is located northeast of the city of Grand Junction, Colorado, and underlies portions of Townships 7 through 11 South, Ranges 95 through 100 West, 6th P.M. The recommended area contains approximately 581,036 acres, of which 72.2% is federal land, 27.5% is fee land, and 0.3% is state land.

The Morrison Formation is overlain by the Dakota Formation and consists of the upper Brushy Basin Member and the lower Salt Wash Member. The top of the Morrison Formation is found at depths of 6,300 to 9,800 feet in the recommended area and the average depth to the top of the formation is 8,050 feet. The thickness of the Morrison Formation varies from 400 to 600 feet and the formation is of Jurassic age.

III. Discussion of Recommendation

Colorado claims in its submission that evidence gathered through information and testimony presented at a public hearing in Cause No. NG–42 convened by Colorado on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Colorado further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Colorado that the Morrison Formation, as described and delineated in Colorado's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before July 5, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76–198 (Colorado-37), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 3, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Colorado's recommendation is adopted.

High-Cost Gas Produced From Tight Formations; Notice of Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the state of New Mexico that the Morrow Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on July 5, 1983. Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on June 3, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or Victor Zabel, (202) 357-8616.

SUPPLEMENTARY INFORMATION:

I. Background

On april 22, 1983, the State of New Mexico Energy and Minerals Department Oil Conservation Division (New Mexico) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Morrow Formation located in Eddy County, New Mexico, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether New Mexico's recommendation that the Morrow Formation be designated a tight formation should be adopted. The United States Department of the Interior, Bureau of Land Management concurs with New Mexico's recommendation. New Mexico's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The Morrow Formation is located in southeast New Mexico. The recommended formation includes all of Sections 25 and 36, Townships 23 South, Range 26 East, NMPM and consists of approximately 1,280 acres. The top of the Morrow Formation is found at an average depth of 11,553 feet and has approximately 190 feet of gross thickness.

III. Discussion of Recommendation

New Mexico claims in its submission that evidence gathered through information and testimony presented at a public hearing in Case No. 7784 convened by New Mexico on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed areas is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atomospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

New Mexico further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by New Mexico that the Morrow Formation, as described and delineated in New Mexico's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before July 5, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76-199 (New Mexico-24), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 3, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event New Mexico's recommendation is adopted.

Kenneth A. William,
Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraph (d)(180) to read as follows:

§ 271.703 Tight formations.

High-Cost Gas Produced from Tight Formations; Notice of Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Tennessee State Oil and Gas Board that the Monteagle Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on July 5, 1983. Public Hearing: No public hearing is scheduled in this docket as yet. Written request for a public hearing are due on June 3, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or Walter W. Lawson, (202) 357-8556.

SUPPLEMENTARY INFORMATION:

I. Background

On March 21, 1983, the Tennessee State Oil and Gas Board (Tennessee) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Monteagle Formation located in Morgan, Scott, and portions of Fentress Counties in the north-central part of the state of Tennessee, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Tennessee's recommendation that the Monteagle Formation in Morgan, Scott, and portions of Fentress Counties, be designated a tight formation should be adopted. Tennessee's recommendations and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Tennessee recommends that the Monteagle Formation encountered in Morgan, Scott, and portions of Fentress Counties, located on the Cumberland Plateau of the north-central part of the state of Tennessee, be designated as a tight formation. The designated interval represents a Mississippian age limestone with lesser amounts of dolomite, chert, and shale. The production zones of the Monteagle Formation are restricted to the oolitic sandstones of lenticular and elongate lime sand bodies deposited in a high energy environment.

The Monteagle Formation is overlain by the Hartselle Formation and is underlain by the St. Louis Dolomite Formation, both of Mississippian age. The depth to the top of the Monteagle Formation varies from 750 t0 2,050 feet with an average depth of 1,100 feet. The thickness varies from 180 to 250 feet.

III. Discussion of Recommendation

Tennessee claims in its submission that evidence gathered through information and testimony presented at a public hearing convened by Tennessee on the matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271,703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Tennessee further asserts that existing federal regulation assure that development of this formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980, notice is hereby given of the proposal submitted by Tennessee that the Monteagle Formation, described and delineated in Tennessee's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before july 5, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76-191 (Tennessee-1), and should give reasons, including supporting data, for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communication concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 3, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set

VOL 48 ISS 101 MY 24 1983 UMI

forth below, in the event Tennessee's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraph (d)(191) to read as follows:

§ 271.703 Tight formation.

* * * * *

(d) *Designated tight formations.*

* * * * *

18 CFR Part 271

[Docket No. RM79–76–195 (Texas–22 Addition IV)]

High-Cost Gas Produced From Tight Formations; Notice of Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Railroad Commission of Texas that the Strawn-Detrital Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on July 5, 1983. Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on June 3, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Walter W. Lawson, (202) 357–8556.

SUPPLEMENTARY INFORMATION:

I. Background

On April 4, 1983, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that additional areas of the Strawn-Detrital Formation in the Ozona, S.W. (Strawn) Field in Crockett County, Texas, be designated as a tight formation. On August 24, 1982, the Commission issued Order No. 249 in Docket No. RM79–76–111 (Texas-22), and on April 21, 1983, the Commission issued Order No. 295 in Docket Nos. RM79–76–150 (Texas-22 Addition) and RM79–76–157 (Texas-22 Addition II) in which the Commission designated as tight formations portions of the Strawn-Detrital in the University Block 31 (Strawn-Detrital) Field and the Howards Creek (Penn) Field and portions of the Detrital Formation in the Perner Ranch area. A recommendation is currently under consideration to designate additional areas of the Strawn-Detrital Formation in the University Block 31 (Strawn-Detrital) and Howards Creek (Penn) Fields, in Docket No. RM79–76–169 (Texas-22 Addition III), Notice of Proposed Rulemaking issued March 1, 1983, as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that the additional areas of the Strawn-Detrital Formation be added to the previously designated tight formation should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Texas recommends that the Strawn-Detrital Formation in portion of the Ozona, S.W. (Strawn) Field in Crockett County, Texas, Railroad Commission District 7C, be designated as a tight formation. The recommended area consists of approximately 14,000 acres located 15 miles southwest of Ozona, Texas, and just to the south of the area of the Strawn-Detrital Formation in the University Block 31 Field designated by the Commission as a tight formation by Order No. 249, issued August 24, 1982. Specifically, the recommended area consists of the south halves of Sections 1, 12 and 13, the west halves of Sections 17 and 23, the east half of Section 8, and all of Sections 2, 3, 4, 9, 10, 11, 14, 15, 16 and 21, Block M, GC and S.F. Survey; Sections 4, 5, 6, 11, 12, 13 and the south quarters of Sections 7 and 10, Block S.L., T and S.T.L. Survey; and a portion of Block Z, J. W. Henderson Survey.

The vertical extent of the Strawn-Detrital Formation in Texas' recommendation is defined as the interval from the base of the Canyon Formation (top of Strawn series) to the top of the Simpson Shale (base of the Devonian), which includes the Strawn, Strawn-Detrital and Devonian zones. In the recommended area the average depth to the top of the Strawn series is approximately 8,800 feet.

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing in support of this recommendation demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing state and federal regulations assure that development of this formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Procedure Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Texas that the additional area of the Strawn-Detrital Formation, as described and delineated in Texas' recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before July 5, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76–195 (Texas–22 Addition IV) and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than June 3, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703(d) is amended by adding paragraph (d)(106)(iii) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(106) *Strawn-Detrital Formation in Texas.* RM79–76 (Texas–22).

* * * * *

(iii) *Ozona, S.W. (Strawn) Field.*

(A) *Delineation of Formation.* The Strawn-Detrital Formation in the area of the Ozona, S.W. (Strawn) Field is located in Crockett County, Texas, Railroad Commission District 7C. The designated area consists of the south half of Section 1, Sections 2, 3, 4, the east half of Section 8, Sections 9, 10, 11, the south halves of Sections 12 and 13, Sections 14, 15, 16, the west half of Section 17, Section 21, and the west half of Section 23, Block M, GC and S.F. Survey; Sections 4, 5, 6, the south quarters of Sections 7 and 10, Sections 11, 12, and 13, Block S.L., T and S.T.L. Survey; and a portion of Block Z, J. W. Henderon Survey.

(B) *Depth.* The vertical extent of the Strawn-Detrital Formation in the Ozona, S.W. (Strawn) Field is defined as the interval from the base of the Canyon Formation (top of the Strawn series) to the top of the Simpson Shale (base of the Devonian), which includes the Strawn, Strawn-Detrital and Devonian zones. The average depth to the top of the Strawn series is approximately 8,800 feet.

States under a program administered by the Secretary of Education. These proposed regulations implement debt collection procedures provided for under the Debt Collection Act of 1982.

DATES: Comments must be received on or before June 23, 1983.

ADDRESS: Comments should be addressed to Mr. Jack Reynolds, Student Loan Collection Task Force, Office of Postsecondary Education, 400 Maryland Avenue, S.W., (ROB-3—Room 3661), Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Mr. Jack Reynolds, (202) 755-1467.

SUPPLEMENTARY INFORMATION:

Background

The Debt Collection Act or 1982, Pub. L. 97-365, authorizes the Federal Government to collect debts owed to it by its own current and retired military and civilian employees through the use of a salary offset. In this respect, the law puts the Federal Government in a position similar to that of a private employer, since a private employer may collect a debt owed to it by one of its employees without resort to litigation.

Under the law, when the head of a Federal agency determines that one of the agency's current or retired employees is indebted to the United States, or is notified by the head of another Federal agency that one of the agency's employees is indebted to the United States, the employee's debt may be repaid by offsetting the debt against that employee's pay. The amount of the offset may not exceed 15 percent of the employee's disposable pay. Disposable pay is defined in the law as gross Federal pay minus deductions required by law to be withheld. These deductions include amounts withheld for Federal, State, and local income taxes, Social Security taxes, and Federal retirement programs.

The law also includes safeguards to protect the rights of employees. Thus, at least 30 days before an offset may be initiated, the head of the agency holding the debt must notify the debtor that he or she (1) is indebted to the United States, (2) may inspect and copy Government records relating to the debt, (3) may enter into an agreement with the head of the agency concerning a repayment schedule, and (4) may request a hearing contesting the existence or amount of the debt, or the proposed offset schedule.

The Secretary of Education is proposing regulations to implement the offset provisions of the Debt Collection Act of 1982 with regard to Federal employees who are indebted to the United States under programs administered by the Secretary. In general, Federal employees most frequently become indebted to the United States under programs administered by the Secretary if they are in default on loans made under the Guaranteed Student Loan/PLUS, National Direct Student Loan, Cuban Student Loan or Law Enforcement Education Programs, or have not repaid overpayments on grants received under the Pell Grant or Law Enforcement Education Programs.

The procedures the Secretary is proposing reflect the major purpose of the offset authority, namely, collecting debts owed the United States by current and former Federal employees in a cost-effective and expeditious manner, while allowing the employee an opportunity to be heard regarding the nature and amount of the debt and the decision to offset 15 percent of the employee's disposable pay.

Before initiating an offset proceeding, the Secretary will notify any Federal employee who is indebted to the United States under a program administered by the Secretary of the existence and amount of that indebtedness, and the Secretary's intention to satisfy that indebtedness by offsetting 15 percent of the employee's disposable pay. The Secretary will, however, agree to reconsider his determination regarding the existence or amount of the debt if the employee can convince the Secretary that his initial determination was incorrect. In making his or her argument against being indebted to the United States, the employee may submit documents to the Secretary or raise factual matters not previously submitted or r aised with the Secretary. Moreover, the Secretary may enter into an agreement with the employee to offset a smaller amount from the employee's disposable pay if the employee can convince the Secretary that an offset of 15 percent against his or her disposable pay would produce an extreme financial hardship. In this connection, the employee must submit an alternative offset schedule that would not produce such a hardship. The Secretary will allow an employee 45 days to present his or her arguments and documents with respect to these issues.

If the Secretary agrees, after reviewing the material submitted by the employee, that the employee is not indebted to the United States, or that the alternative offset schedule proposed by the employee is appropriate to satisfy that indebtedness, the Secretary so informs the employee. If the Secretary determines that the employee is indebted to the United States, he will formally notify the employee of his determination and his rationale for that determination, and of his intention to collect the debt by offsetting the amount he originally scheduled, or a modified amount if he believes a modification is appropriate in light of the employee's submissions. The Secretary will, in addition, inform the employee of his or her right to a hearing before a hearing official, who is not under the supervision or control of the Secretary, if the employee wishes to contest the Secretary's determination of the existence or amount of the debt, or the Secretary's determination that the proposed schedule will not produce an extreme financial hardship for that employee.

The Debt Collection Act of 1982 prohibits the Secretary from offsetting the pay of an employee to satisfy that employee's debt until the procedures set forth in the Act are satisfied. Yet, the Act recognizes that any delay in these procedures benefits the employee and injures the United States, sine it requires that the hearing official, if a hearing is requested by the employee, issue his decision as soon as possible, but not later than 60 days after the employee files a petition for a hearing. The rather short deadline dates proposed by the Secretary in the regulations reflect this statutory deadline and that recognition.

Hearings—Existence or Amount of Debt

The Debt Collection Act of 1982 permits an employee to request a hearing on the determination of the agency regarding the existence or amount of debt owed by the employee to the United States. Thus, the hearing is not to determine anew whether the employee is indebted to the United States; it is a hearing on the determination of an agnecy that the employee is indebted to the United States. In this respect, the hearing is in the nature of an appeal of the decision of the agency. Accordingly, the Secretary is proposing an appeal standard if an employee requests a hearing to challenge the Secretary's determination of the existence and amount of the employee's debt.

Under the Secretary's proposed standard, an employee must demonstrate to the hearing official that the Secretary's determination of the existence or amount of the employee's debt was clearly erroneous before the hearing official can overturn the Secretary's determination. In order for the hearing official to find that the Secretary's determination of the existence and amount of the debt was clearly erroneous, the employee must demonstrate that the Secretary's determination was without legal support. Thus, even if there is legal support for the position of the employee that he is not indebted to the United States, the hearing official may not find that the Secretary's determination was clearly erroneous if there is also support for the position of the Secretary. Moreover, since the hearing official is evaluating whether the Secretary's determination of the existence or amount of the debt was clearly erroneous, the hearing official must base his opinion on the same facts that were available to the Secretary. Therefore, no evidence may be introduced at the hearing that has not already been provided to the Secretary before he made his determination.

In making this finding, the hearing official shall be governed by the statutes and regulations authorizing and implementing the programs giving rise to the debt, and State law, if relevant. In view of the limited scope of the hearing regarding the Secretary's determination of the existence or amount of the debt, the Secretary's expertise regarding the circumstances which give rise to a debt to the United States under programs he administers, and the lack of the expertise by the hearing official in that area, the Secretary has proposed a series of legal principles to guide official in his deliberations on whether the Secretary's determination of the existence and amount of the debt was clearly erroneous. Further, the Secretary anticipates that the hearing official will give great weight to the Secretary's interpretations of the program statutes and regulations.

Hearings—Amount of Offset

The Debt Collection Act also permits the employee to request a hearing regarding the offset schedule established by the head of an agency. The Act, however, estalishes no standards with regard to this review. The Secretary is proposing a standard that he, as well as the hearing official, will follow.

The Secretary believes that it is appropriate in almost all cases, where an employee of the United States is indebted to the United States, to have that employee repay that debt by the Government offsetting 15 percent of his disposable pay. However, the Secretary recognizes that there may be a circumstance where a 15 percent offset against disposable pay would be inappropriate if the offset would produce an extreme financial hardship for the employee. The Secretary believes that an extreme financial hardship is produced only if the offset would prevent the employee from meeting the costs necessarily incurred for essential subsistence expenses of the employee and his family. The Secretary further believes that these essential subsistence costs are costs incurred for medical care, and for food, housing, clothing, and transportation.

The Secretary has defined the family of an employee to include the employee's spouse and dependents. In determining whether an employee will suffer an extreme financial hardship if his pay is offset, the Secretary is proposing to take into account the expenses of the family unit. The Secretary also believes the income and assets of the family unit should also be taken into account when making this determination.

The Secretary acknowledges that the standard he is proposing for demonstrating extreme financial hardship is strict and may be difficult to meet. The Secretary intends this result and expects that very few employees will be able to demonstrate this need. The Secretary believes that a 15 percent offset will not produce a hardship for most employees and further believes that the lifestyle of an employee should be modified, if necessary, to accommodate the repayment of his debt to the United States. The Secretary is also mindful of the fact that if the employee was employed by a private employer, or if a judgment was obtained against the employee by the United States, the remedies permitted to satisfy that debt or judgment would be harsher to the employee than the procedure proposed by the Secretary.

If an employee contends that an offset of 15 percent, or a lesser amount as determined by the Secretary, against his disposable pay would produce an extreme financial hardship, the employee must document that hardship and propose an alternative offset schedule. In order for the Secretary and the hearing official to determine whether an offset would produce an extreme financial hardship for the employee, the employee must provide information concerning his current and future financial situation. The employee satisfies this requirement by providing the information called for in the regulations for the one year period preceding the notice to the employee of the offset, and for a future period which coincides with repayment period proposed by the employee in his or her offset schedule.

Before determining whether the Secretary's proposed offset schedule would produce an extreme financial hardship for the employee, the Secretary and hearing official will: (1) examine the income form all sources of the employee and his spouse and dependents; (2) examine these individual's assets to determine whether the assets could be sold or could serve as collateral for a loan to accommodate the offset; (3) determine whether the employee's essential expenses could be minimized to accommodate the offset; (4) determine whether these individuals could borrow money to accommodate the offset; and (5) take into account exceptional expenses of the employee and his spouse and defendents, and whether such expenses could be avoided or minimized.

Finally, the Secretary does not intend to offset the pay of an employee who, in reality, is not indebted to the United States. Accordingly, in extraordinary circumstances, the Secretary may, after the conclusion of the procedures established in this part, determine that an employee is not indebted to the United States in the amount previously established, based upon conclusive documents producted by the employee after the deadline date established by the regulations.

The Secretary in the part is not establishing rules for offsetting a debt against the pay of a Federal employee to satisfy a judgment obtained by the United States against that employee in a court of the United States. Further, the Secretary in this part is not establishing rules for offsetting the pay of one of his employees who received an overpayment of pay or allowances.

When the Department of Justice and the General Accounting Office issue their final joint regulations implementing the Federal Claims Collection Act as amended by the Debt Collection Act of 1982, the Secretary will revise the Department's salary offset regulations if the Department's regulations are inconsistent with the joint regulations.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291.

They are classified as non-major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Certification Act Certification.

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities.

These regulations do not affect small entities. They affect only individual employees of the United States.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. Written comments and recommendations may be sent to the adddress given at the beginning of this document. All comments submitted on or before the 30th day after publication of this document will be considered before the Secretary issues final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in room 4019–FOB 6, 400 Maryland Avenue, S. W., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

Dated May 20, 1983.

T. H. Bell,

Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new part, Part 31, to read as follows:

PART 31—SALARY OFFSET FOR FEDERAL EMPLOYEES WHO ARE INDEBTED TO THE UNITED STATES UNDER PROGRAMS ADMINISTERED BY THE SECRETARY OF EDUCATION

Sec.

31.1 Scope
31.2 Definitions.
31.3 Pay subject to offset.
31.4 Notice of debt—request for records—submission of information.
31.5 Formal notice to employee.
31.6 Request for a hearing-prehearing submissions.
31.7 Hearings—time, date, and location.
31.8 Consequence of employee's failure to meet deadline dates.
31.9 Hearing procedures.
31.10 Representation.
31.11 Applicable legal principles.
31.12 Standards for determining extreme financial hardship.

Authority: 5 U.S.C. 5514, as amended by section 5 of Public Law 97–365, 96 Stat. 1751–1752.

§ 31.1 Scope.

(a) If a Federal employee is indebted to the United States under a program administered by the United States Secretary of Education ("the Secretary"), the employee's pay may be offset to satisfy that indebtedness under the procedures set forth in this part.

(b) The Secretary in this part establishes rules for offsetting a debt against the pay of an employee of the United States if that employee—

(1) Is in default and indebted to the United States on a loan made under the Guaranteed Student Loan (GLS)/PLUS Program (20 U.S.C. 1071 *et seq.*);

(2) Is in default and indebted to the United States on a loan made under the National Defense/Direct Student Loan (NDSL) Program (20 U.S.C. 1087aa *et seq.*);

(3) Has not repaid an overpayment on a grant made under the Pell Grant Program (20 U.S.C 1070a);

(4) Has not repaid money owed under the terms of a grant, or is in default on a loan, made under the Law Enforcement Eduation Program (42 U.S.C. 3775);

(5) Is in default and indebted to the United States on a loan made under the Cuban Student Loan Program (22 U.S.C. 2601 *et seq.*); or

(6) Is indebted to the United States under any other program administered by the Secretary.

(c) An offset against pay shall be carried out in accordance with the standards established under the Federal Claims Collection Act of 1966, as amended (31 U.S.C. 951 *et seq.*).

(d) The Secretary in this part is not establishing rules for offsetting a debt against the pay of a Federal employee—

(1) To satisfy a judgment obtained by the United States against that employee in a court of the United States; or

(2) To recover an overpayment of pay or allowances.

(5 U.S.C. 5514)

§ 31.2 Definitions.

As used in this part:

(a) "Agency" means—

(1) An Executive department, military department, Government corporation or independent establishment as defined in 5 U.S.C. 101, 102, 103, or 104, respectively.

(2) The United States Postal Service; or

(3) The Postal Commission.

(b) "Disposable pay" means the amount that remains from an employee's Federal pay after required deductions for Federal, State, and local income taxes; Social Security taxes, including Medicare taxes; and Federal retirement programs.

(c) "Employee" means a current or former—

(1) Civilian employee, as defined in 5 U.S.C. 2105;

(2) Member of the Armed Forces or Reserves of the United States;

(3) Employee of the United States Postal Services; or

(4) Employee of the Postal Rate Commission.

(d) "Offset" means a deduction from the pay of an employee to satify a debt.

(e) "Pay" means basic pay, special pay, incentive pay, retired pay, retainer pay, or, in case of an employee not entitled to basic pay, other authorized pay.

(5 U.S.C. 105, 2105 and 5514(a))

§ 31.3 Pay to offset.

(a) An offset from an employee's pay may not exceed 15 percent of the employee's disposable pay, unless the employee agrees in writing to a larger offset.

(b) An offset from pay shall be made monthly or at officially established pay intervals from the employee's current pay account.

(c) If an employee retires, resigns, or is discharged, or if his or her employment period or period of active duty otherwise ends, an offset may be made from subsequent payments of any nature due the individual.

(5 U.S.C. 5514(a))

§ 31.4 Notice of debt—request for records—submission of information.

(a) Before initiating an offset proceeding, the Secretary notifies an employee that—

(1) The Secretary has determined that the employee is indebted to the United States in a specified amount under a program administered by the Secretary; and

(2) The Secretary intends to satisfy that indebtedness by offsetting 15 percent of the employee's disposable pay unless the employee can demonstrate that this offset schedule would produce an extreme financial hardship under § 31.12.

(b)(1) An employee notified of the Secretary's determination of the existence and amount of the debt, and the offset schedule, may submit a request to the Secretary to—

(i) Send a copy of the records in his possession relating to the debt, not later than 10 days from the date the employee receives the notice;

(ii) Reconsider his determination of the existence or amount of the debt, within the time period specified in paragraph (c) of this section; or

(iii) Reconsider the proposed offset schedule if it would produce an extreme financial hardship for the employee under § 31.12, within the time period in paragraph (c) of this section.

(2) If the employee requests the Secretary to reconsider his determination concerning the existence or amount of the debt, the employee shall submit to the Secretary a statement, with supporting documents, indicating why the employee believes he or she is not so indebted.

(3) If the employee requests the Secretary to reconsider the proposed offset schedule, the employee shall file an alternative proposed offset schedule and a statement, with supporting documents, showing why the Secretary's schedule would produce an extreme financial hardship for the employee under § 31.12. The supporting documents must show, for the employee and his or her spouse and dependents, for the one year period preceding the Secretary's notice and for the repayment period proposed by the employee in his or her offset schedule, their—

(i) Income from all sources,

(ii) Assets,

(iii) Liabilities,

(iv) Number of dependents,

(v) Expenses for food, housing, clothing, and transportation,

(vi) Medical expenses, and

(vii) Exceptional expenses, if any.

(c) An employee, who requests the Secretary to reconsider the existence or amount of the debt, or the Secretary's proposed offset schedule, shall submit his or her statement with supporting documents to the Secretary not later than—

(1) 45 days from the date the employee receives the Secretary's notice, if he or she did not request records; or

(2) 45 days from the date the employee receives the records, if the records were requested.

(d) If the employee submits the appropriate statements and documents in a timely manner, the Secretary reconsiders whether the employee is indebted to the United States, the amount of the indebtedness, or the appropriate offset schedule.

(e) The Secretary notifies the employee, if the Secretary so determines on the basis of the statements and documents provided, that—

(1) The employee is not indebted to the United States; or

(2) The employee's proposed alternative offset schedule is approved.

(f) If, after considering the statement and supporting documents, the Secretary determines that the employee is indebted to the United States, the Secretary sends the employee—

(1) A statement indicating the reasons for the decision regarding the indebtedness, including, if applicable, the reasons for reducing the amount of the indebtedness; and

(2) The notice described in § 31.5.

(g) If, after considering the statement and supporting documents, the Secretary determines that his original offset schedule, or a modification to that schedule, will not impose an extreme financial hardship for the employee under § 31.12, the Secretary sends the employee—

(1) A statement indicating why he concluded that his original or modified offset schedule will not impose an extreme financial hardship under § 31.12; and

(2) The notice described in § 31.5.

(5 U.S.C. 5514(a))

§ 31.5 Formal notice to employee.

At least 30 days before requesting an agency to offset the pay of one of its employees under this part, the Secretary sends the employee a notice informing the employee of—

(a) The nature and amount of the debt the Secretary believes the employee owes the United States under a program administered by the Secretary;

(b) The Secretary's intention to collect the debt by having the employee's employing or payor agency offset 15 percent, or the amount that the Secretary determines under § 31.4, from the employee's disposable pay until the debt is fully repaid;

(c) The employee's opportunity for a hearing regarding—

(1) Whether the Secretary's determination concerning the existence or amount of the debt was clearly erroneous based on information that was available to the Secretary before he issued this notice; and

(2) Whether the Secretary's proposed offset schedule, as described in paragraph (b) of this section, would produce an extreme financial hardship for the employee under § 31.12; and

(d) Applicable hearing procedures and requirements.

(5 U.S.C. 5514(a)(1))

§ 31.6 Request for a hearing—prehearing submissions

(a)(1) An employee must fille a petition for a hearing not later than 15 days from the date the employee receives the notice described in § 31.5 if an employee wants a hearing concerning—

(i) The existence or amount of the debt; or

(ii) The Secretary's proposed offset schedule.

(2) The employee shall also indicate whether he or she wishes the hearing to consist solely of written submissions. However, the employee may, not later than 3 days before the hearing date, request that the hearing consist solely of written submissions if the employee did not originally request that type of hearing.

(b) If an employee timely files a petition for a hearing under paragraph (a) of this section, the Secretary—

(1) Notifies the employee of the time, date, and location of the hearing if the employee does not request a hearing consisting solely of written submissions: and

(2) Provides the employee, if the employee has not received the records under §312.4, and the hearing official with a copy of the records in the Secretary's possession relating to the employee's debt.

(c) Not later than 15 days from the date the employee receives the records described in paragraph (b) of this section, or not later than 25 days from the date the employee receives the notice described in § 31.5 if he or she has received records under §31.4, the employee shall file with the Secretary and the hearing official—

(1) The items listed in paragraph (d) of this section, if the employee contests the Secretary's determination of the existence or amount of the debt; or

(2) The items listed in paragraph (e) of this section, if the employee contests the Secretary's offset schedule.

(d)(1) An employee, contesting the Secretary's determination of the existence or amount of the debt, shall file—

(i) A statement of the reasons why the employee believes that the Secretary's determination of the existence or amount of the debt was clearly erroneous. The statement shall include a recitation of the facts on which the employee relies to support his or her belief and any legal arguments supporting that belief.

(ii) A list of witnesses the employee will call at the hearing and a summary of their anticipated testimony; and

(iii) A copy of the records that the employees intends to introduce at the hearing if they differ from the ones provided by the Secretary.

(2) However, the employee may not—

(i) Raise any issue that he or she has not previously raised with the Secretary concerning the existence or amount of the debt; or

(ii) Introduce any facts or records that he or she has not previously submitted to the Secretary concerning the existence or amount of the debt.

VOL 48 ISS 101 MAY 24 1983 UMI

(e) An employee contesting the Secretary's proposed offset schedule shall file with the Secretary—

(1) A proposed alternative offset schedule;

(2) A statement of the reasons why the Secretary's proposed offset against disposable pay will produce an extreme financial hardship under §31.12;

(3) The information required in § 31.4(b)3);

(4) A list of witnesses the employee intends to call at the hearing and a summary of their anticipated testimony; and

(5) A copy of the records that the employee intends to introduce at the hearing if they differ from the ones provided by the Secretary.

(f) As applicable, not later than 15 days from the date the Secretary receives the materials submitted under paragraph (c) of this section, the Secretary provides the employee and the hearing official with—

(1) A statement supporting the Secretary's determination regarding the existence and amount of the debt;

(2) A statement setting forth the reasons why the Secretary's proposed offset schedule does not produce an extreme financial hardship for the employee under §31.12;

(3) A list of witnesses that the Secretary intends to call at the hearing; and

(4) A summary of their anticipated testimony.

(5 U.S.C. 5514(a))

§ 31.7 Hearings—time, date, and location.

(a) If an employee timely files a petition for a hearing under § 31.6, the Secretary selects the time, date, and location for the hearing. The Secretary selects, to the extent feasible, the location that is most convenient for the employee.

(b) For a civilian employee or a former employee, the hearing will be held in Washington, D.C. or in one of the following cities: Boston, Philadelphia, New York, Atlanta, Chicago, Dallas, Kansas City, Denver, San Francisco, or Seattle.

(c) For a current military employee, the Secretary shall select the time, date, and location of the hearing after consultation with the Secretary of Defense.

(d) For a current Coast Guard employee, the Secretary selects the time, date, and location of the hearing after consultation with the Secretary of Transportation.

(5 U.S.C. 5514(a))

§ 31.8 Consequence of employee's failure to meet deadline dates.

(a) An employee waives his or her right to a hearing, and will have his or her disposable pay offset in accordance with the Secretary's offset schedule, if the employee—

(1) Fails to file a petition for a hearing before the deadline date established under § 31.6;

(2) Is scheduled to appear and fails to appear on time at the hearing; or

(3) Fails to file the required submissions under § 31.6 within 5 days after the deadline date established under § 31.6

(b)(1) If the employee files his or her required submissions within 5 days after the deadline date established under § 31.6, and the hearing official finds that the employee has shown good cause for the failure to comply with the established deadline date, the hearing official may find that an employee has not waived his or her right to a hearing.

(2) In making the determination under paragraph (b)(1) of this section, the hearing official shall take into account that the employee was provided 45 days to respond to the Secretary's positions on the same issues under § 31.4.

(5 U.S.C. 5514)

§ 31.9 Hearing procedures.

(a)(1) The hearing is conducted by a hearing official who is not an employee of the United States Department of Education or otherwise under the supervision or control of the Secretary.

(2) A record or transcript of the hearing shall not be made.

(b)(1) The hearing shall not be conducted in accordance with formal rules of evidence with regard to the admissibility of evidence or the use of evidence once admitted.

(2) The hearing official may only permit the introduction of evidence described in the pre-hearing submissions under § 31.6 that are relevant to the issues being considered. However, the employee may introduce other evidence previously provided to the Secretary before he issued the notice set forth in § 31.5, to rebut the evidence of the Secretary.

(3) The hearing official may not require discovery other than that permitted in § 31.6.

(c)(1) At the hearing, the employee and the Secretary may introduce evidence and may call witnesses, consistent with the provisions of paragraph (b) of this section.

(2) Witnesses shall testify under oath.

(3) Witnesses may be cross examined.

(d)(1) At the hearing, the Secretary has the burden of first presenting his evidence on the relevant issues.

(2) The employee then has the burden of presenting his or her evidence regarding these issues.

(3) The Secretary may then offer evidence rebutting the evidence introduced by the employee.

(e)(1)(i) If the Secretary's determination regarding the existence or amount of the debt is contested, the hearing official shall issue a decision in favor of the Secretary's determination, unless the hearing official finds that the employee has demonstrated that the Secretary's determination was clearly erroneous based on information that was available to the Secretary before he issued the notice set forth in § 31.5.

(ii) If the hearing official finds that the Secretary's determination of the amount of the debt was clearly erroneous based on information that was available to the Secretary before he issued the notice set forth in § 31.5, the hearing official shall indicate the amount owned by the employee, if any.

(2)(i) If the Secretary's offset schedule is contested, the hearing official shall uphold the Secretary's offset schedule unless the employee has demonstrated by clear and convincing evidence that the payments called for under the Secretary's schedule will produce an extreme financial hardship for the employee under § 31.12.

(ii) If the hearing official finds that the payments called for under the Secretary's offset schedule will produce an extreme financial hardship for the employee, the hearing official shall establish an offset schedule that will result in the repayment of the debt in the shortest period of time without producing an extreme financial hardship for the employee.

(f) The hearing official shall issue a written opinion stating his or her decision with a rationale supporting that decision as soon as practicable after the hearing.

(g) The Secretary does not offset the debt against the employee's disposable pay during the course of the hearing.

(5 U.S.C. 5514(a))

§ 31.10 Representation.

An employee may represent himself or herself or may be represented by another person, including an attorney, during any portion of any proceedings under this part.

(5 U.S.C. 5514(a))

§ 31.11 Applicable legal principles.

(a) The hearing official may not find that the Secretary's determination of the existence or amount of the employee's debt was clearly erroneous—

(1) If a judgment was obtained against the employee on the dept in a court of competent jurisdiction;

(2) On the basis of Federal, State or local statues of limitations;

(3) On the basis of the quality, or lack of quality, of the education provided by the educational institution the student attended, unless the student is indebted to the United States as a result of being in default on a loan made by that institution and the employee has a legal defense to the repayment of the loan by reason of the lack of quality of the education provided by that institution;

(4) On the basis that the employee is owed a refund by the institution he attended and that refund would eliminate or reduce the debt, unless the employee, not later than the period of time specified §31.4,—

(i) Submitted written confirmation from the institution to the Secretary that the refund is owned, and

(ii) Assigned the refund to the Secretary; or

(5) On the basis of any factual or legal argument that was decided on the merits adverse to the employee in a court of competent jurisdiction.

(b) In determining whether the Secretary's determination of the existence or amount of the employee's debt was clearly erroneous, the hearing official is governed by the relevant Federal statutes and regulations authorizing and implementing the programs giving rise to the debt, and State law, if relevant.

(5 U.S.C. 5514(a))

§ 31.12 Standards for determining extreme financial hardship.

(a)(1) An offset produces an extreme financial hardship for an employee if the offset prevents the employee from meeting the costs necessarily incurred for essential subsistence expenses of the employee and his or her spouse and dependents.

(2) These essential subsistence expenses only include costs incurred for medical care and for food, housing, clothing, and transportation.

(b) In determining whether an offset would prevent the employee from meeting the essential subsistence costs described in paragraph (a) of this section, the Secretary and the hearing official shall consider—

(1) The income from all sources of the employee and his or her spouse and dependents;

(2) The extent to which the assets of the employee and his or her spouse and dependents are available to meet the offset and the essential subsistence expenses;

(3) Whether these essential subsistence costs have been minimized to the greatest extent possible;

(4) The extent to which the employee and his or her spouse and dependents can borrow money to meet the offset and the other essential costs; and

(5) The exstent to which the employee and his or her spouse and dependents have other exceptional expenses that should be taken into account, and whether these expenses have been minimized.

GENERAL SERVICES ADMINISTRATION

Office of Plans, Programs, and Financial Management

41 CFR Part 101-41

Administrative Offset and Interest Assessment on Delinquent Refunds for Totally Unused Tickets

AGENCY: General Services Administration.

ACTION: Proposed rule.

SUMMARY: The General Services Administration (GSA) proposes to amend the Federal Property Management Regulations to enable Government agencies to collect by administrative offset when carriers fail to make refunds for totally unused passenger tickets in accordance with 41 CFR 101-41.210. The amendment will also permit agencies to assess interest and penalties on delinquent refunds due the Government for totally unused passenger tickets. This amendment is necessary to further improve the efficiency of Government-wide efforts to collect debts owed the United States, as prescribed by the Federal Claims Collection Act of 1966 (31 U.S.C. 3701-3711) as amended by the Debt Collection Act of 1982 (Pub. L. 97-365).

DATE: Written comments must be received by July 25, 1983.

ADDRESS: Comments should be sent to the General Services Administration (BWCP), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Chief, Regulations, Procedures, and Claims Branch, Office of Transportation Audits (202-786-3014).

SUPPLEMENTARY INFORMATION: The GSA has determined that this proposed rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The GSA has based all administrative decisions underlying this proposed rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this proposed rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101-41

Air carriers, Accounting, Claims, Freight, Freight forwarders, Government property management, Maritime carriers, Moving of household goods, Passenger services, Railroads, Transportation.

PART 101-41—TRANSPORTATION DOCUMENTATION AND AUDIT

It is proposed to amend 41 CFR Part 101-41 as follows:

Subpart 101-41.2—Passenger Transportation Services Furnished for the Account of the United States

1. Section 101-41.210-4a is added to read as follows:

§ 101-41.210-4a Unused ticket setoff.

SF 1170 claims for totally unused tickets are administratively determined

VOL
48

debts as opposed to overcharges (see § 101–41.506(a)). When past due, they are subject to agency setoff action and the interest and penalty provisions of the Federal Claims Collection Act of 1966 (31 U.S.C. 3701–3711) as amended by the Debt Collection Act of 1982 (Pub. L. 97–365). Claims uncollected after 90 days should be transmitted to the General Services Administration (BWCPG) for further action.

Subpart 101–41.5—Claims by the United States Relating to Transportation Services

2. § 101–41.506 paragraph (a) is revised to read as follows:

§ 101–41.506 Transportation debts administratively determined to be due the United States.

(a) Under the Federal Claims Collection Act of 1966 (31 U.S.C. 3701–3711), the Comptroller General of the United States and the Attorney General have joint responsibility for promulgating standards for the collection, compromise, termination, or suspension of collection action on any debts determined by administrative agencies to be due the United States (see 4 CFR 102). Totally unused tickets, where no ticket coupon has been used and for which an SF 1170 has been issued to the carrier, will be considered an administratively determined debt under this section (§ 101–41.210). Regulations defining agency responsibilities for collecting amounts determined to be due the United States, establishing principles governing agency collection procedures for reporting uncollectible debts to the General Accounting Office (GAO) or the Justice Department are found in 4 CFR Parts 101 through 105 and in Title 4, Debt Claims-General Policies and Procedures of the GAO Policy and Procedures Manual for the Guidance of Federal Agencies.

Applications for Duty-Free Entry of Scientific Instruments

The following are notices of the receipt of applications for duty-free entry of scientific instruments published pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States.

Comments must be filed in accordance with § 301.5(a) (3) and (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register**.

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, Room 1523, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 83–190. Applicant: University of Miami School of Medicine, Dept. of Ophthalmology, Bascom Palmer Eye Institute, P.O. Box 016880, 900 NW 17 St., Miami, FL 33101. Instrument: Rotating Photo Slit Lamp Model SL–45 w/table plate and table leg Model A1T–5. Manufacturer: Topcon Deutschland GMBH, West Germany. Intended use of instrument: The instrument is intended to be used to study and classify the various types of angle closure glaucoma. Measurements will be made of the anterior chamber depth at various locations, including the curvature and configuration of the lens, iris, peripheral cornea, etc. The purpose is to identify the specific anatomic characteristics that lead to the development of various types of glaucoma in order to be able to predict the individuals that require surgical therapy based on the knowledge of the anatomical configuration of the individual. The effectiveness of surgical and medical therapy on changing the anatomic configuration will also be investigated. Application received by Commissioner of Customs: May 12, 1983.

Docket No. 83–192. Applicant: Northwestern University Medical School, Dept. of Pharmacology, Ward Bldg.; Rm. 12–031, 303 East Chicago Avenue, Chicago, IL 60611. Instrument: 2 (each) Three-dimensional Hydraulic Microdrive and K-type Micromanipulator. Manufacturer: Narashigi Scientific Instruments Laboratory, Japan. Intended use of instrument: The instrument is intended to be used for research in which the long term objectives are to understand the nature of channel gating, ion permeation, and molecular mechanisms by which drugs and blocking ions interact with sodium and potassium channels. To achieve this, recently developed gigaseal patch clamp techniques will be used to permit direct measurement of current through individual channels and the suction pipette technique will be used to allow macroscopic current measurement. Application received by Commissioner of Customs: May 12, 1983.

Docket No. 83–193. Applicant: Northwestern University Medical School, Dept. of Pharmacology, Ward Bldg.; Rm. 12–031, 303 East Chicago Avenue, Chicago, IL 60611. Instrument: 1 (each) Three-dimensional Hydraulic Microdrive and K-type Micromanipulator. Manufacturer: Narashigi Scientific Instruments Laboratory, Japan. Intended use of instrument: The instrument is intended to be used for research in which the long term objectives are to understand the nature of channel gating, ion permeation, and molecular mechanisms by which drugs and blocking ions interact with sodium and potassium channels. To achieve this, recently developed gigaseal patch clamp techniques will be used to permit direct measurement of current through individual channels and the suction pipette technique will be used to allow macroscopic current measurement. Application received by Commissioner of Customs: May 10, 1983.

Docket No. 83–195. Applicant: University of California at Davis, Department of Biological Chemistry, Davis, CA 95616. Instrument: Topical Magnetic Resonance Spectrometer, Model TMR 32/200. Manufacturer: Oxford Research Systems, United Kingdom. Intended use of instrument: The instrument is intended to be used in basic and applied research of tissue metabolism in living animals. The experiments will include a broad range of metabolic studies of heart, brain, kidney, liver, and muscle metabolism in animal models of disease, stroke, and drug toxicity. The objectives of such experimentation is to gain more extensive insights and knowledge of fundamental biochemical events associated with tissue damage in various disease states, the effects of drug therapies treating disease, and the toxic effects of certain drugs on various internal organs. Application received by Commissioner of Customs: May 10, 1983.

Docket No. 83–196. Applicant: NCI–Frederick Cancer Research Facility, P.O. Box B, Frederick, MD 21701. Instrument: 14800–3 Cryokit, including 14860–1 Cryotools (without Dewar Flasks). Manufacturer: LKB Produkter AB, Sweden. Intended use of instrument: The instrument is an accessory to an existing ultramicrotome being used for studies of the macromolecular composition of biological material and the localization of cancer-associated metals in biological material. Application received by Commissioner of Customs: May 10, 1983.

pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States.

Comments must be filed in accordance with Subsections 301.5(a) (3) (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the Federal Register.

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, Room 1523, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 83–183. Applicant: Yale University, School of Medicine, 333 Cedar Street, New Haven, CT 06510. Instrument: Electron Microscope, Model JEM 1200EX and Accessories. Manufacturer: JOEL Ltd., Japan. Intended use of instrument: The instrument is intended to be used for studies of the struture of the cells and extracts from experimental slow virus disease (Creutzfeldt-Jakob Disease). Also, the instrument will be used for basic chromosomal structural studies. In addition, it will be used in the training of graduate students requiring fine structural work in their masters, doctoral thesis research and for post-doctoral trainees, mostly on a one to one basis. Application received by Commissioner of Customs: April 28, 1983.

Docket No. 83–50. Applicant: University of Illinois at Urbana-Champaign, Purchasing Division, 506 South Wright Street, 223 Administration Building, Urbana, IL 61801. Instrument: Superconducting Magnet System, 8.5 Tesla, 89 mm RT Bore. Manufacturer: Oxford Instruments, Inc., United Kingdom. Intended use of instrument: The instrument is intended to be used for fourier transform nuclear magnetic resonance analysis of ^{13}C, ^{2}H, ^{11}B, ^{17}O, ^{23}Na, ^{27}Al, ^{29}Si, ^{51}V, ^{55}Mn, and ^{183}W nuclei. The objective of these studies is to more fully understand the structure and function of a variety of biological and geochemical systems. In addition, the article will be used in the course Chem 499, Graduate (Ph. D.) research to provide training in chemical research techniques. Application received by Commissioner of Customs: January 10, 1983.

Docket No. 83–139. Applicant: State University of New York at Buffalo, 202 Crofts Hall, Amherst, NY 14260. Instrument: Fan Test Set, #TE.84. Manufacturer: Experimental Engineering Equipment Ltd., Canada. Intended use of instrument: The instrument is intended to be used for educational purposes in the course Aerodynamics Laboratory (MEA 471). Instrument will be used by students under the supervision of the course instructor, to obtain familiarity and experience with experimental methods in Aerodynamics and Gas Dynamics. The students conduct a series of laboratory experiments which they write up and discuss in laboratory reports which are graded by the instructor. Application received by Commissioner of Customs: May 3, 1983.

Docket No. 83–181. Applicant: Harvard University, The Biological Laboratories, 16 Divinity St., Cambridge, MA 02138. Instrument: Fluorescence Lifetime Instrument (Optical Sub-system). Manufacturer: Photochemical Research Associates, Inc., Canada. Intended use of instrument: The instrument is intended to be used for the study of weak complexes (called exciplexes) formed between simple molecules like acetone and benzene after absorption of ultraviolet light. The decay kinetics of dibromoanthracene fluorescence will be studied in the presence of pair of compounds forming exciplexes. This will involve monitoring the fluorescence of dibromoanthracene by the time-resolved single-photon counting on the nanosecond to microsecond time scale. The fluorescence decay kinetics of the probe reflect the formation and decomposing of the exciplexes present in the solution, which energize the fluorescent probe via energy transfer. Application received by Commissioner of Customs: April 28, 1983.

Docket No. 83–185. Applicant: New York University Medical Center, 550 First Avenue, New York, NY 10016. Instrument: Cryokit, LKB 14800–3 complete with Accessories. Manufacturer: LKB Instruments, Inc., Sweden. Intended use of instrument: The instrument is an accessory to an ultramicrotome which will be used for immunological studies of frozen thin sections of biological materials utilizing labelled antibodies or enzymes. Application received by Commissioner of Customs: April 28, 1983.

Docket No. 83–186. Applicant: Brookhaven National Laboratory, Department of Physics, Bldg., 510B, Upton, NY 11973. Instrument: Toroidal Grazing Incidence Mirror for VUV Monochromator. Manufacturer: Astron, United Kingdom. Intended use of instrument: The instrument is intended to be used in studies of the electronic and geometric structure of molecules adsorbed onto single crystal surfaces using photoemission and surface EXAFS. This knowledge is essential in the understanding of catalytic reactions. Application received by Commissioner of Customs: April 28, 1983.

Docket No. 83–187. Applicant: U.S. Department of Interior, Bureau of Reclamation, P.O. Box 25007, Code D–1523, Denver, CO 80225. Instrument: Fast Atom Bombardment Accessory for Mass Spectrometer. Manufacturer: VG Organic Limited, United Kingdom. Intended use of instrument: The instrument is intended to be used in a number of research programs which require the identification and/or characterization of thermally labile, high molecular weight, organic materials. The research programs are as follows:

(1) Establish the effects that chlorination in an aqueous environment has on the chemical composition of cellulose acetate reverse osmosis membranes and (2) Characterization and identification of changes in the seams joining flexible membrane liners after the seams have been exposed to potential hazardous wastes.

Application received by Commissioner of Customs: May 2, 1983.

Docket No. 83–188. Applicant: Purdue University, FREH Building, W. Lafayette, IN 47907. Instrument: Single Tilting Specimen Cooling Holder, SCH, for JEM 200CX Microscope. Manufacturer: JEOL Ltd., Japan. Intended use of instrument: The instrument is an accessory to an existing electron microscope being used for solid state materials research. Application received by Commissioner of Customs: May 3, 1983.

Docket No. 83–189. Applicant: Temple University School of Medicine, Department of Anatomy, 3400 North Broad Street, Philadelphia, PA 19140. Instrument: Scanning Microdensitometer, Model M85a complete with Accessories. Manufacturer: Vickers Instruments, United Kingdom. Intended use of instrument: The instrument is intended to be used to study the development and function of several cell types in the testis of the normal rat and the implications of diabetes for the reproductive capability of the adult animal. The various experiments to be conducted fall into two general categories, those involving Sertoli or supportives cells and those centered on the Leydig cells that are responsible for the production of male sex hormone (testoterone). The instrument will also be used for educational purposes in the courses: Advanced Embryology (#502), Light and Electron Microscope Methods (#504), Methods in Cell Biology (#513) and Anatomical Research (#997) to enable to student to gain experience in research problems, planning of experiments, experimental techniques, experimental methologies and analysis of data. Application received by Commissioner of Customs: May 2, 1983.

Animal Glue and Inedible Gelatin From West Germany; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on animal glue and inedible gelatin from West Germany. The review covers the eight known manufacturers and/or exporters and one third-country reseller of West German animal glue and inedible gelatin to the United States and generally the period December 1, 1980 through November 30, 1981. The review indicates the existence of dumping margins for certain firms during the period.

As a result of the review, the Department has preliminarily determined to assess dumping duties equal to the calculated differences between United States price and foreign market value on each of their sales during their individual periods of review. Where company-supplied information was inadequate or no information was received, we used the best information available. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Linda L. Pasden or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–5255.

SUPPLEMENTARY INFORMATION:

Background

On July 9, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 29865–6) the final results of its last administrative review of the antidumping finding on animal glue and inedible gelatin from West Germany (42 FR 64116, December 22, 1977) and announced its intent to conduct the next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are animal glue and inedible gelatin, of which there are two principal types, hide glue and bone glue. Animal glue is an organic colloid of protein derivation. There is no significant difference between animal glue and inedible gelatin. Animal glues are odorless, dry, hard, hornlike materials. They are used as general purpose adhesives in industries producing abrasives, paper containers, book and magazine bindings, and leather goods. They are also used as sizing agents and as colloids in emulsions and cleaning compounds. Animal glue and inedible gelatin are currently classifiable under items 455.4000 and 455.4200 of the Tariff Schedules of the United States Annotated.

The review covers the eight known manufacturers and/or exporters and one third-country reseller of West German animal glue and inedible gelatin to the United States and generally the period December 1, 1980 through November 30, 1981.

Three firms did not export West German animal glue and inedible gelatin during the review period. The estimated antidumping duty cash deposit rates for these firms will be the most recent information for each firm. Four firms, Ph. Carl Weiss, Marcuse & Company (London) Limited, Nienburger Gelatin, and Deutsche Gelatin-Fabrieken Stoess & Co., failed to respond to our questionnaire or provided inadequate responses. Even though Gould Metall provided an adequate response to our questionnaire, the response did not enable the Department to analyze its marketing practices without an adequate response from its supplier, Deutsche Gelatin-Fabrieken Stoess & Co. For Gould Metall and the four non-responsive firms, we used the best information available to determine the assessment and estimated antidumping duty cash deposit rates. The best information available is the most recent rate for each firm or the fair value rate.

We are not covering in this review Animal Produkten, a firm include in the last review, because it is no longer in business.

United States Price

In calculating United States price the Department used purchase price, as defined in section 772 of the Tariff Act, since all sales were made to unrelated purchasers in the United States prior to importation. Purchase price was based on the CIF, packed price. Where applicable, deductions were made for foreign inland freight, ocean freight, and marine insurance. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price, as defined in section 773 of the Tariff Act, since sufficient quantities of such or similar merchandise were sold in the home market to provide a basis for comparison. Home market price was based on the ex-factory, packed price with an adjustment for cash discounts. No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist:

Manufacturer/exporter	Time period	Margin (percent)
Chemische Dungerfabriek Rendsburg	12/01/80–11/30/81	[1] 158.00
G. Conradt & Sohn	12/01/80–11/30/81	[1] 67.00
Johannes Martens	12/01/80–11/30/81	[1] 0
Ph. Carl Weiss	12/01/80–11/30/81	16.34
Nienburger Gelatin	01/01/78–11/30/81	158.00
Deutsche Gelatin-Fabrieken Stoess & Co./ Gould Metall	12/01/80–11/30/81	158.00
Fritz Hacker	12/01/80–11/30/81	0
Third-Country Reseller: Marcuse & Company (London) Limited	12/01/80–11/30/81	16.34

[1] No shipments during the period.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must

VOL 48 ISS 101 1983 24 MY UMI

be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing. The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries, with purchase dates during the time periods involved. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based upon the above margins shall be required on all shipments of West German animal glue and inedible gelatin from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. We will not require a cash deposit on future entries for any shipment from a new exporter not covered in this or prior administrative reviews, whose first shipments occurred after November 30, 1981 and who is unrelated to any covered firm. These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

May 16, 1983.

BILLING CODE 3510-25-M

Initiation of Antidumping Investigation; Forged Undercarriage Components From Italy

AGENCY: International Trade Administration, Commerce

ACTION: Initiation of Antidumping Investigation

SUMMARY: On the basis of a petition filed with the United States Department of Commerce, we are initiating an antidumping investigation to determine whether forged undercarriage components from Italy are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether there is a reasonable indication that imports of forged undercarriage components from Italy are materially injuring, or are threatening to materially injure, a United States industry. The allegations of sales at less than fair value include an allegation that home market sales are being made at less than the cost of production in Italy. If the investigation proceeds normally, the ITC will make its preliminary determination on or before June 13, 1983, and we will make ours on or before October 6, 1983.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Andrew Debicki, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone (202) 377-5403.

SUPPLEMENTARY INFORMATION:

Petition

On April 29, 1983, we received a petition filed by counsel on behalf of Jernberg Forgings Co., Lindell Drop Forge Co., Portec, Inc., Presrite Corporation, Presarite of Jefferson, Inc., Walco Metal Forming Group and Walker Forge, Inc. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports from Italy of forged undercarriage components are being, or are likely to be, sold in the United States at less than fair value within the meaning of Section 731 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act), and that these imports are materially injuring, or are threatening to materially injure, a United States industry.

The allegation of sales at less than fair value is supported by comparisons of United States prices based on published export price lists and discount schedules for sales of merchandise in the United States with published domestic price lists and discount schedules for sales made in Italy. In addition, the allegation of sales at less than fair value is further supported by comparing United States prices with prices for sales to third countries developed by the petitioners.

There is also an allegation of sales at less than the cost of production. The cost of production in Italy was based on petitioners' cost of production adjusted for differences in Italian wage rates and, where necessary, finishing costs.

Initiation of Investigation

Under Section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for initiation of an antidumping investigation, and whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on forged undercarriage components and found it meets these requirements.

Therefore, in accordance with section 732 of the Act, we are initiating an antidumping investigation to determine whether forged undercarriage components from Italy are being, or are likely to be, sold in the United States at less than fair value. If the investigation proceeds normally, we will make our preliminary determination by October 6, 1983.

Scope of Investigation

For purposes of this investigation, the term "forged undercarriage components" covers forged components for the undercarriages of crawler-mounted machinery as currently classifiable under items 664.06, 692.34 and 692.35 of the *Tariff Schedules of the United States Annotated (TSUSA).*

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided that the ITC confirms it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by June 13, 1983 whether there is a reasonable indication that imports of forged undercarriage components from Italy are materially injuring, or are threatening to materially injure, a United States industry. If its determination is negative, this investigation will terminate; otherwise, the investigation will continue according to statutory procedures.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

May 16, 1983.

BILLING CODE 3510-25-M

Initiation of Countervailing Duty Investigation; Forged Undercarriage Components From Italy

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether producers, manufacturers, or exporters in Italy of forged undercarriage components, as described in the "Scope of Investigation" section below, receive benefits which constitute subsidies within the meaning of the countervailing duty law. If our investigation proceeds normally, we will make our preliminary determination on or before July 25, 1983.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Andrew Debicki, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, (202) 377-5403.

SUPPLEMENTARY INFORMATION:

Petition

On April 29, 1983, we received a petition from counsel for Jernberg Forgings Co., Lindell Drop Forge Co., Portec, Inc., Presrite Corporation, Presrite of Jefferson, Inc., Walco Metal Forming Group and Walker Forge, Inc., on behalf of the U.S. industry producing forged undercarriage components. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that producers, manufacturers, or exporters in Italy of forged undercarriage components directly or indirectly receive subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act).

Italy is a "country under the Agreement" within the meaning of section 701(b) of the Act. Title VII of the Act, therefore, applies to this investigation, and an injury determination is required.

Initiation of Investigation

Under section 702(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for the initiation of a countervailing duty investigation and whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on forged undercarriage components and found it meets these requirements.

Therefore, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in Italy of forged undercarriage components, as listed in the "Scope of Investigation" section of this notice, receive subsidies. If our investigation proceeds normally, we will make our preliminary determination by July 25, 1983.

Scope of the Investigation

The products covered by this investigation are forged components for the undercarriages of crawler-mounted machinery. The merchandise is currently classified under item numbers 664.06, 692.34 and 692.35 of the *Tariff Schedules of the United States Annotated* (TSUSA).

Allegation of Subsidies

The petition alleges that producers, manufacturers, or exporters in Italy of forged undercarriage components receive the following benefits that constitute subsidies: government equity infusions inconsistent with commercial considerations, preferential financing through government involvement, excessive rebates of indirect taxes, capital grants under the Industrial Reconstruction and Reconversion Act, preferential export insurance, financing and guarantees, forging quality steel purchased at preferential prices and regional development incentives.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Instant Potato Granules From Canada; Final Results of Administrative Review of Antidumping Finding and Revocation in Part

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of antidumping finding and revocation in part.

SUMMARY: On September 23, 1982, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on instant potato granules from Canada. The review covered the three known exporters of this merchandise to the United States and generally the period October 1, 1980 through September 30, 1981.

Interested parties were given an opportunity to submit oral or written comments on the preliminary results. At the request of two of the exporters, we held a public hearing on October 25, 1982. After our analysis of the comments received, we have adjusted the margin for one of the firms. The margins in the preliminary results remain unchanged for the two remaining firms.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph Fargo or David R. Chapman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-2923.

SUPPLEMENTARY INFORMATION:

Background

On September 12, 1972, the Treasury Department published in the **Federal Register** an antidumping finding with respect to instant potato granules from Canada (T.D. 72-263, 37 FR 18505). On September 23, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 42013-14) the preliminary results of its last administrative review of the finding. The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of instant potato granules from Canada, currently classifiable under items 140.5000, 140.7000, and 141.8610 through 141.8630 of the Tariff Schedules of the United States Annotated.

The Department knows of three exporters of Canadian instant potato granules to the United States. This review covers all three exporters and the period October 1, 1980 through September 30, 1981. In addition, we have reviewed for one of the three firms, Carnation, Inc., the period October 1, 1981 through the date of publication of the Department's tentative determination to revoke with regard to that firm, November 30, 1981.

Analysis of Comments Received

Interested parties were given an opportunity to submit oral or written comments on our preliminary results. At the request of two respondents the Department held a hearing on October 25, 1982.

Comment 1: One of the exporters, Vauxhall Foods, Ltd., exported only ingredient potato granules to the United States during the period of review. Vauxhall did provide adequate responses for those U.S. sales. Vauxhall argues that ingredient potato granules were a commercial product in 1971-72 (the period of the fair value investigation), were not the subject of the antidumping investigation and therefore are outside the scope of the finding. The Tariff Commission

VOL 48 ISS 101 MY 24 1983 UMI

investigated the market for instant potato granules and not ingredient granules. Instant potato granules are normally packaged in a six-pound tin called a number 10 can. Inegredient granules are packaged in considerably larger packages, for example, 50-pound kraft bags, 420-pound metal drums, or one-ton nylon bags.

Although the basic manufacturing process is similar, there are significant differences between ingredient granules and instant potato granules that would preclude diversion. The products differ in sodium bisulphite content, butylated hydroxyanisole content, sodium acid pyrophosphate, monoglycerides, flavor and texture. In addition, ingredient granules have a maximum reducing sugar level not specified for instant potato granules. All of these differences would eliminate using ingredient granules as a substitute for instant potato granules in instant potato mixes. Even after adding the preservatives, vitamins, skim milk, butter flavor, seasonings, etc., mixes using ingredient granules would still be "an unacceptable (certainly noncompetitive) product in the marketplace." Diversion in the United States of ingredient granules to instant potato granule use also would be prohibitively expensive, requiring establishment of a mixing line in the United States, and would be easily discovered, again because mixing facilities do not now exist. The destination of granules could be monitored by the Commerce Department.

Department's Position: We agree that potato granules used as ingredients in the manufacture of snack foods and other food products were a commercial product during and prior to the period of the fair value investigation. We also agree that a product known as ingredient potato granules was not the subject of the antidumping investigation. However, we disagree that ingredient potato granules are a different product than instant potato granules. The Tariff Commission investigated the market for instant potato granules but considered granules that were to be used in "certain new food items" (undefined, but in our view broader than mashed potatoes) to be instant potato granules. (*See* U.S. Tariff Commission Report AA1921–97, *Instant Potato Granules from Canada*, Determination of Likelihood of Injury, September 7, 1972. The Department has previously recognized that price comparisons need not be conducted on all types of merchandise within the class that is the subject of an investigation. *See* "Final Results of Administrative Review of Antidumping Findings" on large power transformers from France, 47 FR 10288–89 (March 10, 1982).

Vauxhall submitted as Appendix I to its post-hearing brief to the Department its "Specification for Dehydrated Potato Granules" which was also referred to in the Appendix title page as "Specification for instant potato granules." The text of the specification refers to neither instant nor ingredient potato granules. Four types of packaging were offered in the specification: cases containing 24 boxes with 2 pouches per box, cases containing six number 10 cans, polyethylene-lines kraft bags, and epoxy.lines steel drums. Thus, even assuming the specification is for only instant granules, the packaging can be the same (bag or drum) as for ingredient granules.

Appendix II to Vauxhall's post-hearing brief lists certain home market sales of potato granules. The product specification in Appendix II matches Vauxhall's specifications for "instant" granules, in Appendix I, of sodium bisulfite, butylated hydroxyanixole, sodium acid pyrophosphate, and monoglycerides. The uses listed for the Appendix II product are as pyrogy dough, cake and bread mix, and stews and meat filler.

Appendix III to Vauxhall's post-hearing brief is specifically for potato granules to be used in the preparation of snack foods. The individual physical or chemical properties required by the Appendices I and III specifications generally overlap. We believe that the Appendix III specification is merely a variant of the Appendix I specification and therefore of the same class or kind of merchandise.

The potentially overlapping chemical and other physical specifications presented by Vauxhall ostensibly for ingredient or for instant potato granules are of such variety as to make diversion a practical possibility. Vauxhall sells to unrelated customers in the United States. Consequently, the expenses incurred in establishing a mixing line in the United States would be incurred by a customer, not by Vauxhall. We do not agree that diversion would be easily discovered. Monitoring importations of ingredient granules would require the Department to track importations to their destinations and oversee the use to which they are put.

Comment 2: Vauxhall failed to provide adequate responses on all of its home market sales of such or similar merchandise. Vauxhall argues that it has made a good-faith effort to answer the Department's questionnaire. Vauxhall misunderstood or was confused concerning requested information regarding certain home market sales. Vauxhall was prepared to answer the detailed questions if the Department had explained why Vauxhall should respond regarding those sales of "similar" merchandise.

Department's Position: We specifically told Vauxhall the exact information required. Vauxhall responded that we did not need the information because the merchandise was not comparable to the merchandise sold to the United States.

We do not allow respondents to our questionnaires to determine what data they will report to us. We gave Vauxhall an opportunity to supplement its original submission. Vauxhall did not furnish all of the information requested on sales of such or similar merchnadise. There could be no confusion about what the Department required. The Department does not bear the responsibility to explain why it requires each piece of information requested. Therefore, we used in the preliminary results the best information otherwise available, Vauxhall's most recent rate, to establish the assessment and cash deposit rates. We have continued the use of that information in these final results.

Comment 3: Vauxhall argues case and less than truckload (LTL) merchandise sold in the Canadian market is not comparable to the merchandise sold to the United States. The specifications of the cash/LTL sales (citing Appendices I and II) are different than those of full truckload sales in the Canadian market (citing Appendix III) or to the United States. The market for cash/LTL sales in Canada is different than that for the United States sales. The size of the orders and end use differ from sales to the United States and full truckload sales in Canada. If the cash/LTL sales were used, a difference in merchandise adjustment would be necessary based on the difference in the method and cost of production. Finally the cash/LTL sales are not contemporaneous with the United States sales or are for a much smaller quantity.

Department's Position: As described in our response to Comment 1, a comparision of Vauxhall's standard product specification (Appendix I) with the Appendix III specification shows overlap between the two. None of the reasons given by Vauxhall in this comment relieve Vauxhall of the responsibility of reporting all home market sales of such or similar merchandise. The evidence in the appendices concerning end use is contradictory and the size of an order is not dispositive. While the Department does make adjustments for physical differences in merchandise in accordance with § 353.16 of the Commerce Regulations, Vauxhall has not provided adequate information to make such adjustments. The Department generally may use home market sales made up to 90 days preceding a sale to the United States for comparison with that United States sales. Appendix V, which Vauxhall claims demonstrates that the cash/LTL sales are not contemporaneous with the United States sale, lists sales within such a period.

Comment 4: McCain Foods, Ltd. argues that its submitted questionnaire response should be considered timely filed because of the confusion between the Department and the company as to when the response was due. Even if considered untimely, there were mitigating circumstances which should permit acceptance of the response. Finally, McCain's response was not incomplete. If further information is required, McCain should be allowed to supplement is response.

Department's Position: We have decided that there was sufficient misunderstanding regarding the deadline for the submission of the response to allow us to consider the response as received on time. The response was incomplete; however, because the Department had accepted a comparably incomplete response for the previous review, we have allowed McCain to supplement its response and have used that infomation in completing this review.

Final Results of the Review and Revocation in Part

Based on our analysis of the comments received, we have changed the margin for McCain Foods Inc. The final results of our review for the other two firms are the same as those in our preliminary results:

Manufacturer/exporter	Time period	Margin (percent)
Carnation	10/1/80–11/30/81	[1] 0
Vauxhall	10/1/80–9/30/81	38.5
McCain	10/1/80–9/30/81	2.98

[1] No Shipments during the review period.

Also as a result of the review the Department revokes the antidumping finding on instant potato granules from Canada with respect to such merchandise manufactured and exported to the United States by Carnation. This partial revocation applies to all shipments of this merchandise from Carnation entered, or withdrawn from warehouse, for consumption on or after November 30, 1981, the date of publication of our tentative determination to revoke with regard to Carnation.

The Department shall determine and the U.S. Customs Service shall assess antidumping duties on all appropriate entries from the other two exporters with purchase or export dates during their periods of review. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the above margins shall be required on all shipments of Canadian instant potato granules from the two remaining firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. For any shipment from a new exporter not covered in this or prior reviews, whose first shipments occurred after the most recent period reviewed and who is unrelated to any covered firm, a cash deposit shall be required for future entries at the 2.98 percent rate.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review. The Department intends to begin immediately the next administrative review. The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review.

This administrative review, revocation in part, and notice are in accordance with sections 751 (a)(1) and (c) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1),(c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Metal-Walled Above Ground Swimming Pools From Japan; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on metal-walled above ground swimming pools from Japan. The review covers the three known Japanese exporters and one known third-country reseller of Japanese metal-walled above ground swimming pools to the United States and various periods from November 1, 1977 through August 31, 1982. The review indicates the existence of dumping margins in particular periods for certain exporters.

As a result of the review, the Department has preliminarily determined to assess dumping duties for individual exporters equal to the calculated differences between United States price and foreign market value on each of their sales during the periods of review. Where company-supplied information was inadequate, we used the best information available for assessment and estimated antidumping duty cash deposit rate purposes.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Betty H. Laxague or Susan Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–3601.

SUPPLEMENTARY INFORMATION:

Background

On April 13, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 15822) the final results of its last administrative review of the antidumping finding on metal-walled above ground swimming pools from Japan (42 fR 44811, September 7, 1977) and announced its intent to conduct the next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review. The substantive provisions of the Antidumping Act of 1921 ("the 1921 Act") and the appropriate Customs Service regulations apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by the review are shipments of metal-walled above ground swimming pools. This merchandise is currently classifiable under item numbers 657.2590 and 774.5595 of the Tariff Schedules of the United States Annotated.

VOL
48
ISS
101
MAY
24
1983
UMI

Metal-walled above ground swimming pools exported from third countries which contain walls, frames, and vinyl liners manufactured in Japan are within the scope of the finding.

The review covers the three known Japanese exporters and one known third-country reseller of Japanes metal-walled above ground swimming pools to the United States. The review covers various periods from November 1, 1877 through August 31, 1982. Though covered in the last administrative review, the Kenny firm is not included in the current review as it has gone out of business.

In our last review we deferred eleven third-country resellers because we were uncertain whether they exported Japanese metal-walled above ground swimming pools to the U.S. which were subject to the finding. We have determined that only one third-country reseller, Irwin Toy, Ltd. (Canada) ("Irwin"), exported merchandise subject to the finding to the United States.

Irwin submitted an inadequate response to our questionnaire. Therefore, for this non-responsive firm we used the best information available for assessment purposes. The best information available is the highest rate for responding firms with shipments in each period in which Irwin had shipments.

For the period September 1, 1980 through August 31, 1982, there were no shipments of Japanese metal-walled above ground swimming pools to the United States. The estimated antidumping duty cash deposit rate for each firm will be the most recent information for that firm.

United States Price

In calculating United States price the Department used purchase price, as defined in section 203 of the 1921 Act and section 772 of the Tariff Act. Purchase price was based on the packed, delivered price to unrelated purchasers in the United States, with deductions, where applicable, for U.S. and foreign inland freight, ocean freight, and marine insurance. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used the price to unrelated purchasers in third countries (Australia and France) in accordance with section 773 of the Tariff Act or section 205 of the 1921 Act, since there were no sales in the home market of such or similar merchandise. Where there were insufficient quantities of such or similar mechandise sold to Australia and/or France above the cost of production, we used constructed value as defined in section 773 of the Traiff Act or section 206 of the 1921 Act. Third-country sales prices were based on a packed price to an unrelated party with adjustments, where applicable, for Japanese inland freight, ocean freight, and marine insurance. Further adjustments were made for differences in the merchandise, in accordance with § 353.16 of the Commerce Regulations and § 153.11 of the Customs Regulations. No other adjustments were claimed or allowed.

Constructed values were calculated as the sum of the costs of materials, fabrication, general expenses, profit and the cost of packing. The amount added for general expenses was the statutory minimum of ten percent of the sum of materials and fabrication costs because the statutory minimum was higher than the actual general expenses. The amount added for profit was the statutory minimum of eight percent of the sum of materials, fabrication costs, and general expenses because the actual profit was less than eight percent.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist:

Manufacturer/Exporter	Time period	Margin (percent)
Asahi Chemical Industry Co., Ltd.	11/01/77–10/31/78	29.09
	11/01/78–10/31/79	28.67
	11/01/79–08/31/80	20.40
	09/01/80–08/31/82	[1] 20.40
Serwa Sangyo Co., Ltd	09/01/80–08/31/82	[1] 72.00
Hakuyo Sangyo	09/01/80–08/31/82	[1] 72.00
Irwin Toy Ltd (Canada)	04/01/78–10/31/78	29.09
	11/01/78–10/31/79	28.67
	11/01/79–08/31/80	20.40
	09/01/80–08/31/82	[1] 20.40

[1] No shipments during the period.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries made with purchase dates during the time periods involved. Individual differences between United States price and foreign market value may vary from the percentages stated above.

The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for by section 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based upon the most recent of the above margins shall be required on all shipments of Japanese metal-walled above ground swimming pools from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. For any future shipment for a new exporter not covered in this review or prior reviews, whose first shipments occurred after August 31, 1982 and who is unrelated to any reviewed firm, a cash deposit shall be required at the highest rate for responding firms with shipments during the review period, that is 20.40 percent. These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (9 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,
Deputy Assistant Secretary for Import Administration.

Viscose Rayon Staple Fiber From France; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of antidumping finding.

SUMMARY: On September 8, 1981, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on viscose rayon staple fiber from France. The review covered the known exporters, Rhone-Poulenc Textile and Achille Bayart et Cie, and the period March 1, 1980 through February 28, 1981. Interested parties were given an opportunity to submit written or oral comments on these preliminary results. One importer requested a hearing which was held on November 6, 1981. As a result of our analysis of oral and written comments received, we determine that the shipments in question are subject to this finding and therefore there are no changes in these final results from those presented in the preliminary results of review.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Michael R. Cox or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-5255/5496.

SUPPLEMENTARY INFORMATION:

Background

On March 21, 1979, an antidumping finding with respect to viscose rayon staple fiber from France was published in the **Federal Register** as Treasury Decision 79-88 (44 FR 17157-8). On September 8, 1981, the Department of Commerce ("the Department") published in the **Federal Register** (46 FR 44804-5) the preliminary results of its administrative review of the finding. The Department has now completed that administrative review.

Scope of the Review

The imports covered by the review are shipments of viscose rayon staple fiber, except solution dyed, in noncontinuous form, not carded, not combed and not otherwise processed, wholly of filaments (except laminated filaments and plexiform filaments), currently classifiable under items 309.4320 and 309.4325 of the Tariff Schedules of the United States Annotated.

The review covered the two known exporters of French viscose rayon staple fiber to the United States, Rhone-Poulenc Textile and Achille Bayart et Cie, and the period March 1, 1980 through February 28, 1981.

Analysis of Comments Received

We invited interested parties to submit written comments or request a hearing. One importer, Adolf O. Fuchs ("AOF"), requested a hearing, which was held on November 6, 1981.

Comment 1: AOF argued that its imported viscose rayon staple fiber is white and therefore falls within the "solution dyed" exception to the scope of the finding. The petitioner, the Committee of U.S. Rayon Producers, argued that the exception for solution dyed fiber from the scope of this finding must be interpreted in the context of its origin. Such an interpretation will demonstrate that white was not intended to be a color within the meaning of "solution dyed."

Department's Position: The phrase "except solution dyed" first appeared in the notices of "Discontinuance of Antidumping Investigation" regarding viscose rayon staple fiber from Austria (43 FR 3234-35) and "Withholding of Appraisement" for viscose rayon fiber from Belgium (43 FR 3233-34). In each case, the phrase was explicitly added as a modification of the "class or kind" of merchandise covered in each case. The identical phrase later appeared in the product descriptions of four other antidumping cases concerning viscose rayon staple fiber, initiated on May 5, 1978 (43 FR 19489-92), including viscose rayon staple fiber from France.

On the basis of a review of correspondence between the Treasury Department ("Treasury") and the interested parties in the Austrian viscose rayon staple fiber case, the Department is satisfied that Treasury did not intend white to be a color for purposes of the solution dyed exception in that case. The Department further concludes that Treasury implicitly incorporated this same interpretation of "except solution dyed" into the four later cases when it used precisely the same product description in initiating those cases. Therefore, the Department does not consider white fiber to be solution dyed fiber.

Comment 2: AOF argued that its viscose rayon staple fiber imports were explicitly exempt from this finding because Photine, a chemical brightener, has been added to the imported fiber, thereby making it "solution dyed" fiber. In response, the petitioner argued that the viscose rayon staple fiber imported by AOF is not solution dyed because Photine does not dye white fiber, but merely brightens it.

Department's Position: The Department concludes that the fiber imported by AOF is not "solution dyed" as that term is used in the U.S. industry. Solution dyeing requires the addition of color to the fiber prior to extrusion. Based on our analysis of data submitted by AOF and the petitioner, we find that, while Photine is added prior to extrusion, Photine is an optical brightener that simply makes already white viscose rayon staple fiber whiter, but does not alter viscose rayon staple fiber color. Therefore, the addition of Photine does not place it within the solution dyed exception.

Comment 3: The petitioner also stated that the fiber imported by AOF competes directly with fiber produced by the domestic fiber industry. Exclusion of AOF's fiber from the finding will potentially permit substantial importations of unfairly priced viscose rayon staple fiber.

Department's Position: The Department has determined that the imported viscose rayon staple fiber is within the intended scope of the finding. During an administrative review under section 751 of the Tariff Act, the Department may only clarify the scope of a particular finding. See *Royal Business Machines, Inc. v. United States*, 1 CIT 80, 86-87, 507 F. Supp. 1007, 1013 (1980). The Department can neither add merchandise to the scope of a finding that was previously beyond the scope nor drop merchandise that was previously included.

Comment 4: AOF contended that, prior to the assessment of anidumping duties, notice must be given of the class or kind of merchandise to which the finding will apply.

Department's Position: The Department's notice of final results for its first administrative review was published on April 2, 1981 and covered imports of identical fiber by AOF. This constitutes clear notice of our position at that time. AOF had an opportunity to contest this decision prior to publication of those final results and an opportunity to appeal to the Court of International Trade.

Comment 5: AOF commented that equity requires the Department to weigh the injurious effect of its decision on the opposing interests. The imports by AOF represent a minute segment of the domestic market but a substantial portion of AOF's business.

Department's Position: The Department cannot ignore certain importations simply because of their small relative magnitude. The purpose of the antidumpting finding is to eliminate all sales at less than fair value of the class or kind of merchandise that caused material injury to a domestic industry. The International Trade Commission is charged with responsibility for reviewing questions of continuing injury.

Comment 6: AOF asserted that no margins in fact exist with respect to importations of viscose rayon staple fiber from France during the period of review.

Department's Position: Neither exporter has provided an adequate response to our questionnaire. Absent adequate response we used the best information available, which in this case is the dumping margin calculated during the fair value investigation.

Comment 7: At the request of the Department AOF submitted comments in an attempt to substantiate its claim that, although the imported flat fibers are specialty fibers, they are not of the class or kind of merchandise intended to be included in the finding, and should be specifically excluded.

VOL 48 ISS 101 MAY 24 1983 UMI

Department's Position: Specialty fiber is expressely covered by the antidumping finding. AOF has not demonstrated that the Treasury Department intended to cover only certain types of specialty fiber. Therefore, flat fiber imports are covered by the finding.

Final Results of the Review

Based on our analysis of the comments received, we have made no changes in these final results from those presented in the preliminary results of review. We therefore determine that a weighted-average dumping margin of 24 percent exists for the period of review.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties of 24 percent on all shipments of viscose rayon staple fiber from France with purchase dates during the period of review. The Department will issue appraisement instructions on both exporters directly to the Customs Service.

Further, as provided by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based upon the above margin, that is, 24 percent of the entered value, shall be required on all shipments of French viscose rayon staple fiber entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement shall remain in effect until publication of the final results of the next administrative review. The Department intends to begin immediately the next administrative review.

The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible during the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Pacific Fishery Management Council's Groundfish Management Team; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

SUMMARY: The Pacific Fishery Management Council was established by Section 302 of the Magnuson Fishery Conservation and Management Act, 16 U.S.C. 1801 et seq., and the Council has established a Groundfish Management Team which will meet to discuss current groundfish management matters; prepare projections of groundfish landings for 1983, and develop a report for presentation to the Council at its June 8–9, 1983, meeting. Time is scheduled for public comment at 3 p.m., on June 1, and members of the public will be permitted to submit oral or written statements regarding these matters.

DATES: June 1, 1983; 9 a.m. to 5 p.m.; June 2, 1983, 8 a.m. to 5 p.m.

ADDRESS: The meeting will take place at the Oregon Department of Fish and Wildlife, Beaver Room, 506 S.W. Mill Street, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, Oregon 97201, Telephone: (503) 221–6352.

Dated: May 19, 1983.

Richard B. Stone,

Acting Chief, Operations Coordination Group, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Pacific Fishery Management Council's Groundfish Task Force; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

SUMMARY: The Pacific Fishery Management Council was established by Section 302 of the Magnuson Fishery Conservation and Management Act, 16 U.S.C. 1801 et seq., and the Council has established a Groundfish Task Force which will meet to discuss current groundfish management matters; review projections of groundfish landings for 1983, and, if necessary, develop groundfish management options for the remainder of 1983. The results of this meeting will be presented to the Council at its June 8–9, 1983, meeting, in Portland. A public comment period will be scheduled at 3 p.m., on June 3, 1983, and members of the public will be permitted to submit oral or written statements regarding these matters.

DATE: June 3, 9 a.m. to 5 p.m.

ADDRESS: The public meeting will take place at the Oregon Department of Fish and Wildlife, Commission Room, 506 S.W. Mill Street, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, Oregon 97201, Telephone: (503) 221–6352.

Dated: May 19, 1983.

BILLING CODE 3510-22-M

Pacific Fishery Management Council, Public Meeting With a Partially Closed Session Public Meetings of Its Groundfish Advisory Subpanel and Its Scientific and Statistical Committee

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice of public meeting with a partially closed session.

SUMMARY: This notice sets forth the schedule and proposed agendas of the forthcoming separate public meetings of the Pacific Fishery Management council, its Groundfish Advisory Subpanel, and its Scientific and Statistical Committee (SSC). The Council was established by Section 302 of the Magnuson Fishery Conservation and Management Act, 16 U.S.C. 1801 et seq., and the Council has established a Groundfish Advisory Subpanel and a SSC to assist the Council in carrying out its responsibilities under the Act. All portions of the meetings will be open to the public with the exception of the Council's closed session. The agenda items in the closed session are exempt from public attendance and participation pursuant to Section 302(i)(3) of the Magnuson Act.

DATES: June 7–9, 1983.

ADDRESS: The meetings will take place at the Cosmopolitan Motor Hotel, 1030 N.E. Union, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street, Second Floor, Portland, Oregon 97201, Telephone: (503) 331–6352.

Agendas

Council (open session)—June 8–9, 1983. (9:00 a.m. to 5:00 p.m. on June 8; 8:00 a.m. to 5:00 p.m. on June 9) in the Capri-Del Rio Room. Review the final draft of the Groundfish Plan Amendment which, among other things, would allow joint ventures for Pacific whiting south of 39°N latitude; review projections of groundfish landings for 1983 and, if necessary, adopt proposed groundfish management options for the remainder of 1983; tentatively adopt alternatives for the Salmon Framework Plan Amendment; consider other matters which may come before the Council by that date; and conduct a public comment period beginning at 4:00 p.m on June 8.

Council (closed session—June 8, 1983. (8:00 a.m. to 9:00 a.m.) in the Capri-del Rio Room. Discussion of the status of fishery negotiations between the U.S. and Canada, litigation and personnel matters. Only those Council members and staff having security clearances will be allowed to attend this session.

Groundfish Advisory Subpanel (open session)—June 7, 1983. (10:00 a.m.—5:00 p.m.) in the Hall of Fame Room. Draft recommendations to the Council on the Groundfish Plan Amendment and groundfish management options for the remainder of 1983, and conduct a public comment period beginning at 3:00 p.m. on June 7.

Scientific and Statistical Committee (open session)—June 7–8, 1983. (10:00 a.m.–5:00 p.m. on June 7; 8:00 a.m. to 5:00 p.m. on June 8) in the Bombay Room. Review final draft of the Groundfish Plan Amendment, groundfish management options for the remainder of 1983, and tentative alternatives for the 1984 Salmon Framework Plan Amendment, discuss other matters that may be referred to the committee by that date, and conduct a public comment period at 3:30 p.m. on June 7.

Dated: May 19, 1983.

Richard B. Stone,

Acting Chief, Operations Coordination Group, National Marine Fisheries Service.

BILLING CODE 3910-01-M

Department of the Army, Corps of Engineers

Intent To Prepare a Draft Supplement to the Final Environmental Impact Statement (FEIS) "Multipurpose Deepwater Port and Crude Oil Distribution System at Galveston, Tex."

AGENCY: Corps of Engineers, DOD, Galveston District.

ACTION: Notice of intent to prepare a draft supplement to an FEIS.

SUMMARY: 1. *Proposed Action.* The proposed action is to prepare a Draft Supplement to an FEIS in response to the January 20, 1983 decision of the Fifth Circuit Court of Appeals (New Orleans, Louisiana) that determined that, in order for Galveston District to reconsider its decision for five Department of the Army Permits (10400, 13576, 13577, 13578, and 13579), the District must rework the FEIS to correct two deficiencies: lack of a "worst case" oil spill analysis; and failure to adequately discuss the environmental impacts of bulk commodities activities. The Draft

VOL 48 ISS 101 MY 24 1983 UMI

Supplement will address both deficiencies in detail.

2. *Reasonable Alternatives.* Alternatives under consideration include:

a. Reissue the permits.

b. Reissue the permits with special conditions.

c. Deny issuance of the permits.

3. *Scoping Process.*

a. A notice has been prepared and will be circulated to agencies, organizations, and interested individuals inviting views and comments on the types of studies and depth of analyses which are required to address the two deficiencies noted by the Fifth Circuit Court. The Final Scope of Studies for the Draft Supplement will then be determined in consideration of the views submitted by the public and agencies.

b. Significant issues to be analyzed in the Draft Supplement include: frequency, fate and environmental impacts of a "worst case" oil spill; and effects of bulk commodities that may be induced by the project.

c. The Draft Supplement will be coordinated with all required Federal, State, and local agencies, environmental groups, the applicants, and interested individuals.

d. Environmental consultation and review of the project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, Council on Environmental Quality Regulations (40 CFR Parts 1500–1508), and all other applicable laws, regulations and guidelines.

4. *Scoping Meetings.* No future public meeting to discuss the scope of the Draft Supplement has been scheduled.

5. *Estimated Availability Date of Draft Supplement.* The Draft Supplement is expected to be available to the public in Spring 1984.

ADDRESS: Questions about the proposed action and Draft Supplement to the FEIS can be answered by Mr. C. R. Harbaugh, Chief, Environmental Resources Branch, Galveston District, Corps of Engineers, P.O. Box 1229, Galveston, Texas 77553, (409) 766–3044.

Dated: May 16, 1983.

Alan L. Laubscher,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-GK-M

Department of the Navy

Privacy Act of 1974; Proposed New System of Records

AGENCY: Department of the Navy (U.S. Marine Corps), DOD.

ACTION: Notice of a new system of records.

SUMMARY: The U.S. Marine Corps proposes to add a system of records to its inventory of systems of records subject to the Privacy Act of 1974. The system notice for the new system is set forth below.

DATE: The proposed system notice will be effective without further notice on June 23, 1983.

ADDRESSES: Send any comments to the system manager identified in the system notice.

FOR FURTHER INFORMATION CONTACT: Mrs. B. L. Thompson, Privacy Act Coordinator, Headquarters, U.S. Marine Corps, Washington, D.C. 20380, telephone: 202/694–1452.

SUPPLEMENTARY INFORMATION: The U.S. Marine Corps systems notices for record systems subject to the Privacy Act of 1974, as amended, Title 5 United States Code section 552a have been previously published in the **Federal Register** (46 FR 6639 Jan. 31, 1981).

A new system report as required by 5 U.S.C. 552a(o) was submitted on April 18, 1983.

May 19, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

MMN00049

SYSTEM NAME:

Manpower Management Information System.

SYSTEM LOCATION:

Marine Corps Base, Camp Lejeune, North Carolina.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Marines who are joined to Base organizations and filling a Table of Organization (T/O) line number; all nonchargeable military personnel who are administratively attached to Base organizations (except students); and wage grade employees assigned to Base and tenant units.

CATEGORIES OF RECORDS IN THE SYSTEM:

Files contain personal identification data such as name, social security number, pay grade, military occupational specialties, dates current tour began and other information extracted from the existing Manpower Management System and Naval Automated Civilian Manpower Information System master records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Title 10, U.S. Code 5031 and Title 10, U.S. Code 5201.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See the Blanket Routine Uses at the head of the published Marine Corps systems notices in the **Federal Register**.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on magnetic tape and disk.

RETRIEVABILITY:

Records are accessed by social security number and T/O line number.

SAFEGUARDS:

Building has a 24-hour security watch. Computer terminals and records are located in areas accessible only to authorized personnel that are properly screened, cleared and trained. Use of terminals requires knowledge of passwords. Terminals are physically locked when not being used by authorized personnel.

RETENTION AND DISPOSAL:

Records on magnetic disk are retained from one file recreation to the next generally one month. Magnetic tapes are forwarded to Headquarters, U.S. Marine corps.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Chief of Staff for Manpower, Marine Corps Base, Camp Lejeune, North Carolina 28542, Telephone: (919) 451–2220.

NOTIFICATION PROCEDURES:

Requests from individuals should be addressed to the system manager. Written requests for information should contain the full name and social security number, date and place of birth and signature of the individual concerned. For personal visits, the individual should be able to provide identification bearing picture and signature or sufficient verbal data to ensure that the individual is the subject of inquiry.

RECORD ACCESS PROCEDURES:

The agency's rules for access to records may be obtained from the system manager.

CONTESTING RECORD PROCEDURES:

The agency's rules for contesting contents and appealing initial determination by the individual concerned may be obtained from the system manager.

RECORD SOURCE CATEGORIES:

Information in the system is obtained from the Manpower Management System, the Naval Automated Civilian Manpower Information System, the Table of Manpower Requirements, from the individual's commanding officer or supervisor, and from the individual.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 3810-01-M

Office of the Secretary

Privacy Act of 1974; Amendment to a Notice for a System of Records

AGENCY: Office of Inspector General, Office of the Secretary, DoD.

ACTION: Amendment to a notice for a system of records.

SUMMARY: The Office of the Inspector General, Department of Defense, proposed to amend the notice for a system of records. The amendment is set forth below.

DATE: The proposed system notices will be effective without further notice on June 23, 1983.

ADDRESSES: Send any comments to the system manager.

FOR FURTHER INFORMATION CONTACT: Mr. David Stewart, Office of the Assistant Inspector for Administration, Department of Defense, Washington, D.C. 20301. Telephone: 694–0491.

SUPPLEMENTARY INFORMATION: The system notice for system of records: CIS–06, entitled: Investigative Files, appeared in the **Federal Register** on July 15, 1983 at 47 FR 30809 (FR Doc. 82–19152).

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

May 19, 1983.

Changes

CIS–06

System name: Investigative Files.

In *System location,* add: "The Office of the Inspector General, the Department of Defense, the Pentagon, Washington, D.C. 20301, has temporary control over portions of the records in the system."

In *Categories of records in the system,* delete the third paragraph and insert in its place:

* * * * *

"Case control documents which are not included in RO1s but which serve as the basis of investigation or which guide and facilitate investigative activities, including documents providing the data to open, conduct, transfer and close cases, as well as Defense Hot Line Complaints;"

* * * * *

As revised, "System location" and "Categories of records in the system" read as follows:

CIS–06

SYSTEM NAME:

Investigative Files.

SYSTEM LOCATION:

Defense Criminal Investigative Service (DCIS), a component of the Assistant to the Secretary of Defense (Review and Oversight) (ATSD(R&O)), Cameron Station, Alexandria, VA 22314, has primary control over the system.

Regional field offices, resident agencies, and various DCIS headquarters staff elements originate and have temporary control over portions of the records.

The Office of the Inspector General, the Department of Defense, the Pentagon, Washington, DC 20301 has temporary control over portions of the records in the system.

* * * * *

CATEGORIES OF RECORDS IN THE SYSTEM:

Official Reports of Investigation (RO1s) including any attachments prepared by DCIS or other DoD federal, state, or local official investigative activities;

DCIS Information Summary Reports (ISRs) which record unsolicited information of criminal nature received by DCIS concerning a person or incident which is of direct interest to other DoD Components or federal agencies;

Case control documents which are not included in the ROIs but which serve as the basis of investigation or which guide and facilitate investigative activities, including documents providing the data to open, direct, conduct, transfer and close cases; as well as Defense Hot Line Complaints;

DCIS file administration and management documents accounting for disclosure, control, and access to a file; and

Grand Jury information not contained in case files, agent notes, fingerprint cards, duplicate files at the local level and other miscellaneous documents supporting the criminal investigation file to include court documents and on occasion reports of administrative proceedings.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Gary Energy Corp.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of action taken on Consent Order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announced that it has adopted a Consent Order with Gary Energy Corporation (Gary) as a final order of the Department.

EFFECTIVE DATE: May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Donald A. Muncy, Deputy Chief Counsel, Dallas Office, Economic Regulatory Administration, Department of Energy, 1341 W. Mockingbird, Room 200 E, Dallas, Texas 75247, 214/767–7408.

SUPPLEMENTARY INFORMATION: On March 14, 1983, 48 FR 10731, the ERA published a notice in the **Federal Register** that it had executed a proposed Consent Order with Gary Energy Corporation on February 18, 1983, which would not become effective sooner than 30 days after publication of that notice. Pursuant to 10 CFR 205.199J(c) interested persons were invited to submit comments concerning the terms and conditions of the proposed Consent Order.

The Consent Order with Gary, a refiner and NCL processor with its home office located in Englewood, Colorado, resolves potential liability of Gary, arising out of Gary's compliance with the Mandatory Petroleum Allocation and Price Regulations during the period from January 1, 1983 through January 28, 1981. The Consent Order requires Gary to pay the sum of $600,000 to the administrator of the ERA ultimate disposition by DOE.

Fifteen comments were received. All of the comments addressed the issue of the appropriate disposition of the $600,000 refund. Nine comments asserted that the most suitable distribution of the funds after payment to identified injured customers, could be accomplished through allotment of the

VOL 48 ISS 101 MY 24 1983 UMI

funds to individual state governments for energy conservation programs and other energy-related programs directly benefiting consumers, by pro-rata allotments based on a state's petroleum consumption. Three comments averred that the most equitable distribution of refunds could be accomplished by allotment of funds directly to the individual state governments for energy programs.

Two commentors made claims against the refunds proceeds, but neither of them furnished information on which a determination could be made that they had been injured by any actions of Gary. Rather, each merely asserted that it has been a purchaser of products from Gary.

The remaining comment stated that the proposed Consent Order should be clarified by explaining the relationship between Gary and both Gary Operating Company and a third company, Spruce, and whether activities by these entities fell within the purview of the Consent Order. The comment stressed that failure to clarify the relationship between these firms will make it difficult for purchasers of Gary Operating Company and Spruce to determine if such purchasers qualify for a portion of the proposed refund.

After consideration of the suggestion that the proposed Consent Order be clarified, it was concluded that such clarification is unnecessary for the following reasons. First, as set out in the Consent Order, all alleged violations of Gary Energy Corporation and Gary Operating Company are resolved by the Consent Order, and because of the combination of information of the two entities for compliance auditing purposes, specific allegations and therefore, resolution of them cannot be separated. Secondly, the Consent Order does not address and has no impact on the compliance or noncompliance of Spruce (which is not an affiliate of Gary Energy or Gary Operating) with any regulatory provisions.

With respect to the disposition of the $800,000 Gary has agreed to refund, DOE has not yet determined the appropriate disposition. The suggestions of the commentors will be duly considered in determining the appropriate disposition of funds.

Having considered all coments submitted, DOE has determined that the proposed Consent Order with Gary Energy Corporation should be made final on May 24, 1983.

Issued in Dallas, Texas on 5th day of May, 1983.

Ben L. Lemos,

Director, Dallas Office, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-011]

Kerr Glass Manufacturing Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Kerr Glass Manufacturing Corporation (KERR), 501 South Shatto Place, Los Angeles, California 90020, filed an application on April 11, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its glass production facility in Dunkirk, Indiana, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). The application was amended on May 6, 1983, to add an eligible seller; the volumes remain the same. More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its amended application, KERR indicates that the volume of natural gas for which it requests certification is approximately 5,000 Mcf per day. This volume is estimated to displace the use of approximately 794 barrels of No. 6 fuel oil (1.0-2.0 percent sulfur) per day.

The eligible sellers are SW Pipeline Company, c/o Industrial Gas Services, Inc., 4501 Wadsworth Boulevard, Wheatridge, Colorado 80033; and IGC Energy, Inc., 1630 North Meridian Street, Indianapolis, Indiana 46202. The gas will be transported by Panhandle Eastern Pipeline Company, P.O. Box 1642, Houston, Texas 77001; and by Indiana Gas Company, P.O. Box 1231, Muncie, Indiana 47305, a local distribution Company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to KERR and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 18, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Proposed Remedial Order to John M. Holland, Jr., et al.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed remedial order to John M. Holland, Jr., Jack Holland & Son, Inc. and P.H.D. Corp., Inc.

SUMMARY: Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA), of the Department of Energy (DOE) gives notice that a Proposed Remedial Order (PRO) was issued on May 4, 1983, to John M. Holland, Jr. whose address is Post Office Box H, Safford, Arizona or 815 Hillsborough Boulevard, Hillsborough, California; Jack Holland & Son, Inc. which is located at 799 Fletcher Lane, Room 204, Hayward, California 94544; and P.H.D. Corp., Inc. which is located at 570 "B" Street, Hayward, California 94541. Any aggrieved person may file a Notice of Objection to the Proposed Remedial Order in accordance with 10 CFR 205.193 on or before the fifteenth day after the publication of this Notice, or on the first federal workday thereafter.

In this Proposed Remedial Order, ERA sets forth proposed findings of fact and conclusions of law concerning sales of crude oil in the western United States, principally in California, Arizona and Nevada, by Jack Holland & Son, Inc. and P.H.D. Corp, Inc. during the period January 1978 through December 1979.

During that period Jack Holland & Son, Inc. and P.H.D. Corp., Inc., and John M. Holland, Jr. as an officer and controlling shareholder of both corporations, are alleged to have overcharged customers of crude oil by $22,177,306.85, in violation of the price rules applicable to resales of crude oil set forth in 10 CFR Part 212, Subpart L.

The Proposed Remedial Order alleges that Jack Holland & Son, Inc. and P.H.D. Corp., Inc.: (1) Sold crude oil at prices in excess of lawful prices in violation of 10 CFR 212.183, (2) failed to certify properly sales of crude oil in violation of 10 CFR 212.131, (3) sold crude oil while failing to perform any service or other function traditionally associated with the resale of crude oil, and (4) circumvented the pricing and certification regulations applicable to crude oil by selling crude oil as "fuel oil," thereby violating 10 CFR 205.202 and 210.62(c), which prohibited activities resulting in the circumvention of DOE regulations.

Request for copies of the Proposed Remedial Order, with confidential information deleted, should be directed to: Raymond G. Gong, Chief Counsel, San Francisco Office, Economic Regulatory Administration, U.S. Department of Energy, 333 Market Street, Sixth Floor, San Francisco, CA 94105.

Aggrieved persons may object to this Proposed Remedial Order by filing a Notice of Objection to the Proposed Remedial Order. This notice must comply with the requirements of 10 CFR 205.193.

To be considered, a Notice of Objections must be filed with: Office of Hearings and Appeals, Department of Energy, 12th & Pennsylvania Avenue NW., Washington, D.C. 20461.

The notice must be filed in duplicate, by 4:30 p.m. e.d.t. on or before the fifteenth day after publication of this Notice, or the first federal workday thereafter. In addition, a copy of the Notice of Objection must, on the same day as filed, be served on John M. Holland, Jr., Jack Holland & Son, Inc., and P.H.D. Corp., Inc. and on each of the following persons pursuant to 10 CFR 205.193(c):

Raymond G. Gong, Chief Counsel, San Francisco Office, Economic Regulatory Administration, U.S. Department of Energy, 333 Market Street, Sixth Floor, San Francisco, CA 94105

Tony Miles, Assistant General Counsel for Administrative Litigation, U.S. Department of Energy, 1000 Independence Avenue SW., Washington, D.C. 20585

No data or information which is confidential should be included in any Notice of Objection.

Issued in San Francisco, California on the fourth day of May, 1983.

Raymond G. Gong,

Chief Counsel, Economic Regulatory Administration, San Francisco Office.

BILLING CODE 6450-01-M

Oil-Tex Petroleum, Inc. and David E. Myres; Amended Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of an Amended proposed Remedial Order which was issued to Oil-Tex Petroleum, Inc. and David E. Myres, Houston, Texas. This Amended Proposed Remedial Order alleges pricing violations in the amount of $2,477,378.00 plus interest in connection with the resale of crude oil at prices in excess of those permitted by 10 CFR Parts 205, 210, and 212, Subparts J and L during the time period March 1980 through December 1980.

A copy of the Amended Proposed Remedial Order, with confidential information deleted, may be obtained from James F. Murphy, Manager, Crude Reseller Program, Economic Regulatory Administration, Department of Energy, P.O. Box 35228, Dallas, Texas 75235, or by calling (214) 767-7432. Within fifteen (15) days of publication of this notice, any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, Federal Building, Room 3304, 12th & Pennsylvania Ave. NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193

Issued in Dallas, Texas, on the 29th day of April, 1983.

Ben L. Lemos,

Director, Dallas Office, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

[Form AD-R0177]

National Survey of Compensation Paid to Scientists and Engineers Engaged in Research and Development; Inquiry

AGENCY: Office of the Assistant Secretary for Management and Administration, DOE.

ACTION: Request for comments on proposed extension of Form AD-R0177.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980, this notice announces a proposed extension of a form and invites comments on the form. Form AD-R0177, "National Survey of Compensation Paid to Scientists and Engineers Engaged in Research and Development," collects salary information. It is completed on a voluntary basis by employers and employees in research and development. The Department of Energy and survey participants use the published survey data to evaluate compensation of scientists and engineers employed in their respective operations (in case of DOE, contractor-operated government facilities). Nonparticipants may purchase the report on survey data from the National Technical Information Service.

DATE: Written comments must be submitted on or before June 23, 1983.

ADDRESS: Send comments to Cornelius J. Carr at the address listed below.

FOR FURTHER INFORMATION CONTACT: To obtain additional information or copies of the Form AD-R0177, contact Cornelius J. Carr, MA-262.1, Room 4H023, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-9037.

SUPPLEMENTARY INFORMATION:

I. Current Action.
II. Request for Comments.

I. Current Action

DOE proposes extension of the Form AD-R0177, "National Survey of Compensation Paid to Scientists and Engineers in Research and Development." The form is completed by employers and employees in research and development. DOE uses the published summary survey data to evaluate the compensation of scientists and engineers employed in contractor-operated government facilities. Moreover, many private sector research and development institutions use the published survey for the purpose of salary comparison. The survey data will be collected and processed by the Battelle Columbus Laboratories. DOE will publish the survey results and provide copies to survey participants. The form is the same as previously used.

II. Request for Comments

The DOE invites prospective respondents to comment on the planned revisions within 30 days of the publication of this notice. The following general guidelines are provided to assist in the preparation of responses:

VOL
48
ISS
1
01
MY
24
1983
UMI

(As a potential data provider)

a. Are the instructions and definitions clear and sufficient? If not, what instructions require clarification?

b. Can data be submitted using the definitions included in the instructions?

c. Can the data be submitted in accordance with the response time specified in the instructions?

d. How many hours, including time for preparation and administrative review, will your organization require to complete and submit the form?

e. What is the estimated cost of completing the form, including the direct and indirect costs associated with the data collection? Direct costs should include all one-time and recurring costs, such as development, assembly, equipment, ADP and other administrative costs directly attributable to providing this information.

f. Do you know of other Federal, State or local agencies that collect similar data? (If yes, please identify.)

g. How can the form be improved?

(As a potential user)

a. Do you need data at the levels of detail indicated on the form?

b. For what purposes would you use these data? (Be specific.)

c. How could the form be improved to better meet your specific data needs?

d. Are there alternative sources of data and do you use them? What are their deficiencies?

DOE is also interested in receiving comments from persons as to their views on the need for the collection of this information.

Comments submitted in response to this notice will be included in the request for Office of Management and Budget approval of this data collection and will become a matter of public record.

Issued in Washington, D.C., May 18, 1983.

Yvonne M. Bishop,

Director, Office of Statistical Standards, Energy Information Administration.

[FR Doc. 83-11476 Filed 5-23-83; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. ER83-490-000]

Connecticut Light and Power Co.; Notice of Filing

May 18, 1983.

The filing Company submits the following:

Take notice that on May 2, 1983, the Connecticut Light and Power Company (CL&P) tendered for filing a proposed rate schedule with respect to a Transmission Agreement dated November 1, 1982 between (1) CL&P and Western Massachusetts Electric Company (WMECO, and together with CL&P the NU Companies) and (2) Westfield Gas and Electric Department (WG&E).

CL&P states that the Transmission Agreement provides for transmission services to WG&E for the wheeling of WG&E's purchase from the Massachusetts Municipal Wholesale Electric Company (MMWEC) of a portion of MMWEC's entitlement obtained from Point Lepreau Unit No. 1 (located in New Brunswick, Canada) during the period commencing on the date Point Lepreau Unit No. 1 achieves commercial operation to October 31, 1987.

The transmission charge rate is a monthly rate equal to one-twelfth of the estimated annual average cost of transmission service on the electric transmission system of the NU Companies determined in accordance with Appendix A and Exhibits I, II and III thereto, of the Transmission Agreement. The monthly transmission charge is determined by the product of: (i) The transmission charge rate ($/kW-month), and (ii) the number of kilowatts transmission charge is reduced by 50% to give due recognition for payments made by WG&E to other utility systems also providing related transmission service.

CL&P requests an effective date of February 1, 1983, and therefore requests waiver of the Commission's notice requirements. CL&P states that copies of this rate schedule have been mailed to WMECO, and WG&E.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 210 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.210, 385.211 and 385.214). All such petitions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-13822 Filed 5-23-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ES83-42-000]

Edison Sault Electric Co.; Notice of Application

May 18, 1983.

Take notice that on May 12, 1983, Edison Sault Electric Company (Applicant) filed an application seeking authority pursuant to Section 204 of the Federal Power Act to issue up to $1,250,000 principal amount of short-term debt, with final maturities of not later than December 31, 1984.

Any person desiring to be heard or to make any protest with reference to the said application should on or before May 31, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). The application is on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-13823 Filed 5-23-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP68-179-001]

Florida Gas Transmission Co.; Notice of Informal Conference

May 18, 1983.

On November 12, 1981, Florida Gas Transmission Company (FGT) filed an application with the Federal Energy Regulatory Commission (FERC) pursuant to Section 7(c) of the Natural Gas Act, 15 U.S.C. Section 717f(c), requesting that the certificate issued to it in the above-styled proceeding be amended in order to enable it to replace the current volumetric limitations authorized for that system so as to permit unlimited load growth for its Priorities 1 through 4 customers and to freeze the level of service to its Priorities 5 through 9 customers after providing for some additional growth.

Several protests and petitions to intervene (some supporting and some opposing) FGT's application to amend filed in the instant proceeding have been filed with the Commission. In addition certain customers have recently expressed a current interest in this proceeding and indicated a strong desire to see it move forward to a final determination.

In view of all these factors an informal conference will be convened on June 1, 1983 at 10:00 a.m. for the purposes of discussing the issues involved in the above-styled proceeding.

This informal conference will be held at the offices of the FERC at 825 North Capitol Street, NE., Washington, D.C. 20426. All interested parties are invited to attend this conference.

Kenneth F. Plumb,

Secretary.

[Docket Nos. RP82-116-005 (PGA83-2) and TA83-2-7-003]

Southern Natural Gas Co.; Notice of Proposed Changes in FERC Gas Tariff

May 18, 1983.

Take notice that Southern Natural Gas Company (Southern), on May 18, 1983, tendered for filing proposed changes in its FERC Gas Tariff, Sixth Revised Volume No. 1, to become effective June 1, 1983. The revised tariff amends previous PGA and general rate increase filings on the above-styled proceedings to effect a major rate reduction following settlement conference with its customers, the Commission Staff and other parties. The proposed changes would decrease Southern's rates as a result of the following items.

(1) An amendment to its most recently filed PGA reflecting certain decreases in cost of purchased gas to jurisdictional customers of 294.549¢ of approximately 21.4¢ per Mcf.

(2) A reduction in its general rate increase in Docket No. RP82-116 to reflect reduced costs including a reduction in the cost of equity capital to 13 percent and a reduction in mainline depreciation expense to 3.00 percent.

The rate reductions requested herein are in anticipation of a rate settlement to be entered into by all parties prior to June 1, 1983. Absent such a settlement, Southern reserves the right to restore jurisdictional rates to the current level.

Copies of the filing were served upon all parties to Docket Nos. RP82-116 and

VOL 48 ISS 101 MAY 24 1983 UMI

TA83–2–7, the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 25, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the preceedings. Any person wishing to become a party must file a petition to intervene.

Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER83–496–000]

Cleveland Electric Illuminating Co.; Filing

May 19, 1983.

The filing company submits the following:

Take notice that on May 5, 1983, the Cleveland Electric Illuminating Company (CEI) tendered for filing an executed Service Agreement and Exhibits A and B thereto, providing for transmission by CEI of approximately 40 MW of power from the 345 kv interconnection point on CEI's Juniper-Canton Line with the Ohio Power Company to the City of Cleveland, Ohio (City) in accordance with the terms and conditions of CEI's FERC Transmission Service Tariff.

CEI has requested waiver of the FERC's 60–day notice requirement in order to permit commencement of transmission service on May 1, 1983.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such petitions or protests should be filed on or before June 2, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding.

Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. ER83–501–000]

Florida Power Corp.; Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 9, 1983, Florida Power Corporation (Florida Power) tendered for filing a Contract for Interchange Service (Contract) between Florida Power and the City of Tallahassee, Florida entered into on May 1, 1983. The Contract provides for the following interchange services: emergency energy, short-term and long-term firm capacity and energy, and economy energy.

Florida Power asks that the sixty (60) day notice requirement be waived so that the Contract, in acordance with its terms, may be permitted to become effective on May 1, 1983.

Florida Power states that copies of this filing have been mailed to the City of Tallahassee and the Florida Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before June 6, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. ER83494–000]

Florida Power Corp; Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 5, 1983, Florida Power Corporation (Florida Power) rendered for filing a revision to the daily capacity charge of its scheduled interchange service to Florida Power & Light Company, Tampa Electric Company, the Orlando Utilities Commission, the Sebring Utilities Commission, the Jacksonville Electric Authority, and the Cities of Gainesville, Kissimmee, St. Cloud and Lakeland, Florida under interconnection agreements with each of these utilities. According to Florida Power, the revised charge of $127.29 per MW per day is based on 1982 data and is derived according to the same method shown in

cost support schedules submitted with the inteconnection agreements. According to Florida Power, the present daily capacity charge based on 1981 data is $96.27 per MW per day.

Florida Power requests that the revised daily capacity charge be made effective on May 1, 1983, and request waiver of notice requirement.

According to Florida Power, the filing has been served on each of the above-named utilities and the Florida Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 2, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER83–500–000]

Idaho Power Co.; Compliance Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 9, 1983, the Idaho Power Company tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supesedes Original Volume No. 1) during March, 1983, along with cost justification for the rate charged. This filing includes the following supplements:

Utah Power & Light Company—Supplement 17
Montana Power Company—Supplement 15
Sierra Pacific Power Company—Supplement 15

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 6, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER83–503–000]

Kansas Power & Light Co.; Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 9, 1983, the Kansas Power and Light Company (KPL) tendered for filing Amendment #8 to the General Participation Agreement to Mokan Pool members.

Amendment #8 provides for the addition of City Power & Light Department of the City of Independence, Missouri to the Mokan Power Pool.

KPL states that the following are presently Participants under the General Participation Agreement with the following FPC Rate Schedule Numbers:

Kansas City Power & Light Company—Rate Schedule FPC No. 32
Missouri Public Service Company—Rate Schedule FPC No. 8
The Empire District Electric Company—Rate Schedule FPC No. 73
Kansas Gas and Electric Company—Rate Schedule FPC No. 94
The Kansas Power & Light Company—Rate Schedule FPC No. 7
Central Telephone & Utilities Corporation—Rate Schedule FPC No. 53
St. Joseph Light & Power Company—Rate Schedule FPC No. 17
Midwest Energy, Inc.
Sunflower Electric Cooperative, Inc.
Board of Public Utilities of the City of Kansas City, Kansas

KPL states that all Participants under the General Participation Agreement filed certificates of concurrence to the proposed change with KPL's submittal.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 3, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. ER83–499–000]

Pacific Gas & Electric Co.; Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 9, 1983, Pacific Gas and Electric Company (PG&E) tendered for filing as an initial rate schedule a January 28, 1983 Letter Agreement for interruptible transmission service by PG&E for the Western Area Power Administration (Western).

The agreement provides that PG&E will transmit non-firm energy obtained by Western, from the Colorado River Storage Project, from Midway Substation to Tracy Substation, subject to the availability of transmission capacity in the PG&E system. The transmission rate of 1.0 mill-kWh is a negotiated rate. Energy delivered at Midway shall be reduced by 1.7% to compensate for transmission losses.

PG&E requests an immediate effective date of October 2, 1981, and therefore requests waiver of the 60-day notice requirement.

Copies of the filing were served upon Western and the California Public Utilities Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 6, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the preceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the

[Docket No. ER83-498-000]

Pacific Gas & Electric Co.; Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 9, 1983, Pacific Gas and Electric Company (PG&E) tendered for filing a signed letter agreement dated March 28, 1983, amending Article 14(a)(3) of the United States Power Contract No. 14-06-200-2948A (Contract) between the Western Area Power Administration (Western) and PG&E dated July 31, 1967 (Original FPC Volume No. 4).

The letter agreement states that PG&E agrees to support, under the terms of the Contract, a load level of up to 1152 MW.

PG&E requests an effective date of March 1, 1983 as agreed by both parties, and therefore requests waiver of the 60-day notice requirement.

Copies of the filing were served upon Western and the California Public Utilities Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 6, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-502-000]

Public Service Company of Colorado; Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 9, 1983, the Public Service Company of Colorado (PSCo) tendered for filing a proposed change in its FERC Electric Service Tariff. PSCo states that the proposed change is a Supplemental Agreement (Supplement) to PSCo's Power Purchase Agreement (Agreement) with the City of Burlington, Colorado (Burlington), dated February 19, 1974, as amended, filed with the Commission under PSCo's FERC Rate Schedule No. 15.

PSCo indicates that the Supplement provides that Burlington may reduce its obligation to accept and pay for its requirements of electric power and energy provided by the Company by the amount of electric power obtained from Western Area Power Administration (WAPA) for peak shaving purposes only. PSCo will act as the scheduling agent for Burlington in scheduling repayment energy to WAPA. PSCo will provide all repayment energy to WAPA for Burlington's account, including any required losses, Mt. Elbert pump back energy, and Burlington will pay PSCo for same at the energy charge in effect for PSCo's deliveries of energy to Burlington.

PSCo requests waiver of the notice requirements as there is no change in rates proposed by this filing.

PSCo states that copies of the filing were served upon all parties to the Agreement and affected state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 3, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

[Docket No. ID-1864-001]

Jackson H. Randolph; Application

May 19, 1983.

The filing individual submits the following:

Take notice that on May 13, 1983, Jackson H. Randolph filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Director, Vice President—The Cincinnati Gas & Electric Company.

Director, Vice President—The Union Light, Heat and Power Company.

Vice President—Miami Power Corporation.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 285.211, 385.214). All such motions or protests should be filed on or before June 6, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-493-000]

Southern California Edison Company; Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 3, 1983, Southern California Edison Company (Edison) tendered for filing a notice of change of rates for transmission service as embodied in Edison's agreements with the following entities:

	Rate Schedules FERC No.
City of Los Angeles	102, 118, 140, 141
San Diego Gas & Electric Co.	139, 151
Pacific Gas & Electric Co.	117, 147
City of Burbank	114, 135
City of Pasadena	115, 158, 137
Western Area Power Administration	120
Arizona Power Pooling Association	93
Arizona Electric Power Cooperative	132, 161
M-S-R Public Power Agency	153
City of Glendale	136, 143
Imperial Irrigation District	138

Edison requests waiver of the Commission's prior notice requirements and an effective date of January 1, 1983, for these rate changes.

Copies of this filing were served upon the Public Utilities Commission of the State of California and all interested parties.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed in or before June 1, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER83-504-000]

Utah Power & Light Company; Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 10, 1983, Utah Power & Light Company (Utah) tendered for filing new service agreements providing for sales under Service Schedules UTAH-1B and UTAH-1C of Volume 2 of Utah FERC Electric Tariff, under which Utah sells and delivers non-firm energy to electric utilities. The new service agreements are with the following purchasers:

Idaho Power Company—(UTAH-1B).

City of Riverside, California—(UTAH-1B and 1C).

Southern California Edison Company—(UTAH-1B and 1C).

Western Area Power Administration—(UTAH-1B).

Arizona Electric Power Cooperative, Inc.—(UTAH-1C).

Utah requests that the UTAH-1B agreements be made effective retroactively on the date of the first delivery or the date of the agreement, whichever is earlier and that the UTAH-1C agreements be made effective retroactively to the date of the agreement. Utah also requests that the notice requirements be waived.

Copies of this filing were served on the potential customers involved, and also on the regulatory commissions of Utah, Idaho, Wyoming, California, and Arizona.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 3, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Wisconsin Public Service Commission; Filing

May 19, 1983.

The filing Company submits the following:

Take notice that on May 6, 1983, Wisconsin Public Service Commission (WPSC) tendered for filing a Supplement to the "Partial Requirements Service Agreement" with the City of Manitowoc, Wisconsin, FERC, Electric Service Tariff, original Volume I, Appendix "B." This Supplement revises the contract demand quantities for peak load, intermediate load, and base load in accordance with Exhibit 1 of the agreement, Paragraph 6. The Supplement also changes the location of points of delivery of energy designated in Paragraph 2 of said Exhibit 1.

WPSC requests an effective date of May 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 3, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

ENVIRONMENTAL PROTECTION AGENCY

[SAB-FRL 2368-1]

Science Advisory Board; Environmental Health Committee; Open Meeting

Under Pub. L. 92-463, notice is hereby given that a one-day meeting of the Environmental Health Committee of the Science Advisory Board will be held on June 10, 1983, in Conference Room 3906-3908, Waterside Mall, U.S. Environmental Protection Agency, 401 M Street, Southwest, Washington, D.C. The meeting will start at 9:00 a.m. and adjourn not later than 4:30 p.m.

The principal purpose of the meeting will be: (1) To review and comment on the scientific adequacy of the revised draft of the Carcinogen Assessment of Coke Oven Emissions (Revised May 1983); (2) To continue the Committee's deliberations on EPA's Health Advisory Program for unregulated contaminants in drinking water; and (3) To hear a report on final revisions of the Health Assessment Documents for Acrylonitrile; 1,1,1-Trichloroethane (Methyl Chloroform); and 1,1,2-Trichloro-1,2,2-Trifluoroethane (Chlorofluorocarbon FC-113).

The agenda will also include briefings and informational items of current interest to the members including briefings on (a) The recent published report of the National Research Council on "Risk Assessment in the Federal Government: Managing the Process;" (b) Exposure assessment in EPA's Office of Health and Environmental Assessment; and (c) Exposure assessment in EPA's Office of Air Quality Planning and Standards.

For information on how to how to obtain copies of the revised draft of the Carcinogen Assessment of Coke Oven Emissions and the Health Assessment Documents for Acrylonitrile, 1,1,1-Trichloroethane (Methyl Chloroform) and 1,1,2-Trichloro-1,2,2-Trifluoroethane (Chlorofluorocarbon FC-113) please call or write the Center for Environmental Research Information, 20 West St. Clair Street, Cincinnati, Ohio 45268 (513) 684-7531.

The meeting will be open to the public. Any member of the public wishing to attend, participate, submit a

VOL 48 ISS 101 MY 24 1983 UMI

paper, or wishing further information should contact the Executive Secretary, Environmental Health Committee, Science Advisory Board (A–101), U.S. Environmental Protection Agency, Washington, D.C. 20460 by c.o.b. June 6, 1983. Please ask for Mrs. Patti Howard or Mr. Ernst Linde. The telephone number is (202) 382–2552.

Dated: May 16, 1983.

Terry F. Yosie,

Staff Director, Science Advisory Board.

[FR Doc. 83–13861 Filed 5–23–83; 8:45 am]

BILLING CODE 6560–50–M

[OPP–100004; PH–FRL 2368–8]

Battelle Memorial Institute; Transfer of Data to Contractor

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA plans to transfer information submitted under sections 3 and 6 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) to Battelle Memorial Institute of Columbus, under Contract No. 68–02–3169. Some of the information has been claimed to be confidential business information (CBI). The contractor, Battelle Memorial, has met all the requirements of 40 CFR 2.301(h)(2) and consequently the data wil be transferred for performance of the contract. This action will enable Battelle Memorial to fulfill the obligations of the contract and serves to notify affected persons.

DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: William C. Grosse, Chief, Information Services Branch, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 222, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2613).

SUPPLEMENTARY INFORMATION: The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 10(e) provides that confidential business information (CBI), or business information which is alleged to be confidential, may be disclosed to an authorized contractor when such disclosure is necessary for the performance of the contract. EPA routinely receives such CBI as part of the data that are submitted by pesticide registrants and others as provided for in FIFRA section 3(c)(2). Contractors are authorized to receive such data if the EPA program office managing the contract makes the determinations specified in 40 CFR 2.301(h)(2) as referenced in § 2.307. Such determinations have been made concerning contract 68–02–3169 with Battelle Memorial.

Battelle Memorial's work will require their access to internal scientific reviews prepared by the Toxicology Branch of the Office of Pesticide Programs (OPP) Hazard Evaluation Division. Battelle Memorial must also have access to the data discussed in the reviews. These data consist of chronic feeding studies submitted by pesticide registrants to OPP. Because of the large number of studies involved, Battelle's staff will be evaluating the reviews and data in a selective manner. Not all companies' data will necessarily be reviewed.

Battelle Memorial has been cleared in accordance with the procedures in the EPA FIFRA Confidential Business Information Security Manual to have access to confidential business information. FIFRA subsection 10(f)(1) provides a criminal penalty for wrongful disclosure of confidential information, whether such disclosure is made by an EPA employee or an EPA contractor. Battelle Memorial's contract with EPA specifically prohibits disclosure of confidential business information to any third party in any form without written authorization from EPA, and Battelle Memorial's personnel will be required to sign a nondisclosure agreement before they are permitted access to such information.

Dated: May 16, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

[FR Doc. 83–13860 Filed 5–23–83; 8:45 am]

BILLING CODE 6560–50–M

[OPTS–140035; BH–FRL 2368–7]

General Accounting Office; Disclosure of Confidential Business Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The General Accounting Office (GAO) has requested access to information submitted to EPA under the Toxic Substances Control Act (TSCA), including confidential business information submitted under sections 4, 5, 6, 7, and 8 of the Act. The GAO states that it will require access to this information to conduct a review of EPA's program to regulate existing chemicals for the Senate Committee on Environment and Public Works.

DATE: This information will be provided to the GAO no sooner than June 6, 1983.

FOR FURTHER INFORMATION CONTACT: Jack P. McCarthy, Director, TSCA Assistance Office (TS–799), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, Toll Free: (800–424–9065), In Washington, D.C.: (544–1404), Outside the USA: (Operator—202–544–1404).

SUPPLEMENTARY INFORMATION: The GAO, on behalf of the Comptroller General, has informed EPA that it has been asked by the Senate Committee on Environment and Public Works to conduct a review of EPA's program to regulate existing chemicals. Specifically, the Committee has asked the GAO to "undertake a new study of EPA's actions and progress in identifying the hazards associated with the 55,000 existing chemicals that were identified by EPA as of January 1979 and in protecting the public and environment from those existing chemicals that pose an unreasonable risk."

To perform its review, the GAO has requested access to information submitted to EPA under TSCA, including confidential business information submitted under sections 4, 5, 6, 7 and 8 of the Act. Pursuant to 40 CFR 2.209(b), which applies to information submitted under TSCA 40 CFR 2.306(h), EPA must provide access to confidential business information in response to a written request from the Comptroller General. (In this case, the request is from the GAO on behalf of the Comptroller General.) Before providing such information, EPA is required by 40 CFR 2.209(b) to notify the submitters of the information at least ten days in advance of disclosure.

This is a notice under 40 CFR 2.209(b) to all submitters of information under section 4, 5, 6, 7 or 8 of TSCA that EPA will provide the GAO with access to confidential business information no sooner than ten days after publication of this notice in the **Federal Register.**

EPA will identify any information that is subject to a confidentiality claim and will inform the GAO of the provisions of section 14(d) of TSCA which set criminal penalties for wrongful disclosure of confidential business information.

The GAO recognizes the sensitivity of the confidential business information it may review in the course of its study. Prior to access, the GAO personnel performing this work will be briefed on EPA's security procedures as set forth in the TSCA Confidential Business Information Security Manual. These employees will then be given access to information as requested and will be allowed to attend meetings in which such information is discussed. In addition, EPA employees will be authorized to discuss this confidential business information with the designated GAO personnel.

The GAO intends to have access to confidential business information only on EPA's premises. In addition, it does not intend to include any such information in its report to the Senate Committee. In order to ensure confidentiality, the GAO will ask EPA to review any technical information to be included in the final report to verify that it does not contain confidential business information.

Dated: May 12, 1983.

Don R. Clay,

Acting Assistant Administrator for Pesticides and Toxic Substances.

BILLING CODE 1505–01–M

[Docket No. 82N–0061; DESI 9366]

Deanol Acetamidobenzoate; Withdrawal of Approval of New Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The commissioner of Food and Drugs denies a request for hearing and withdraws approval of the new drug application for Deaner Tablets, a drug used to treat children with learning and behavior problems. The drug lacks substantial evidence of effectiveness for its labeled indications.

EFFECTIVE DATE: June 23, 1983.

FOR FURTHER INFORMATION CONTACT: David T. Read, National Center for Drugs and Biologics (HFN–8), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3650.

SUPPLEMENTARY INFORMATION: In a notice (DESI 9366) published in the **Federal Register** of May 15, 1970 (35 FR 7616), the Food and Drug Administration (FDA) evaluated reports received from the National Academy of Sciences/National Research Council (NAS/NRC), Drug Efficacy Study Group, and concluded that Deaner Tablets, NDA 11–417, held by Riker Laboratories, Inc., 19901 Nordhoff St., Northridge, CA 91324 (Riker), is possibly effective for its labeled indications. (The NAS/NRC rating system categorized drugs as "effective," "effective but," "probably effective," "possibly effective," or "ineffective.") The notice provided Riker, and any person marketing this drug without approval, 6 months to obtain and submit data providing substantial evidence of effectiveness for the indications evaluated as possibly effective. In response to this notice, Riker submitted four studies on Deaner Tablets.

In a notice (formerly Docket No. FDC–D–566) published in the **Federal Register** of January 8, 1975 (40 FR 1533), the Director of the Bureau of Drugs (predecessor to the National Center for Drugs and Biologics) evaluated these four studies and concluded that they do not constitute substantial evidence of effectiveness. Accordingly, the Director proposed to withdraw approval of the new drug application for Deaner Tablets and offered an opportunity for a hearing.

On February 3, 1975, Riker requested a hearing, and on March 5, 1975, submitted the material on which it relied to justify a hearing. The Director of the National Center for Drugs and Biologics reviewed the material and concluded that summary judgment was appropriate (21 CFR 314.200(g)(3)). Accordingly, on July 19, 1982, the Director provided Riker an opportunity to comment on a proposed order denying a hearing and withdrawing approval of Deaner Tablets. Riker responded to the proposed order on September 14, 1982 by submitting the results of a 1975 study. Riker did not attempt to critique the draft order.

The Commissioner has considered all of the material submitted by Riker and has concluded that there is no genuine and substantial issue of fact requiring a hearing. A full discussion follows.

I. The drug

Deaner Tablets, each containing 25, 100, or 250 milligrams (mg) of deanol (2-dimethylaminoethanol) as the para-acetamidobenzoic acid salt.

II. Recommended Uses

Deaner Tablets is currently labeled as possibly effective for the following indications:

1. Learning problems—learning in deficit of that usually associated with apparent level of intelligence, including I.Q. Reading difficulties. Shortened attention span.

2. Behavior problems—hyperkinetic behavior problem syndrome characterized by distractibility, motor disinhibition, dissociation, and perseveration.

3. Or, as more frequently encountered, hyperkinetic behavior and learning disorders incorporating varying combinations of both of the above. Under-achievers. Reading and speech difficulties. Impaired motor coordination. Hyperactive, impulsive/compulsive behavior, often described as asocial, antisocial, delinquent, stimulus-governed.

III. Data Submitted to Support Claims of Effectiveness

1. Oettinger, L., "A Double-Blind Study of Dimethylaminoethanol (Deaner) and Placebo in Children with Minimal Brain Dysfunction," unpublished, 1971. Riker Number 546–054.

This was a double-blind, parallel study comparing Deaner Tablets to placebo in 46 children between 8 and 14 years of age. These children were referred to this study by their schools, pediatricians, social agencies, parents, and other patients, because of learning and behavior problems. The investigator's criteria for exclusion from this study were overt psychosis, gross neurological abnormalities, primary emotional disorders, or I.Q.'s below 80 (as measured by a standard group or individual intelligence test).

The children were randomly separated into two groups, one receiving Deaner, the other placebo. Each child received five 100-mg tablets of Deaner or look-like placebo tablets every day over a period of 4 weeks. Their responses to treatment were measured by questionnaires answered by parents and school personnel, and a battery of psychological tests administered by the investigator.

VOL 48 ISS 101 MAY 24 1983

The Bureau of Drugs reviewed this study in the notice of January 8, 1975, and found that it failed to demonstrate a significant difference between Deaner and placebo. Riker does not dispute this finding in its hearing request submission and describes the study as merely a "probing clinical experiment." Riker's consultant found no significant treatment effects under the parent questionnaire or the school questionnaire when analyzed by a factor analysis developed before the study. Nor did the consultant find any significant treatment effects under the Draw-A-Man Test, Bender Gestalt, Porteus Maze Test, Wipman Test, Flowers-Costello Test, and Paired Associate Learing Test. Although the consultant did find a "weak suggestion" of drug effect for total symptoms score under the school questionnaire and the continuous performance test, he concluded that, in view of the large number of variables examined and the marginal levels of significance, these results should be accepted with caution. Accordingly, even under Riker's own analysis, this study fails to substantiate Deaner's effectiveness. But even if the study had produced positive results, it fails to meet the standards of an adequate and well-controlled clinical investigation as set forth in 21 CFR 314.111(a)(5)(ii).

First, the investigator did not provide adequate assurance that the subjects selected were suitable for the purposes of this study (21 CFR 314.111(a)(5)(ii)(*a*)(*2*)(*i*)). To assure a suitable population, the investigator is required to provide a method of selection that provides adequate assurance that the subjects have the condition for which the drug is offered, including criteria of diagnosis and appropriate confirmatory laboratory tests. Where such assurances are not provided, there is no rational basis for determining precisely which conditions may be effectively treated with this regimen.

In this study, the investigator failed to provide in its method of selection adequate assurance that the population had learning disabilities (reading difficulties and shortened attention span) and behavior problems (distractibility), motor disinhibition, dissociation, and perservation) as described in Deaner's labeling. Some of the people who referred patients to the study had no professional expertise to identify the symptoms described above. These referrals were not based upon any clear diagnostic criteria relating to the conditions described in Deaner's labeling. Nor did the investigator establish clear diagnostic criteria to select a suitable population from the patients referred. The investigator asserts that children were selected who fit the general critera of minimal brain dysfunction, as outlined in Monograph 3 of the National Institute of Neurological Diseases and Blindness ("Minimal Brain Dysfunction in Children," PHS Pub. No. 1415, 1966). This statement is not helpful because: (1) Even if "minimal brain dysfunction" were equated with the conditions listed in Deaner's labeling, the cited monograph does not provide a method of identifying a child with minimal brain dysfunction, and (2) a substantial number of children in this study were not diagnosed as having minimal brain dysfunction. Because the investigator failed to provide adequate confirmation that the population had the conditions identified in Deaner's labeling, the study is not adequate and well controlled.

In addition, the investigator failed to employ a method of selection that assures the comparability of the treatment and control groups with respect to known pertinent variables such as the severity and duration of the conditions in Deaner's labeling. If variables that can influence the outcome of a study are known, randomized patient assignment is not sufficient to assure comparability between test and control groups; a poststudy comparison of the manner in which known pertinent variables are distributed between the test and control groups is required (21 CFR 314.111(a)(5)(ii)(*a*)(2)(*iii*)). The purpose of randomization is to promote, insofar as possible, the equal distribution of unknown variables which may affect treatment outcome. Here, the investigator selected children whose conditions had a variety of etiologies ranging from organic brain disease to severe psychiatric disturbances, some with abnormal neurological conditions and histories of febrile seizures. These children exhibited varying degrees of learning disabilities and behavior problems. Because the treatment and control groups are not demonstrably comparable with respect to etiologies and symptoms, the results of the study are unreliable.

The investigator also failed to employ a method of selection that assures comparability of the treatment and control groups with respect to concomitant medication (21 CFR 314.111(a)(5)(ii)(*a*)(*2*)(*iii*)). Although the medical history included a question on whether the patient was receiving concomitant medication, the investigator failed to record the answer to this question in a substantial number of cases (21 CFR 314.111(a)(5)(ii)(*a*)(*4*)). This omission is particularly critical where as here, there is no indication that patients were cautioned to refrain from using other medication.

2. Duncan, C., "Double-Blind Study of the Effects of Deaner (2-Dimethylaminoethanol) and Placebo on the Attention Span of Children with the Hyperkinetic Syndrome," unpublished, 1971. Riker Number 546–055.

This was a double-blind, parallel study comparing Deaner, placebo, and a no-treatment group over a 4-week period. The investigator selected 43 children between 6 and 14 years of age. These children were referred by a pediatric neurology clinic and local pediatric neurologists. Children with histories of repetitive petit mal or grand mal epileptic seizures or other psychomotor seizures were excluded from the study.

The children were divided into 3 groups: 18 received 500 mg per day of Deaner, 20 received placebo, and 5 received no treatment. None of the children in this study received other medication having a stimulating or soporific effect during the study or during the 2 weeks immediately preceding the study in which the predrug psychological testing was done.

The patients were evaluated on the basis of psychological tests, a neurologist's global rating, a parent symptom report, a teacher symptom report, and clinical electroencephalograms.

The Bureau of Drugs reviewed this study in the notice of January 8, 1975, and found that it failed to demonstrate a significant drug effect. Riker concedes in its hearing request submission that this study, like the Oettinger study, was merely a "probing clinical experiment." Riker's consultant found that the data do not support the hypothesis that Deaner differs from placebo at the dosages employed, except in two instances which he dismissed as "obscure" or "marginal." In fact, the consultant concluded that "no reliable treatment effects were discovered" in this study.

This study, therefore, failed to reveal drug effect. In addition, the study was not adequate and well controlled as required by 21 CFR 314.111(a)(5)(ii). In the notice of January 8, 1975, the Bureau noted several defects in this study that were not disputed by Riker in its hearing request submission.

First, the investigator failed to employ a method of selection that provides adequate assurance that the population was suitable for the purposes of the study (21 CFR 314.111(a)(5)(ii)(*a*)(*2*)(*i*)). Although the protocol for this study states that subjects would be limited to those presenting the subjective symptoms of distractibility, hypermobility, impulsiveness, short attention span, and learning deficits, no objective diagnostic criteria for the identification of these subjective symptoms are provided. In fact, the patient case reports provide no record of even a subjective determination of the presence of these symptoms. Because diagnostic criteria have not been provided, it is not possible to determine whether the population actually had the conditions described in Deaner's labeling. Second, without diagnostic criteria to quantify the severity and duration of the disease, comparability of the treatment and control groups is not assured (21 CFR 314.111(a)(5)(ii)(*a*)(*2*)(*iii*)). Other criticisms noted by the Bureau in its January 8, 1975 notice, such as conditions of blinding, scheduling of tests, and time of drug administration, were also not addressed by Riker in its hearing request submission (21 CFR 314.111(a)(5)(ii)(*a*) (*3*) and (*4*)). For these reasons the study lacks the essentials of an adequate and well-controlled clinical investigation.

3. Lewis, J. A., and R. Young, "Deanol and Methylphenidate in Minimal Brain Dysfunction," *Clinical Pharmacology and Therapeutics*, 17(5):534–40, 1975. Riker Number 546–056.

This was a double-blind, parallel study comparing the effects of Deaner, Ritalin (methylphenidate), and placebo on 74 children. These children were referred to the study by public school teachers and counselors, pediatricians, and personnel from child development clinics who believed that the children's classroom performance was below potential. The investigators selected children from these referrals who met the following criteria: (1) inappropriate poor school performance as defined by the teacher; (2) acceptance by the parent that the child was having problems in school; (3) between 6 and 12 years of age; (4) full-scale I.Q. on the WISC (Wechsler Intelligence Scale for Children) of 80 or above; (5) absence of diagnosable mental retardation, epilepsy, or other neurological disease; and (6) absence of any diagnosable major psychiatric illness.

The investigators conducted this study over 12 weeks. Twenty-four children received Deaner (250 mg per day for the first 2 weeks, 500 mg per day for the next 10 weeks); 25 children received Ritalin (20 mg per day for the first 2 weeks, 40 mg per day for the next 10 weeks); and 25 children received placebo.

The investigators evaluated the children on the following psychological tests: WISC Verbal, Performance, and Full Scale I.Q.; the visual sequential memory subtest from the Illinois Test of Psycholinguistic Abilities; Bender Gestalt; Goodenough Draw-A-Person test; and a reaction time measurement test. The parents also rated the children's behavior on the Werry-Weiss-Peter Scale.

The investigators found significant differences favoring Deaner over placebo in all measurements except visual sequential memory and the Draw-A-Person test. No significant differences were found between Deaner and Ritalin. (Ritalin is a proven effective regimen for attention deficit disorders, previously referred to as minimal brain dysfunction (35 FR 15771; October 7, 1970).)

In the notice of January 8, 1975, the Bureau of Drugs evaluated this study and found that it was not adequate and well controlled because it failed to provide details about methods of blinding the investigators and analysts (21 CFR 314.111(a)(5)(ii)(*a*) (*3*) and (*4*)). Riker's hearing submission provided an adequate description of the blinding and coding procedures followed in this study. However, the study is not adequate and well controlled for other reasons.

First, the study failed to contain a method of selection that assured that suitable subjects would be selected for the purpose of this study (21 CFR 314.111(a)(5)(ii)(*a*)(*2*)(*i*)). As discussed previously, a study must provide adequate confirmation of the condition for which the drug is offered, including criteria of diagnosis and appropriate confirmatory laboratory tests. Here, the investigators did not provide adequate diagnostic criteria of the condition, but relied upon, in their own words, "relatively loose criteria" on the theory that "they would most closely approximate the population actually being treated by medical practitioners."

The investigators' reliance upon vague and overbroad diagnostic criteria such as "poor school performance" as perceived by the teacher and "acceptance" by the parents that the children were "having school problems" renders the study less than an adequate and well-controlled trial. These diagnostic criteria, which are different from the symptomatology described in Deaner's labeling (i.e., reading difficulties, short attention span, hyperkinetic behavior characterized by distractibility, motor disinhibition, dissociation, and perseveration), and inadequate. Without precise diagnostic criteria characterizing the medical condition to be treated, there can be no precise conclusions reached on the study. "Poor school performance" or "school problems" does not necessarily imply the existence of a problem requiring drug treatment.

Second, the investigators failed to follow a method of selection that assures comparability of the test and control groups in certain pertinent variables (21 CFR 314.111(a)(5)(ii)(*a*)(*2*)(*iii*)). An adequate comparison of drug therapies is possible only when the patient groups studied are substantially identical, or when any differences are accounted for in the analysis. Two of the most important variables in a comparison of treatment groups are the etiology and pathogenesis (i.e., cause and development) of the condition being treated. This is especially important in this study, in which the condition being treated ("poor school performance" and "school problems") could be the result of many different causes. In this instance, the investigators failed to ensure the comparability of the treatment and placebo groups with respect to the cause of the condition or the duration and severity of any learning disability, behavior problem, hyperactivity, neurological "hard" and "soft" signs, and EEG abnormalities.

Finally, the investigators failed to assure the comparability of the treatment and control groups with respect to concomitant medication (21 CFR 314.111(a)(5)(ii)(*a*)(*2*)(*iii*)). Riker's own consultant questions whether children in this study received concomitant medication. Because concomitant medication can significantly influence the results of this study, it is necessary to assure that these groups are comparable in this important variable. Because of the investigators' failure to provide such information, the study cannot be considered adequate and well controlled.

4. Coleman, N., P. Dexheimer, A. DiMascio, W. Redman, and R. Finnerty, "Deanol in the Treatment of Hyperkinetic Children," *Psychosomatics*, 17:69–72, 1976. Riker Number 546–057. This was published after Riker's hearing request submission, and was submitted to FDA under the name of A. DiMascio only.

This was a double-blind, parallel study comparing Deaner and placebo in 50 hyperkinetic children between 6 and 12 years of age. The children in the study were referred by physicians, mental health centers, pupil adjustment counselors, and teachers. The

UMI

VOL 48 ISS 101 MAY 24 1983 UMI

investigators selected children from this population who exhibited behavior disturbances or symptoms on the Connors' Teacher Rating Scale (a minimum of five disturbances or symptoms, or three at the "very much" level). In addition, the investigators selected only those children who were diagnosed as suffering hyperkinesis of 6 months' duration as confirmed by their parents. The investigators' criteria for excluding children from this study were: (1) Signs (or history) of definite organic brain damage, (2) I.Q. below 80 (as measured by WISC), (3) psychosis, (4) physical contraindications, or (5) under the treatment of other physicians.

The children were randomly separated into two groups, one receiving Deaner, and the other placebo. Deaner was administered at 300 mg per day the first week, 400 mg per day the second week, and 500 mg per day for the remaining 10 weeks of the study. Drug effect was measured by the following tests given at baseline and at the end of the study: (1) WISC; (2) Wide Range Achievement Test (WRAT); (3) Porteus Maze Test; (4) Connors' Teacher Rating Scale; (5) Connors' Parent Rating Scale; and (6) global evaluations by the teacher, parents, and psychiatrist.

The Bureau of Drugs reviewed this study in the notice of January 8, 1975. The Bureau criticized the study because the investigators had selected a method of analyzing the data after the study was completed without an adequate explanation of steps taken to minimize analyst bias. Riker's hearing submission reanalyzed the study using Connors' Rating Scales, an acceptable method.

This study, as now analyzed, fails to establish the effectiveness of Deaner. The investigators found no significant differences between Deaner and placebo groups under the parent and teacher questionnaire using Connors' Rating Scales. Nor did they find any significant differences under any of the achievement tests. The fact that there were no significant differences under these critical paramenters diminishes the value of the psychiatrist's global evaluation, the only parameter which significantly favored Deaner. Accordingly, this study fails to substantiate a claim of effectiveness for Deaner.

Nevertheless, even if the results of this study had favored Deaner more significantly, it is not an adequate and well-controlled clinical investigation within the meaning of 21 CFR 314.111(a)(5)(ii).

Contrary to the investigators' assertion, there is no assurance provided by a method of selection that the test and control groups were comparable in pertinent variables as required by 21 CFR 314.111(a)(5)(ii)(*a*)(*2*)(*iii*). Similar to the investigators in the Lewis study discussed above, the investigators in this study did not ensure that the conditions of the patients admitted to the study were of similar etiology.

Another deficiency of this study is the investigators' failure to explain the methods of observation and recording of results in making the psychiatrist's global evaluation (21 CFR 314.111(a)(5)(ii)(*a*)(*3*)). This is particularly critical to an evaluation of this study because only this parameter revealed a significant result favorable to Deaner. The investigators' failure to explain how the children were assessed in the global evaluations obscures the meaning of this parameter. Contrary to Riker's assertion, this omission was not resolved by the investigators' final report of this study.

E. Other medical data. Riker's hearing request submission also included data on neurological involuntary movements, such as Dopa-induced dyskinesias, tardive dyskinesias, and Huntington's chorea. Riker admits that these data are inconclusive as to whether Deaner is effective treatment for these conditions. Moreover, because these data concern indications not in Deaner's labeling, they are irrelevant to this proceeding.

Riker also submitted an article on the influence of 2-dimethylaminoethanol on the level of acetylcholine in the brains of mice, and two articles on the suppressant effects of two stimulants (neither of which was Deaner) on the growth of hyperactive children. These articles clearly are not related to the effectiveness of Deaner.

Finally, Riker submitted a study entitled "Deanol vs. Placebo in Hyperactive Children," Riker Number 546–058, by James A. Lewis (unpublished). Riker retracted this study after notification from the Bureau that it was not filed in conformance with 21 CFR 314.200(c)(2). It is worth noting, however, that the investigator found no significant differences between Deaner and placebo.

IV. Riker's Response to the Proposed Final Order

On July 23, 1982, the Director of the National Center for Drugs and Biologics served upon Riker a proposed order denying a hearing and withdrawing approval of the new drug application for Deaner Tablets for the reasons noted above (21 CFR 314.200(g)(3)). Riker's response to the proposed final order was a single-page letter and a final report on study 546–058, "Deanol vs. Placebo in Hyperactive Children," by James A. Lewis and Barbara S. Lewis.

Riker does not dispute any of the specific criticisms found in the proposed order, but maintains without explanation that the data were not afforded an adequate and fair medical review. This bare assertion does not raise a genuine and substantial issue of fact which justifies a hearing.

Nor does Riker's untimely resubmission of study 546–058 raise a genuine and substantial issue of fact which would justify a hearing in this matter. The study, as noted in the proposed order, found no significant differences between Deaner and placebo. This finding is not disputed in the study's final report which has not been submitted by Riker. (See page 25.) Consequently, even if the Commissioner were to consider this study as appropriately filed, it fails to reveal any drug effect.

V. Findings

On the basis of the foregoing review of all the evidence submitted, and after providing an opportunity to comment on this order, the Commissioner finds that (1) there is a lack of substantial evidence that Deaner has the effects it purports or is represented to have under the conditions of use, prescribed, recommended, or suggested in its labeling, and (2) Riker has failed to set forth specific facts showing that there is a genuine and substantial issue of fact requiring a hearing.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 505(e), 52 Stat. 1052–1053 as amended (21 U.S.C. 355(e)) and under authority delegated to the Commissioner (21 CFR 5.10) the request for a hearing is denied, and the approval of NDA 11–417 for Deaner Tablets, including all amendments and supplements thereto, is hereby withdrawn. Distribution of this drug product in interstate commerce without an approved new drug application is illegal and subject to regulatory action. This order is effective June 23, 1983.

Dated: May 12, 1983.

Mark Novitch,

Deputy Commissioner of Food and Drugs.

[FR Doc. 83–13710 Filed 5–23–83; 8:45 am]

BILLING CODE 4160–01–M

[Docket Nos. 81N–0391 and 82N–0095; DESI 6514 AND 11935]

Drugs for Human Use; Drug Efficacy Study Implementation; Oral Prescription Drugs Offered for Relief of Symptoms of Cough, Cold, or Allergy; Withdrawal of Approval

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of the new drug application for Omni-Tuss Suspension and those parts of another application that pertain to Pyribenzamine and Ephedrine Tablets. The basis of the withdrawal is that there is a lack of substantial evidence that the fixed-combination drugs are effective in the relief of symptoms that the fixed-combination drugs are effective in the level of symptoms of cough, cold, or allergy.

EFFECTIVE DATE: June 23, 1983.

ADDRESS: Requests for an opinion of the applicability of this notice to a specific product should be identifed with the appropriate docket number and directed to the Division of Drug Labeling Compliance (HFN–310), National Center for Drugs and Biologics, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: David T. Read, National Center for Drugs and Biologics (HFN–8), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3650.

SUPPLEMENTARY INFORMATION: In notices published in the **Federal Register** of May 25, 1982 (47 FR 22606 and 22604), the Director of the then Bureau of Drugs revoked the temporary exemption for the two drug products described below which permitted these products to remain on the market beyond the time limit scheduled for the implementation of the Drug Efficacy Study. Those notices also proposed to issue orders withdrawing approval of the new drug applications, or parts thereof, that provide for these drug products. The proposal was based on the lack of substantial evidence of effectiveness that each ingredient in the combination products contributes to the claimed effects or is present in an amount considered to be effective, as required by section 305(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) and 21 CFR 314.111(a)(5) and 300.50. The two products are:

1. NDA 12–666: Omni-Tuss Suspension, containing codeine sulfate, phenyltoloxamine dihydrogen sulfate, chloropheniramine maleate, ephedrine sulfate (all as cation exchange resin complexes of sulfonated polystyrene), and guaiacol carbonate; Pennwalt Corp., Pharmaceutical Division, 755 Jefferson Rd., Rochester, NY 14623 (DESI 6514; Docket No. 81N–0391).

2. NDA 5–914: As it pertains to Pyribenzamine and Ephedrine Tablets containing tripelennamine hydrochloride and ephedrine sulfate; Ciba Pharmaceuticals Co., 556 Morris Ave., Summit, NJ 07901 (DESI 11935; Docket No. 82N–0095).

Neither Pennwalt Corp. nor Ciba Pharmaceuticals requested a hearing on the two products listed above. Failure to file an appearance and request a hearing constitutes a waiver of the opportunity for a hearing.

The three other products listed in the two May 25, 1982, notices—Ambenyl Expectorant (47 FR 22604; see also 47 FR 50344), and Tussionex Tablets and Suspension (47 FR 22606—and a product related to Omni-Tuss Suspension called Ru-Tuss Expectorant, manufactured by Boots Pharmaceuticals, Inc., are not affected by this notice. The manufacturers of these products have requested hearings; the products will be the subject of future **Federal Register** notices.

Any drug product that is identical, related, or similar to Omni-Tuss Suspension and Pyribenzamine and Ephedrine Tablets and is not the subject of a pending hearing request or an approved new drug application is covered by the new drug applications reviewed and is subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write to the Division of Drug Labeling Compliance (address given above).

The Director of the National Center for Drug and Biologics, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053 as amended (21 U.S.C. 355)) and under the authority delegated to him (see 21 CFR 5.82 and 47 26913 published in the **Federal Register** of June 22, 1982) finds that, on the basis of new information before him with respect to the products, evaluated together with the evidence available to him when the applications were approved, there is lack of substantial evidence that the two drug products will have the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling.

Therefore, pursuant to the foregoing finding, approval of those parts of NDA 5–914 that provide for Pyribenzamine and Ephedrine Tablets, and approval of NDA 12–666, and all amendments and supplements thereto, are withdrawn effective June 23, 1983.

Shipment in interstate commerce of the above products, or any identical, related, or similar product that is not the subject of a pending hearing request or an approved new drug application, will then be unlawful.

Dated: May 18, 1983.

Harry M. Meyer, Jr.,

Director, National Center for Drugs and Biologics.

BILLING CODE 4160–01–M

Health Resources and Services Administration

Home Health Services; Section 339 of the Public Health Service Act; Delegation of Authority

Notice is hereby given that the following delegations have been made regarding home health services under section 339 of the Public Health Service Act (42 U.S.C. 255), as amended.

1. Delegation from the Administrator, Health Resources and Services Administration, to the Regional Health Administrators, Regions I–X, with authority to redelegate, of the following authorities under Section 339 of the Public Health Service Act (42 U.S.C. 255) within their respective regions (for projects that are not multiregional or national in scope):

(a) Under section 339(a), to make grants to public and nonprofit private entities and loans to proprietary entities to meet the initial costs of establishing and operating home health programs;

(b) Under section 339(b), to make grants to public and private entities to assist them in developing appropriate training programs for paraprofessionals (including homemaker home health aides) to provide home health services.

2. Delegation from the Administrator, Health Resources and Services Administration, to the Director, Bureau of Health Care Delivery and Assistance, with authority to redelegate, of all the authorities under section 339 of the Public Health Service Act except those authorities specifically delegated to the Regional Health Administrators, excluding the authorities to submit reports to Congress or a Congressional committee and to issue regulations.

Previous delegations and redelegations made to officials within the Public Health Service of authorities under Title III of the Public Health Service Act may continue in effect provided they are consistent with this delegation.

VOL 48 ISS 101 MY 24 1983 UMI

The above delegation was effective on May 12, 1983.

Dated: May 12, 1983.

Robert Graham,

Administrator, Health Resources and Services Administration.

BILLING CODE 4160-16-M

Public Health Service

National Center For Health Services Research; Assessment of Medical Technology

The Public Health Service (PHS), through the Office of Health Technology Assessment (OHTA), announces that it is coordinating an assessment of what is known of the safety and clinical effectiveness and use (indications) of ambulatory electroence phalographic (EEG) monitoring in the diagnosis of seizure disorders. Specifically, we are interested in: (1) The technical issues concerning the reliability and usefulness of the data gained from 24-hour monitoring while the patient follows usual daily activities and sleep; (2) general indications for use of the procedure; and (3) its diagnostic implications.

For the purposes of this announcement, ambulatory electroencephalographic (EEG) monitoring is defined as long-term (24-hour), continuous brain activity monitoring. The ambulatory EEG monitor uses a portable cassette recorder capable of recording brain rhythms during a patient's routine daily activities and sleep. The recorder stores signals derived from on-head differential preamplifiers. Ambulatory EEGs using cassette tape recorders usually have only four channels available for detecting epileptiform events, except in instances where the fourth channel is used for cardiac monitoring.

The PHS assessment consists of a synthesis of information obtained from appropriate organizations in the private sectors and from PHS agencies and others in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety and clinical effectiveness of a technology. Based on this assessment, a PHS recommendation will be formulated to assist the Health Care Financing Administration (HCFA) in establishing Medicare coverage policy. Any person or group wishing to provide OHTA with information relevant to this assessment should do so in writing no later than September 15, 1983, or within 90 days from the date of publication of this notice.

The information being sought is a review and assessment of past, current, and planned research related to this technology, a bibliography of published controlled clinical trials and other well-designed clinical studies since 1978 and other information related to the characterization of the patient population most likely to benefit, the clincial acceptability, and the effectiveness of this technology. Proprietary information is not being sought, but published commercial information may be submitted.

Written material should be submitted to: Martin N. Erlichman, National Center for Health Services Research, Office of Health Technology Assessment, Park Building, Room 3-10, Stop #2, 5600 Fishers Lane, Rockville, Maryland 20852.

For further information contact Martin Erlichman, Health Science Analyst, at the above address or by telephone (301) 443-4990.

Dated: May 16, 1983.

Harold Margulies,

Director, Office of Health Technology Assessment, National Center for Health Services Research.

[FR Doc. 83-13856 Filed 5-23-83; 8:45 am]

BILLING CODE 4160-17-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Idaho; Modification of District Boundaries, Resource Areas and a Resource Area Headquarters Office

May 16, 1983.

Pursuant to the authority vested in the Secretary of the Interior by the Taylor Grazing Act of June 28, 1934 (48 Stat. 1269) as amended and delegated to the Director, Bureau of Land Management by 235 DM 1.1, the boundaries of the Burley and Idaho Falls Districts are changed.

In conjunction with the boundary change one Resource Area is modified, an office is moved and its name is changed, three Resource Areas are abolished and two Resource Areas are established.

SUMMARY: This notice sets forth a series of administrative boundary and name changes between Bureau of Land Management administrative units in Idaho. Part of the lands involved are managed under Section 3 and part under Section 15 of the Taylor Grazing Act. The jurisdiction transfer will not affect the status or use of the public lands in any way. The changes are confined to the Burley and Idaho Falls Districts.

DATE: The changes in boundaries and unit names become effective on July 1, 1983.

ADDRESSES: Bureau of Land Management District Offices involved are:

Burley District Office, Route 3, Box 1, 200 South Oakley Highway, Burley, Idaho 83318.

Idaho Falls District Office, 940 Lincoln Road, Idaho Falls, Idaho 83401

FOR FURTHER INFORMATION CONTACT: Fred Cook, Public Affairs Office, Idaho State Office, 3380 Americana Terrace, Boise, Idaho 83706, (208) 334-1170, FTS 554-1770.

SUPPLEMENTARY INFORMATION: As a part of the merger of the Bureau of Land Management and the Minerals Management Service activities in Idaho, the relocation of personnel in the southern and southeastern part of Idaho to better serve the public and improve the management of resources on public lands was approved by the National Director on February 17, 1983. A summary of these changes is as follows:

1. The boundary between the Idaho Falls and Burley Districts is changed. All of the Public Lands administered by the Burley District in Bannock County and a portion of Caribou County are transferred to the Idaho Falls District. A map of the Idaho Falls District is available at the Idaho Falls District Office, located in Idaho Falls, Idaho.

2. In the Idaho Falls District, the Soda Springs Resource Area is abolished. Established in its place is the Pocatello Resource Area which includes the lands transferred to this district along with the lands that were encompassed by the Soda Springs Resource Area. A map of the new Resource Area is available at the Idaho Falls District Office, located in Idaho Falls.

3. The Bureau of Land Management Resource Area Headquarters Office at Soda Springs, Idaho is to be closed and a new Resource Area Headquarters Office established at Pocatello, Idaho known as the Pocatello Resource Area, Idaho Falls District.

4. The three Resource Areas in the Burley District; Magic RA, Raft River, RA, and Bannock-Oneida RA are abolished. In their place, two Resource Areas are established in the Burley District. They are the Snake River RA and Deep Creek RA. The Snake River RA encompasses the public lands generally found in Twin Falls and Cassia Counties. The Deep Creek RA encompasses the public lands generally found in Oneida County and that portion of Power County lying south of the Snake River. A map of the specific unit boundaries is available at the Burley District Office located in Burley, Idaho.

5. Management of public lands and resources affected by these changes will continue under the direction of current office heads until July 1, 1983.

Clair M. Whitlock,

State Director.

[FR Doc. 83-13901 Filed 5-23-83; 8:45 am]

BILLING CODE 4310-84-M

Casper District Office, Wyoming; Proposed Coal Exchange

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Environmental Assessment on Proposed Exchange of Coal Leases in Campbell County, Wyoming (I-90 Exchange).

SUMMARY: The Bureau of Land Management proposes to accept portions of coal leases W-0313666 and W-0111833 from Wyodak Resource Development Corporation, in exchange for other Federal coal in the same county. Part of the coal offered for exchange is under Interstate Highway 90. Notice of this exchange proposal is required under 43 CFR 3435.3-5.

FOR FURTHER INFORMATION CONTACT: Charles F. Wilkie, Special Projects Team Leader, Casper District Office, Bureau of Land Management, 951 Rancho Road, Casper, Wyoming 82601, (307) 261-5598.

SUPPLEMENTARY INFORMATION: The Wyodak Resources Development Corporation, a division of Blackhills Power and Light, wants to exchange 16 million tons of coal under its current lease for 20 million tons of Federal coal adjacent to the existing Wyodak mine. The Bureau of Land Management proposes to authorize this exchange. Such an exchange was made possible in 1978 by Pub. L. 95-554, which amended the Minerals Leasing Act of 1920. Bureau of Land Management Environmental Assessment WY-061-3-51 covers this proposal. Copies are available from the Casper District Office on request.

The proposed exchange is in the public interest because the only effect of mining the selected area would be to increase the life of the Wodak mine by 5 years. If the exchange did not take place, 16 million tons of coal would not be produced, approximately 65 jobs would be lost 5 years earlier and approximately 2.4 million dollars in revenue to the county, city and schools would be discontinued in 2014 rather than 2019. Therefore, fewer significant impacts would result from making the exchange than from not making the exchange.

A public hearing will be held on this exchange if requested.

Dated: April 18, 1983.

Robert S. Childs,

Acting District Manager.

[FR Doc. 83-11011 Filed 5-23-83; 8:45 am]

BILLING CODE 4310-84-M

[CA 9299]

Realty Action Exchange, Public Lands in Mono County, California

The following described lands have been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Mount Diablo Meridian, California

T. 5S., R. 33E.,
Sec. 34, SW¼.
Comprising 160.00 acres, more or less.

In exchange for these lands, the Federal government will acquire non-Federal land from the M&A Zack Lifetime Trust described as follows:

Mount Diablo Meridian, California

T. 5S., R. 32E.,
Sec. 23, SE¼SE¼;
Sec. 25, W½NW¼;
Sec. 26, N½NE¼.
Comprising 202.167 acres, more or less.

The purpose of the exchange is to acquire non-Federal lands which contain important wildlife habitat resources needed for the continued survival of the endangered Owens pupfish. The exchange is consistent with the Bureau's planning system. The public interest will be well served by making the exchange.

The selected land containing 160.00 acres will no longer be included under grazing authorization in the Chalfant Valley Allotment (Allotmen No. 6030) once the public land is transferred out of public ownership.

Lands to be transferred from the United States will be subject to the following reservations, terms and conditions:

1. A right-of-way for ditches and canals constructed by the authority of the United States, pursuant to the Act of August 30, 1980 (26 Stat. 391; 43 U.S.C. 945).

2. The reservation to the United States of all minerals in the lands being transferred out of Federal ownership.

3. A prior existing electric transmission line right-of-way granted to California Electric Power Company, its successors and assigns, by right-of-way grant LA 0170777 under authority of the Act of March 4, 1911 (43 U.S.C. 961).

4. A prior existing telephone line right-of-way granted to California Interstate Telephone Company, its successor and assigns, by right-of-way grant LA 0170726 under authority of the Act of March 4, 1911 (43 U.S.C. 961).

In accordance with 43 CFR 2201.1(b), this notice shall segregate the public lands identified herein from further appropriations under all public land laws, including the mining laws. This segregation shall terminate upon issuance of patent or 2 years from the date of this publication, whichever occurs first.

Detailed information concerning the exchange, including the environmental assessment, is available at the Bakersfield District Office, 800 Truxtun Avenue, Room 302, Bakersfield, California 93301.

For a period of 45 days after publication of this notice, interested parties may submit comments to the District Manager, Bakersfield District Office at the above address. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this action will become the final determination.

Glenn A. Carpenter,

Acting District Manager.

BILLING CODE 4310-70-M

Gulf Islands National Seashore Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Commission Act that a meeting of the Gulf Islands National Seashore Advisory Commission will be held at 1:00 p.m. on June 2, 1983, in the Matador Room of the Sheraton Inn, 224 E. Garden Street, Pensacola, Florida.

The purpose of the Gulf Islands National Seashore Advisory Commission is to consult and advise with the Secretary of the Interior or his designee on matters of planning and development of Gulf Islands National Seashore.

The members of the Advisory Commission are as follows:

Mrs. Courtney Blossman, Chairman (Mississippi)
Ms. Gordon D. Allen (Mississippi)
Mr. Margaret Allen (Mississippi)
Mr. Sherman Barnes (Florida)
Mr. J. Earle Bowden (Florida)
Mr. George Byars (Mississippi)
Mr. Lloyd J. Caillavet (Mississippi)
Mr. Edwin Cake, Jr. (Mississippi)
Mr. Bill Davis (Mississippi)
Mr. Paul Delcambre (Mississippi)
Donald Edwards (Mississippi)
Ms. Betty Gerrity (Florida)
Mr. Lee Hodges (Mississippi)
Mr. R. K. Hollister (Mississippi)
Mrs. M. G. Kennedy (Florida)
Mr. Charles Liberis (Florida)
Ms. Sara Megehee (Mississippi)
Mr. Michael Mitchell (Florida)
Mr. Grady Don Pope (Florida)
Mr. Stuart Reynolds (Florida)
Ms. Diana Rettenhouse (Florida)
Mr. Richard Schmidt (Mississippi)
Mr. Vince Whibbs (Florida)
Ms. Erica Woolley (Florida)

The matter to be discussed at this meeting will be an evaluation report of the seashore's development and operations program.

The meeting will be open to the public; however, facilities and space for accommodating members of the public are limited. Any member of the public may file with the Commission a written statement concerning the matter to be discussed.

Persons wishing further information concerning the meeting or who wish to submit written statements, may contact Franklin D. Pridemore, Superintendent, Gulf Islands National Seashore, P.O. Box 100, Gulf Breeze, Florida 32561, telephone (904) 932-6316. Minutes of the meeting will be available at Park Headquarters for public inspection approximately 4 weeks after the meeting.

Dated: May 16, 1983.

Robert M. Baker,

Regional Director, Southeast Region.

BILLING CODE 4310-70-M

Land and Water Conservation Fund Grants Manual; Availability

AGENCY: National Park Service, Interior.

ACTION: Notice of availability of Land and Water Conservation Fund Grants Manual.

SUMMARY: The National Park Service announces the availability of the 1983 revised edition of the Land and Water Conservation Fund Grants Manual for sale through the Government Printing Office.

Purchasing Information: Copies of the L&WCF Grants Manual (Document Number: 024-016-81001-5) may be purchased for $45.00 (Domestic) or $56.25 (Foreign) from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. This purchase price covers a three year subscription including up to six amendments. Mail orders should include payment by check or money order. Telephone orders (202-783-3238) may be charged to Master Card or VISA.

FOR FURTHER INFORMATION CONTACT: Cathy-Martin Urbanek, National Park Service, Division of Recreation Grants, U.S. Department of the Interior, Washington, D.C. 20240, (202) 343-3700.

SUPPLEMENTARY INFORMATION: The Land and Water Conservation Fund (L&WCF) Grants Manual sets forth the administrative policies, procedures and guidelines for grants awarded to State and local governments pursuant to the Land and Water Conservation Fund Act of 1965, as amended (Pub. L. 88-578). This Manual is intended to serve as a basic reference for those engaged in the administrative and financial management of L&WCF grants to States, and to achieve uniformity in the administration of the L&WCF program by the States. Copies of this Manual were sent to the State Liaison Officers through National Park Service Regional Directors in April 1983.

(Catalog of Federal Domestic Assistance Number 15.916).

(Land and Water Conservation Fund Act of 1965, Pub. L. 88-578, as amended).

Dated: May 17, 1983.

Russell E. Dickenson,

Director, National Park Service.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Permanent Authority Decisions

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the gounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will service a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly authorized.

Please direct status inquiries about the following to Team 1 at (202) 275-7992.

Volume No. OP1-181(N)

Decided: May 16, 1983.
By the Commission, Review Board No. 1, Members Parker, Chandler and Fortier.

MC 44370 (Sub-3), filed May 9, 1983. Applicant: E. M. LERIT, INC., P.O. Box 306, Dunellen, NJ 08812. Representative: Robert B. Pepper, 168 Woodbridge Ave., Highland Park, NJ 08904, (201) 572-5551. Transporting *telephones, telephone supplies and materials, metal products, and scrap*, between Philadelphia, PA, and New York, NY, on the one hand, and, on the other, points in CT, DE, MA, MD, NJ, NY, PA, SC, and VA.

BILLING CODE 7035–01–M

Motor Carriers; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the Appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Please direct status inquiries about the following to Team 1, (202) 275–7992.

Motor Carriers; McDaniel Hauling, Inc.—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: The four motor contract carriers named in the footnote below have individually requested exemption from the requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted for future as well as existing contracts.

DATES: Comments are due on June 8, 1983. The sought relief will become final 15 days after the close of the comment period unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing the relief.

ADDRESS: Send an original and 15 copies of comments to: Room 2139, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Paul W. Schach (202) 275–7885 or Howell I. Sporn (202) 275–7691.

SUPPLEMENTARY INFORMATION:

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2227, Interstate Commerce Commission, Washington, D.C. 20423, or call 289–4357 in the D.C. metropolitan area or toll free (800) 424–5403.

Decided: May 16, 1983.

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

[No. 38999]

Rail Carriers; Conticarriers and Terminals, Division of Continental Grain Co.—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of final exemption of existing operations and provisional exemption of future operations.

SUMMARY: The provisional exemption of petitioner's existing operations granted at 48 FR 6902 (February 16, 1983) is made final. Additionally, in accordance with current Commission policy, a provisional exemption of petitioner's future contracts is granted.

DATE: Comments are due on June 8, 1983. The provisional exemption of petitioner's future contracts will become final 15 days after the close of the comment period, unless in response to timely filed adverse comments, the Commission issues a future decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: No. 38999, Room 2139, Interstate Commerce Commission, Office of Proceedings, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Robin Williams, (202) 275–7697 or Howell I. Sporn, (202) 275–7691

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2227, Interstate Commerce Commission, Washington, D.C. 20423, or call 289–4357 in the DC metropolitan area or toll free (800) 424–5403.

Decided: May 13, 1983.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Rail Carriers; Somerset Railroad Corporation—Exemption From 49 U.S.C. 10746

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Under 49 U.S.C. 10505, the Interstate Commerce Commission exempts Somerset Railroad Corporation from the provisions of 49 U.S.C. 10746 for the operation of 15.5 miles of track in New York.

DATES: This exemption shall be effective on June 23, 1983. Petitions for reconsideration of this action must be filed by June 3, 1983 and petitions for stay must be filed by June 13, 1983.

ADDRESS: Send pleadings to: Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423. Petitioner's representative: Allen E. Kintigh, President, Somerset Railroad Corporation, c/o New York State Electric & Gas Corporation, 4500 Vestal Parkway East, Binghamton, NY 13902.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan Area) or toll free (800) 424–5403.

Decided: May 17, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

BILLING CODE 7035-01-M

[Ex Parte No. 387 (Sub-932)]

Rail Carriers; Pittsburgh and Lake Erie Railroad Co.; Exemption for Contract Tariff; ICC-PLE-C-0107 (Bituminous Steam Coal)

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: A provisional exemption is granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the above-noted contract tariff may become effective on one day's notice.[1] This exemption may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register**.

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in this instance to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power, moreover, the transaction is of limited scope. Therefore, we find that the exemption request meets the requirements of 49 U.S.C. 10505(a) and is granted subject to the following conditions:

This grant neither shall be construed to mean that the Commission has approved the contract for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review this contract and to determine its lawfulness.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10505)

Decided: May 16, 1983.

By the Commission, Review Board Number 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Agency Forms Under Review

May 20, 1983.

OMB has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. The list has all the entries grouped into new forms, revisions, or extensions. Each entry contains the following information:

(1) The name and telephone number of the Agency Clearance Officer (from whom a copy of the form and supporting documents is available); (2) The office of the agency issuing this form; (3) The title of the form; (4) The agency form number, if applicable; (5) How often the form must be filled out; (6) who will be required or asked to report; (7) An estimate of the number of responses; (8) An estimate of the total number of hours needed to fill out the form; (9) An indication of whether Section 3504(H) of Pub. L. 96–511 applies; (10) The name and telephone number of the person or office responsible for OMB review.

Copies of the proposed forms and supporting documents may be obtained from the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions about the items on this list should be directed to the reviewer listed at the end of each entry and to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer and the Agency Clearance Officer of your intent as early as possible.

DEPARTMENT OF LABOR

Office of Pension and Welfare Benefit Programs

Cincinnati Bell Inc. Pension Plan and Trust et al.; Grant of Individual Exemptions

AGENCY: Office of Pension and Welfare Benefit Programs, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the

VOL
48
ISS
101
MAY
24
1983
UMI

notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

Cincinnati Bell Inc. Pension Plans Trust Located in Cincinnati, Ohio

[Prohibited Transaction Exemption 83-88; Exemption Application No. D-3403]

Exemption

The restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (D) shall not apply to:

A. Effective January 1, 1975, the past extensions of credit by the Cincinnati Bell Inc. Pension Plan, and the Cincinnati Bell Inc. Management Pension Plan (the Plans) as a result of the Plans' acquisition of debt obligations of American Telephone and Telegraph Company (AT&T) and its subsidiaries, provided that the transactions have complied with the provisions of section 408(e) of the Act, as if the securities were deemed to be qualifying employer securities as defined in the Act; and

B. Effective this date, the purchases by the Plans of debt and/or equity securities issued by AT&T or any subsidiary as would be permitted under section 408(e) of the Act if AT&T and its subsidiaries were considered to be affiliates of Cincinnati Bell Inc. (the Employer), provided that the Plans' assets involved in such transactions are subject to the investment discretion and control of a fiduciary who is independent of both AT&T and the Employer.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 15, 1983, at 48 FR 10953.

For Further Information Contact: Mr. David Stander of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

[Prohibited Transaction Exemption 83-89; Exemption Application No. D-3748]

Joseph M. Wiesenbaugh, Jr., D.D.S. & Associates, P.A. Pension Plan (the Plan) Located in Hagerstown, Maryland

Exemption

The restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code, shall not apply to the past and future borrowing by the Plan of the maximum loan values of life insurance policies held by the Plan on the lives of Plan participants, provided that the terms and conditions of such loans are at least as favorable to the Plan as those it could obtain from an unrelated party.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983, at 48 FR 14078.

Effective Date: This exemption is effective August 3, 1982.

For Further Information Contact: Mrs. Miriam Freund, of the Department, telephone (202) 523-8971. (This is not a toll-free number.)

[Prohibited Transaction Exemption 83-90; Exemption Application No. D-3763]

Emjay Corporation Master Profit Sharing Trust and Plan as Adopted by the Warner S. Bump Medical Group, S.C. Profit Sharing Plan and Trust (the Plan) Located in Rhinelander, Wisconsin

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed loan of funds by the Plan to Warner S. Bump Medical Group, S.C., and the Warner S. Bump Medical Building, parties in interest with respect to the Plan, provided that the terms and conditions of the loans are not less favorable to the Plan than those obtainable in similar transactions with an unrelated party.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 11, 1983, at 48 FR 10498.

For Further Information Contact: Mr. David Stander of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

[Prohibited Transaction Exemption 83-91; Exemption Application No. D-3946]

The Dupps Company Profit Sharing Plan Located in Germantown, Ohio

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed loan of $500,000 by the Plan to Dupps Company, provided that the terms of the transactions are not less favorable to the Plan than those obtainable in an arm's length transaction with an unrelated party at the time of consummation of the transaction.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983, at 48 FR 14082.

For Further Information Contact: Alan H. Levitas of the Department, telephone (202) 523-8971. (This is not a toll-free number.)

[Prohibited Transaction Exemption 83-92; Exemption Application No. D-4127]

T. C. Consultant Pension Trust (the Plan) Located in West Orange, New Jersey

Exemption

The sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply, effective September 30, 1982, to the contribution to the Plan of 734 shares of American Telephone & Telegraph Company common stock (the Stock) by Theodore Cohn Consultant, Inc. (the Employer), the sponsor of the Plan, provided that the stock was valued at its fair market value as of the date it was contributed to the Plan.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983, at 48 FR 14085.

Effective Date: This exemption is effective September 30, 1982.

For Further Information Contact: Mr. David Stander of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; not does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 17th day of May, 1983.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, Department of Labor.

BILLING CODE 4510-29-M

Office of the Secretary

[Order 7-83]

Delegation of Authority and Assignment of Responsibilities for Architectural Accessibility in Department of Labor Structures

May 9, 1983.

1. *Purpose.* To delegate authority and assign responsibilities for carrying out Department of Labor (DOL) policies, programs and activities under the Architectural Barriers Act of 1968, as amended, and Section 502 of the Rehabilitation Act of 1973, as amended.

2. *Policy.* It is the policy of DOL to promote accessibility of structures, buildings, and facilities to physically handicapped individuals, and to ensure that buildings controlled by DOL or constructed, leased or acquired with DOL financial assistance fully comply with statutory and regulatory provisions which required the elimination of architectrural, transportation, and communication barriers in covered structures.

3. *Background.* Pursuant to the Acts above, DOL if required to ensure that certain buildings and facilities under its control or funded subject to its standards are accessible to handicapped persons. Through a Memorandum of Agreement (a copy of said memorandum is attached), the Architectural and Transportation Barriers Compliance Board (A&TBCB) permits DOL to institute its own system of compliance which meet the general features and objectives set forth by the A&TBCB as well as the needs of individual agencies. This delegation assigns responsibilities for development and implementation of such a compliance system in DOL.

4. *Delegation of Authority and Assignment of Responsibilities*

a. *The Assistant Secretary for Administration and Management* is hereby delegated authority and assigned responsibilities for:

(1) developing policy, setting standards, and coordinating investigative and enforcement activities of other component offices and administrations of the Department of Labor pursuant to the Acts referred to in Paragraph 1, above, and the Memorandum of Agreement between A&TBCB and DOL.

(2) monitoring, investigating, and enforcing the provisions of the Acts mentioned in Paragraph 1, above, with respect to DOL buildings and facilities, and facilities financed in whole or part by grants or loans which are subject to standards for design, construction or alteration issued by the Department of Labor under the laws authorizing such grants or loans, except for those facilities referred to in Paragraph 4b, below.

b. *The Assistant Secretary for Employment and Training Administration (ETA)* is hereby delegated authority and assigned responsibility, in accordance with the policies and standards established by the Assistant Secretary for Administration and Management, for monitoring, investigating and enforcing the laws referred to in Paragraph 1 above, with respect to buildings and facilities financed in whole or in part by ETA grants or loans and which are subject to standards for design, construction or alteration issued by ETA under the laws authorizing such grant or loan.

c. *DOL Agency Heads* are required to adhere to the policies, standards, and directives established by the Assistant Secretary for Administration and Management in accordance with Paragraph 4a, above.

d. *The Solicitor of Labor* shall have responsibility for providing legal advice and assistance to and representing DOL officials in legal proceedings, as appropriate, with regard to the administration of the Acts referred to in Paragraph 1 above.

5. *Redelegation of Authority.* The authority and responsibility delegated in this Order to the departmental officials identified above may be redelegated.

6. *Effective Date.* This Order is effective immediately.

Raymond J. Donovan,

Secretary of Labor.

Memorandum of Agreement Between the Architectural and Transportation Barriers Compliance Board and the Department of Labor

Whereas the Architectural and Transportation Barriers Compliance Board (ATBCB) is charged with ensuring compliance by the Department of Labor (DOL) in the elimination of architectural, transportation, and communication barriers to physically handicapped persons in structures for which DOL is responsible under the Architectural Barriers Act of 1968, as amended, and section 502 of the Rehabilitation Act of 1973, as amended, in accordance with standards issued pursuant to these Acts and with minimum guidelines determined and issued by the ATBCB; and *Whereas* the DOL seeks to assure continued progress in making these buildings, for which it is responsible, accessible to physically handicapped persons; and *Whereas* the Parties wish

VOL 48 ISS 101 MAY 24 1983 UMI

to fully cooperate in achieving these mutual goals;

It is hereby agreed by the Executive Director of the ATBCB and the Secretary of Labor on behalf of the DOL that

(a) The Department of Labor shall:

(1) institute a clearly defined Department-wide system of compliance which meets the general features and objectives as set forth by the ATBCB in the ATBCB Guidance Manual, Federal Agency System Self-Compliance With Accessibility Standards, as well as the needs of the individual agencies;

(2) with regard to covered structures constructed, leased or acquired by recipients of DOL financial assistance, require from each recipient a clear commitment to prevent or eliminate phusical barriers in covered structures in accordance with minimum guidelines of the ATBCB and standards of the General Services Administration;

(3) monitor progress in preventing or removing barriers in covered structures occupied by the Department of Labor or constructed, leased or acquired with DOL financial assistance;

(4) develop a system of tracking and resolving complaints which adheres to the standards and timetables set forth in ATBCB regulations;

(5) require each agency to inventory its covered structures and to obtain information necessary to maintain proper compliance;

(6) survey and inspect selected facilities, by appropriate sampling, to evaluate progress in achieving accessibility to the extent permitted by available resources;

(7) adhere to the bases for waivers and modifications and to the procedures for initiating and resolving waiver applications, as set forth in the statutes and ATBCB regulations and interpretations;

(8) maintain an effective system of communication and information exchange among the separate agencies, and recipients and with the ATBCB to ensure uniformity and effectiveness of the enforcement program (such information exchange shall include but shall not be limited to standards, coverage, waiver policy, and complaint procedure); and

(9) coordinate these activities and recommend periodically whatever changes may be needed;

(b) The Executive Director shall:

(1) refrain from initiating any enforcement proceedings against DOL for alleged noncompliance in relation to any building or facility if the Executive Director has approved a detailed plan for removal of the barriers from that building or facility, and he or she is satisfied that reasonable progress is being made in accordance with the detailed plan. Reasonable progress in a specific case shall be evaluated by comparing the time elapsed since the plan was submitted in relationship to the undone portion of the construction. The Executive Director shall not withhold approval of a plan if he or she determines that:

(a) The plan meets the current applicable Federal accessibility standard and

(b) actual construction for barrier removal is scheduled to start within 3 months after the presentation of the plan to him or her.

(2) provide the DOL and its covered recipients with whatever technical assistance and information are found necessary to meet their compliance obligations;

(3) maintain full cooperation with the DOL in resolving differences in interpretation of ATBCB regulations and guidelines where the DOL has requested clarification or change;

(4) affirm that this Agreement is entered into in order to acknowledge the DOL's program and policies of providing increased accessibility to buildings and facilities; and

(5) provide assistance in developing a training program for DOL staff in operating DOL's self-compliance system.

Both parties state that this Agreement shall be in effect for an indefinite period of time, and may be modified by the mutual consent of both or terminated by either party upon thirty (30) days advance written notice to the other party.

Dated: March 15, 1983.

Approved:

Robert M. Johnson,

Executive Director, Architectural and Transportation Barriers Compliance Board.

Dated: May 9, 1983.

Raymond J. Donovan,

Secretary of Labor.

BILLING CODE 4510-23-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (83-45)]

NASA Advisory Council, Space Systems and Technology Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Informal Advisory Subcommittee on Space Systems.

DATE AND TIME: June 8, 1983, 9 a.m. to 5 p.m.; June 9, 1983, 9 a.m. to 4 p.m.

ADDRESS: National Aeronautics and Space Administration, Langley Research Center, Building 1219, Room 225, Hampton, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. Stanley R. Sadin, National Aeronautics and Space Administration, Code RS-5, Washington, DC 20546 (202/755-8557).

SUPPLEMENTARY INFORMATION: This Informal Advisory Subcommittee was formed to make a technical review of the Office of Aeronautics and Space Technology (OAST) Space Systems Technology Program. The Subcommittee, chaired by Mr. Adrain O'Neal, is comprised of 7 members. The meeting will be open to the public up to the seating capacity of the room (approximately 20 persons, including the Subcommittee members and participants).

TYPE OF MEETING: Open

AGENDA:

June 8, 1983

9 a.m.—Review and Comments on the NASA/OAST Long Range Plan and the FY 1985 Plan.

2 p.m.—Review and Comments on OAST High Priority Technology Goals.

5 p.m.—Adjourn.

June 9, 1983

9 a.m.—Critique of Landmark Mission Sets for Planning.

1 p.m.—Summary, Conclusions and Draft Minutes of Meeting.

4 p.m.—Adjourn.

Ann P. Bradley,

Acting Associate Administrator for Management Office of Management.

May 16, 1983.

[Notice (83-46)]

NASA Advisory Council; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Informal Task Force for the Study of the Mission of NASA.

DATE AND TIME: June 9, 1983, 9 a.m. to 4 p.m.

ADDRESS: NASA Headquarters, Room 6004, 400 Maryland Avenue SW, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Nathaniel B. Cohen, Code LB-4, National Aeronautics and Space Administration, Washington, DC 20546 (202/755-8383).

SUPPLEMENTARY INFORMATION: The NASA Advisory Council Informal Task Force for the Study of the Mission of NASA was established under the NASA Advisory Council to conduct a study of the directions NASA should take in the future (including goals, programmatic objectives, and possible missions) and to report its findings and recommendations to the Council. The Task Force is chaired by Dr. George E. Solomon, and has a total of 14 members.

Visitors will be admitted to the meeting room up to its capacity, which is approximately 60 persons including Task Force members and other participants. Visitors will be requested to sign a visitor's register.

TYPE OF MEETING: Open.

AGENDA:

June 9, 1983

9 a.m.—Introduction.

9:30 a.m.—Status reports by subgroups.

11 a.m.—Task Force Working Session.

4 p.m.—Adjourn.

Dated: May 16, 1983.

Richard L. Daniels,

Director, Management Support Office, Office of Management.

[Notice (83-47)]

NASA Advisory Council, Space Systems and Technology Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Informal Advisory Subcommittee on Chemical Propulsion Technology.

DATE AND TIME: June 9-10, 1983, 8:30 a.m. to 5:30 p.m. each day.

ADDRESS: National Aeronautics and Space Administration, Lewis Research Center, Administration Building, Room 225, 21000 Brookpark Road, Cleveland, Ohio.

FOR FURTHER INFORMATION CONTACT: Mr. Edward A. Gabris, National Aeronautics and Space Administration, Code RST, Washington, DC 20546 (202/755-2490).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Chemical Propulsion Technology was established to provide guidance and direction to the Chemical Propulsion research and technology programs of NASA's Office of Aeronautics and Space Technology. The Subcommittee, chaired by Dr. Sanders Rosenberg, is comprised of six members. The meeting will be open to the public up to the seating capacity of the room (approximately 30 persons, including the Subcommittee members and participants).

TYPE OF MEETING: Open.

AGENDA:

June 9, 1983

8:30 a.m.—Welcome.
Chairperson's Remarks
Presentation of Agenda.

9:30 a.m.—Orbit Transfer Vehicle Propulsion Program—Propulsion Test-bed New Initiatives.

3:30 p.m.—Space Long-Range Plan—High Priority Technology Goals.

4:00 p.m.—Landmark Missions for Chemical Propulsion.

4:30 p.m.—Subcommittee Discusion of "Center of Excellence" Criteria.

5:30 p.m.—Adjourn.

June 10, 1983

8:30 a.m.—Lewis Research Center—A Center of Excellence in Advance Liquid Chemical Propulsion.

5:30 p.m.—Adjourn.

Dated: May 16, 1983.

Ann P. Bradley,

Acting Associate Administrator for Management, Office of Management.

[Notice (83-48)]

NASA Advisory Council, Aeronautics Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Informal Advisory Subcommittee on General Aviation Technology.

DATE AND TIME: June 15, 1983, 8:30 a.m. to 5 p.m., June 16, 1983, 8:30 a.m. to 5 p.m., June 17, 1983, 8:30 a.m. to 12 noon.

ADDRESS: National Aeronautics and Space Administration, Lewis Research Center, Building 3, Room 215, Cleveland, OH.

FOR FURTHER INFORMATION CONTACT: Mr. Harry W. Johnson, National Aeronautics and Space Administration, Code RJ-2, Washington, D.C. 20546, (202/755-3228).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on General Aviation Technology was established to assist the NASA in assessing the adequacy of its aeronautics research and technology program to meet the specific needs of general aviation, including commuter transport aircraft, and to recommend any modifications or augmentations of current and planned activities deemed necessary to increase their value and effectiveness in achieving program objectives. These objectives include advanced technology for increased safety, energy efficiency, utility, environmental compatibility, and economic usefulness. The program is multidisciplinary in scope, encompassing aerodynamics and flight dynamics, propulsion, materials and structures, avionics, controls and human factors. The Subcommittee, chaired by Mr. John W. Olcott, is comprised of eight members. The meeting will be open to the public up to the seating capacity of the room (approximately 50 persons including Subcommittee members and participants).

Type of meeting: Open.

Agenda

June 15, 1983

8:30 a.m.—Opening Remarks and Reports by Chairperson and Executive Secretary.

9 a.m.—Research Center Aeronautics Program Status Reports: NASA Langley Research Center, NASA Lewis Research Center, NASA Ames Research Center.

5 p.m.—Adjourn.

June 16, 1983

8:30 a.m.—Research Center Program Reports Concluded.

10 a.m.—Overview: Long Range Plan and Proposed New Initiatives.

11 a.m.—General Aviation Safety Panel Report and Discussion.

1 p.m.—NASA Lewis Research Center Facilities Tour.

3 p.m.—Discussion of Issues Regarding General Aviation and Commuter Aircraft Technology.

5 p.m.—Adjourn.

June 17, 1983

8:30 a.m.—Discussion of Issues Concluded.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Inter-Arts Advisory Panel; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Inter-Arts Advisory Panel (Folk Arts Section) to the National Council on the Arts will be held on June 9-11, 1983, from 9:00 a.m.-5:30 p.m. in Room 730 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 682-5433.

Dated: May 18, 1983.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Advanced Reactors; Meeting

The ACRS Subcommittee on Advance Reactors will hold a meeting on June 7, 1983, Room 1167, 1717 H Street, NW, Washington, D.C. The Subcommittee will review NRC Research Programs in Advanced Reactors for the ACRS Report to the Commission on the FY 1985-1986 research budget.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions during which the Subcommittee finds it necessary to discuss such proprietary information. One or more closed sessions may be necessary to discuss information. (Sunshine Act Exemption 4). To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows: *Tuesday, June 7, 1983—1:00 p.m. until the conclusion of business.*

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding the topics to be discussed.

The Subcommittee will than hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Paul Boehnert (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m., EDT.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close portions of this meeting to public attendance to protect proprietary Information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: May 17, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

Advisory Committee on Reactor Safeguards, Subcommittee on Qualification Program for Safety-Related Equipment; Meeting

The ACRS Subcommittee on Qualification Program for Safety-Related Equipment will hold a meeting on June 7, 1983, Room 1046, 1717 H Street, NW., Washington, DC. The Subcommittee wil discuss the portion of the NRC Safety Research Budget related to equipment qualification and plant aging.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions which will be closed to protect proprietary information (Sunshine Act Exemption 4). One or more closed sessions may be necessary to discuss such information. To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows: *Tuesday, June 7, 1983—8:30 a.m. until the conclusion of business.*

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Anthony Cappucci (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m., EDT.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close portions of this meeting to public attendance to protect proprietary information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

BILLING CODE 8010–01–M

[811–2785; Rel. No. 13248]

Adams Fiduciary Bond Fund; Filing of Application

May 17, 1983.

Notice is hereby given that Adams Fiduciary Bond Fund ("Applicant"), 55 Court Street, Boston, Mass. 02108, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, filed an application on March 25, 1983, for an order of the Commission, pursuant to Section 8(f) of the Act and Rule 8f–1 thereunder, declaring that Applicant has ceased to be an investment company as defined by the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant represents that it was organized under the laws of Massachusetts on October 20, 1977. Applicant states that it filed its Form N–8A on October 20, 1977, and its Form 8B–1 on December 13, 1977. According to the application, as of February 25, 1983, Applicant had 191,913.059 shares of beneficial interest outstanding. Such shares were the single class of Applicant's shares outstanding and had a $47.78 net asset value per share. The application indicates that, as of February 25, 1983, Applicant's aggregate net asset value was $9,169,949.

Applicant represents that its Board of Trustees called a special meeting of Applicant's shareholders held on February 11, 1983, for the purpose of considering and acting on a proposal to adopt a plan of liquidation (the "Plan"). Applicant represents further that the Plan provides for the sale of Applicant's assets and (after provision for the payment of all outstanding obligations, taxes and other liabilities of Applicant, accrued or contingent) the pro rata distribution of Applicant's remaining assets in cash to its shareholders. Applicant indicates that, at the special meeting, its securityholders approved the Plan by a favorable vote of 83.46 percent of the shares outstanding. Applicant states that its portfolio of investments was sold to the highest bidder on February 28, 1983.

Applicant states that, on February 28, 1983, distributions were made pro rata in complete liquidation to Applicant's securityholders, on surrender of their shares, by checks mailed to such securityholders, in the total aggregate amount of $9,169,949. Applicant states further that it had no securityholders at the time of the filing of the application. Applicant states that it is not party to any litigation or administrative proceeding and that it does not intend to engage in business activities other than those necessary for the winding-up of its affairs. Applicant states further that it filed a Certificate of Termination with the Secretary of the Commonwealth of Massachusetts on March 24, 1983.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 13, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

AEP Generating Co.; Proposed Issuance of Fixed Rate Notes by Service Company; Interest Rate Hedging Agreement

May 17, 1983.

AEP Generating Company ("AEGCo") 180 East Broad Street Columbus, Ohio 43215, an electric utility subsidiary of American Electric Power Company, Inc., a registered holding company, has filed with this Commission an application-declaration pursuant to Sections 6(a), 7, and 12 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42(b)(2), 50(b), and 50(a)(2) promulgated thereunder.

In accordance with Commission orders dated March 24, 1982, and February 16, 1983 (HCAR Nos. 22429 and 22857, respectively), AEGCo has entered into a Revolving Credit Agreement for the issuance of up to $450 million of notes through December 31, 1987. Such notes bear interest at AEGCo's option at either a fluctuating rate equal at all times to the prime rate (as defined in the Revolving Credit Agreement), or at a fixed rate per annum equal to ½ of 1% above the applicable London Interbank Offering ("LIBO") Rate until December 31, 1985, and ⅝ of 1% above the LIBO Rate thereafter through December 31, 1987.

The proceeds of AEGCo's revolving credit borrowings, $150 million as of March 31, 1983, together with other available funds, are applied to the construction cost of the Rockport Generating Station. AEGCo is acquiring a 35% undivided ownership interest as tenant-in-common in the two-unit Rockport plant from Indiana & Michigan Electric Company, AEGCO's associate company.

AEGCo seeks authorization to issue up to $300 million principal amount of unsecured, fixed rate notes to banks from time to time through March 31, 1984, pursuant to a fixed rate term loan agreement ("Term Loan Agreement"). The proceeds of these fixed rate notes will be used to refinance borrowings at fluctuating interest rates under AEGCO's $450 million Revolving Credit Agreement or, in lieu of further borrowings under the Revolving Credit Agreement. An exception from competitive bidding pursuant to subparagraph (a)(2) of Rule 50 is requested.

The fixed rate notes will mature on a date not less than two nor more than ten years from date of issuance. No compensating balances or commitment fees will be required. Each such note will bear interest not greater than 200 basis points over the prime rate, but in no event greater than 14% per annum. The proposed agreement will provide that in the event a note is paid prior to maturity, AEGCo will be required to pay a fee to the lending bank calculated to reimburse the bank for the difference, if any, between the stated loan rate and the bank's opportunity rate calculated on the basis of Treasury obligation rates. AEGCo states that it believes that funds at a fixed rate at or near the applicable prime rate are currently available on loans having maturities of up to, but not exceeding, two years. Rates quoted to AEGCo on loans having longer maturities have generally been in the range of up to 200 basis points higher than the prime rate. AEGCo believes that it will be of long-term benefit to the company and its customers to refund a portion of its outstanding variable rate notes, in whole or in part, with the proceeds of fixed rate notes having longer maturities, even though such long-term notes may bear a fixed rate of interest higher than current short-term rates at the time of such borrowings.

AEGCo also proposes on or before March 31, 1984, to enter, through competitive bidding, into one or more hedging agreements ("interest rate swaps") with banks. The interest rate swaps would involve the contractual exchange of interest payments on up to $300 million principal amount of unsecured variable rate debt of AEGCo under its Revolving Credit Agreement. Under such contracts, AEGCo would agree to make payments of interest at a fixed rate to a bank up to a principal amount of $300 million, in return for the bank's agreement to pay interest to AEGCo on the same principal amount and bearing interest at a variable rate that is a function of the LIBO rate payable by AEGCo under the Revolving Credit Agreement. The aggregate amount of notes outstanding under the revolving credit agreement, with or without any associated interest rate swaps, or under the proposed fixed rate term loan agreement would not exceed $450 million.

Essentially, an interest rate swap would enable AEGCo and a fixed rate borrower to exchange interest payments thus permitting AEGCo to enter into fixed rate obligations despite the limited availability of fixed-rate long term funds from domestic banks and eliminates the need to issue new long-term debt obligations. Because the bank arranging the swap guarantees this stream of interest payments, each party is insulated from the credit risks of the other. Under the hedging agreement, AEGCo would agree to make fixed rate payments, not exceeding a ceiling of 14%, to a bank and the bank agrees to make fluctuating rate interest payments based on AEGCo's LIBO rate borrowings under its Revolving Credit Agreement. The fixed rate obligation would mature not later than December 31, 1987, the maturity date of AEGCo's revolving credit borrowings. Although the typical swap involves hedging a floating rate against a fixed rate Eurobond with seven years maturity, AEGCo's rate will probably be hedged against a certificate of deposit in light of the 1987 maturity date of AEGCo's revolving credit borrowings.

AEGCo also anticipates that the floating rate paid to AEGCo by the bank would not fully cover AEGCo's LIBO Rate obligations under the Revolving Credit Agreement. For example, the bank may agree to pay AEGCo the present LIBO rate and AEGCo would be required to pay any percentage over LIBO payable under the Revolving Credit Agreement. Also, any additional fees, such as a bank's swap arrangement fee, may be paid on a lump sum at commencement or be reflected in the fixed rate payment to the bank. A typical interest rate swap agreement would contain early termination, or unwind provisions, pursuant to which AEGCo may be required to make or would be entitled to receive a settlement payment in the form of liquidated damages in the event of early termination.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 9, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

Alpha Income Fund, Inc. and Alpha Tax-Exempt Bond Fund, Inc.; Filing of Applications

May 17, 1983.

Notice is hereby given that Alpha Income Fund, Inc. ("Income Fund") 2 Piedmont Center, Suite 500, Atlanta, Geogria 30363 and Alpha Tax-Exempt Bond Fund, Inc. ("Bond Fund") (together, "Applicants"), each registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, have each filed an application on April 20, 1983, for an order of the Commission pursuant to Section 8(f) of the Act declaring that it has ceased to be an investment company, as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the complete text of relevant provisions thereof.

Income Fund, a Maryland corporation, and Bond Fund, a Georgia corporation, filed their respective registration statements pursuant to Section 8 of the Act on October 22, 1969 and November 29, 1976. The registration statements of Income Fund and Bond Fund filed under the Securities Act of 1933 were declared effective on July 24, 1970 and January 25, 1978 respectively, and each of the Applicants commenced its initial public

VOL 48 ISS 101 MY 24 1983 UMI

offering immediately following such declaration.

Each Applicant represents that its board of directors by unanimous written consent dated March 17, 1983, following a meeting of such board on January 27, 1983, approved a sale of all its assets and liquidation. According to the applications, in the case of Income Fund such sale was to Fidelity Corporate Bond Fund, Inc., and in the case of Bond Fund it was to Fidelity Municipal Bond Fund, Inc. Each Applicant states that while its corporate existence continues in effect at present, it will file in the near future the necessary documentation to effect its dissolution.

Each Applicant states that the method of distribution to its security holders in connection with winding up its affairs pursuant to its liquidation was to credit to open accounts in the names of such securityholders on the books of the company acquiring its assets the shares of the acquiring company received by Applicant in exchange for its assets on an equivalent net asset value basis. Each such securityholder was credited with the number of shares of the acquiring company corresponding to his percentage ownership of shares of Applicant. The securityholders, according to each Applicant, were credited with such shares of the respective acquiring company on April 15, 1983.

Applicant represents that it has no debts or other outstanding liabilities, and is not a party to any litigation or administrative proceeding. Each Applicant states that within the last 18 months it has not transferred any of its assets to a separate trust, the beneficiaries of which were or are securityholders of Applicant. Finally, each Applicant states that it is not now engaged, and does not propose to engage, in any business activities other than those necessary for the winding up of its affairs.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, upon its own motion or upon application, finds that a registered investment company has ceased to be an investment company it shall so declare by order and upon the taking effect of that order the registration of that investment company shall cease to be in effect.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 13, 1983, at 5:30 p.m. do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[812-5460; Rel. No 13251]

The Bond Fund for Bank Trust Departments; Filing of an Application

May 17, 1983.

Notice is hereby given that The Bond Fund for Bank Trust Departments ("Applicant"), 24 Federal Street, Boston, Massachusetts 02110, registered under the investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on February 17, 1983, and an amendment thereto on April 4, 1983, for an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act, and Rules 2a–4 and 22c–1 thereunder to the extent necessary to permit Applicant to value its portfolio securities using the amortized cost method of valuation. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder as to the provisions to which the exemption applies.

A Massachusetts business trust consisting of four series, Applicant seeks to value the portfolio securities in its Government Money Market Portfolio ("GMM") and any future money market series on the amortized cost basis. GMM will invest in U.S. Treasury bills, notes and bonds, and other obligations guaranteed by the U.S. Government, its agencies and instrumentalities. Subsequently formed money market series will make investments, including any repurchase agreements, limited to those that GMM may invest in, or other appropriate investments. To the extent that subsequently formed money market series might invest in bank instruments, Applicant represents that such money market series will not invest in the securities of any of its affiliates without obtaining prior Commission approval.

Section 6(c) of the Act permits the Commission, among other things, to grant an exemption by order upon application from any provision or provisions of the Act, or from any rule or regulation thereunder, provided such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by policy and provisions of the Act.

In support of the relief requested, Applicant submits that the amortized cost method of valuation will enable GMM to maintain he constant net asset value per share required by many investors. Applicant represents that its proposed use of a one dollar amortized cost per share would offer GMM's shareholders the convenience of being able to value their investments simply by knowing the number of shares they own. Applicant's trustees have determined in good faith that, absent unusual circumstances, the amortized cost method of valuing securities will reflect the fair value of such securities. Applicant believes that the requested relief is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant expressly agrees that the following conditions may be imposed in any order of the Commission granting the exemption requested:

1. In supervising the operations of GMM and delegating special responsibilities involving portfolio management to Applicant's investment adviser, Applicant's board of trustees undertakes—as a particular responsibility within its overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and GMM's investment objectives, to stabilize GMM's net asset value per share, as computed for the purpose of distribution, redemption, and repurchase, at $1.00 per share.

2. Included among the procedures to be adopted by the board of trustees shall be the following:

(a) Review by the board of trustees, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the current net asset value per share as determined by using available market quotations from Applicant's amortized cost price per share, and maintenance of records of such review. To fulfill this condition, Applicant states that it intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the board of trustees in the exercise of its discretion to be appropriate indicators of value, which may include, *inter alia*, (i) quotations or estimates of market value for individual portolio instruments, or (ii) values obtained from yield data relating to classes of instruments published by reputable sources.

(b) In the event such deviation from Applicant's amortized cost price per share exceeds ½ of 1%, a requirement that the board of trustees will promptly consider what action, if any, should be initiated.

(c) Where the board of trustees believes the extent of any deviation from GMM's amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten Applicant's average portfolio maturity; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. GMM will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable price per share; provided, however, that it will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days. In fulfilling this condition, Applicant undertakes that, if the disposition of a portfolio instrument results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce such dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and Applicant will record, maintain, and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of trustees' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board of trustees' meetings. The documents preserve pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act as though such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments which its board of directors determines present minimal credit risks and which are of "high quality" as determined by any major rating service; or, in the case of any instruments that are not rated, of comparable quality as determined by the board of trustees.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement indicating whether any action pursuant to condition 2(c) was taken during the preceding fiscal quarter, and, if any such action was taken, Applicant will describe the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 13, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[70-6859; Rel. No. 22943]

The Connecticut Light & Power Co.; Proposed Issuance and Sale at Competitive Bidding of First Mortgage Bonds and Preferred Stock With an Adjustable Dividend Rate

May 17, 1983.

The Connecticut Light and Power Company ("CL&P"), Selden Street, Berlin, Connecticut 06037, an electric utility subsidiary of Northeast Utilities, a registered holding company, has filed an application with this Commission pursuant to Section 6(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50 promulgated thereunder.

CL&P proposes to issue and sell during the time period ending March 31, 1984, in one or more issues, (1) up to $180 million principal amount of first and refunding mortgage bonds, and (2) up to 1,600,000 shares ($80 million aggregate par value) of preferred stock, $50 par value. During the same time period, CL&P may also effect other long-term or intermediate-term debt financings in the form of debenture sales in the Eurobond market or term loans coupled with an interest rate swap contract, the authorizations for which were previously granted by this Commission (HCAR No. 22715, November 17, 1982, and HCAR No. 22940, May 17, 1983). The total principal amount of first mortgage bonds to be issued would not exceed $180 million, less the amounts raised with any Eurobond issues and any term loan/interest rate swap contract.

In issuing and selling the preferred stock and the first mortgage bonds, CL&P may employ alternative competitive bidding procedures in accordance with the Commission's delayed or continuous offering and sale procedures under Rule 415 of the Securities Act of 1933 (17 CFR 230.415). Pursuant to Rule 50(a)(5) of the Act, the Commission has issued a statement of policy (HCAR No. 22623, September 2, 1982) authorizing the use of alternative competitive bidding procedrues in lieu of the procedures prescribed by Rule 50(b). CL&P has also stated, however, that market conditions may require that these securities be sold through a negotiated public offering, in which case, CL&P would seek an exception from all competitive bidding requirements.

The bonds will be issued under CL&P's Indenture of Mortgage and Deed of Trust dated May 1, 1921, as supplemented. The bonds will mature in not less than five nor more than thirty years, and the interest rate and price

VOL 48 ISS 101 MY 24 1983 UMI

(which shall be not less than 98% nor more than 100% of the principal amount thereof, exclusive of accrued interest, if any) will be determined by competitive bidding. Terms applicable to each series of bonds will include a prohibition, for a period of not more than five years, against redeeming the bonds, directly or indirectly, with funds borrowed at a lower effective interest cost than the cost of the applicable series. The terms will also provide that no more than one percent in principal amount of a series of bonds shall be redeemed with the use of a sinking fund in any twelve-month period prior to five years from date of issue of a series of bonds.

The number of shares of preferred stock to be issued and sold will be approved and authorized and the special terms thereof will be established by resolutions of CL&P's Board of Directors. CL&P proposes to issue the preferred stock with either a fixed dividend rate (which shall be a multiple of 0.08%) or an adjustable dividend rate. Dividend rates, price to CL&P (which shall not be less than $50 nor more than $51.375 per share), and the underwriters' compensation will be determined by competitive bidding. If the option of an adjustable dividend rate is chosen for any series of preferred stock, the initial dividend rate would be a fixed percentage rate to be set by CL&P. However, for all subsequent dividend payment periods the annual dividend per share would, subject to maximum (not higher than 15 percent per annum) and minimum (not lower than 6 percent per annum) rates that would be fixed by CL&P, be computed at a fixed percentage rate above or below the Applicable Rate (as described below), from time to time in effect, for each subsequent quarterly dividend period. The fixed rate above or below the Applicable Rate would be established by the competitive bidding process.

The Applicable Rate for any dividend period would be the highest of: (i) The Three-month Treasury Bill Rate, (ii) the Ten Year Constant Maturity Rate and (iii) the Twenty Year Constant Maturity Rate for such dividend period. If CL&P determines that for any reason one or more of such rates cannot be determined for any dividend period, then the Applicable Rate for such dividend period would be the higher of whichever of such rates can be so determined. If CL&P determines that none of such rates can be determined for any dividend period, the the Applicable Rate in effect for the preceding dividend period would be continued for such dividend period.

Depending upon market conditions at the time of the offering of the securities, if CL&P determines that preferred stock having a resale price of approximately $25 per share is likely to have a significantly better market reception than the preferred stock having a resale price of approximately $50 per share, CL&P may issue and sell the preferred stock to underwriters for deposit with a Depositary. The underwriters would then receive from the Depositary and deliver to the repurchasers in the subsequent public offering Depositary Receipts evidencing Depositary Preferred Shares, each representing one-half share of preferred stock. Holders of Depositary Preferred Shares would be entitled to withdraw one share of preferred stock for every two Depositary Preferred Shares surrendered to the Depositary. Holders of preferred stock would be entitled to withdraw two Depositary Preferred Shares for every share of preferred stock surrendered to the Depositary. Under certain circumstances, upon notice to the holders of Depositary Preferred Shares, the deposit arrangements could be terminated.

The net proceeds from the sales of the bonds and preferred stock will be used to repay in part short-term borrowings (consisting of bank loans and commercial paper) and construction trust borrowings, which were incurred to finance CL&P's construction program and, in the case of short-term borrowings, for general working capital purposes. CL&P's 1983–1984 construction program (including allowance for funds used during construction but excluding nuclear fuel) is expected to total about $1,059.2 million, of which $526.7 million is expected to be expended in 1983 and $532.5 million is expected to be incurred in 1984.

The application and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Any interested persons wishing to comment or request a hearing should submit their views in writing by June 9, 1983, to the Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant at the address specified above and proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application, as filed or as it may be amended, may be granted.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-13909 Filed 5-23-83; 8:45 am]

BILLING CODE 8010-01-M

[812-5519; Rel. No. 13250]

Heizer Corp.; Filing of Application

May 17, 1983.

Notice is hereby given that Heizer Corporation ("Applicant"), 20 North Wacker Drive, Chicago, Illinois 60606, filed an application on March 25, 1983, for an order, pursuant to Section 61(a)(3)(B) of the Investment Company Act of 1940 ("Act"), approving the issuance of stock options to: (1) Charles L. Palmer, a nonemployee director of Applicant, and to (2) each future nonemployee director of Applicant. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder for further information as to the provisions to which the exemption applies.

A business development company as defined by Section 2(a)(48) of the Act, Applicant seeks long-term capital appreciation. Applicant has historically invested in new and developing companies whose securities have no established public market, and in mature companies—including some that are experiencing financial difficulties. Applicant typically acquires a substantial or controlling interest in its portfolio companies, and furnishes them with significant managerial assistance, particularly in the early stages of their development. Applicant represents that it has no external "investment adviser" within the meaning of the Act, and that its management makes its investment decisions in accordance with policies approved by the board of directors. In addition to overseeing Applicant's management, Applicant's board of directors devotes substantial time and attention to matter relating to its portfolio companies, thus functioning more like the board of an operating company than like the board of a traditional investment company. To attract and retain the highly qualified and motivated personnel needed to assist in the development of Applicant and its portfolio companies, Applicant instituted a stock option plan for its directors.

Applicant's nonemployee directors may purchase shares of Applicant pursuant to an order of the Commission (Investment Company Act Release No. 12136, January 4, 1982) and Applicant's own limitations. The Commission's order approved Applicant's issuance of options to purchase up to 10,000 shares of Applicant's common stock to each of its nonemployee directors. The Commission approved Applicant's exemptive request on the basis that the stock options' terms, and the manner in which Applicant issued them, appeared, based on representations in the application, to be fair, reasonable, involve no overreaching of shareholders, and complied with all applicable conditions of Section 61(a)(3)(B) of the Act.

Applicant seeks to place Mr. Palmer, and any future nonemployee director, in parity with those nonemployee directors whose stock options have been approved by the Commission. On September 20, 1982, Applicant granted options to Mr. Palmer to purchase up to 10,000 shares of its common stock at a price of $9.875 per share, Applicant's closing price on the American Stock Exchange on that day. On January 25, 1983, Applicant's board of directors concluded that Applicant should grant stock options to all future nonemployee directors comparable to those issued to current nonemployee directors.

Like the stock options earlier approved by the Commission, Applicant contends the options it seeks approval for meet all applicable requirements of Section 61(a)(3)(B) of the Act. Such options will or already: have an exercise price equal to the fair market value of Applicant's voting stock at the date of issuance, as measured by the voting stocks' closing price on a national securities exchange for that day; be issued pursuant to an executive compensation plan approved by Applicant's shareholders; be non-transferable except for disposition by will or intestacy; expire by their terms on the lesser of (1) ten years less one day from the date of issuance, or (2) 90 days after the nonemployee director ceases to be a director of Applicant for any reason except death, in which case the options will not expire for a maximum of one year from the date of death; and vest and become exercisable with respect to ten percent of the shares subject to the option on each of the first nine anniversary dates of the date of issuance, with the final ten percent exercisable sixty days prior to the tenth anniversary of the date of issuance.

Also in accordance with Section 61(a)(3)(B), Applicant represents that it has no investment adviser who receives any compensation described in Section 205(1) of the Investment Advisers Act of 1940, and that it has no profit-sharing plan of the type described by Section 57(n) of the Act. Applicant asserts that as of September 20, 1982, the date it issued the options to Mr. Palmer, the amount of voting securities that would result from the exercise of all then outstanding options issued to its directors, officers, and employees, approximated 7.4% of its outstanding voting stock. Applicant represents that it has issued no warrants, options, or rights to purchase its voting securities other than those issued to its directors, officers, and employees, and thus its stock options easily meet the percentage limitations imposed by Section 61(a)(3)(B)(iv). Applicant recognizes that Section 61(a)(3)(B)(iv) also limits the total number of shares it could issue, pursuant to options, to future nonemployee directors.

Applicant characterizes the options it seeks approval for as identical in all material respects to those already approved by the Commission, with the date of issuance, the exercise price, and the recipient's identity constituting the only significant differences. Applicant believes the stock options it issues to its nonemployee directors have and will continue to provide significant incentive to its directors to remain on its board of directors and to devote their best efforts to Applicant's future success. Applicant asserts that the stock options allow its directors to increase their ownership interest in Applicant, thereby helping to ensure a close identity of their interests with those of Applicant and its shareholders. Applicant represents that savings generated by reduced paperwork, legal expenses, and Applicant management and Commission staff time will benefit Applicant, its stockholders, the Commission, and the public. Applicant submits that the options granted Mr. Palmer and the options to be issued to future nonemployee directors are fair, reasonable, and involve no overreaching of Applicant or its shareholders insofar as the options granted to nonemployee directors represent only a small percentage of Applicant's outstanding shares (even if an option to purchase 10,000 shares were immediately exercisable, instead of over the stated ten-year period, it would represent only .0625 percent of Applicant's voting securities). Finally, Applicant submits that its total compensation program for nonemployee directors, in which stock options function as an integral component, is fair and reasonable.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 13, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[812-5462; Rel. No. 13249]

Kemper Corp.; Filing of an Application for an Order

May 17, 1983.

Notice is hereby given that Kemper Corporation ("Applicant"), Kemper Center, Long Grove, Illinois 60049, filed an application on February 28, 1983, and amendments thereto on March 3, April 15, and April 20, 1983, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting the purchase of securities issued by Applicant from the provisions of Section 12(d)(3) of the Act and Rule 12d-1 thereunder to the extent requested. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, summarized below, and are referred to the Act and the rules thereunder for further information as to the provisions to which the exemption applies.

A non-operating holding company, Applicant, through its subsidiaries, offers: automobile, property, casualty, and life insurance; reinsurance; and investment services. Lumbermens Mutual Casualty Company ("Lumbermens") owned approximately 52% of applicant's common stock as of December 31, 1982. Applicant's property-casualty insurance business, operated on a regional, national, and international basis, includes automobile,

VOL 48 ISS 101 MAY 24 1983 UMI

homeowners, accident, and health insurance, and worker's compensation. Applicant's reinsurance business also operates on an international as well as national basis.

Applicant offers life insurance products through Federal Kemper Life Assurance Company and Kemper Investors Life Insurance Company ("KILICO"). Among other products, KILICO offers variable annuities and universal life insurance through broker-dealers and independent agents. KILICO provides investment management services, as a registered investment adviser, to the KILICO Money Market Separate Account, Total Return Separate Account, and Income Separate Account. KILICO owns Investors Brokerage Services, Inc. ("Investors"), a broker-dealer designed to provide discount brokerage services to Applicant's employees. Applicant represents that Investors now services retail accounts.

Applicant provides investment services through Kemper Financial Services, Inc. ("KFS") and two regional broker-dealers, Blunt Ellis & Loewi Inc. ("BEL") and Prescott, Ball & Turben, Inc. ("PBT"). KFS and its subsidiaries sponsor and distribute money market, stock, and bond mutual funds, tax-exempt unit investment trusts, and life insurance and annuity products. KFS's life insurance subsidiary, KILICO, issues the forementioned life insurance and annuity products. KFS markets most of its products through retail distributors of financial products, although it sells its no-load mutual fund products directly to the public. A registered broker/dealer and investment adviser, KFS manages pension, insurance company, and other institutional investment portfolios. KFS, as of December 31, 1982, managed approximately $19 billion of assets. KFS owns a 50.5 percent interest in Kemper-Murray Johnstone International, Inc., a registered investment adviser providing international investment management services. KFS owns fifty percent of Investors Fiduciary Trust Company, a limited purpose trust company specializing in trust services.

Licensed as a broker-dealer, BEL also acts as an investment banker. Applicant represents that BEL serves as one on the largest distributors of KFS products. Applicant describes BEL as retail-oriented, handling securities transactions primarily for individual clients, with some institutional business. BEL's parent, Loewi Financial Companies, Ltd., merged with and into a wholly-owned subsidiary of Applicant, itself owns subsidiaries that, among other things, act as an investment adviser.

Applicant acquired eighty percent of PBT, another broker-dealer, in 1982. Like BEL, PBT engages in investment banking, but PBT serves more institutional clients that BEL. Applicant represents that PBT trades for its own account in various arbitrage transactions.

Applicant has an option to purchase, from Lumbermens, Bateman Eichler, Hill Richards, Inc. ("BEHR") a broker-dealer and investment banker like BEL and PBT. Applicant claims that none of BEHR's revenues inure directly or indirectly to Applicant. On April 5, 1983, the executive committees of the boards of directors of Lumbermens and Applicant approved, subject to approval of the relief herein requested, the purchase by Applicant of all the outstanding stock of Batehill, Inc. ("Batehill"), BEHR's parent company. Batehill's subsidiaries operate real estate management and equipment leasing businesses. Applicant's other investments include a 21.4 percent interest in the common stock of Gibralter Financial Corporation of California, a savings and loan association holding company that offers discount brokerage services.

Applicant seeks an order, pursuant to Section 6(c) of the Act, exemping from the provisions of section 12(d)(3) of the Act the purchase or other acquisition solely for investment pruposes by a registered investment company, or any security issued by Applicant, provided that all of the conditions of Rule 12d-1 (or any successor rule) are satisfied but for the requirement that not in excess of fifteen percent of the total gross revenues of Applicant be derived directly, indirectly, or both, from the business of a broker, a dealer, an underwriter, an investment adviser of an investment company, or an investment adviser registered under the Investment Advisers Act of 1940 (hereinafter referred to as "Such Businesses"), and that in lieu thereof a condition be established that not in excess of twenty-five percent of the total gross revenues be derived, directly or indirectly, from such businesses. Applicant has further agreed to the condition that no registered investment company may avail itself of the exemptive order when purchasing securities issued by Applicant if, immediately after such purchase: (1) That investment company and all other registered investment compaanies having the same (or an affiliated) investment adviser own in the aggregate more than 5% of the securities of that class outstanding (in determining the amount of outstanding securities of a class, the registered investment company may rely upon information set forth in applicant's most recent quarterly or annual report, and any current report subsequent thereto, filed with the Commission pursuant to the Securities Exchange Act of 1934, unless such investment company knows or has reason to believe that the information contained therein is inaccurate); or (2) the ergistered investment company has invested more than 10% of the value of its total assets or, if lower, the maximum percentage permitted by its investment policies and restrictions, in any class of securities of Applicant; or (3) where the registered investment company is an open-end company, 10% or more of the gross dollar amount of shares issued by it or by any other open-end registered investment company having the same (or an affiliated) investment adviser within the preceding 24-month period (excluding shares issued upon the reinvestment of dividends) were sold in transactions where BEL, PBT, Investors, or any other registered broker-dealer subsidary of Applicant acted as broker-dealer. The foregoing 24-month period is a rolling period, *i.e.*, the most recent month is substituted for the earliest month as time passes. A change in circumstances subsequent to a purchase that complied with the foregoing condition (such as a decrease in the number of Applicant's shares outstanding, an increase in the value of the investment company's position in applicant relative to its total assets, or sales by Applicant's broker-dealer subsidiaries in excess of the 10% threshold) shall not require any disposition of Applicant's securities, but no further purchases may be made until such condition is again satisfied.

Without the requested relief, Applicant submits that registered investment companies may be precluded from purchasing, or compelled to sell, Applicant's securities, not withstanding that the acquisition or retention of such securities does not present the dangers that Section 12(d)(3) seeks to eliminate. For the year ended December 31, 1982, Applicant derived approximately eleven percent of its gross revenues (restated on an annualized pooling of interest basis to account for the BEL acquisition in May, 1982, and PBT in October, 1982, although Applicant treated both acquisitions as "purchases" for accounting purchases) from Such Businesses. If applicant purchases Batehill, it estimates that approximately 14.5% of its gross revenues would have emanated, based on December 31, 1982, annualized figures, from Such Businesses.

Applicant anticipates that, because NASDAQ began reporting Applicant's common stock on its national marketing quotation system on February 8, 1983, its increased visibility will attract more equity-oriented investment companies to its stock. Applicant asserts that it has a large institutional following and that, as of December 31, 1982, registered investment companies held approximately 9.4% of its common stock. Applicant believes that many investment companies may begin disposing of its securities if financial reports show Applicant's subsidiary broker-dealers and investment advisers contributing even 31–14% of Applicant's consolidated revenues.

Applicant acknowledges three principal risks cited to justify Section 12(d)(3): (1) the entrepreneurial risks of the investment banking business; (2) the risk that an investment company might invest in a broker-dealer in reciprocity for broker-dealer's sales of the investment company's shares; and (3) the risk that an investment company might direct brokerage to a broker-dealer that it had invested in to enhance the broker-dealer's profitability or to rescue it from financial difficulty. Applicant submits that these risks, in the context of an investment in Applicant, do not warrant the application of Section 12(d))3) to an extent greater than that contemplated by the requested order.

Applicant asserts that it will continue to have a large asset base and a considerable revenue stream not exposed to the entrepreneurial risks of investment banking, in part because the relief it requests would prohibit investment companies from investing in Applicant when Applicant's gross revenes derived from Such Businesses exceeded twenty-five percent of Applicant's total gross revenues. Applicant further states that its total, consolidated gross revenues for the year ended December 31, 1982, approximated $2.1 billion; its net income approximated $93.4 million. For the year ended December 31, 1981, Applicant represents its consolidated gross revenues approximated $2.2 billion and its net income approximated $83 million.

Applicant characterizes the risk that an investment company might invest in Applicant's securities in reciprocity for the sale of that company's shares by Applicant's broker-dealers as remote. Applicant asserts that such an arrangement might constitute a joint transaction in violation of Section 17(d) of the Act. Moreover, as a result of the third provision of the condition imposed as a prerequisite to the contemplated order, nor more than a *de minimis* relationship could exist between an investment company investing in Applicant whose securities were sold by BEL, PBT, Investors, or any other registered broker-dealer subsidiary of Applicant.

Finally, Applicant describes the risk that an investment company might direct brokerage to Applicant's broker-dealers to enhance its profitability or to rescue it from financial difficulty as virtually non-existent. Given the size and variety of Applicant's business on a consolidated basis, Applicant finds it inconceivable that any investment company could have any discernable impact upon its profitability or financial stability simply through directed brokerage commissions.

Section 6(c) of the Act permits the Commission, among other things, to grant an exemption by order upon application from any provision or provisions of the Act, or from any rule or regulation thereunder, provided such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant concludes that the risks that Section 12(d)(3) seeks to eliminate are not present in Applicant or are adequately addressed by Rule 12d–1 as sought to be modified by the application and the conditions Applicant has agreed to. Without the requested relief, Applicant believes the range of securities that an investment company may invest in might needlessly shrink despite the desirability of Applicant's securities. Applicant submits that the relief it requests is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 13, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20504. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[31-792; Rel. No. 22947]

Transamerica Delaval Inc.; Application To Be Declared Not To Be an Electric Utility Company

May 18, 1983.

Transamerica Delaval Inc. ("Delaval"), 3450 Princeton Pike, Lawrenceville, New Jersey 08648, a Delaware corporation and a wholly-owned subsidiary of Transamerica Corporation, has filed with this Commission an application pursuant to the Public Utility Holding Company Act of 1935 ("Act") requesting an order declaring Delaval not to be an electric utility company under Section 2(a)(3).

Delaval is engaged, through 16 divisions, in the manufacture of precision engineered machinery and components for a variety of industrial markets. Its products include turbines, compressors, valves, pumps, forgings, filters, and diesel engines. Delaval is currently developing and testing a new 12-cylinder prototype engine at its manufacturing facilities in California. The testing process produces electrical energy which, prior to 1982, was wasted in a water rheostat. In February 1982 Delaval entered into a 3-year power sales agreement ("Agreement") with Pacific Gas & Electric Company ("PG&E"). Under the Agreement, PG&E purchases all the energy produced during the testing process, and Delaval repurchases sufficient energy to power its manufacturing plant while testing is underway from PG&E at its established rates for industrial customers.

The prototype engine drives a generator, which produces approximately 8 MW of power that is delivered and sold to PG&E. Delaval's manufacturing facilities consume

VOL
48
ISS
101
MY
24
1983
UMI

approximately 2,000 KW per hour, purchased from PG&E, an amount far less than the 8,000 KW per hour produced during the periods of the testing process. In 1982 Delaval sold to PG&E 11.5 million KWH of electricity for approximately $690,000, and purchased from PG&E approximately 13.2 million KWH. Testing of the 12-cylinder prototype engine is expected to be completed by the end of 1983. At that time Delaval expects to replace that prototype with a 6-cylinder prototype, the testing of which will produce less electric energy for sale to PG&E.

Delaval's revenues of $690,000 from sales of electricity to PG&E constituted approximately 0.18% of its total revenues of $400,000,000 for 1982. Delaval requests an order declaring it not to be an electric utility company pursuant to Section 2(a)(3) of the Act. That section provides that the Commission shall by order declare a company not to be an electric utility company if it finds "such company is primarily engaged in [non-utility business], and by reason of the small amount of electric energy sold by such company it is not necessary in the public interest or for the protection of investors or consumers that such company be considered an electric utility company for purposes of [the Act]."

The application and amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 15, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant at the address specified above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date the application, as filed or as it may be amended, may be granted.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13234A (812-4707); Administrative Proceeding File No. 3-6244]

Union-Investment-Gesellschaft m.b.H.; Hearing on Application for an Order Permitting Registration of an Investment Company Organized in West Germany and Granting Exemptions

May 17, 1983.

On December 1, 1982, the Commission issued a notice (Investment Company Act Release No. 12863) of an application filed by Union-Investment-Gesellschaft m.b.H. ("Applicant") c/o Franz M. Oppenheimer, Esq., Leva, Hawes, Symington, Martin & Oppenheimer, 815 Connecticut Avenue, NW., Washington, D.C. 20006, a West German management company, on behalf of Unifonds, a West German mutual fund, for an order of the Commission pursuant to Section 7(d) of the Investment Company Act of 1940 ("Act") permitting registration of Applicant under the Act so that it may sell Unifonds shares in the United States, and pursuant to Section 6(c) of the Act granting exemptions from the following provisions of the Act and various rules adopted thereunder: Sections 10 (a), (b), (f) and (g); 12 (b) and (d)(3); 13; 15; 16; 17 (a), (e), (f), (g) and (j); 18(i); 22 (c), (d), and (e); 30 (a), (c), and (d); 31 (a) and (b); 32; and 34. The notice, which is incorporated herein by reference, gave any interested person until December 27, 1982, to file a request in writing for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted.

On December 27, 1982, a request for a hearing was filed with the Commission by the Investment Company Institute ("ICI"), which was supplemented by a letter dated March 4, 1983. Counsel to Applicant on January 31, 1983, filed a letter with the Commission responding to the contentions made by the ICI in its hearing request. The ICI states in its hearing request that it is the national trade association of the American mutual fund industry and it asserts, among other things, that granting the requested approvals and exemptions could be detrimental to both the American investing public and the American mutual fund industry. Specifically, the ICI contends that Applicant has failed to meet the standard of enforceability that must be met to permit its registration under Section 7(d) of the Act. The ICI argues, with respect to Section 7(d) of the Act, that Applicant and Unifonds would fail to comply with what it asserts are among the most important provisions of Rule 7d-1, promulgated under that section, and that such failure would seriously undermine the ability of the Commission or a shareholder of Unifonds to enforce the provisions of the Act against those companies. In addition, the ICI questions the propriety of granting Applicant's specific exemptive requests which have been made pursuant to Section 6(c) of the Act, arguing that such requests do not meet the standards for exemptive relief set forth in Section 6(c).

It appears to the Commission that it is appropriate in the public interest and in the interest of investors that a hearing be held with respect to said application. Accordingly,

It is ordered, pursuant to section 40(a) of the Act, that a hearing on said application under the applicable provisions of the Act and Rules of the Commission thereunder be held at a time and place to be fixed by further order as provided by Rule 6 of the Commission's Rules of Practice [17 CFR 201.6], and that an Administrative Law Judge to be designated by further order preside at said hearing. Any person, other than Applicant, desiring to be heard or otherwise wishing to participate in this proceeding is directed to file with the Secretary of the Commission, on or before June 6, 1983, his application as provided by Rule 9(c) of the Commission's Rules of Practice (17 CFR 201.9(c)), setting forth the nature and extent of his interest in the proceeding and any issues of fact or law which he desires to controvert, or any additional issues which he deems raised by this Notice and Order by said application. A copy of such request shall be served personally or by mail upon Applicant at the address noted above, and proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. Persons filing an application to participate or to be heard will receive notice of the date and place of the hearing, and any adjournments thereof, as well as other actions of the Commission involving the subject matter of this proceeding.

The Division of Investment Management has advised the Commission that it has made an examination of the application, the request for hearing, and the response to such request by counsel to Applicant and that, upon the basis thereof, the following matters and questions are presented for consideration without prejudice to its specifying additional matters and questions upon further examination.

(1) Whether, given the failure and/or inability of Applicant to agree to comply with all of the provisions of Rule 7d-1 under the Act in its offering of Unifonds shares in the United States, the conditions and representations which Applicant has agreed will govern the offering of shares will make it both legally and practically feasible to enforce the provisions of the Act against Applicant;

(2) Whether allowing Applicant to offer shares of Unifonds in the United States in the manner proposed in its application, with the resultant reliance on provisions of West German law to provide protections to investors in this country, which are allegedly substantially equivalent to those contained in those provisions of the Act which Applicant has requested exemption, is consistent with the public interest and the protection of investors;

(3) Whether it is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act to grant Applicant the exemptions it seeks from the various provisions of the Act, and relevant rules and regulations thereunder; and

(4) Whether the formation of a United States corporation is a reasonable alternative to Applicant's proposed operations, and if so, what, if any, advantages or disadvantages would result from that approach.

It is further Ordered that at the aforesaid hearing attention should be given to the foregoing matters.

It is further Ordered that the Division of Investment Management shall be a party to the proceeding.

It is further Ordered that the Secretary of the Commission shall give notice of the aforesaid hearing by mailing a copy of this Notice and Order by certified mail to Applicant at the address noted above and the Investment Company Institute; that notice to all other persons be given by publication of this Notice and Order in the **Federal Register**; that a copy of this Notice and Order shall be published in the "SEC Docket;" and that an announcement of the aforesaid hearing shall be included in the "SEC News Digest."

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[License No. 09/09-5271]

Alpha Venture Capital Corporation

Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et. seq.*), has been filed by Alpha Venture Capital Corporation with the Small Business Administration (SBA), pursuant to 13 CFR 107.102(1983).

The officers, directors and stockholders of the Applicant are as follows:

Joaquin A. DeLima, #6 Timberline, Austin, Texas 78746, President/Director, 100%
Franklin K. Busse, 7607 Long Point Drive, Austin, Texas 78731, Vice President/Director, Secretary & General Manager
Adalex A. DeLima, #6 Timberline, Austin, Texas 78746, Director & Treasurer

An Applicant, a Texas Corporation with its principal place of business at 1013 East 38-½ Street, Austin, Texas 78751 will begin operations with private capital of $500,000.

The applicant will conduct its activities principally in the State of Texas.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the application include the general business reputation and character of proposed managers, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Austin, Texas.

Myriad Capital, Inc.; Application for Approval of Conflict of Interest Transaction Between Associates

Notice is hereby given that Myriad Capital, Inc. (Myriad), 8820 South Sepulveda Boulevard, Suite 204, Los Angeles, California 90045, a Federal Licensee under the Small Business Investment Act of 1958, as amended, has filed an application with the Small Business Administration pursuant to § 107.1004 of the Regulations governing small business investment companies (13 CFR 107.1004 (1983)) for approval of a conflict of interest transaction.

Myriad proposes to make a $400,000 investment in the shares of Western Underwriters Insurance Company (WUIC), 11548 South Street, Suite 20, Cerritos, California 90701.

The conflict arises because Chuang-I Lin, President of Myriad, became a director of WUIC on February 12, 1982, to protect Myriad's investment after its board of Directors on February 1, 1982, made a commitment to purchase the shares.

WUIC is a new insurance company in organization. Mr. Lin was required by section 2807.03 of Title X, California Administrative Code, to purchase $200,000 of its common stock. The securities cannot be sold to the public or to Myriad until $3,250,000 is raised and a Certificate of Authority is issued by the California Insurance Commissioner. In the meantime the funds are held in escrow.

Approval is requested for Myriad, after the issuance of the Certificate of Authority, to purchase 4,000 shares of WUIC's Stock from Mr. Lin, at the cost, $200,000, and 4,000 shares from WUIC for $200,000.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in the Los Angeles, California area.

P.R. Peterson Venture Capital Corp.; License Surrender

Notice is hereby given that P.R. Peterson Venture Capital Corporation, 7301 Washington Avenue, South, Edina, Minnesota 55435 has surrendered its license to operate as a small business investment company under the Small Business Investment Act of 1958, as amended (the Act). P.R. Peterson Venture Capital Corporation was licensed by the Small Business Administration on September 12, 1978.

Under the authority vested by the Act and pursuant to the regulations promulgated thereunder, the surrender was accepted on March 7, 1983, and accordingly, all rights, privileges, and franchises derived therefrom have been terminated.

[License No. 04/04-5219]

Venture Group, Inc.; Issuance of License to Operate as a Small Business Investment Company

On September 29, 1982, a notice was published in the **Federal Register** (47 FR 42860), stating that an application had been filed by Venture Group, Inc., 5433 Buffalo Avenue, Jacksonville, Florida 32208, with the Small Business Administration (SBA) for a license to operate as a small business investment company (SBIC), pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1982)).

Interested parties were given until the close of business October 14, 1982, to submit their written comments to SBA. No comments were received.

Notice is hereby given that, pursuant to Section 301(d) of the Small Business Investment Act of 1958, as amended, and after having considered the application and all other information, SBA issued License No. 04/04-5219, on April 25, 1983, to Venture Group, Inc. to operate as an SBIC.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

FEDERAL COMMUNICATIONS COMMISSION

Closed Commission Meeting.
Thursday, May 26, 1983.
May 19, 1983.

The Federal Communications Commission will hold a Closed Meeting on the subjects listed below on Thursday, May 26, 1983, following the Open Meeting which is scheduled to commence at 9:30 A.M., in Room 856, at 1919 M Street, N.W., Washington, D.C.

Agenda, Item No., and Subject

Enforcement—1—Field Investigation of Spanish International Communications Corporation, licensee of five television stations and five translators. Spanish International Network, et al.

Hearing—1—Motion for Stay of Commission Order terminating comparative renewal proceeding for a VHF television station in New York City (Docket Nos. 19991 and 19992).

2—Application for Review of Hearing Designation Order in the North Miami, Florida, comparative FM proceeding (BC Docket Nos. 82-731 through 82-742).

Court remand of the RKO General, Inc., Fidelity Television, Inc. comparative television renewal proceeding (Docket Nos. 16679-16680).

Enforcement Item 1, is closed to the public because it concerns Investigatory Records Matters (See 47 CFR 0.603 (g)).

Hearing Items 1 thru 3, are closed to the public because they concern Adjudicatory Matters (See 47 CFR 0.603 (j)).

The following persons are expected to attend the appropriate portions of this meeting: Commissioners and their Assistants; Managing Director and members of his staff; General Counsel and members of his staff; Chief, Mass Media Bureau and members of his staff; Chief, Office of Public Affairs and members of his staff.

Action by the Commission:

Enforcement Item 1, April 11, 1983. Commissioners Fowler, Chairman; Quello, Fogarty, Jones, Dawson, Rivera and Sharp voting to consider this item in Closed Session.

Hearing Items 1 thru 3, May 18, 1983. Commissioners Fowler, Chairman; Quello, Fogarty, Jones, Dawson, Rivera and Sharp voting to consider this item in Closed Session.

This meeting may be continues the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254-7674.

William J. Tricarico,

Secretary, Federal Communications Commission.

[S-733-83 Filed 5-20-83; 10:24 am]

2

FEDERAL COMMUNICATIONS COMMISSION

Open Commission Meeting, Thursday, May 26, 1983.
May 19, 1983.

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, May 26, 1983, which is scheduled to commence at 9:30 A.M., in Room 856, at 1919 M Street, N.W., Washington, D.C.

Agenda, Item No., and Subject

General—1—Title: Amendment of Parts 2, 21, 74 and 94 of the Commission's Rules and Regulations in regard to frequency allocation to the Instructional Television Fixed Service, the Multipoint Distribution Service, and the Private Operational Fixed Service (General Docket 80-112).

Amendment of Part 21 of the Commission's Rules to permit the use of alternative procedures in choosing applicants for radio authorizations in the Multipoint Distribution Service (CC Docket No. 80-116).

Application of Channel View, Inc., for an experimental (developmental) station at Salt Lake City, Utah (File No. 8938-ED-MR-82).

Summary: The Commission will consider whether a reallocation of the 2500-2690 MHz band should be made and other related matters.

2—Title: Amendment of Part 74 of the Commission's Rules and Regulations in regard to Instructional Television Fixed Service

Summary: The Commission will consider proposed changes regarding the technical requirements imposed on ITFS licensees and proposed relaxation or elimination of non-technical requirements.

3—Title: *Memorandum Opinion and Order* in the Matter of Various Methods of Transmitting Program Materials to Hotels and Similar Locations and Use of the Business Radio Service for the Transmission of Motion Pictures or Other Program Material to Hotels or Other Similar Points.

Summary: The FCC will consider the issues raised in petitions for reconsideration concerning its May 1981 decision in Docket 19671 which permitted eligibles in the Private Operational-Fixed Microwave Radio Service to distribute their products and services to customers.

Private Radio—1—Title: Amendment of Part 90 of the Rules to allow wildlife tracking telemetry in the Forestry-Conservation Radio Service, PR Docket No. 82-618, RM-4016.

Summary: The FCC will consider whether to adopt a Report and Order which will allow the use of wildlife tracking telemetry in the Forestry-Conservation Radio Service.

2—Title: Amendment of certain Amateur Radio Service Rules (Part 97) by deletion, clarification, relaxation and codification.

Summary: The Commission will consider whether to adopt an Order which would make several minor amendments to Part 97 of the Rules to delete unnecessary rules, clarify rules, revise unnecessarily restrictive rules and codify into the rules certain statutory requirements.

3—Title: Report and Order proposing to eliminate unnecessary reporting and record keeping requirements in the Maritime Services.

Summary: The FCC will consider whether to amend Parts 81 and 83 (Maritime Services) to remove certain reporting and record keeping requirements which appear to impose unnecessary burdens on the maritime public.

4—Title: Amendment of the Amateur Radio Service Rules, Part 97, to eliminate requirements that licensees maintain a detailed log of station operation.

Summary: The Commission will consider whether to adopt an Order amending Part 97 of the Rules to eliminate most record-keeping requirements for licensees of amateur radio stations.

5—Title: Amendment of the Amateur Radio Service Rules, Part 97, to make additional frequencies available to the Radio Amateur Civil Emergency Service (RACES) during declared national emergencies.

Summary: The Commission will consider whether to adopt a Notice of Proposed Rule Making proposing to amend Part 97

VOL
48
ISS
1
01
MAY
24
1983
UMI

of the Rules to make additional frequencies available to the Radio Amateur Civil Emergency Service during declared national emergencies.

Common Carrier—1—Title: in the Matter of Inquiry into Policies to be Followed in the Authorization of Common Carrier Facilities to Meet Caribbean Region Telecommunications Needs During the 1985–1995 Period

Summary: The Commission will consider a Notice of Inquiry to develop policies and guidelines for the construction and use of cable and satellite transmission facilities to meet demands for common carrier services in the Caribbean region for the period 1985–1995.

2—Title: Rules for Establishment and Management of an Exchange Carrier Association (Access Charges)

Summary: The Commission will consider adopting rules concerning the formation and management of an Exchange Carrier Association for access charges.

3—Title: Application of the Western Union Telegraph Company to acquire facilities for the provision of Teletex service within the United States and Germany.

Summary: .The Commission will consider whether to authorize facilities to the Western Union Telegraph Company for the provision of Teletex service within the United States and between the United States and Germany.

4—Title: MTS/WATS Market Structure. CC Docket No. 78–72, Phase IV (Access Monitoring Plan)

Summary: In the Third Report and Order in this proceeding the Commission stated it would monitor the access of the institution of end user access charges. The Commission gave the Common Carrier Bureau 90 days to develop a proposed plan. This item contains the proposed plan.

Audio—1—Title: Application for the involuntary assignment of license of station KPRQ(AM), Murry, Utah, from Murry Broadcasting Company, Inc. to Kirk Merkley, Receiver: (2) a contingent application to assign the license from the Receiver to Tri-Alpha Broadcasting Corporation: (3) license renewal application filed by Murry Broadcasting Company, Inc.; and (4) objections to the applications.

Summary: The Commission will consider the significance of the appointment of a receiver of broadcast assets by a state court where the court's decision is based on the enforcement of a reversionary interest in the station's license.

Video—1—Title: "Request for Issuance of Tax Certificate" (CSR–2258) filed November 29, 1982, by Midessa Television Company, licensee of Station KMID–TV (NBC, Channel 2), Midland, Texas.

Summary: Midessa Television Company, licensee of Station KMID–TV (NBC, Channel 2), Midland, Texas, seeks issuance of a tax certificate for its sale of its interest in Community Cablevision Company d/b/a Community Cable of Odessa.

2—Title: A. Request of RKO General Inc., for temporary waiver of the main studio rule (section 73.1125) for station WOR-TV, channel 9, Secaucus, New Jersey.

B. Motion for stay filed by Multi-State Communications, Inc., of the action of the Commission changing the allocation of channel 9 from New York City to Secaucus, New Jersey.

Summary: The Commission will consider whether a grant of the waiver request and of the motion for stay would serve the public interest.

3—Title: Application for review and request for stay of Bureau action returning as untimely filed the application of Caldwell Television Associates, Ltd. for a new commercial television station in Caldwell, Idaho.

Summary: The Commission will determine whether it properly returned the application as untimely filed.

Policy—1—Title: Amendment of Section 73.37(b) of the Commission's Rules.

Summary: On its own motion the Commission is considering an amendment to this rule governing the acceptance, processing and grant of certain AM applications.

2—Title: Amendment of FM Table of Assignments regarding Helena, Montana (BC Docket No. 80–523).

Summary: The Commission will review a Broadcast Bureau decision which assigned four Class C FM channels to Helena, Montana and will review a petition for stay.

3—Title: Modification of FM Broadcast Station Rules to Increase the Availability of Commercial FM Broadcast Assignments. (BC Docket No. 80–90)

Summary: The Commission will consider changing the technical rules governing the allotment of FM broadcast channels to allow the operation of more stations.

Enforcement—1—Title: Application for Review filed by Decency in Broadcasting, Inc. of the former Broadcast Bureau's (now Mass Media Bureau) action denying its request for action against alleged obscenities and profanities broadcast by Rahall Broadcasting of Indiana, Inc., licensee of Radio Station WFBQ(FM), Indianapolis, Indiana.

Summary: FCC considers an application for Review filed by Decency in Broadcasting, Inc., asking the Commission to reverse the Mass Media Bureau's refusal to take action against Rahall Broadcasting of Indiana, Inc., licensee of Radio Station WFBQ(FM), Indianapolis, Indiana for broadcast of alleged obscene, indecent and profane material in violation of 18 U.S.C. 1464.

2—Title: License application to cover construction permit (BLH–810206 AN) and renewal application (BRH–810803 WT) and apparent operation contrary to the rules and the construction permit.

Summary: The Commission will determine the appropriate action to be taken with respect to WSEZ(FM)'s applications in light of the apparent operation contrary to the terms of the CP and the Rules.

3—Title: Application for Review of Eulogio Cardona y Beltran.

Summary: Mr. Beltran seeks review of Broadcast (now Mass Media) Bureau's ruling of November 9, 1981. The Bureau denied Mr. Beltran's personal attack complaint because he failed to show that he was attacked during discussion on a controversial issue of public importants.

This meeting may be continued the following work day to allow the Commission to compete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254–7674.

William J. Tricarico,

Secretary, Federal Communications Commission.

POSTAL SERVICE (Board of Governors)

Amendment to Notice of a Meeting.

"Federal Register" citation of previous announcement: 48 FR 22254, May 17, 1983.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: Briefing Session (Closed): 1:00 p.m., Wednesday, June 1, 1983. Meeting (Open) 8:00 a.m., Thursday, June 2, 1983.

CHANGE: Preceding the briefing session on June 1, the Board will hold a meeting for the purpose of continuing the discussion of the Postal Service's possible strategies concerning future postal ratemaking, which was commenced at the Board's January 31, 1983, meeting and continued at its March 7, April 4, and May 2 meetings. The meeting will be closed to public observation, the Board having duly determined to close its discussion in accordance with the provisions of the Sunshine Act.

CONTACT PERSON FOR MORE INFORMATION: David F. Harris, (202) 245–3734.

David F. Harris,

Secretary.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 816, 817, and 826

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Backfilling and Grading

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is issuing final rules relating to the backfilling and grading requirements for surface and underground mining activities. The rules are reorganized, duplication is eliminated, some specific design criteria are removed, and the backfilling and grading performance standards for steep slope mining are combined with the backfilling and grading performance standards for other types of surface coal mining operations. These changes will allow more flexibility in the backfilling and grading procedures.

EFFECTIVE DATE: June 23, 1983.

FOR FURTHER INFORMATION CONTACT: Robert A. Wiles, P.E., Division of Engineering Analysis, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, DC 20240; 202–343–4022.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Discussion of comments and rules adopted.
III. Procedural matters.

I. Background

OSM proposed revisions on June 21, 1982 (47 FR 26760), to the performance standards that govern the backfilling and grading of areas disturbed by surface coal mining operations. The proposed rules were issued to remove some specific design criteria, to eliminate duplication in the previous rules, and to consolidate backfilling and grading standards for steep slope operations with the standards for other operations. These final rules cover the performance standards for backfilling and grading of disturbed areas in surface mining activities and underground mining activities. In addition, the rules include provisions for backfilling and grading in areas involving thin and thick overburden.

The public hearing on the proposed rules scheduled for August 4, 1982, was not held since no one requested to speak at the hearing. However, two public meetings were conducted on the proposed rules, and the records of these meetings are filed in the Administrative Record.

When the rules were proposed on June 21, 1982, it was announced that the public comment period would remain open until further notice (47 FR 26760). A subsequent **Federal Register** notice (47 FR 30266, July 13, 1982) announced that the public comment period would close at 5:00 p.m., August 25, 1982, to coincide with the closing of the public comment period on the draft Supplemental Environmental Impact Statement on the proposed rules and other related proposals. As a result of persons wishing to testify on various aspects of the proposed rules at oversight hearings before the House Committee on Interior and Insular Affairs on September 9–10, 1982, the public comment period was reopened through September 10, 1982, to allow admission of relevant portions of the hearing transcripts into the Administrative Record (47 FR 39201, September 7, 1982).

These final rules implement the environmental protection standards for surface coal mining operations as set forth in the Surface Mining Control and Reclamation Act of 1977 (Act), 30 U.S.C. 1201 *et seq.* The backfilling and grading rules for areas disturbed by surface mining activities are based on Section 515(b)(3) of the Act, and the rules for areas disturbed by underground mining activities are based on Section 516(b) of the Act. The final rules governing surface coal mining operations on steep slopes are based on the performance standards in Section 515(d) of the Act.

Backfilling and grading rules for the permanent regulatory program were promulgated on March 13, 1979 (44 FR 15411). Part 816 of those rules included general requirements for backfilling and grading (§§ 816.101 and 816.102), requirements for covering coal and acid- and toxic-forming materials (§816.103), and requirements for areas with thin and thick overburden (§§ 816.104 and 816.105). Similar requirements for the surface effects of underground mining activities were included in Part 817, except that there were no rules for areas with thin or thick overburden. In the same March 13, 1979, rulemaking, special backfilling and grading rules for steep slope operations were included in 30 CFR Part 826.

The June 21, 1982, notice proposed that §§ 816.101 and 816.103 be conbined with § 816.102 into a section on general requirements for backfilling and grading and that §§ 816.101 and 816.103 be removed. The requirements for areas with thin and thick overburden (§§ 816.104 and 816.105, respectively) that duplicated the general backfilling and grading requirements were proposed to be deleted. The same changes were proposed for Part 817, except that rules for thin and thick overburden are unnecessary for underground mining activities. In the June 21, 1982, rulemaking it was proposed that the special backfilling and grading rules for steep slope operations (Part 826 of the permanent program rules) be moved to Parts 816 and 817 as new §§816.107 and 817.107, respectively.

The final rules generally adopt the provisions of the proposed rules. The final rules include general requirements for backfilling and grading in § 816.102, requirements for areas with thin and thick overburden in §§ 816.104 and 816.105, respectively, and additional provisions for backfilling and grading operations on steep slope areas in § 816.107. In order to simplify the preamble, the following discussion of the rules in §§ 816.102 and 816.107 also applies to §§ 817.102 and 817.107, unless otherwise noted. The sections for thin and thick overburden, §§ 816.104 and 816.105, respectively, apply only to surface mining activities. As discussed below, Part 826, governing mining on steep slopes, is being removed at this time. For additional discussion of the proposed rules, see the preamble to the proposed rules published June 21, 1982 (47 FR 26760).

II. Discussion of Comments and Rules Adopted

A. General Comments

During the comment period, OSM received comments from industry and associations, individuals, environmental groups, and Federal and State agencies. More than 100 comments on the proposed backfilling and grading rules were received and evaluated in preparing the final rules. All of the relevant comments received concerning this final rule are addressed below.

Several general comments that did not address specific aspects of the rules will be addressed before discussing the changes to the proposed rules.

OSM received support for the change to the performance standards in the proposed backfilling and grading rules, but was also criticized for providing too much flexibility to the State regulatory authorities. Several commenters indicated that the move to performance standards and allowing flexibility to the States was needed.

OSM concludes that Congress intended the States to have flexibility in implementing the performance standards. Section 201(c)(9) of the Act requires OSM to assist the States in developing State programs which meet the standards of the Act "and at the same time, reflect local requirements and local environmental and agricultural conditions * * *." The standards of Section 515(b) of the Act are minimum requirements which the States may add to at their discretion. The emphasis of the rules is on performance standards; the regulatory authority may develop design criteria or other standards that are appropriate to the local program.

One commenter criticized the time and effort required to perform unnecessary and unrealistic studies with no benefit other than to satisfy the rules. However, the commenter did not identify any studies that were characterized as a waste of effort and money. OSM believes that the information required by these backfilling and grading rules is reasonable and necessary for the regulatory authority to determine that the operation is, and will be, in compliance with the Act.

One commenter requested that a technical handbook being developed by OSM to provide state-of-the-art knowledge for backfilling and grading be clearly designated for reference purposes only. This request was made to ensure that the handbook mentioned in the preamble of the proposed rules (47 FR 26762) would not be misconstrued to have the force of rules over a period of time. The commenter continued by stating that updating the handbook would be a major undertaking and that there would be times when the handbook would lack the latest information developed by industry.

The technical handbook being developed by OSM will present only guidelines for the design and construction of the backfilling and grading portion of the reclamation operation and will not have the force of law. OSM is aware that keeping the handbook current will be a major undertaking and that new developments in the industry must be conscientiously followed and incorporated into the handbook.

B. Specific Comments and Discussion of Rules Adopted

Part 816—Permanent Program Performance Standards—Surface Mining Activities

Previous Section 816.101 Backfilling and grading: General requirements

The proposed rules combined some provisions of previous § 816.101 with § 816.102, deleted others because of duplication with proposed § 816.102, and removed some specific design criteria as discussed in the preamble of June 21, 1982 (47 FR 26762).

The proposed backfilling and grading rules removed the timing and distance requirements in previous § 816.101(a) for rough backfilling and grading of contour, open pit, and area strip mining operations. The change was proposed since a detailed timetable for each step in the reclamation plan already is required by 30 CFR 780.18(b)(1), and the specific design criteria would more properly be described in the technical handbook or be set by the regulatory authority on the basis of local conditions.

Most State regulatory authorities supported the deletion of the timing and distance requirements for backfilling and grading since it grants additional flexibility to them. However, some States requested authorization to specify these requirements in their State programs. They believed some criteria are necessary to eliminate constant disputes between the regulatory authority and the operator on what constitutes contemporaneous reclamation. Another State wanted flexibility to set requirements for the timing of backfilling and grading to meet specific conditions within the State, which are needed to maintain contemporaneous and quality reclamation. One State believed that national guidance is appropriate with respect to time periods and suggested setting the times based on mine method and technology. The suggested time periods for backfilling and grading, various types of mining operations would fall within the scope of contemporaneous reclamation. It also indicated that any standard should have an "escape" clause. The escape clause would allow the regulatory authority to approve different time periods if the mine conditions or other site-specific conditions made it impossible to meet the established standards.

One commenter believed that the rationale given in the preamble to the proposed rules for deleting the time and distance requirements was insufficient. The commenter felt that the timetable in the previous rule was well explained and should not be changed because one of the chief purposes of the Act is to establish minimum national standards that all operators have to meet. The commenter also stated that specific requirements are necessary as enforcement measures, because under the proposed rules the inspector would be unable to detect violations without review of the permit and that parameters must be established within which compliance can be measured.

OSM agrees that the regulatory authorities should be able to establish schedules that specify contemporaneous reclamation. In a related rulemaking (47 FR 16604, April 16, 1982) concerning concurrent surface and underground mining activities, OSM proposed to amend § 816.100, the provision that governs contemporaneous reclamation. As part of the final rule in that rulemaking, OSM will add language to § 816.100 that will allow the regulatory authority to set time and distance requirements for mining operations that take into account conditions that are unique to their locale. Such standards established by the regulatory authority will be at least as effective as those in the previous rule which allowed the regulatory authority to grant additional time for backfilling and grading when a need was demonstrated by the operator. Under revised § 816.100, the regulatory authority will be able to establish a timetable more in keeping with State needs. OSM does not believe it imposes an undue burden on inspectors to review permits to determine the approved timing for contemporaneous reclamation. However, under the final rule a State will still have the flexibility to establish time periods for backfilling and grading as part of the State program rather than on a permit-by-permit basis.

OSM believes that different State time frames for backfilling will not affect interstate competition, as stated by one commenter. In either area- or contour-mining, an operation will generally have the economic incentive to transport spoil the shortest distance possible and to move the material only one time. In most cases spoil will be moved directly to the final location and backfilling will occur at the same time as mining. Where material must be rehandled, the costs of rehandling and backfilling would be the same regardless of the time frame specified. Thus, the primary consideration, in terms of costs for backfilling, is not the time frame involved, but rather the distance and number of times material must be handled. Under final § 816.100, the time frame chosen by each State will have to be the shortest practicable period between mining and backfilling given the particular conditions in that State. A difference among States before backfilling is completed would not confer any advantage on operators in one State over those in another. Operators in all States are still required to accomplish reclamation contemporaneously with mining. This rule merely acknowledges that "contemporaneous reclamation" is a relative term which must be interpreted

VOL
48
ISS
101
MAY
24
1983
UMI

by each State on the basis of the mining conditions in its territory. In fact, costs may be greater for some types of mining if there is a longer distance between the mining area and the backfilling operation because of additional cost in moving the overburden a greater distance.

OSM received no other comments on the requirements that were proposed of deletion from § 816.101. Therefore, § 816.101 will be removed from the final rules for the reasons stated in the preamble to the proposed rules (47 FR 26762 June 21, 1982).

Section 816.102 Backfilling and grading: General requirements

Section 816.102 sets the general provisions for backfilling and grading areas disturbed by surface mining activities. The section requires return to the approximate original contour (AOC) except under certain situations; sets standards for handling and placing spoil and coal processing waste; and establishes general performance standards for exposed coal seams, acid- and toxic-forming materials, cut-and-fill terraces, small depressions, impoundments, and final-graded surfaces. Various changes were made to the proposed rule, consisting of primarily rearranging some of the provisions, adding cross references to some of the provisions, and providing additional clarifying language. Further discussion of these changes is included with the response to comments set forth below.

Section 816.102(a) [Proposed § 816.102(b)]

Final § 816.102(a) establishes the requirements for reclaiming areas disturbed by the mining operation. These provisions were proposed as §§ 816.102 (a) and (b). OSM has reorganized § 816.102 in the final rules to specifically identify the requirements for backfilling and grading the spoil in the disturbed areas in § 816.102(a) as the first paragraph, for the convenience of the user, and has placed the exceptions to the AOC-restoration requirement, included in proposed § 816.102(a)(1)–(a)(3), as the last paragraph in § 816.102. Also, the language in final § 816.102(a) is slightly different from the proposal, due to the reorganization; however, the rephrasing does not change the meaning of the paragraph. Comments were received on each paragraph of proposed § 816.102(b) and these along with the changes to the final rules, are discussed below in sequence.

Final § 816.102(a) introduces the specific requirements by stating that the disturbed areas shall be backfilled and graded. This provision is a combination of the introductory phrase of proposed § 816.102(b) and proposed § 816.102(b)(2) which stated that spoil shall be backfilled and graded. In the final rule, OSM has replaced the word "spoil" with the more inclusive term "disturbed areas" to indicate that there are other areas that may require backfilling and grading in addition to the mined-out area and that materials other than spoil may be used as backfill. A disturbed area is defined in § 701.5 to mean "an area where vegetation, topsoil, or overburden is removed or upon which topsoil, spoil, coal processing waste, underground development waste, or noncoal waste is placed by surface coal mining operations. . . ." With this change, the rules are more in line with the intent of Section 515(b)(3) of the Act.

Final § 816.102(a)(1) states that the disturbed areas must be backfilled and graded to achieve AOC, except as provided in § 816.102(k). Paragraph (k) indicates the circumstances under which the postmining slopes may vary from AOC for certain mining conditions. The requirement to return to AOC was in proposed § 816.102(a), which introduced the exceptions to AOC for certain mining conditions. Because no comments were required on the general requirement to return to AOC, no change has been made in this rule.

Final § 816.102(a)(2) requires that the disturbed areas be backfilled and graded to eliminate all highwalls, spoil piles, and depressions except as provided in Paragraph (h) for small depressions and in Paragraph (k)(3)(iii) for previously mined highwalls. This provision is the same as proposed § 816.102(b)(2)(i) except that a reference for highwall exceptions has been added and the small-depression reference has been reworded in accordance with the reorganization of the section.

One commenter wanted the term "spoil piles" clarified so that it does not mean excess spoil sites. The commenter noted that excess spoil is used for purposes other than backfilling and grading and is disposed of according to the revised excess spoil rules in proposed § 816.71. Another commenter wanted this paragraph changed to reflect the proposed new definition of excess spoil, which excludes spoil that is used to blend spoil from the mined-out area with the surrounding terrain (47 FR 24954, June 8, 1982).

In area mining, the spoil piles referred to in final § 816.102(a)(2) are those formed during the mining operation from shovel or dragline operations. These are the spoil piles that must be backfilled, compacted, and graded according to Section 515(b)(3) of the Act. In other mining methods, spoil piles are comprised of overburden that is disposed of in the pit area after the coal is removed. Such overburden is not considered excess spoil and must be placed according to the provisions of §§ 816.102–816.105.

Excess spoil includes material that is disposed of in a location other than the mined-out area, except for material used to blend spoil with the surrounding terrain in achieving AOC in nonsteep slope areas. Generally, excess spoil includes only that spoil that is not needed to restore AOC. The spoil piles referred to in § 816.102(a)(2) are not considered excess spoil which would be disposed of according to the provisions of § 816.71 because they are necessary to restore AOC. The spoil piles referred to in § 816.102(a)(2) remain in, or are returned to, the area from which the overburden was removed.

One commenter suggested replacing the section reference for small depressions in proposed § 816.102(b)(2)(i) with the language from § 816.102(h) that pertains to small depressions. The commenter offered no explanation for this suggested change.

The depressions which Section 515(b)(3) of the Act requires to be removed are those formed during the mining operation before any backfilling and grading of the spoil has been accomplished. They may be of any size and are not planned as part of the postmining land-use plan. The small depressions allowed to remain by the Act and § 816.102(h) are small depressions used for specific purposes and formed during the reclamation operation. OSM has retained the organization of these two paragraphs as set out in the proposed rule because to combine them would create a long and confusing paragraph.

Under final § 816.102(a)(3), the disturbed areas must be backfilled and graded to achieve a postmining slope that does not exceed either the angle of repose or such lesser slope as is necessary to achieve a minimum long-term static safety factor of 1.3 and to prevent slides. These provisions were taken from proposed § 816.102(b)(2)(ii), which was similar to the final rule except it contained a requirement that the spoil be backfilled and graded to achieve the "most moderate slope possible" after being replaced. Also, it did not include the provision to prevent slides.

A commenter believed that the word "moderate" should be deleted from the sentence "[a]chieve the most moderate slope possible that * * *" because the interpretation of "moderate" is a matter of relative judgment that does not relate to actual land use. OSM accepts the commenter's assertion that "moderate" is a matter of relative judgment and should not be adopted. After evaluating the comment, OSM has decided that it is not necessary to describe the postmining slope further since the required slope is defined by the AOC of the land. The definition of AOC states that the postmining surface configuration should closely resemble the general surface configuration of the land prior to mining. OSM believes this description of the final slope is sufficient under the Act and that this rule need only set limits based on safety considerations.

One commenter indicated that the 1.3 minimum long-term static safety factor was satisfactory as an indication of spoil stability. However, the commenter believed OSM should recognize the fact that it is not necessary to determine the factor of safety in all designs. It was pointed out that many highway fills are designed on 2*h*:1*v* slope without calculating a factor of safety during design. The commenter concluded by saying that it is not reasonable to require the operator to determine the factor of safety for embankments well above the design requirements.

The rigorousness of the analysis used to determine the safety factor for an individual structure is based to a large degree on the conditions surrounding the structure. For example, the embankment of a high dam is analyzed more rigorously than the fill for a highway embankment. The rule specifies the long-term factor of safety which must be achieved for each backfilled area. It does not specify the level of detail of analysis to be completed for every situation within the permit area. When determining the proper method of analysis for the stability of a postmining slope, the operator and the regulatory authority should consider all the conditions surrounding the structure, with particular attention given to foundation conditions and the presence of ground water.

Another commenter stated that there are local conditions where the undisturbed slope may not have had a 1.3 static safety factor prior to mining. For these situations, the commenter continued, the operator should not be required to have slopes more stable than naturally occurring surrounding slopes and that the operator should be able to document them and then have the regulatory authority approve a lesser factor of safety.

The commenter has described a situation that may be fairly common in steep slope coal mining country. However, OSM believes that the 1.3 safety factor is appropriate to meet the stability requirements of the Act in Sections 515 (b)(3) and (b)(4) and 515(d)(2). The basis for establishing the 1.3 safety factor is discussed in the preamble to the previous rules at 44 FR 15228 (March 13, 1979). OSM believes those reasons are still valid and, therefore, this rule will retain the 1.3 safety factor for the backfilled and graded area.

Final § 816.102(a)(4) states that the disturbed area must be backfilled and graded to minimize erosion and water pollution both on and off the site. This provision is derived from proposed § 816.102(b)(2)(iii), which stated that the spoil must be backfilled and graded to minimize disturbance of the hydrologic balance both on and off the site. The change was made to make the standard more applicable to reclamation operations.

Two commenters stated that the provision to minimize disturbance of the hydrologic balance in proposed Paragraph (b)(2)(iii) was redundant and that it was adequately covered elsewhere in the proposed rules. One commenter suggested using the phrase "prevent slides, erosion and water pollution" in place of the phrase "minimize disturbance of the hydrologic balance". This change, the commenter contended, would make the rules consistent with Section 515(b)(3) of the Act.

OSM agrees that the phrase in proposed § 816.102(b)(2)(iii) repeated the language of § 816.41(a) on minimizing the disturbance to the hydrologic balance and, therefore, does not need repeating. The phrase "prevent slides" has been added to final § 816.102(a)(3) in response to the comment. The remaining segment of the suggested phrase has been added to § 816.102(a)(4), with the substitution of "minimize" for "prevent". Although the commenter believed the latter term would make the rule consistent with Section 515(b)(3) of the Act, the phrase is used in the Act only with respect to the thick-overburden condition (to which proposed § 816.102(b)(2)(iii) would also have applied). OSM believes this performance standard should apply to all backfilling and grading operations in order to ensure that the standards of Section 515 (b)(4) and (b)(21) of the Act are met. Section 515(b)(4) requires all operations to stabilize and protect all surface areas, including the backfilled area, to control erosion and attendant air and water pollution. Section 515(b)(21) requires the operator to protect offsite areas from slides or damage during the operation. To provide the protection cited in the Act, OSM has clarified final § 816.102(a)(4) to require that the disturbed areas be backfilled and graded so that erosion and water pollution will be minimized. The goal of the Act is to minimize these conditions, so that language is used in the final provision.

Final § 816.102(a)(5) states that the disturbed areas shall be backfilled and graded to support the approved postmining land use and is the same as proposed § 816.102(b)(2)(iv). No substantive comments were received concerning this provision.

Section 816.102(b) [Proposed § 816.102(b)(1)]

Final § 816.102(b) states that the spoil, except excess spoil disposed of in accordance with §§ 816.71–816.74, must be returned to the mined-out area. This provision was proposed as § 816.102(b)(1), which stated that the spoil must be retained in the mined-out area unless disposal elsewhere in the permit area is approved. The rule has been changed to specifically identify the section for disposal of excess spoil and to replace the phrase "retained in" with "returned to" in response to comments.

Two commenters wanted the term "mined-out area" defined. One commenter pointed out that the mined-out area for underground mines could be either the mine workings or the surface area overlying them. The commenter further suggested that instead of using the phrase "mined-out area," OSM should require the spoil to be retained in the "area where overburden has been removed."

OSM has decided not to define the phrase "mined-out area" in the final rules. OSM believes the term "mined-out area" is sufficiently descriptive for surface mining activities to mean the area of the mining pit where the coal has been removed. Additional discussion of the meaning of this term in relation to underground mines is included in the preamble to §817.102 covering underground mining activities.

Several commenters wanted to allow disposal of spoil anywhere in the permit area instead of being limited to the mined-out area and suggested deleting the phase requiring approval to dispose of spoil elsewhere in the permit area. They believed the mined-out area was too restrictive and that this limited the flexibility of the operator. They pointed out that spoil from first cuts of surface mines and faceup areas of underground mines cannot be retained in the mined-out area because there is no mined area at that time. The commenters suggested requiring only that the spoil be retained

VOL 48 ISS 101 MY 24 1983 UMI

in a permitted area. They argued this would give the operator flexibility to place the spoil on the downslope in nonsteep slope areas, along the contour, or anywhere else in the permit area in keeping with "common practice." Environmental protection would be ensured, they argued, because any spoil disposal area would have to be permitted.

OSM has not adopted the proposed provisions specifically requiring the regulatory authority to approve the location for disposal of spoil within the permit area which is outside the mined-out area. A specific approval process is unnecessary because the rule prohibits the indiscriminate placement of spoil in the permit area since upon permanent placement it must either be returned to the mined-out area, disposed of as excess spoil, or placed in accordance with § 816.102(d). Also, the reclamation plan prepared in accordance with § 780.18(a)(3), which requires a plan for backfilling, would show the anticipated locations for the disposal of spoil and must be approved by the regulatory authority. The approval process for placement and disposal of spoil is a part of the total process of reviewing and approving a permit application for a surface coal mining operation under 30 CFR Parts 780 and 784 and would be covered by these parts.

The commenters are correct in stating that spoil generated by the first cut of an area mine or during faceup operations of an underground mine may be temporarily placed in the permit area on a surface outside the precise area from which the spoil was removed. Ultimately, however, it must be returned to the area from which it was removed or disposed of as excess spoil. Thus, the phrase "returned to" rather than "retained in" the minded-out area is used in final § 816.102(b).

One commenters advocated adding the language "in accordance with the approved postmining land use in the reclamation plan" after introducing backfilling and grading at the beginning of proposed § 816.102(b)(2). By using this language, the commenter believed the regulatory authority would be able to ensure that the procedures to eliminate highwalls, spoil piles, and depressions were presented to its satisfaction and the operator had an approved set of plans to follow during the reclamation operation. Also, the inspector would then have a set of plans against which to check actual performance.

The final rule has not been changed from the proposed rule because final § 816.102(a)(5) states that the area must be backfilled and graded to support the approved postmining land use. Since mining cannot begin without an approved permit, it is not necessary to add the language suggested by the commenter.

Section 816.102(c) [Proposed § 816.102(b)(3)]

Final § 816.102(c) was proposed as § 816.102(b)(3) and states that spoil and waste materials must be compacted where advisable to ensure stability or to prevent leaching of toxic material. Because of the reorganization of the section and because waste materials may be used for backfilling under § 816.102(e), the term "spoil and waste materials" is added as the subject of the sentence. The term "toxic material" is added as a phrase modifying "leaching," in keeping with the language of Section 515(b)(3) of the Act. No comments were received on this provision.

Section 816.102(d) [Proposed § 816.102(c)]

Final § 816.102(d) allows spoil to be placed on the area outside the mined-out area in nonsteep slope areas in order to restore the AOC by blending the spoil into the surrounding terrain, if the following three requirements are met: (1) All vegetation and organic material must be removed from the area, (2) topsoil must be treated in accordance with § 816.22, and (3) spoil must be backfilled and graded in accordance with § 816.102. OSM has replaced the proposed phrase "active mine working" with the phrase "mined-out area" and has made an editorial change to § 816.102(d) to clarify that the provision provides for requirements for the area outside the mined-out area in nonsteep slope areas.

The comments generally supported the proposal to allow spoil to be placed on the area outside the mined-out area in nonsteep slope areas for blending purposes. One commenter asserted that spoil from the first cuts on area mines should not be treated as excess spoil, but gave no justification for this position. Spoil from the first cut or any other cut may be treated as excess spoil if it is not needed to achieve AOC. One commenter proposed allowing spoil to be placed in draws and valleys where slopes are too steep for safe topsoil removal. The commenter seemed to indicate that rather than removing the topsoil, a topsoil substitute would be used in the area to adequately facilitate quality reclamation. The commenter offered no background information or justification for this procedure.

The provision allowing blending of spoil has been retained in the final rule. OSM does not intend that there be a difference between the treatment of areas used for blending and the areas mined for coal. The environmental protection performance standards in Section 515 of the Act apply to the blended area to the same extent as they do to other disturbed areas. Paragraph (d)(3) states that the blended area must be backfilled and graded in accordance with this section; therefore, the blended area must be reclaimed to the same performance standards as other disturbed areas.

Another commenter advocated adding a fourth requirement in Paragraph (d) to state that the blended areas must meet all the other performance standards of Part 816. Such a provision is unnecessary since § 816.102(d)(3) makes all of the backfilling and grading provisions mandatory and the rest of the provisions of Part 816 will apply where relevant.

One commenter contended it was unclear how the regulatory authority and the mine operator would distinguish between material used for blending and excess overburden [excess spoil]. The commenter asserted that under the previous rules, excess overburden [excess spoil] was any material placed outside the active mine workings. The commenter concluded by saying that OSM should discuss methods of making the distinction in this preamble to the final rules.

As previously discussed, OSM is changing the definition of excess spoil to mean material not required to achieve AOC that is disposed of outside the mined-out area but not including material used in blending under this section. The distinction between the applicability of the excess spoil rules and this rule depends upon whether the material is being used to achieve AOC. If the spoil used for blending the mined-out area into the surrounding terrain is used to achieve AOC, it may be so placed in accordance with § 816.102(d). If it is not used to achieve AOC, it is excess spoil to which the provisions of § 816.71 apply. It is only in nonsteep slope areas that a distinction needs to be made between material used for blending and that placed in an excess spoil fill. In steep slope areas, all spoil disposed of outside the mined-out area requires approval according to the provisions of § 816.71.

One commenter believed that the requirement to remove all vegetative and organic material from the area to be used for blending is too restrictive, especially if the topsoil has already been removed from the area. The commenter believed early successional herbaceous and/or shrubby species

should not be regrubbed but that larger trees should be removed.

The commenter did not explain why the delay between removing topsoil and placing spoil on the area would be long enough to allow reestablishment of vegetation. In fact, allowing such a long time to elapse after topsoil removal could likely cause increased erosion. The provison has not been changed in the final rule and the requirement to remove all vegetation and organic material applies to an area whether it has been grubbed once or not. Clearing, grubbing, and removing the topsoil should be done just prior to placing spoil over the area to prevent erosion and regrowth of vegetation. The preparation and reclamation of areas outside the mined-out area used for placement of spoil should follow the same process as is used in the areas from which the overburden and coal is removed and where spoil is normally placed.

Section 816.102(e) [Proposed §816.102(d)]

Section 816.102(e) allows disposal of coal processing waste and underground development waste in the mined-out area if it is done in accordance with §§ 816.81 and 816.83, except that a long-term static safety factor of 1.3 rather than 1.5 must be achieved. The term "mined-out" is substituted for the word "backfilled" in the final rule to accurately describe the area suitable for disposal of such waste materials. No changes were made to the paragraph as a result of comments.

Section 816.102(d) was supported by industry commenters who believed coal processing waste and underground development waste could be safely placed in the mined-out area without harm to the hydrologic regime. The proposal was opposed by commenters who believed that OSM was allowing waste in the mined-out area without adequate regulation, which might result in numerous and serious problems. One of the commenters continued that by deleting the previous 4-foot-cover requirement, OSM would be seriously deficient in meeting its responsibility to establish minimum national environmental protection performance standards.

OSM does not believe it is necessary to include additional design criteria, such as the previous 4-foot-cover requirement for acid- and toxic-forming materials in this section. That provision was suspended pending rulemaking to allow treatment of those materials as an alternative to covering them (47 FR 67943, November 27, 1979).

Referencing the coal mine waste disposal performance standards of §§ 816.81 and 816.83 provides the necessary environmental protection requirements for placing coal processing waste and underground development waste in the mined-out area. In addition, the provision allowing disposal of waste in the mined-out area does not waive any other applicable requirements, such as those pertaining to the protection of the hydrologic balance and controlling drainage from acid- and toxic-forming materials. Thus, there is no basis for the assertion that the provisions allows for waste disposal without adequate regulation.

One commenter stated that by allowing coal waste in the mined-out area, OSM would be increasing the possibility of acid mine drainage and the release of toxic metals. OSM is aware that there is the possibility of problems caused by the disposal of coal mine waste in mined-out areas. However, this potential is no greater, and may be less than, disposal in any other area. In fact, this method can be the most environmentally desirable approach provided there is enough space and suitable nontoxic overburden to cover both the wastes and any toxic material from the mine. With proper burial and treatment, there should be no long-term problems with placing coal waste in mined-out areas.

Another commenter stated that because of the potential fire hazard in coal processing refuse, it must be placed no less than 10 feet from a coal seam and isolated from the seam with a noncombustible barrier. The commenter continued that if more than one coal seam is exposed in the highwall, the barrier must be the length and height of the highwall. Also the material must have 90-percent Proctor compaction. In addition, the commenter said that because of changes in drainage requirements, waste should be eliminated from fill, but that if it was to be allowed, impermeable material must be used as a barrier to isolate the refuse from the water-drainage areas.

OSM does not believe it is necessary or appropriate to establish specific design criteria, as proposed by the commenter. Incorporation in § 816.102(e) of OSM's revised rules on coal processing waste should alleviate these concerns. A full discussion on the treatment of coal processing waste will be contained in the preamble to the revised coal mine waste disposal rules, §§ 816.81–816.89. Those rules will incorporate the rules of the U.S. Mine Safety and Health Administration, 30 CFR 77.214, which require clay or inert material to be placed between new refuse piles and old refuse piles or exposed coal beds. Also, 30 CFR 77.215 specifies the compaction requirements to minimize air and water infiltration into refuse piles and reduce the possibility of combustion (OSM's proposed rules at 47 FR 26602–26603, June 18, 1982). For contour suface mining situations, it has been recommended that the waste be encapsulated by 3 feet of impermeable material at the base of the cut (U.S. Environmental Protection Agency, 1973, pp. 79–80). According to another article, on fires in coal processing waste, burning refuse has been extinguished by sealing and smothering with 2 feet of compacted clay (U.S. Mining Enforcement and Safety Administration, 1975, p. 7.15). OSM has not been able to locate references that show it is necessary to isolate coal processing waste from a coal seam by a distance of 10 feet, or, for more than one coal seam, that the barrier must be the length and height of the highwall as advocated by the commenter. By adhering to the above-cited rules, coal processing can be successfully disposed of in backfilled areas.

One commenter suggested that if it was allowable to mix the waste throughout the backfilled spoil the results might be better than if the waste was in flat, compacted layers, as long as the hydrologic regime is not significantly changed in the area. Another commenter believed there would be no problem in placing waste materials in mined-out areas as long as the waste is sufficiently covered with 4 or more feet of overburden or topsoil.

The final rules do not prevent coal processing wastes from being mixed with the overburden material if the performance standards are met. This is one factor that could be considered during the design of a backfill area containing coal waste.

A State regulatory authority explained that under its program when waste material is placed in a backfilled area, the area is treated as a waste structure and must be designed to a 1.5 safety factor. It stated that with a 1.3 safety factor, the operator will need to make a greater demonstration of stability and that there will need to be a more stringent review by the regulatory authority.

A State regulatory authority could adopt a 1.5 static safety factor for such situations. However, OSM believes that a 1.3 static safety factor is adequate. The mere characterization of a material as waste does not make it less stable than other materials not so classified. The specific properties of the material, such as water content, particle size, coefficient of friction, and others, must

VOL 48 ISS 101 MAY 24 1983 UMI

be accounted for in achieving fill stability. If the required static safety factor can be achieved, it is irrelevant for stability purposes that waste is included in the backfill. In addition, OSM believes that a 1.3 static safety factor provides the necessary level of confidence because, in general, backfilling occurs on solid benches or mining-pit areas for which the foundation characteristics have been reasonably determined. Furthermore, a State has the prerogative of setting more stringent criteria for the disposal of coal waste than the performance standards published by OSM.

One commenter proposed deleting the references in § 816.102(e) to §§ 816.81 and 816.83 and the 1.3 long-term static safety factor and replacing them with a reference to the hydrologic-balance rules. The commenter expressed the need for giving the design professional more latitude. Further, the commenters contended that the rules should address backfilling in such a manner as to prevent detrimental impacts to vegetation and water quality and added that a reference to §§ 816.41 and 816.48 would be more appropriate.

The language of the proposed paragraph has not been changed. OSM believes the reference to the coal mine waste rules is appropriate to ensure the proper disposal of coal waste. Reference to the coal waste rules, moreover, does not waive the general requirements for protection of the hydrologic balance.

Section 816.102(f) [Proposed § 816.102(e)]

Final § 816.102(f) contains the requirements for covering or treating exposed coal seams, acid- and toxic-forming materials, and combustible materials to control the impact on surface and ground water, to prevent sustained combustion, and to minimize adverse effects on plant growth and land use. After evaluating the comments, OSM has made no substantive changes to the proposed rules except to clarify that the "land use" referenced in the proposal is the approved postmining land use.

One commenter supported OSM's proposed deletion of the 4-foot-cover requirement for acid- and toxic-forming materials from the previous rules and replacement with a provision to either treat or bury these materials. The commenter continued that this provides the operator with a heretofore unavailable option for disposing of these materials because some spoils do not require 4 feet of cover and treatment can be more economical and adequate than coverage under such conditions.

Two commenters advocated that OSM retain the minimum 4-foot-cover requirement for acid- and toxic-forming material. They believed that without a design criterion, the term "adequate" in § 816.102(f) would lead to arguments between the regulatory authority and the operators as to how much cover was adequate. Also, they believed the changed requirements would require more effort in the review of the design for the cover. The commenters concluded that the regulatory authority needs to be as certain as possible about adequacy of cover because if the cover fails, the operator may need to redisturb additional areas to borrow materials to cover the toxic materials properly.

OSM is aware of the many potential problems that attend the proper disposal of toxic materials. However, a national standard for cover thickness is not the solution to these problems. Instead, the regulatory authority should set whatever standards, specific or otherwise, which provide the best solution within the State. The problems of interpretation will be avoided by allowing the State regulatory authorities to set and explain standards designed for local conditions. These standards must be based on the national performance standard requiring successful covering or treatment in accordance with the provisions of § 816.102(f).

One commenter indicated that problems such as inadequate rooting depth for plant growth and contamination and damage to the hydrologic balance would be caused by removing the 4-foot-depth requirement. The commenter stated that OSM provided no analysis, data, or technical literature to support the deletion of the requirement. Also, the commenter pointed out that one study (Murray, 1978) recommended that in Appalachia, toxic spoil be covered with 5 feet of soil.

In one respect, this comment actually supports OSM's new rule. The commenter asserts that some areas need 5 feet of cover. In such situations, OSM would not be adequately protecting the environment by specifying only 4 feet as a national standard.

Also, the above-referenced document points out that the characteristics of the cover material may cause burial depth to vary from place to place and region to region. In a study on acid formation from a restored refuse pile, no significant variation in acid production resulted with a cover of 1 foot, 2 feet, or 3 feet of soil (Murray, 1978, p. 321). Since the proper burial depth for acid- and toxic-forming material will vary in different locations, OSM will rely on regulatory authorities to ensure that the performance standard is met. Some considerations for establishing the depth of cover are the approximate rooting depth for the plants, the depth needed to place the refuse below the zone of significant oxidation (Murray, 1978, p. 140), the difficulty of placing the cover material in layers, and the erosion potential of the site. In addition, OSM believes that treatment of acid- and toxic-forming materials or a combination of treatment and cover may, in some situations, be a more effective method of eliminating the problem. Therefore, the final rule allows this as an alternative to covering with nontoxic material.

Section 816.102(g) [Proposed § 816.102(f)]

Cut-and-fill terraces are allowed by final § 816.102(g) where they are compatible with the approved postmining land use and are needed to conserve moisture, ensure stability, and control erosion or where specialized grading, foundation conditions, or roads are required. The proposed rule has been changed as a result of a commenter's suggestion to clarify that the regulatory authority must approve cut-and-fill terraces.

Mixed comments were received on the proposed revision of the cut-and-fill terrace provisions. Commenters supporting revision of the rules cited increased operator discretion in constructing the width of the terraces and no foreseeable impacts from wider terraces as long as the fill material is retained on the solid bench. One of the commenters recommended that the rule state that the regulatory authority must approve the cut-and-fill terraces. Those commenters in opposition to the changes said that the change is no more than an attempt to defeat the AOC requirements and that OSM has established a major loophole in the AOC requirements. The commenters believed that the only way to remedy the problem is to return to the design standards of the previous rule.

Terraces are an acceptable grading technique for achieving the surface configuration after a mining operation. They are specifically authorized by the definition of AOC in Section 701(2) of the Act as long as "the reclaimed area, including any terracing or access roads, closely resembles the general surface configuration of the land prior to mining and blends into and complements the drainage pattern of the surrounding terrain * * *." At the suggestion of a commenter, the proposed rule has been changed to show that the regulatory authority may approve cut-and-fill terraces. The final rule clarifies that the

regulatory authority will review the terrace design for meeting the objectives of the approved postmining land use. Regulatory authority approval of cut-and-fill terraces shall prevent potential abuse. Thus, additional design standards are not necessary for proper execution of the provision. Terraces are standard soil-conservation practices for controlling the runoff of water and reducing the soil loss caused by erosion.

For terraces to be most effective in reducing sheet and rill erosion and retaining runoff in areas of inadequate rainfall, the terrace design must follow accepted engineering practices including considering the specific conditions of the site. Terrace design involves selecting the proper spacing and location of the terraces and the design of the channel with adequate capacity to carry the runoff from the land area above the terrace. In determining the physical features of terraces, the operator and the reviewing officials should consider such soil characteristics as infiltration and water-holding capacity, cropping and soil-management practices, and climate, which includes intensity, duration, and distribution of precipitation (Schwab and others, 1966, pp. 224–248). The necessity for site-specific design of terraces was emphasized for surface mining operations in arid and semiarid regions of the western U.S. where terraces are used for erosion control and moisture conservation. Some of the terraces in those regions are designed to retain all of the onsite precipitation. (Verma and Thames, 1978, pp. 401–402).

One commenter remarked that if terraces are wider than 20 feet; which was not allowed in previous rules, it is harder to stablize the backfill. No additional clarification of the statement was given by the commenter. OSM believes that properly designed terraces using accepted engineering practices could enhance the stability of the disturbed area.

Another commenter believed that the qualifiers in the provisions for cut-and-fill terraces set requirements that seem to discourage the use of agricultural terraces. The provision of special concern was that terraces had to be compatible with the approved postmining land use and that their width had to be adequate to ensure the safety, stability, and erosion control of the postmining land-use plan. The commenter wanted the section redrafted to encourage the use of contour and level bench terraces on reclaimed lands to facilitate sediment control and successful revegetation. The commenter suggested using terraces for enhancing the value of reclaimed areas for agricultural lands, but added that agricultural terraces should not be used in lieu of reducing postmining slopes to at least premining slope conditions.

The language in the final rule does not discourage agricultural use of reclaimed land. Terraces are a physical feature that could be compatible with various postmining land uses, including agriculture. They should be identified in the land-use plan and approved by the regulatory authority. An agricultural land use could be approved just as could any other postmining land use.

Section 816.102(h) [Proposed § 816.102(g)]

Final § 816.102(h) states that small depressions may be constructed if they are needed to retain moisture, minimize erosion, create and enhance wildlife habitat, or assist revegetation. The creation and enhancement of wildlife habitat was not included in the proposed rule.

One commenter advocated constructing small depressions to create and enhance wildlife habitat. It was suggested that this new use for small depressions be added to proposed § 816.102(g). OSM has accepted the comment that benefiting wildlife is a reasonable use of small depressions. Section 515(b)(3) of the Act allows small depressions as authorized pursuant to the Act. Section 515(b)(24) of the Act requires fish, wildlife, and related environmental values to be enhanced where practicable. OSM believes small depressions could, in certain cases, be a practicable means of benefiting wildlife and increasing wildlife habitat. The final rule reflects this position.

Another commenter described using depressions as a means of requiring less backfilling in the final cut of an area mine. A depression would be created between the sloped highwall and the last spoil ridge which would be terraced. The depression would undoubtedly collect water during some periods of the year. However, the Act, in section 515(b)(3), does not allow depressions to circumvent the AOC restoration requirements. Also, the depressions described by the commenter would not qualify as small depressions under § 816.102(h). Depressions cannot substitute for fully backfilling the mining pit. Congress intended that depressions that would collect and store water be barred from the surface area unless permanent impoundments are approved (Senate Report 95–128, 95th Congress, 1st Session, 1977, p. 99). Therefore, the depressions described by the commenter are not allowable.

Section 816.102(i) [Proposed § 816.102(h)]

Permanent impoundments on backfilled areas may be approved according to final § 816.102(i) if they meet the requirements of §§ 816.49 and 816.56 and if they are suitable for the approved postmining land use. No changes in the rule resulted from OSM's evaluation of comments; the only change will be to note the proper reference for impoundments, §§ 816.49 and 816.56. A commenter stated that construction of impoundments should be forbidden in overburden which contains high concentrations of sulfur or iron because impoundments in these areas will increase the potential for acid mine drainage. The commenter also stated that OSM has not addressed how this rule will affect the stability of the backfilled and graded spoil. Section 515(b)(8) of the Act provides performance standards for permanent water impoundments. That section requires that water impoundments not degrade the water quality below established water-quality standards. Under § 816.102(i), the water impoundments must be designed and constructed according to the provisions of § 816.49, which considers the quality of water and the stability of the structure as part of the design process. Since properly designed impoundments may be authorized in the approved mining and reclamation plan and permit, there is no need to duplicate those provisions as part of this rulemaking. Properly designed impoundments will not increase the potential for acid mine drainage nor decrease the stability of the backfill. The impoundment should not affect the stability of the backfilled area since the operator must achieve a static safety factor of 1.3 for the backfilled area, and the static safety factor for the impoundment must comply with the requirements of § 816.49. The permit review process will allow the regulatory authority to determine the feasibility of impoundments.

Proposed § 816.102(i)

Proposed § 816.102(i), which stated that overland and shallow ground-water flow from undisturbed areas and flow in ephemeral streams must be controlled by diversions and other water-control measures in accordance with § 816.41(f), has not been adopted. The provision concerning ground-water flow is not included in the final rules because all aspects of backfilling and grading are subject to the hydrologic-balance provisions of §§ 816.41–816.46. It was a redundant provision since it merely

VOL 48 ISS 101 MAY 24 1983 UMI

referred the operator to the appropriate section.

A commenter wanted the provision on controlling overland and shallow ground-water flow in proposed § 816.102(i) removed from the final rule because existing § 816.43 would have been removed under proposed OSM rule changes. Section 816.43 was deleted from the proposed hydrology rules published June 25, 1982 (47 FR 27712), but the requirements of that section were to be incorporated in proposed § 816.41(f). Subsequent to publication of those proposed rules, the provisions on controlling overland and shallow ground-water flow are returned to § 816.43 and the reference to them in § 816.102 is not needed.

Section 816.102(j)

Final § 816.102(j) is unchanged from the proposed rule. This section states that preparation of final-graded surfaces must be conducted in a manner that minimizes erosion and provides a surface for replacement of topsoil that will minimize slippage. No comments were received on the provision. For further explanation of this provision, see the preamble to the proposed rule (47 FR 26763, June 21, 1982).

Section 816.102(k) [Proposed § 816.102(a)]

Final § 816.102(k) states that the postmining slope may vary from AOC under certain conditions. These conditions are limited to when the standards for thin overburden in § 816.104 are met (§ 816.102(k)(1)); the standards for thick overburden in § 816.105 are met (§ 816.102(k)(2)); or when approval is obtained for any of the following situations—mountaintop removal in accordance with, a variance from 30 CFR 785.14 AOC requirements (in accordance with § 785.16, or incomplete elimination of highwalls in previously mined areas in accordance with § 816.108 (§§ 816.102(k)(3)(i), (k)(3)(ii), and (k)(3)(iii), respectively). Changes made to the proposed provisions included adding cross references where appropriate and clarifying some of the provisions of the proposed rule. Although the thick-overburden situation has been included as an exception to the AOC-restoration requirement, the exception is allowed only after AOC has been restored.

Proposed § 816.102(a)(3) would have required the postmining slopes to be returned to AOC except when a variance was obtained from the regulatory authority for mountaintop removal, alternative postmining land use or remining. For the final rules, OSM has replaced the word " variance" with "approval" because the word "approval" more accurately describes the action of the regulatory authority during the permitting process with regard to mountaintop removal and incomplete elimination of highwalls. Not requiring a return to AOC for alternative postmining land uses under § 785.16 is a variance process that is referred to as such in final § 816.102(k)(3)(ii).

One commenter believed that proposed § 816.102(a)(3)(ii) was totally inadequate in the treatment of variances from the AOC requirement. The commenter asserted that since there is little opportunity for operators to upgrade land-use classification as would be required by proposed § 816.133(d), the postmining surface contour would have to be restored to AOC and consequently the operator would not be able to realize some environmental improvements on the land surface. The commenter provided examples of such environmental improvements as elimination of steep slopes, reduction of sedimentation, and improvement in grazing and wildlife habitat. At the same time, the commenter felt that a cost savings could be realized through efficient earthwork design. The commenter believed that the rules should not ignore these possibilities and that requiring return to AOC was too great a restriction.

Returning the postmining land surface to AOC is generally required by Section 515(b)(3) of the Act, which is the basis for the backfilling and grading rules. The Act does not allow a general variance from the AOC-restoration requirement. The provisions for obtaining a variance from the requirements to restore the land to AOC, which were proposed in §§ 785.16 and 816.133(d) (47 FR 16152, April 14, 1982), must satisfy the conditions of Section 515(e) of the Act.

Section 785.16 contains the permitting procedures for obtaining a variance from AOC requirements, and proposed § 816.133(d) contains the performance standards for the variance from AOC for an alternative postmining land use. Since final revisions to §§ 785.16 and 816.133(d) are in another rulemaking, there is no need in this preamble for a detailed discussion of variance procedures except for the reference to § 785.16 in § 816.102(k)(3)(ii). It is sufficient to note that in some situations the performance standards in § 816.133(d) would allow many of the improvements cited by the commenter.

A commenter suggested that when the final rules are written, the land-use variance provision of § 816.102(k)(3)(ii) should reference § 816.133(d) as an aid to the reader. OSM has retained the reference to the permit application process in § 785.16 in the final provision of § 816.102(k)(3)(ii). OSM believes § 785.16 is the proper cross reference because that section includes the permit application process for obtaining a variance from AOC for the postmining land use. The phrase "land-use variances" which was proposed to introduce the paragraph has been replaced by "a variance from approximate original contour requirements." This phrase is more in keeping with §§ 785.16 and 816.133(d).

Another commenter asserted that hill-and-depression topography is the result of backfilling and grading the final-cut area of an area mine. The commenter did not relate how the postmining surface contour would be different from the premining surface contour or why such a contour would not necessarily satisfy the AOC-restoration requirement. In response, it is possible for hill-and-depression topography to meet AOC requirements, depending on the premining topography. The regulatory authority would determine during the review and approval process of the permit if the proposed topography would meet AOC requirements.

An exception from the requirement to return to AOC for those situations in which the incomplete elimination of highwalls is allowed in previously mined areas is allowed by § 816.102(k)(3)(iii). A commenter concurred with the variance from AOC for remining of previously mined areas but, without any explanation, did not agree with allowing a variance from elimination of the highwall. Another commenter believed that the rule should include a reference to the rules on remining. OSM agrees with the latter comment, and the final rule will include a reference to § 816.107(e). If proposed § 816.106, as set forth in OSM's "Final Environmental Impact Statement OSM-EIS-1: Supplement" is adopted, appropriate conforming amendents will be adopted.

Previous Section 816.103 Backfilling and grading: Covering coal and acid- and toxic-forming materials

The preamble for the proposed rule discussed moving the requirements for this section to proposed § 816.102(e), and the reasons were outlined at 47 FR 26763–27674 (June 21, 1982). OSM received no comments on this proposal; therefore, § 816.103 will be deleted in the final rule and its essential provisions transferred to final § 816.102(f) as discussed above.

Section 816.104 Backfilling and grading: Thin overburden

Proposed § 816.104 applied to thin-overburden situations where replacement of all spoil and waste materials in the permit area would be insufficient to restore the disturbed area to AOC. In addition, the proposed rule required the operator to "backfill, grade, and compact (where advisable)" those areas of thin overburden using all available spoil and waste materials to attain the lowest practicable grade but not more than the angle of repose and to meet the other requirements of § 816.102. The language of the proposed rule was the same as that of Section 515(b)(3) of the Act. The proposed rule was changed as a result of comments in order to specify more clearly which provisions of § 816.102 an operator must meet in thin-overburden conditions.

One commenter objected to using the term "insufficient" in describing the amount of spoil available to the operator to use in achieving AOC. The commenter believed that the term "insufficient" was unenforceable and provided too much discretion. The commenter asserted that such usage would require that regulatory authority would be required to develop specific guidelines for mining in thin-overburden areas. OSM disagrees with this comment. In a thin-overburden situation the operator must meet all of the performance standards, except for the AOC-restoration requirement. The operator must demonstrate in the permit application that there is insufficient material to return to AOC. With this demonstration, the regulatory authority will have an objective decision to make as to whether there is enough spoil to return to AOC. There are no unreasonable problems of discretion associated with the final rule. The final rule follows the thin-overburden language in the first proviso of section 515(b)(3) of the Act.

Two commentors pointed out some areas of confusion as to which provisions in § 816.102 apply to thin-overburden situations. The commenters were not sure which requirements in § 816.102 would be waived if insufficient spoil was available to the operator. As previously discussed, the only exception to the performance standards of the Act for thin-overburden conditions is the return to AOC provision. The rule that requires all available spoil and waste material be used to attain the lowest practicable grade but not to exceed the angle of repose. All of the provisions in § 816.102 apply to thin overburden except Paragraph (a)(1). The backfiling, grading, and compacting process is the same regardless of the thickness of the overburden above the coal. Therefore, the phrase "backfill, grade, and compact" has not been adopted from proposed § 816.104(a). Section 816.104(b) specifically addresses which backfilling and grading performance standards must be met when the overburden is thin. The final rule will show that the only requirement waived for thin-overburden situations is return to AOC.

In addition, one commenter wanted the rule to state that use of borrow areas is not intended for thin-overburden situations. The commenter indicated this could be accomplished by specifying that only spoil and waste materials generated from the mined-out areas would be used for backfilling and grading in § 816.104(a). Since return to AOC is not mandated, borrow areas are not required in thin-overburden situations to reach AOC.

In summary, the final rule for thin-overburden situations includes the same description of thin overburden as did the proposed rule, the phrase "backfill, grade and compact" has been deleted in § 816.104(a), and § 816.104(b) provides that thin overburden must meet the requirements of §§ 816.102(a)(2)–816.102(j). Except for these changes, the final rule is the same as the proposed rule, which is further explained in the preamble to the proposed rule (47 FR 26764, June 21, 1982).

Section 816.105 Backfilling and grading: Thick overburden

Proposed § 816.105 applied to thick-overburden situations where the volume of the spoil and other waste materials was more than sufficient to restore the disturbed area to AOC. In addition, the proposed rule required the operator to "backfill, grade, and compact (where advisable)" the excess overburden to attain the lowest practicable grade but not more than the angle of repose, meet the other requirements of § 816.102, and dispose of any excess spoil in accordance with §§816.71–816.74. The language of the proposed rule was the same as that of the second proviso of Section 515(b)(3) of the Act. The final rule has been changed as a result of evaluation of comments to specify more clearly the provisions of § 816.102 that an operator must meet for thick-overburden conditions.

One commenter objected to using the term "more than sufficient" to describe the amount of spoil available to the operator for achieving the AOC. The commenter believed it was unenforceable and provided too much discretion to use the term "more than sufficient". This would require the regulatory authority to develop specific guidelines for mining coal in a thick-overburden area, the commenter argued.

Another commenter wanted OSM to emphasize the exclusion of thick-overburden operations from the requirements of proposed § 816.102(a) by requiring that they meet the other requirements of proposed § 816.102(b).

In a thick-overburden situation the operator must meet all of the performance standards of the rules except that the operator, after achieving AOC, may exceed the AOC requirement. The amount of excess overburden is a site-specific condition and easily documented. Therefore, each permit application requesting consideration under this section should be evaluated by the regulatory authority. The final rule follows the thick-overburden language in Section 515(b)(3) of the Act and will retain the proposed description of thick overburden.

As discussed above, the only exception to the Act's performance standards for thick-overburden conditions operation is from the requirement to return to AOC. The Act replaces the AOC standards with a requirement that the operator, after achieving AOC, shall use the additional spoil to attain the lowest practicable grade but not exceeding the angle of repose. Thus, all of the provisions in § 816.102 would apply to thick overburden except Paragraph(a)(1). The backfilling, grading, and compacting process is the same regardless of the amount of overburden removed and backfilled, and therefore, those terms have not been adopted from proposed § 816.105(a). Section 816.105(b) specifically addresses the particular backfilling and grading performance standards which must be met.

One commenter was concerned that there be no prohibition in § 816.105 on disposing of excess spoil before the backfilling is completed to restore AOC. The commenter indicated that the amount of excess spoil is based on design estimates and is often disposed of before the backfilling operation is completed.

Section 816.105(c) refers to the provisions in §§816.71–816.74 for the disposal of excess spoil. Section 816.105(c) does not require excess spoil to be retained until backfilling is completed. Therefore, excess spoil may be disposed of anytime in the mining operation. However, adequate spoil must be available for backfilling to meet the AOC requirements.

In summary, the final rule for thick-overburden situations will include the same description of thick overburden as

VOL 48 ISS 101 MAY 24 1983 UMI

the proposed rule; the phrase "backfill, grade, and compact" has been deleted in § 816.105(a), and § 816.105(b) provides that in thick-overburden situations operators must meet the requirements of §§ 816.102(a)(2)–816.102(j). For editorial clarity, the word "use" will be the first word in § 816.105(a). For further explanation of this rule, see the preamble to the proposed rule (47 FR 26764, June 21, 1982).

Section 816.107 Backfilling and grading: Steep slopes

OSM proposed to transfer the requirements of §§ 826.11 and 826.12, the special backfilling and grading requirements for steep slope operations, from Part 826 to form a new § 816.107. The new section contains only the requirements needed for steep slopes and removes the repetition in the rules that was needed when Part 826 was a self-contained part. OSM received no comment on the proposed transfer, and § 816.107 will be adopted as proposed. For a complete explanation of this proposal, the reader is referred to the standards for the proposed rule (47 FR 26764, June 21, 1982).

New § 816.107(a) describes the conditions under which the steep slope rules apply. Section 816.107(b) prohibits placing the following materials on the downslope: spoil, waste materials of any type, debris and abandoned or disabled equipment. The reference to haul-road construction debris in the proposed rule has been changed in the final rule to include all debris, without specifying haul-road debris. Section 816.107(c) provides that land shall not be disturbed above the highwall except with the approval of the regulatory authority. Section 816.107(d) states the conditions under which woody material may be buried in the backfill. After considering the comments received on the steep slope provisions, OSM has decided to adopt the final rules as described above.

One additional consideration has arisen because of the removal of Part 826. Its removal has required the redesignation of § 816.12(b) as § 816.107(e). Section 816.107(e) states that the highwall does not have to be fully eliminated in contour-mining operations in steep slope areas that affect previously mined, unreclaimed lands if it is demonstrated that the volume of all reasonable available spoil is insufficient to completely backfill the highwall. The provision is the same as interim final § 826.12(b) published on November 12, 1982 (47 FR 51316) with appropriate changes in the references to backfilling and grading rules to conform with other changes adopted. For further information and discussion of comments relevant to this provision, see the interim final rule. If the June 25, 1982, proposed remaining rules (47 FR 27734) become final, § 816.107(e) may be incorporated in § 816.106.

Several commenters believed that the provisions in § 816.107(c) on disturbing land above the highwall were not completely consistent with Section 515(d)(3) of the Act. In explaining their rationale, two commenters wanted to replace "shall not" in the proposed rules with "may not" to repeat the exact language of the Act. Another commenter suggested changing the sentence from the negative to the positive by having the sentence read "[l]and above the highwall *may* be disturbed *if* the regulatory authority * * *" instead of "[l]and above the highwall *shall not* be disturbed *unless* the regulatory authority * * *." The commenter continued by stating that this change would allow the flexibility for steep slope mining that Congress intended when it wrote the Act.

Section 515(d)(3) of the Act provides that "[t]he operator may not disturb land above the top of the highwall unless the regulatory authority finds that such disturbance will facilitate compliance with the environmental protection standards applicable to steep slope operations." The phrase "may not" is used in this context to create a condition precedent to allowing disturbance above the highwall. Since such actions are not permitted until the proper finding has been made, OSM used the standard regulatory language for describing mandatory actions. OSM believes that substituting "shall not" for "may not" does not change congressional intent regarding disturbance above the highwall. Also, using a positive or negative sentence structure does not change the flexibility of the provision. The paragraph has not been changed; the operator will not be allowed to disturb land above the highwall unless permission is received from the regulatory authority after the proper finding is made.

It should noted that final § 816.107(c) neither supersedes nor waives the Mine Safety and Health Administration rule at 30 CFR 77.1001 which requires that loose hazardous material be stripped for a safe distance from the top of highwalls to protect miners from falling material hazards.

Two commenters believed that the provisions in § 816.107(d) should apply only to the prohibition of woody materials in the backfill area and not to any mulching provisions. They reasoned that the revegetation rules, §§ 816.111–816.116, would cover the mulching requirements and that the language in § 816.107(d) would be repetitive.

OSM has accepted these comments and revised proposed § 816.107(d) accordingly. Since the revegetation rules separately provide that the regulatory authority may require mulching where deemed necessary, similar language is not needed in § 816.107(d) to clarify that mulch may be used in steep slope areas.

Part 817—Permanent Program Performance Standards—Underground Mining Activities

The changes in proposed §§ 816.101–816.107 will also be made to the corresponding provisions of §§ 817.101–817.107 and will not be discussed any further under this portion of the preamble.

The discussion below refers only to specific comments received and changes made on requirements that pertain specifically to underground mining activities.

Section 817.102 Backfilling and grading: General requirements

The backfilling and grading requirements proposed for the surface effects of underground mining activities were the same as those proposed for surface mining activities, except that the nonapplicable exceptions to the requirement to restore AOC listed in § 816.102 were not proposed for Part 817 and a Paragraph (k) was added to consider the situation of settled, revegetated fills for underground mining activities. The rationale for proposed Paragraphs 817.102(a)–(j) is the same as that for proposed Paragraphs (a)–(j) of § 816.102. For comments which pertain to these sections, the reader is referred to the preamble for Part 816.

In the earlier discussion of § 816.102, it was noted that a commenter pointed out that the mined-out area for underground mines could be either the mine workings or the surface area overlying them. Because of the possible ambiguity, OSM has decided to use the term "mined-out surface area" in reference to underground mining activities. OSM believes the term is appropriate for underground mining activities because OSM's primary concern is the surface impacts incident to an underground coal mine rather than the underground workings. Therefore, these rules concern activities completed on surface areas such as faceup operations for underground coal mine development or other types of surface excavation incident to the underground mining activity.

Section 817.101(l) [Proposed § 817.102(k)]

OSM has added a new § 817.102(l) to provide flexibility for settled fills that have become stabilized and revegetated, as a result of the U.S. District Court remanding the rule requiring return to AOC for underground mines. *In re: Permanent Surface Mining Regulation Litigation*, No. 79–1144 (D.D.C. May 16, 1980) (Slip Op. at 17–18). For additional discussion of the reasons for the new paragraph, see the preamble for the proposed rules (47 FR 26765–26767 June 21, 1982).

Under final § 817.102(l), fills that are sufficiently stable and revegetated to the standards of the Act can remain in place if they meet the following four criteria: That the fill be composed only of spoil or non-acid or non-toxic-forming underground development waste Paragraph (1)(i)); that the spoil not be located so as to be detrimental to the environment, to the health and safety of the public, or to the approved postmining land use (Paragraph (1)(ii)); that the spoil also be stable as demonstrated by geotechnical analysis (Paragraph (1)(iii)); and that the fill be sufficiently vegetated to prevent erosion and contribution of suspended solids to streams from normal runoff (Paragraph (1)(iv)). In addition, the regulatory authority may decide to leave the spoil in place if more environmental harm or injury to the public health and safety would be caused by moving it (Paragraph (2)). Finally, the regulatory authority may require stabilization of the spoil if it does not meet the criteria of Paragraphs (l)(1)(i)–(l)(1)(iv).

Except for minor renumbering and as discussed below, the proposed rule was not changed as a result of consideration of comments received. OSM has added some clarifying language to the rule and also indicated that the spoil or underground development waste shall not be detrimental to the approved postmining land use.

Three commenters suggested alternative regulatory language to implement the District Court order to provide some flexibility for settled fills that have become stabilized and revegetated. *In re: Permanent Surface Mining Regulation Litigation*, No. 79–1144 (D.C.C. May 16, 1980) (Round II). They suggested replacing the term "fill" or its contents in Paragraph (l) with "area."

OSM will retain the proposed language in the final rule. In remanding the rule, the court used the term "fills," not "areas." This is significant since the plaintiffs (commenters here) had argued that stabilized and revegetated "areas" should not be required to be regraded. OSM believes the proper course is to use the term actually used by the court rather than a term that was not used even though it was brought to the attention of the court. Therefore, OSM is of the opinion that the court order was correctly interpreted in the proposed rule. For additional discussion of settled fills, see the preamble to the proposed rule (47 FR 26766, June 21, 1982).

Three commenters also suggested that proposed § 817.102(k)(l), which referred to non-toxic or non-acidic-forming underground development waste and proposed § 817.102(k)(l)(i), which referred to protection of the environment and public health and safety, be deleted from the rule. The rationale for this suggestion is that the court order included all types of fill material and did not exclude fills of toxic or acidic underground development waste from consideration as revegetated and stabilized. The commenters did not explain why proposed § 817.102(k)(l)(i) on protection of the environment and public health and safety should be deleted.

One commenter stated that the rule should not be limited to spoil or non-toxic or non-acidic-forming underground development waste because the court's opinion was not so limited. The court directed OSM to provide "some flexibility for settled fills * * *." The final rule provides such flexibility. The court did not direct OSM to adopt any specific regulatory language. After considering all the comments, past experience, the court's opinion, and all other relevant factors, OSM has determined that only fills composed of spoil or non-acid- and non-toxic-forming underground development waste should be allowed to remain without regrading.

Thus, the limitation has been retained in the final rule. Although the above environmental conditions were not discussed in the court's opinion, OSM believes these provisions are necessary to fully implement the environmental protection performance standards for underground mining. Section 516(b)(9) of the Act provides the authority to limit the possibility of acid and toxic drainage. Section 516(b)(8) of the Act provides the authority to eliminate conditions which constitute a hazard to the health and safety of the public.

Regarding proposed Paragraph (k)(3) (now the last sentence of (1)(2)), one commenter stated that if the spoil is detrimental to the environment or to the public health and safety, then the regulatory authority must require stabilization of the spoil. The proposed language gives the regulatory authority the discretion to require stabilization.

The change suggested by the commenter was not made for the final rule. OSM agrees that generally the spoil should be stabilized to prevent further adverse impacts resulting from the spoil. However, to make stabilization mandatory could, in certain situations, cause degradation of the spoil, which could cause more damage than the present conditions. The term "may" provides the regulatory authority the discretion to provide the best solution to a given situation and still retain the flexibility to specify the requirements for stabilization or relocation of the fill that best meet the site-specific conditions.

The same commenter believed that it was inappropriate in proposed § 816.102(k)(3) to refer to proposed § 817.102(k)(1)(i) on the detrimental aspects of the fill but instead should use the phrase "minimize adverse impacts to the environment and health and safety of the public."

The commenter provided no justification for this suggestion and OSM has not changed the language in the final rule. The language of final § 817.102(l)(1)(ii) that "waste shall not be located so as to be detrimental to the environment, to the health and safety of the public, or to the approved postmining land use" is a clearer and more enforceable performance standard than the suggested language to "minimize adverse impacts." Therefore, OSM has adopted the language as proposed.

Part 826—Special Permanent Program Performance Standards—Operations on Steep Slopes

The proposed rules indicated that Part 826, which applied to both surface and underground mining activities, would be removed from the rules and the provisions moved to §§816.107 and 817.107. The justification for this action was discussed in the preamble for the proposed rules (47 FR 267565, June 21, 1982) and the reader is referred to that preamble for more information. OSM received no comments on deleting Part 826, and the final rules reflect this change.

III. Procedural Matters

Executive Order 12291 and Regulatory Flexibility Act

The Department of the Interior (DOI) has examined these proposed rules according to the criteria of Executive Order 12291 (February 17, 1981). OSM has determined that these are not major rules and do not require a regulatory impact analysis because they will impose minor costs on the coal industry and coal consumers. In addition, the proposed rules emphasize the use of performance standards instead of design criteria, which will allow operators to utilize the most cost-effective means of achieving compliance.

The Department has also determined pursuant to the Regulatory Flexibility Act, 5 U.S.C 601 *et seq.*, that these rules will not have a significant economic impact on a substantial number of small entities. The regulatory authority will allow all operators adequate flexibility for regional conditions to be considered in backfilling and grading operations. This flexibility could result in cost savings for small operators in allowing for site-specific backfilling and grading operation design and in availing small operators of the opportunity to employ innovations in the design of backfilling and grading operations.

National Environmental Policy Act

OSM has analyzed the impacts of these final rules in the Final Environmental Impact Statement OSM EIS–1: Supplement according to Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2)(C)). The final supplement is available in OSM's Administrative Record in Room 5315, 1100 L Street, N.W., Washington, D.C., or by mail request to Mark Boster, Chief, Branch of Environmental Analysis, Room 134, Interior South Building, U.S. Department of the Interior, Washington, DC 20240. This preamble serves as the record of decision under NEPA. The final rule is different from the draft final rules published in Volume III of the final EIS in that two paragraphs have been reorganized and additional clarifying language has been added to the rule which does not change the findings of the EIS analysis. In addition, one sentence of § 816.107(d) in the final EIS relating to the distribution of woody material has not been included in the final rules. The removal of this sentence has no environmental effect because it would have been duplicative of a provision in the revegetation rules. Finally, until the adoption of §§ 816.106 and 817.106, final §§ 816.107(e) and 817.107(e) will reflect the substance of draft final §§ 816.106 and 817.106, as set forth in the FEIS, regarding contour remining on steep slopes. This was analyzed in the FEIS.

Paperwork Reduction Act

There are no information collection requirements established by these rules requiring approval of the Office of Management and Budget under 44 U.S.C. 3507 *et seq.*

Agency Approval

Section 516(a) of the Act requires that, with regard to rules directed toward the surface effects of underground mining, OSM must obtain written concurrence from the head of the department which administers the Federal Mine Safety and Health Act of 1977, the successor to the Federal Coal Mine Health and Safety Act of 1969. OSM has obtained the written concurrence of the Assistant Secretary for Mine Safety and Health, U.S. Department of Labor.

List of Subjects

30 CFR Part 816

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Surface mining.

30 CFR Part 817

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Surface mining, Underground mining.

30 CFR Part 826

Coal mining, Environmental protection, Reporting and recordkeeping requirements, Underground mining.

Accordingly, 30 CFR Parts 816, 817, and 826 are amended as set forth herein.

Dated: April 15, 1983.

William P. Pendley,

Acting Assistant Secretary, Energy and Minerals.

PART 816—PERMANENT PROGRAM PERFORMANCE STANDARDS—SURFACE MINING ACTIVITIES

§ 816.101 [Removed]

1. Part 816 is amended by removing § 816.101.

2. Section 816.102 is revised to read as follows:

§ 816.102 Backfilling and grading: General requirements.

(a) Disturbed areas shall be backfilled and graded to—

(1) Achieve the approximate original contour, except as provided in paragraph (k) of this section;

(2) Eliminate all highwalls, spoil piles, and depressions, except as provided in paragraph (h) (small depressions) and in paragraph (k)(3)(iii) (previously mined highwalls) of this section;

(3) Achieve a postmining slope that does not exceed either the angle of repose or such lesser slope as is necessary to achieve a minimum long-term static safety factor of 1.3 and to prevent slides;

(4) Minimize erosion and water pollution both on and off the site; and

(5) Support the approved postmining land use.

(b) Spoil, except excess spoil disposed of in accordance with §§816.71–816.74, shall be returned to the mined-out area.

(c) Spoil and waste materials shall be compacted where advisable to ensure stability or to prevent leaching of toxic materials.

(d) Spoil may be placed on the area outside the mined-out area in nonsteep slope areas to restore the approximate original contour by blending the spoil into the surrounding terrain if the following requirements are met:

(1) All vegetative and organic material shall be removed from the area.

(2) The topsoil on the area shall be removed, segregated, stored, and redistributed in accordance with §816.22.

(3) The spoil shall be backfilled and graded on the area in accordance with the requirements of this section.

(e) Disposal of coal processing waste and underground development waste in the mined-out area shall be in accordance with §§ 816.81 and 816.83, except that a long-term static safety factor of 1.3 shall be achieved.

(f) Exposed coal seams, acid- and toxic-forming materials, and combustible materials exposed, used, or produced during mining shall be adequately covered with nontoxic and noncombustible material, or treated, to control the impact on surface and ground water in accordance with § 816.41, to prevent sustained combustion, and to minimize adverse effects on plant growth and the approved postmining land use.

(g) Cut-and-fill terraces may be allowed by the regulatory authority where—

(1) Needed to conserve soil moisture, ensure stability, and control erosion on final-graded slopes, if the terraces are compatible with the approved postmining land use; or

(2) Specialized grading, foundation conditions, or roads are required for the approved postmining land use, in which case the final grading may include a terrace of adequate width to ensure the safety, stability, and erosion control necessary to implement the postmining land-use plan.

(h) Small depressions may be constructed if they are needed to retain moisture, minimize erosion, create and enhance wildlife habitat, or assist revegetation.

(i) Permanent impoundments may be approved if they meet the requirements of §§ 816.49 and 816.56 and if they are suitable for the approved postmining land use.

(j) Preparation of final-graded surfaces shall be conducted in a manner that minimizes erosion and provides a surface for replacement of topsoil that will minimize slippage.

(k) The postmining slope may vary from the approximate original contour when—

(1) The standards for thin overburden in §816.104 are met;

(2) The standards for thick overburden in §816.105 are met; or

(3) Approval is obtained from the regulatory authority for—

(i) Mountaintop removal operations in accordance with § 785.14 of this chapter;

(ii) A variance from approximate original contour requirements in accordance with § 785.16 of this chapter; or

(iii) Incomplete elimination of highwalls in previously mined areas in accordance with § 816.107(e).

§ 816.103 [Removed]

3. Part 816 is amended by removing § 816.103.

4. Section 816.104 is revised to read as follows:

§ 816.104 Backfilling and grading: Thin overburden.

In surface coal mining which is carried out at the same location over a substantial period of time where the operation transects the coal deposit and where the thickness of the coal deposit relative to the thickness of the overburden is large and where the operator demonstrates that the spoil and other waste materials available from the entire permit area are insufficient, giving due consideration to volumetric expansion, to restore the disturbed area to its approximate original contour, the operator shall, at a minimum—

(a) Use all available spoil and waste materials to attain the lowest practicable grade, but not more than the angle of repose; and

(b) Meet the requirements of §§ 816.102(a)(2)–816.102(j).

5. Section 816.105 is revised to read as follows:

§ 816.105 Backfilling and grading: Thick overburden.

In surface coal mining where the thickness of the overburden is large relative to the thickness of the coal deposit and where the operator demonstrates that the volume of the spoil and other waste materials is more than sufficient to restore the disturbed area to approximate original countour, the operator shall, at a minimum, after restoring to approximate original contour—

(a) Use the spoil and waste materials to attain the lowest practicable grade, but not more than the angle of repose;

(b) Meet the requirements of §§ 816.102(a)(2)–816.102(j); and

(c) Dispose of any excess spoil in accordance with §§ 816.71–816.74.

6. Section 816.107 is added to read as follows:

§ 816.107 Backfilling and grading: Steep slopes.

(a) Surface mining activities on steep slopes shall be conducted so as to meet the requirements of § 816.102, and the requirements of this section except where mining is conducted on flat or gently rolling terrain with an occasional steep slope through which the mining proceeds and leaves a plain or predominantly flat area or where operations are conducted in accordance with Part 824 of this chapter.

(b) The following materials shall not be placed on the downslope:

(1) Spoil.

(2) Waste materials of any type.

(3) Debris, including that from clearing and grubbing.

(4) Abandoned or disabled equipment.

(c) Land above the highwall shall not be disturbed unless the regulatory authority finds that this disturbance will facilitate compliance with the environmental protection standards of this subchapter and the disturbance is limited to that necessary to facilitate compliance.

(d) Woody materials shall not be buried in the backfilled area unless the regulatory authority determines that the proposed method for placing woody material within the backfill will not deteriorate the stable condition of the backfilled area.

(e) The disturbed area shall be backfilled and graded to comply with the provisions of § 816.102 to return the site to the approximate original contour and completely cover the highwall; *Provided, however,* that where contour-mining operations affect previously mined areas that were not reclaimed to the standards of this chapter and the volume of all reasonably available spoil is demonstrated in writing to the regulatory authority to be insufficient to completely backfill the highwall, the highwall shall be eliminated to the maximum extent technically practical in accordance with the following criteria:

(1) The person who conducts the surface coal mining and reclamation operation shall demonstrate to the regulatory authority that the fill, designed by a qualified registered professional engineer, has a minimum static safety factor for the stability of the backfill of at least 1.3.

(2) All spoil generated by the mining operation and other reasonably available spoil shall be used to backfill the area. Reasonably available spoil shall include spoil generated by the mining operation and other spoil located in the permit area that is accessible and available for use and that when rehandled will not cause a hazard to the public safety or significant damage to the environment.

(3) The backfill shall be graded to a slope which is compatible with the approved postmining land use and which provides adequate drainage and long-term stability.

(4) Any remnant of the highwall shall be stable and not pose a hazard to the public health and safety or to the environment.

(5) Spoil placed on the outslope during previous mining operations shall not be disturbed if such disturbances will cause instability of the remaining spoil or otherwise increase the hazard to the public health and safety or to the environment.

VOL 48 ISS 101 MAY 24 1983 UMI

PART 817—PERMANENT PROGRAM PERFORMANCE STANDARDS—UNDERGROUND MINING ACTIVITIES

§ 817.101 [Removed]

7. Part 817 is amended by removing § 817.101.

8. Section 817.102 is revised to read as follows:

§ 817.102 Backfilling and grading: General requirements.

(a) Disturbed areas shall be backfilled and graded to—

(1) Achieve the approximate original contour, except as provided in paragraph (k) of this section;

(2) Eliminate all highwalls, spoil piles, and depressions, except as provided in paragraph (h) (small depressions) and in paragraph (k)(2) (previously mined highwalls) of this section;

(3) Achieve a postmining slope that does not exceed either the angle of repose or such lesser slope as is necessary to achieve a minimum long-term static safety factor of 1.3 and to prevent slides;

(4) Minimize erosion and water pollution both on and off the site; and

(5) Support the approved postmining land use.

(b) Spoil, except as provided in paragraph (l) of this section, and except excess spoil disposed of in accordance with §§ 817.71–817.74, shall be returned to the mined-out surface area.

(c) Spoil and waste materials shall be compacted where advisable to ensure stability or to prevent leaching of toxic materials.

(d) Spoil may be placed on the area outside the mined-out surface area in nonsteep slope areas to restore the approximate original contour by blending the spoil into the surrounding terrain if the following requirements are met:

(1) All vegetative and organic materials shall be removed from the area.

(2) The topsoil on the area shall be removed, segregated, stored, and redistributed in accordance with § 817.22.

(3) The spoil shall be backfilled and graded on the area in accordance with the requirements of this section.

(e) Disposal of coal processing waste and underground development waste in the mined-out surface area shall be in accordance with §§ 817.81 and 817.83, except that a long-term static safety factor of 1.3 shall be achieved.

(f) Exposed coal seams, acid- and toxic-forming materials, and combustible materials exposed, used, or produced during mining shall be adequately covered with nontoxic and noncombustible materials, or treated, to control the impact on surface and ground water in accordance with § 817.41, to prevent sustained combustion, and to minimize adverse effects on plant growth and the approved postmining land use.

(g) Cut-and-fill terraces may be allowed by the regulatory authority where—

(1) Needed to conserve soil moisture, ensure stability, and control erosion on final-graded slopes, if the terraces are compatible with the approved postmining land use; or

(2) Specialized grading, foundation conditions, or roads are required for the approved postmining land use, in which case the final grading may include a terrace of adequate width to ensure the safety, stability, and erosion control necessary to implement the postmining land-use plan.

(h) Small depressions may be constructed if they are needed to retain moisture, minimize erosion, create and enhance wildlife habitat, or assist revegetation.

(i) Permanent impoundments may be approved if they meet the requirements of §§ 817.49 and 817.56 and if they are suitable for the approved postmining land use.

(j) Preparation of final-graded surfaces shall be conducted in a manner that minimizes erosion and provides a surface for replacement of topsoil that will minimize slippage.

(k) The postmining slope may vary from the approximate original contour when approval is obtained from the regulatory authority for—

(1) A variance from approximate original contour requirements in accordance with § 785.16 of this chapter; or

(2) Incomplete elimination of highwalls in previously mined areas in accordance with § 817.107(e).

(l) Regarding of settled and revegetated fills to achieve approximate original contour at the conclusion of underground mining activities shall not be required if the conditions of Paragraph (l)(1) or (l)(2) of this section are met.

(1)(i) Settled and revegetated fills shall be composed of spoil or non-acid- or non-toxic-forming underground development waste.

(ii) The spoil or underground development waste shall not be located so as to be detrimental to the environment, to the health and safety of the public, or to the approved postmining land use.

(iii) Stability of the spoil or underground development waste shall be demonstrated through standard geotechnical analysis to be consistent with backfilling and grading requirements for material on the solid bench (1.3 static safety factor) or excess spoil requirements for material not placed on a solid bench (1.5 static safety factor).

(iv) The surface of the spoil or underground development waste shall be vegetated according to § 817.116, and surface runoff shall be controlled in accordance with § 817.43.

(2) If it is determined by the regulatory authority that disturbance of the existing spoil or underground development waste would increase environmental harm or adversely affect the health and safety of the public, the regulatory authority may allow the existing spoil or underground development waste pile to remain in place. The regulatory authority may require stabilization of such spoil or underground development waste in accordance with the requirements of paragraphs (l)(1)(i)–(l)(1)(iv) of this section.

§ 817.103 [Removed]

9. Part 817 is amended by removing § 817.103.

10. Part 817 is amended by adding new § 817.107 to read as follows:

§ 817.107 Backfilling and grading: Steep slopes.

(a) Underground mining activities on steep slopes shall be conducted so as to meet the requirements of § 817.102 and the requirements of this section.

(b) The following materials shall not be placed on the downslope:

(1) Spoil.

(2) Waste materials of any type.

(3) Debris, including that from clearing and grubbing.

(4) Abandoned or disabled equipment.

(c) Land above the highwall shall not be disturbed unless the regulatory authority finds that this disturbance will facilitate compliance with the environmental protection standards of this subchapter and the disturbance is limited to that necessary to facilitate compliance.

(b) Woody materials shall not be buried in the backfilled area unless the regulatory authority determines that the proposed method for placing woody material within the backfill will not deteriorate the stable condition of the backfilled area.

(e) The disturbed area shall be backfilled and graded to comply with the provisions of § 817.102 of this chapter to return the site to the approximate original contour and completely cover the highwall; *Provided, however,* that where contour-mining operations affect previously mined areas that were not reclaimed to the standards of this chapter and the volume of all reasonably available spoil is demonstrated in writing to the regulatory authority to be insufficient to completely backfill the highwall, the highwall shall be eliminated to the maximum extent technically practical in accordance with the following criteria:

(1) The person who conducts the surface coal mining and reclamation operation shall demonstrate to the regulatory authority that the fill, designed by a qualified registered professional engineer, has a minimum static safety factor for the stability of the backfill of a least 1.3.

(2) All spoil generated by the mining operation and other reasonably available spoil shall be used to backfill the area. Reasonably available spoil shall include spoil generated by the mining operation and other spoil located in the permit area that is accessible and available for use and that when rehandled will not cause a hazard to the public safety or significant damage to the environment.

(3) The backfill shall be graded to a slope which is compatible with the approved postmining land use and which provides adequate drainage and long-term stability.

(4) Any remnant of the highwall shall be stable and not pose a hazard to the public health and safety or to the environment.

(5) Spoil placed on the outslope during previous mining operations shall not be disturbed if such disturbances will cause instability of the remaining spoil or otherwise increase the hazard to the public health and safety or to the environment.

PART 826—SPECIAL PERMANENT PROGRAM PERFORMANCE STANDARDS—OPERATIONS ON STEEP SLOPES [REMOVED]

11. Part 826 is removed.

Office of Management and Budget

Budget Rescissions and Deferrals

VOL 48 ISS 101 MY 24 1983 UMI

OFFICE OF MANAGEMENT AND BUDGET

Budget Rescissions and Deferrals

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report one new deferral of budget authority totaling $2,750,000 and two increases to previously reported deferrals, increasing the amounts deferred by $57,047,000.

The deferrals affect Energy Activities, the Department of Justice, and the Railroad Retirement Board.

The details of each deferral are contained in the attached reports.

Ronald Reagan.

The White House,
May 19, 1983.

BILLING CODE 3110-01-M

CONTENTS OF SPECIAL MESSAGE
(in thousands of dollars)

Deferral #	Item	Budget Authority
	Energy Activities	
	Energy programs	
D83-48A	Energy supply, R&D activities (plant and capital equipment)	68,052
	Department of Justice	
	Federal Prison System	
D83-35A	Buildings and Facilities	67,837
	Other Independent Agencies	
	Railroad Retirement Board	
D83-75	Limitation on administration	2,750
	Total, deferrals	138,639

****

SUMMARY OF SPECIAL MESSAGES
FOR FY 1983
(in thousands of dollars)

	Rescissions	Deferrals
Eighth special message		
New items	---	2,750
Change to amounts previously submitted	---	57,047
Effects of eighth special message	---	59,797
Amounts previously submitted that were changed by this message	---	78,842
Total, rescissions and deferrals	---	138,639
Amounts previously submitted that were not changed by this message	1,554,015 1/	13,375,333
Total amount proposed to date in all special messages	1,554,015 1/	13,513,972 2/

1/ This amount includes $23,400,000 in current budget authority for the rural telephone bank that is offset by a corresponding increase in permanent budget authority (R83-20).

2/ All amounts listed represent budget authority except for $15,944,000 of outlays only in one general revenue sharing deferral (D83-16B).

Supplementary Report

Report Pursuant to Section 1014(c) of Public Law 93-344.

This report updates Deferral No. D83-48, transmitted to the Congress on February 1, 1983.

The amount currently deferred in the Energy supply R&D—plant and capital equipment account is $68,052,000, a net decrease of $23,055,000 from the $91,107,000 originally reported. Of the funds originally reported, $28,595,000 were subsequently made available for obligation. Then, the account received an additional $5,540,000 through a re-interpretation of the current rate available under the second continuing resolution for FY 1983 (Pub. L. 97-377). These additional funds exceeded amounts required under the current program plan and, accordingly, have been deferred.

BILLING CODE 3110-01-M

Deferral No: D83-48A

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: Energy Activities	New budget authority (P.L. 97-377): $367,262,000 *
Bureau: Energy Programs	Other budgetary resources: 9,680,058 *
Appropriation title & symbol: Energy Supply, R&D Activities (Plant and Capital Equipment) 89X0225 1/	Total budgetary resources: 376,942,058 *
	Amount to be deferred: Part of year: ____ Entire year: 68,052,000 *
OMB identification code: 89-0224-0-1-271	Legal authority (in addition to sec. 1013): ☐ Antideficiency Act ☐ Other ____
Grant program: ☐ Yes ☒ No	
Type of account or fund: ☐ Annual ☐ Multiple-year ____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other ____

Justification: This appropriation provides plant and capital equipment support for research and development of energy technologies.

The FY 1983 level of appropriations for this account in the Act Making Further Continuing Appropriations FY 1983 (P.L. 97-377) is based upon the FY 1982 current rate of operations. The Conference Report directed the Department of Energy to follow the program recommendations of the Appropriation Committees contained in the House and Senate Reports accompanying the 1983 appropriations bills. The Department of Energy has, therefore, prepared a program plan for Energy Supply R&D activities in accordance with this expression of Congressional intent. As a result, use of the entire amount provided under the Continuing Resolution is not expected to be needed in FY 1983. Accordingly, the excess is being deferred.

Estimated Effects: This deferral will not have any identifiable programmatic effects since the funds deferred are in excess of the amount required to satisfy Congressional directives.

Outlay Effects: This deferral will have no effect on FY 1983 outlays.

1/ This account was the subject of a deferral in FY 1982 (D82-104).

* Revised from previous report.

Supplementary Report

Report Pursuant to Section 1014(c) of Public Law 93–344.

This report revises the previous Deferral No. D83–35, transmitted to the Congress on December 16, 1982.

This revised deferral report for the Department of Justice, Federal Prison System, Buildings and facilities increases the amount deferred from $16,330,000 to $67,837,000. This $51,507,000 increase is taken to establish a reserve pending consideration of a reprogramming request and due to unanticipated delays in completing construction projects.

	Amount to be deferred: Part of year: —
	Entire year: 67,837,000*
MB identification code: 15-1003-0-1-753	Legal authority (in addition to sec. 1013): [Y] Antideficiency Act
Grant program: [ ] Yes [X] No	[ ] Other: —
Type of account or fund: [ ] Annual; [ ] Multiple-year ____ (expiration date); [Y] No-year	Type of budget authority: [X] Appropriation; [ ] Contract authority; [ ] Other: —

Justification:* This appropriation finances planning, acquisition of sites, and construction of new penal and correctional facilities as well as construction, remodeling, and equipping necessary buildings and facilities at existing penal and correctional institutions. Projects are undertaken to reduce overcrowding, close old and antiquated penitentiaries, and provide a safe and humane environment for staff and inmates. Part of the deferral is related to a reprogramming request pending before Congress to permit $43,400,000 of Jobs Bill (P.L. 98-8) funding to be used for new construction projects. Also, due to the time required for planning, design efforts and selection of contractors, it would not be possible to complete those projects, for which funding is deferred, during FY 1983.

Estimated Effects: Would not have a negative impact on the building and facilities program because the deferred amount cannot be efficiently used if made available in FY 1983.

Outlay Effect: This deferral will have no effect on FY 1983 outlays.

* Revised from previous report.
1/ This account was the subject of two deferrals in FY 1982 (D82-178 and D82-192).

Deferral No: DA3-75

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: Railroad Retirement Board	New budget authority (P.L. 97-377): $46,361,000
Bureau:	Other budgetary resources: 700,000
Appropriation title & symbol: Limitation on administration (6038011)	Total budgetary resources: 47,061,000
	Amount to be deferred: Part of year: 2,750,000
	Entire year:
MB identification code: 60-8011-0-7-601	Legal authority (in addition to sec. 1013): [X] Antideficiency Act
Grant program: [ ] Yes [X] No	[ ] Other
Type of account or fund: [X] Annual	Type of budget authority: [X] Appropriation
[ ] Multiple-year (expiration date)	[ ] Contract authority
[ ] No-year	[ ] Other

Justification: This account funds administrative expenses of the Railroad Retirement Board. The Board sought funds to upgrade and modernize its data processing based on conceptual planning. Detailed planning has not been completed and the Board is reassessing the most appropriate scope and timing of its modernization effort in light of the rail industry pension's serious underfunding. This is a routine deferral taken under the provisions of the Antideficiency Act (31 U.S.C. 1512).

Estimated Effects: There will be no effect on the operation of the program as these funds would not be obligated until the normal planning process and associated financial plans have been completed:

Outlay Effect: This deferral will have no effect on FY 1983 outlays.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Microfiche Editions Available...

Federal Register

The Federal Register is published daily in 24x microfiche format and mailed to subscribers the following day via first class mail. As part of a microfiche Federal Register subscription, the LSA (List of CFR Sections Affected) and the Cumulative Federal Register Index are mailed monthly.

Code of Federal Regulations

The Code of Federal Regulations, comprising approximately 180 volumes and revised at least once a year on a quarterly basis, is published in 24x microfiche format and the current year's volumes are mailed to subscribers as issued. Or, the previous year's full set may be purchased at a reduced price and mailed as a single shipment.

Subscription Prices:

Federal Register:

One year: $175 domestic; $218.75 foreign
Six months: $87.50 domestic; $109.40 foreign

Code of Federal Regulations:

Current year (as issued): $250 domestic; $312.50 foreign
Previous year's full set (single shipment): $155 domestic; $193.75 foreign

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Presidential Determination No. 83-6 of April 8, 1983

Eligibility of Algeria To Make Purchases of Defense Services Under the Arms Export Control Act

Memorandum for the Honorable George P. Shultz, the Secretary of State

Pursuant to the authority vested in me by Section 3(a)(1) of the Arms Export Control Act, I hereby find that the furnishing of defense services to the Government of Algeria will strengthen the security of the United States and promote world peace.

You are directed on my behalf to report this finding to the Congress.

This finding shall be published in the **Federal Register**.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 102
Wednesday, May 25, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 32

Consumer Products Containing Small Quantities of Radioactive Material; Correction

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rulemaking; correction.

SUMMARY: This document corrects a final rule appearing in the **Federal Register** on March 24, 1983 (48 FR 12331) that modified reporting and recordkeeping requirements imposed on persons specifically licensed to distribute consumer products containing byproduct material. The action is necessary to correct the inadvertent omission of a reference to a section of the Commission's regulations covered by this reporting requirement.

FOR FURTHER INFORMATION CONTACT: Dr. Anthony N. Tse, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone (301) 443–5825.

1. On page 12333, second column, fourth line of § 32.16(b), the phrase "§ 30.15 or" should be inserted after the word "under."

Dated at Bethesda, Maryland, this 13 day of May, 1983

Jack W. Roe,
Acting Executive Director for Operations.

FEDERAL TRADE COMMISSION

16 CFR Part 305

Rules for Using Energy Cost and Consumption Information Used in Labeling and Advertising of Consumer Applications Under the Energy Policy and Conservation Act; Ranges of Comparability for Clothes Washers

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission amends its Appliance Labeling Rule by revising the ranges of comparability used on required labels for clothes washers.

Under the rule, each required label on a covered appliance must show a range, or scale, indication the range of energy costs or efficiencies for all models of a size or capacity comparable to the labeled model. These ranges, which show the highest and lowest energy costs or efficiencies for the various size or capacity groupings of the appliances covered by the rule, are published in the **Federal Register** by the Commission no more often than annually, and are called "ranges of comparability." The figures to be used on the ranges are provided by the Commission after an analysis of data submitted by appliance manufacturers, who derive the energy costs or efficiencies of their appliances by following test procedures prescribed by the Department of Energy ("DOE"). One element used in calculating the ranges is the representative average unit cost of the energy used by the appliances, which is calculated annually by DOE. Because this average cost usually changes annually, and because appliance models are constantly being added, changed, or dropped by manufacturers, the ranges of comparability are likely to change from year to year. This has been the case with the ranges for clothes washers, and this notice publishes the new range figures, which, under §§ 305.10, 305.11 and 305.14 of the rule, must be used in the labeling and advertising of clothes washers, beginning August 23, 1983.

EFFECTIVE DATE: August 23, 1983

FOR FURTHER INFORMATION CONTACT: James Mills, 202–376–2891, or Lucerne D. Winfrey, 202–376–2805, Attorneys, Division of Enforcement, Federal Trade Commission, Washington, D.C. 20580.

SUPPLEMENTARY INFORMATION: Section 324 of the Energy Policy and Conservation Act of 1975 (EPCA)[1] required the Federal Trade Commission to consider labeling rules for the disclosure of estimated annual energy cost or alternative energy consumption information for at least thirteen categories of appliances: (1) refrigerators and refrigerator-freezers; (2) freezers; (3) dishwashers; (4) clothes dryers; (5) water heaters; (6) room air conditioners; (7) home heating equipment, not including furnaces; (8) television sets; (9) kitchen ranges and ovens; (10) clothes washers; (11) humidifiers and dehumidifiers; (12) central air conditioners; and (13) furnaces. Under the statute, DOE is responsible for developing test procedures that measure how much energy the appliances use. In addition, DOE is required to determine the representative average cost a consumer pays for the different types of energy available.

On November 19, 1979, the Commission issued a final rule [2] covering seven of the thirteen appliance categories: refrigerators and refrigerator-freezer, freezers, dishwashers, water heaters, clothes washers, room air conditioners and furnaces.

The rule requires that energy efficiency ratings or energy costs and related information be disclosed on labels and fact sheets and in retail sales catalogs for all covered products manufactured on or after May 19, 1980. Certain point-of-sale promotional materials must disclose the availability of energy cost or energy efficiency rating information. The required disclosures and all claims concerning energy consumption made in writing or in broadcast advertisements must be based on the results of the DOE test procedures.

Pursuant to § 305.8 of the rule, manufacturers submitted reports to the Commission by January 21, 1980. These reports contained information on the estimated annual cost or energy

[1] Pub. L. 94–163, 89 Stat. 871 (Dec. 22, 1975).
[2] 44 FR 66466, 16 CFR 305 (November 19, 1979).

VOL 48 ISS 102 MAY 25 1983 UMI

efficiency rating for the seven categories of appliances derived from tests performed pursuant to the DOE test procedures. The reports also contained the model, the number of tests performed on each model, and the capacity of each model. From that information, the Commission compiled and published [3] ranges of comparability for each product, as required by § 305.10 of the rule.

Section 305.8(b) of the rule requires that manufacturers, after filing this initial report, shall report annually by specified dates for each product type.[4] The date submitted by manufacturers is based, in part, on the representative average unit cost of the type of energy used to run the appliances tested. According to § 305.9 of the rule, these average energy costs, which are provided by DOE, will be periodically revised by the Commission, but not more often than annually. Because the costs for the various types of energy appear to be increasing steadily, and because manufacturers regularly add new models to their lines, improve existing models and drop others, the date base from which the ranges of comparability are calculated is constantly changing. To keep the required information in line with these changes, the Commission is empowered, under § 305.10 of the rule, to publish new ranges (but not more often than annually), if an analysis of the new data indicates that the upper or lower limits of the ranges have changed by more than 15%.

The new figures for the estimated annual costs of operation for clothes washers, which were calculated using the 1983 representative average energy costs published by DOE on January 25, 1983 [5] have been submitted and have been analyzed by the Commission. New ranges based upon them are herewith published.

List of Subjects in 16 CFR Part 305

Advertising, Energy conservation, Household appliances, Labeling, Reporting and recordkeeping requirements.

In consideration of the foregoing, the Commission publishes the following ranges of comparability for use in the labeling and advertising of clothes washers beginning August 23, 1983.

[3] 45 FR 13998 (March 3, 1980), 45 FR 19520 (March 25, 1980), 45 FR 28036 (April 17, 1980), 46 FR 3829 (January 16, 1981).

[4] Reports for clothes washers are due by March 1; reports for water heaters, room air conditioners and furnaces are due by May 1; reports for dishwashers are due by June 1; reports for refrigerators, refrigerator-freezers and freezers are due by August 1.

BILLING CODE 6750–01–M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 123

[T.D. 83–118]

Foreign Locomotives and Railroad Equipment; Entry and Use

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: The rule amends the Customs Regulations to provide that:

1. Foreign locomotives or other foreign railroad equipment in use on a continuous route crossing one international boundary into the United States, shall be admitted without formal entry or the payment of duty to proceed to the end of the run and depart for another foreign country;

2. Foreign railroad equipment other than locomotives may be used in such trains or for such local traffic as is reasonably incidental to its economical and prompt departure for a foreign country; and

3. Empty foreign railroad equipment shall be admitted to the United States without formal entry and payment of duty if the passengers or goods to be loaded are to be transported to or through any foreign country.

A conforming amendment to the regulations relating to foreign-based truck trailers also is made.

This action is taken to remove a serious hinderance to strictly international traffic, while retaining the prohibition against diversions of foreign locomotives and railroad equipment to unpermitted point-to-point local traffic.

The purpose of the amendments is to allow a three country movement (Canada-U.S.-Mexico, or reverse) of foreign locomotives and railroad equipment in international traffic, and thus not subject those locomotives or that equipment to formal entry or duty.

EFFECTIVE DATE: June 24, 1983.

FOR FURTHER INFORMATION CONTACT: John Mathis, Carriers, Drawback and Bonds Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, (202–566–5706).

SUPPLEMENTARY INFORMATION:

Background

Section 322(a) of the Tariff Act of 1930, as amended (19 U.S.C. 12322(a)), provides that vehicles and other instruments of international traffic, of any class specified by the Secretary of the Treasury, shall be granted "the customary exceptions from the applications of the customs laws" to the extent of, and subject to, to the terms and conditions prescribed in the regulations or instructions of the Secretary.

Section 123.12(a), Customs Regulations (19 CFR 123.12(a)), presently provides that foreign locomotives or other foreign railroad equipment in use on a continuous route crossing an international boundary into the United States, shall be admitted without formal entry or the payment of duty to proceed to the end of the run and return to the country in which the run began in certain specified situations. Section 123.12(a)(2) further provides that foreign railroad equipment other than locomotives may be used on the outward (*i.e.*, return) trip only in connection with trains crossing the boundary, or for such local traffic as is reasonably incidental to the economical and prompt return of the equipment to the country from which it entered the United States.

In addition, § 123.12(b), Customs Regulations (19 CFR 123.12(b)), now provides that empty foreign railroad equipment shall be admitted to the United States without formal entry and payment of duty only if the passengers or goods to be loaded are to be transported directly to or through the country from which the equipment entered the United States.

However, it is clear that the underlying purpose of § 123.12 (a) and (b), and their antecedents, was to prohibit wholesale diversions to unpermitted point-to-point local traffic of foreign locomotives and railroad equipment moving through the United States in international traffic, but not to hinder any strictly international traffic.

Accordingly, to give full effect to a 1978 ruling in which Customs held that a three country movement (Canada-U.S.-Mexico) is international traffic, and to eliminate the dichotomy between the strict language of the regulations and current administrative practice, a notice of proposed rulemaking to amend § 123.12 was published in the **Federal Register** on August 27, 1982 (47 FR 37924).

The proposed amendment to § 123.12(a) provided that foreign locomotives or other foreign railroad equipment in use on a continuous route crossing one international boundary into the United States (*e.g.*, Canada) shall be admitted without formal entry or the payment of duty to proceed to the end of the run and depart for another foreign country (*e.g.*, Mexico). Section 123.12(a)(2) also was to be amended to provide that foreign railroad equipment other than locomotives may be used on an outward trip in such trains or for such local traffic as is reasonably indcidental to its economical and prompt departure for a (any) foreign country. The "outward" trip, then would no longer refer exclusively to a return trip to the country in which the railroad equipment began its run. The equipment might return, or it might proceed to another foreign country.

The proposed amendment to § 123.12(b) provided that empty foreign railroad equipment shall be admitted to the United States without formal entry and payment of duty if the passengers or goods to be loaded are to be transported directly to or through any foreign country.

A conforming amendment also was to be made to § 123.14(c)(2), Customs Regulations (19 CFR 123.14(c)(2)), to provide that a foreign-based truck trailer may carry merchandise between points in the United States on its departure for a foreign country under the same conditions as are prescribed for "other foreign railroad equipment" in proposed § 123.12(a)(2).

No comments were received in response to the notice of proposed rulemaking. Therefore, after a review of the matter Customs has determined to adopt the proposal as described in that notice.

E.O. 12291 and Regulatory Flexibility Act

It has been determined that the amendments in this document are not a "major rule" within the criteria provided in section 1(b) of E.O. 12291, and therefore no regulatory impact analysis is required.

Pursuant to the provisions of section 605(b) of the Regulatory Flexibility Act (Pub. L. 96–354, 5 U.S.C. 601 *et seq.*), it is hereby certified that the regulations set forth in this document will not have a significant economic impact on a substantial number of small entities. Accordingly, these regulations are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Drafting Information

The principal author of this document was Todd J. Schneider, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs Offices participated in its development.

List of Subjects in 19 CFR Part 123

Canada, Customs duties and inspection, Exports, Freight, Imports, Mexico, Motor carriers, Railroads.

Amendments to the Regulations

Part 123, Customs Regulations (19 CFR Part 123), is amended as set forth below.

William von Raab,

Commissioner of Customs.

Approved: May 6, 1983.

John M. Walker, Jr.,

Assistant Secretary of the Treasury.

PART 123—CUSTOMS RELATIONS WITH CANADA AND MEXICO

1. Section 123.12(a) introductory text is revised to read as follows:

§ 123.12 Entry of foreign locomotives and equipment in international traffic.

(a) *Use on a continuous route.* Foreign locomotives or other foreign railroad equipment in use on a continuous route crossing the boundary into the United States shall be admitted without formal entry or the payment of duty to proceed to the end of the run and depart for a foreign country, in accordance with the following:

* * * * *

2. Section 123.12(a)(2) is revised to read as follows:

§ 123.12 Entry of foreign locomotives and equipment in international traffic.

(a) *Use on a continuous route.* * * *

(2) *On outward trip.* Foreign locomotives may be used on the outward trip only in connection with through trains crossing the boundary, including switching to make up such trains. Other foreign railroad equipment may be used in such trains or for such local traffic as is reasonably incidental to its economical and prompt departure for a foreign country.

* * * * *

3. Section 123.12(b) is revised to read as follows:

§ 123.12 Entry of foreign locomotives and equipment in international traffic.

* * * * *

(b) *Admission of empty equipment.* Empty foreign railroad equipment shall be admitted to the United States without formal entry and payment of duty only if the passengers or goods to be loaded are to be transported directly to or through a foreign country.

* * * * *

4. Section 123.14(c)(2) is revised to read as follows:

§ 123.14 Entry of foreign-based trucks, buses, and taxicabs in international traffic.

* * * * *

(c) *Use in local traffic.* * * *

(2) A foreign-based truck trailer may carry merchandise between points in the United States on its departure for a foreign country under the same conditions as are prescribed for "other foreign railroad equipment" in § 123.12(a)(2).

(R.S. 251, as amended, sec. 14, 67 Stat. 516, as amended, sec. 624, 46 Stat. 759, 77A Stat. 14; and Gen. Hdnte. 11, Tariff Schedules of the U.S. (19 U.S.C. 66, 1202,1322(a), 1624))

[FR Doc. 83–14000 Filed 5–24–83; 8:45 am]

BILLING CODE 4820–02–M

ENVIRONMENTAL PROTECTION AGENCY

21 CFR Part 193

[FAP 3H5202/R565; PH-FRL 2367–7]

Tolerances for Pesticides in Food Administered by the Environmental Protection Agency; Fluridone

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule extends a regulation permitting residues of the herbicide fluridone in potable water in connection with an experimental use permit concurrently being extended. This regulation was requested in a petition submitted by the Elanco Products Company.

EFFECTIVE DATE: Effective on March 17, 1981.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C 20460.

FOR FURTHER INFORMATION CONTACT: Richard Mountfort, Product Manager (PM) 23, Registration Division (TS–767C), Environmental Protection Agency, Rm. 253, CM #2, 1921 Jefferson

VOL 48 ISS 102 MAY 25 1983 UMI

Davis Highway, Arlington, VA 22202, (703–557–1830).

SUPPLEMENTARY INFORMATION: EPA issued a regulation, published in the **Federal Register** of March 17, 1981 (46 FR 17015), which established a regulation permitting residues of the herbicide fluridone [1-methyl-3-phenyl-5-[3-(trifluoromethyl)-phenyl]-4(1*H*)-pyridinone in potable water at 0.01 part per million (ppm) as a result of application of the herbicide to lakes and ponds under an experimental use permit to expire June 1, 1983.

Under the experimental use permit (1471–EUP–67), fishing, swimming, drinking, or other use of the treated pond/lake water is restricted for 150 days after application.

Elanco Products Company, 740 South Alabama St., Indianapolis, IN 46285, in a petition (FAP 9H5202), has requested extension of this regulation to permit continued use of fluridone in potable water while further data are collected on fluridone.

The scientific data reported and other relevant material have been evaluated, and it has been determined that the pesticide may be safely used in accordance with the experimental use permit which is being extended concurrently.

The pesticide is considered useful for the purpose for which the regulation is sought. It is concluded that the regulation permitting residues of fluridone may be safely used in the prescribed manner when such use is in accordance with the label and labeling registered pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, (86 Stat. 973, 89 Stat. 751. U.S.C. 135(a) *et seq*). Therefore, the regulation permitting residues of fluridone in potable water at 0.01 ppm is extended as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new food or feed additive levels, or conditions for safe use of additives, or raising such food or feed additive levels do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24945).

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 346(c)(1))).

List of Subjects in 21 CFR Part 193

Food additives, Pesticides and pests.

Dated: May 16, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 193—[AMENDED]

Therefore, 21 CFR 193.219 is revised to read as follows:

§ 193.219 Fluridone.

(a) [Reserved].

(b) A tolerance of 0.01 part per million is established for residues of the herbicide fluridone [1-methyl-3-phenyl-5-(3)-trifluoromethyl)-phenyl)-4(1*H*)-pyridinone] in potable water. Such residues may be present therein only as a result of application of the herbicide fluridone to lakes and ponds under an experimental use program which expires June 1, 1954.

This program is to be conducted by the Elanco Products Company. Residues remaining in potable water after June 1, 1984 will not be considered actionable if the pesticide is legally applied during the term and in accordance with the provisions of the experimental use permit and the food additive tolerance.

[FR Doc. 83-13779 Filed 5-24-83; 8:45 am]

BILLING CODE 6560-50-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 207 and 255

[Docket No. R–83–953]

Coinsurance for the Purchase or Refinancing of Existing Multifamily Housing Projects

AGENCY: Department of Housing and Urban Development (HUD), Office of the Assistant Secretary for Housing—Federal Housing Commissioner.

ACTION: Interim rule, with request for comments.

SUMMARY: This interim rule revises an earlier interim rule which was published on March 31, 1982 (47 FR 13517), amending 24 CFR Part 255, Coinsurance for Private Lenders. Part 255 provides for FHA mortgage insurance, on a coinsurance basis under section 244 of the National Housing Act, for the financing or refinancing of existing multifamily rental housing projects. The earlier interim rule amended Part 255, among other things, by broadening eligibility for participation in the program to include private mortgage companies, adding a "sound capital resources" requirement for coinsured lenders, and providing for protection of the Government National Mortgage Association (GNMA) in the event of loss on coinsured mortgages backing GNMA-guaranteed securities.

As a result of public comments received on the March 31 rule and a continuing analysis of the coinsurance program within the Department, additional program changes are deemed necessary. In order to provide a continuing opportunity for public participation in the development of the program, these changes are again being issued as an interim rule.

Major changes contained in this rule include (1) further extension of program eligibility to State Housing Agencies, (2) provision for reinsurance of half, all or the maximum amount otherwise authorized of the lender's coinsurance risk, (3) revision of the maximum repair limits permitted under the program, (4) tightening of the "sound capital resources" requirement, (5) more favorable terms and conditions for the insurance of mortgages covering multifamily housing projects in older, declining urban areas, and (6) changes in the procedures and methods of calculating insurance benefits under the program. A discussion of the public comments and a complete section-by-section summary of the changes made both in this interim rule and the earlier interim rule are set forth below.

ADDRESS: Interested persons are invited to submit comments regarding this rule to the Office of General Counsel, Rules Docket Clerk, Room 10278, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410. Comments should refer to the above docket number and title. A copy of each comment submitted will be available for public inspection and copying during regular business hours at the above address.

DATES: *Effective:* Upon expiration of the first period of 30 calendar days of continuous session of Congress after publication, subject to waiver. Further notice of the effectiveness of this interim rule will be published in the **Federal Register.**

Comment due date: July 25, 1983.

FOR FURTHER INFORMATION CONTACT: James Hamernick, Office of Multifamily Housing Development, 451 Seventh Street, S.W., Washington, D.C. 20410, (202) 755–5720. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On July 2, 1980, the Department published at 45 FR 45116 a final rule to revise 24 CFR by adding a new Part 255 entitled, "Coinsurance for Private Lenders." The new Part 255 set forth an experimental program for the coinsurance of loans originated by depository institutions to finance the purchase or refinancing of existing multifamily rental housing projects. This new program was based upon statutory authorities found in section 207 (authority to insure mortgages on muiltifamily projects), section 223(f) (authority to insure mortgages executed in connection with the purchase or refinancing of an existing multifamily housing project), and section 244 (authority to insure pursuant to a coinsurance contract) of the National Housing Act.

On March 31, 1982, the Department published at 47 FR 13517 an interim rule which revised 24 CFR Part 255 to accomplish the following: broaden eligibility of originating lenders from depository institutions only to include mortgage bankers and other private FHA lenders, add a "sound capital resources" requirement to existing net worth criteria required of originating lenders, provide for reimbursement to GNMA for payments made to holders of GNMA-guaranteed securities backed by coinsured loans in the event of a default by the loan originators, change the coinsurance premium sharing formula, allow assignment of coinsured mortgage loans and coinsurance obligations under certain conditions, and make miscellaneous technical modifications. Although the interim rule became effective on May 17, 1982 following the required congressional review period, interested parties were given until June 1, 1982, to submit written comments.

Three comments were received in response to publication of the interim rule. These expressed the views of one mortgage company (Banco Mortgage Company), one trade association (the Mortgage Bankers Association of America— MBA), and the New York City Community Preservation Corporation ("CPC"), a nonprofit corporation representing savings and commercial banks. The Department's resolution of the suggestions offered in these comments is summarized below:

Response to Public Comments

1. *Reinsurance.* All three of the comments urged that HUD allow originating lenders discretion to reinsure their loss exposure, either partially (Banco, MBA) or completely (CPC). This issue has also been discussed informally by industry and departmental officials and received lengthy consideration before and during the public comment period. The Department believes that originating lenders should be required to retain a share of the risk inherent in coinsurance. However, the Department also agrees that discretion to reinsure may provide a necessary incentive for participation in the coinsurance program. Consequently, § 255.106 has been revised in this interim rule to permit a lender to purchase reinsurance coverage of (1) 50 percent of its coinsurance risk, (2) 100 percent of its coinsurance risk, or (3) that portion of its coinsurance risk which equals the maximum amount which the mortgage guarantee insurer is authorized to insure. However, where 100 percent of risk, or the maximum amount authorized, is reinsured, insurance benefits, as determined by § 255.425(a) and (b), will be reduced by 15 percent (§ 255.425(c)). A detailed description of how these provisions would work is contained in the section-by-section description below.

To help meet the cost of reinsurance coverage or self insurance by the lender, § 255.402(b) authorizes the lender to charge the mortgagor a separate annual fee of not to exceed 0.25 percent of the average outstanding principal balance of the loan in addition to the HUD mortgage insurance premium. This is a lender fee only and is not shared with HUD. It may be collected without regard to whether reinsurance coverage is, in fact, purchased by the lender. See also the section-by-section summary of this provision.

2. *Mortgage Insurance Premium (MIP) Sharing.* One commenter objected to the requirements that the initial MIP be collected entirely for HUD's account and that subsequent annual MIP be shared on an 80/20 percent basis between HUD and the lender, on grounds that, because the lender must absorb the first 5 percent of any loss, HUD's share of actual losses would reach 80 percent only in the unlikely event of total loss on the project. In response, the Department notes that the risk and premium sharing formulas contained in Part 255 were formulated on the basis of careful actuarial analysis. The coinsurance provisions of the National Housing Act specifically require sharing of premiums "on a sound actuarial basis" (Section 244(a), second sentence). The Department is concerned about equity with respect to its coinsurance requirements, however, and will monitor closely actuarial results under the new program for any indications that premium sharing revisions are justified. It should be noted that § 255.428 of the rule places an additional risk upon the FHA insurance fund, in that it obligates the Commissioner to protect GNMA from absorbing any coinsurance loss caused by the default of a lender-issuer of GNMA mortgage-backed securities. Considering this and the newness of the program concept, the MIP and risk sharing provisions of Part 255 are not being changed in response to this comment.

The Department considered an alternative coinsurance risk sharing formula for specially designated low-income neighborhoods, under which HUD would pay 100 percent of the losses resulting after deducting 10 percent of the outstanding principal balance of the mortgage on the date of institution of foreclosure proceedings or on the date of acquisition of the property otherwise after default. This alternative was determined to be actuarially unsound because it provided inadequate incentive to the mortgagee to sell a foreclosed property at the highest possible price.

3. *Special Provisions for Neighborhood Rehabilitation.* Comments from CPC (which serves as a mortgage originating consortium for New York City depository lenders) suggested a special program within Part 255 to promote moderate rehabilitation in specially defined low-income neighborhoods. The proposed special terms were as follows: per unit rehabilitation of up to $20,000; insured financing of up to 90 percent of project value; a loss sharing formula of 90/10 percent between HUD and the lender,

VOL 48 ISS 102 MAY 25 1983 UMI

elimination of the 5 percent deductible, and lender discretion to reinsure any portion of its 10 percent risk share.

The interim rule makes a number of changes in Part 255 which are responsive to these comments. 24 CFR 207.32a(1) currently makes advantageous terms under Section 233(f) of the National Housing Act available to certain older, declining urban neighborhoods, designated as Target Preservation Areas under the Target Area Preservation Program (TAP). An insured mortgage amount is permitted at 90 percent (instead of 85) of appraised value and the repayment term may extend to the lesser of 40 years (instead of 35) or 100 percent (instead of 75 percent) of the estimated remaining economic life of the project. The combination of the 90 percent loan-to-value ratio and permissible subordinated financing in Section 233(f) provides for 95 percent financing in TAP areas. This interim rule incorporates revisions at § 255.210, § 255.211, and § 255.212 to assure that these terms are available for coinsured mortgages which meet the TAP eligibility criteria.

The rule also revises the restrictions on refinancing mortgages in portfolio (§ 255.208) to give HUD discretion to approve additional portfolio refinancing by a lender where the property securing a loan is in a Target Preservation Area. Further, as noted above, provision is made for reinsurance of a coinsurer's risk, and, as noted below, the maximum repair limits permitted under the program are being liberalized. All of these changes, taken together, should help reduce lender reluctance to use the Part 255 program in riskier urban neighborhoods and make the program more effective where it is used. We do not believe it necessary or desirable, at this time, to make further changes in the coinsurance program, which could expose the FHA insurance fund to unacceptable actuarial risks.

4. *Assignment of Coinsured Mortgages.* One comment suggested that the limitations on mortgage assignments and transfers contained in § 255.408 are intended only to supplement, not supersede, the basic multifamily assignment provisions of 24 CFR 207.261. In fact, the Department drafted § 255.408 with the intention of placing discrete restrictions upon the assignability of Section 223(f) coinsured mortgages. This is necessary because of the statutory right of assignees of coinsured mortgages to elect to receive full insurance, rather than coinsurance, coverage of losses in the event of default (see parenthetical phrase in the second sentence of Section 244(a) of the National Housing Act). A policy of general assignability would defeat the purpose of the coinsurance program, and, therefore, § 255.408 is retained without substantial change.

5. *Capital and Reserve Requirements.* One public comment and informal inquiries to the Department have revealed a technical problem in the definition of "sound capital resources" in § 255.8(h), i.e., the likelihood that loss reserves established by a lender to cover its coinsurance liability will be treated by accountants as a liability, and thus be excluded from "unencumbered resources" as the term is used in this rule. The interim rule revises § 255.8(h) to make clear that coinsurance loss reserves should be considered unencumbered resources for purposes of establishing the minimum sound capital resources required of lenders.

In view of the continuing risks inherent in multifamily loans, this rule does not revise, as was recommended in a public comment, the 1/300 ratio for maintaining ongoing reserves under § 255.102(b) to take account of seasoning of mortgages in portfolio. Future changes can be adopted if program experience supports an actuarial projection that insurance risk will decline as mortgage life advances.

6. *Clarification of Date of Application.* Since Part 255 is a program for existing multifamily properties, HUD regulations require that the multifamily project must have been completed three years before the application for Part 255 mortgage insurance. One commentator suggested clarifications to assure that completion of construction refers to the original construction of the project and not to completion of repairs or moderate rehabilitation financed under Section 223(f) of the National Housing Act. Accordingly, § 255.228(g) (redesignated as § 255.228(f)) is revised in the rule to refer to "construction or substantial rehabilitation" as the event which must be completed three years before application.

7. *Definition of Date of Default.* One comment pointed out that § 255.411 deems a default as occurring 30 days after the events (failure to make a payment or default on a covenant) which are considered a default in the Section 207 basic multifamily regulations (24 CFR 207.255(d)) and that this, combined with the 30-day grace period in § 255.412, could cause the lender to lose 60 days of interest in the computation of the insurance claim amount in § 255.426(b), which includes interest on unpaid mortgage principal between the time of default and the date of foreclosure or property acquisition. While the Department does not believe that a loss of 60 days interest would in fact occur under existing regulations, this interim rule revises § 255.411 to define the date of default as the date of failure to make a payment or perform a covenant, not 30 days thereafter. This, combined with the revision to § 255.426(b), assures that interest will be payable from the date of default to the date of payment of the insurance benefits.

8. *Sharing of Losses: Mortgage Interest and Foreclosure Costs.* The same commenter objected to provisions in § 255.426, which provide for reimbursement of lenders for interest on a defaulted mortgage at the debenture rate (from default to foreclosure/acquisition), instead of at the higher mortgage interest rate, on the ground that these limited reimbursements afford a degree of coinsurance protection to HUD under full insurance programs but are out of place in this coinsurance program. While the Department recognizes no imperative for restricting its coinsurance protection solely to the risk sharing formula of a five percent deductible and 85/15 percent loss split, the Department is taking this opportunity to revise § 255.426(b) to make clear that upon claim settlement, a lender will receive interest on unpaid principal from date of default to acquisition of title at the mortgage interest rate, not at the debenture rate. The rationale for this change in policy is set forth below in the section-by-section description of § 255.426(b).

9. *Reinstatement of Defaulted Mortgages.* One comment suggested that reinstatement of a defaulted mortgage should be optional, rather than mandatory, since lenders would thereby have more leverage in working out problems with defaulting mortgagors. The reinstatement provision in § 255.413 (and its counterpart in Part 207—§ 207.256a) is not entirely mandatory, since reinstatement is required only where the mortgagor cures the default. If the mortgagor cures the default, reinstatement should be mandatory. This reflects HUD policy for all multifamily programs.

Additional Departmental Amendments

In addition to the revisions described above, the Department has included in this interim rule several other modifications to Part 255. Some are in response to largely technical recommendations made in the course of internal clearance of this rule. Revisions are made to the following sections: §§ 255.1, 255.3, 255.5, 255.6, 255.101, 255.102, 255.104, 255.201, 255.203, 255.216, 255.217, 255.224, 255.225, 255.239, 255.401, 255.403, 255.404, 255.407, 255.408, 255.415, 255.424, 255.425, 255.427, 255.428, and 255.429. Minor alterations to improve sentence structure and clarity have also been made throughout the rule.

One revision of a substantive nature is the extension of Part 255 program eligibility to State Housing Finance Agencies. There appeared to be little reason to exclude State Agencies as eligible coinsurance mortgagees. Most have sufficient underwriting and servicing capabilities already in place, and almost invariably have a mandate to provide decent housing for lower and moderate-income families. Also, program eligibility will permit these Agencies to take advantage of a Federal program concerned with the moderate rehabilitation of existing structures—an activity they may not carry out under the Part 250 State Agency program, which is limited to new construction and substantial rehabilitation.

Another substantive revision would revise § 255.228, relating to the maximum repair limits permitted under the program. The purpose of the Section 223(f) program, with or without coinsurance, is to assist in the conservation of neighborhoods by providing a viable means for financing or refinancing the existing housing resources in these neighborhoods for projects which are not in need of substantial rehabilitation. In developing 24 CFR Part 255 for the coinsurance aspect of this program, substantial public comment was received to the effect that the purpose of the program was no longer being adequately served because of the restrictive nature of the existing repair limitations. The present limit (briefly, the greater of 15% of project value after repairs or $3,000 per unit) has been used since the inception of the Section 223(f) program in 1975. The Department was urged to increase this limitation because it is now much too low to permit use of the program in connection with large numbers of otherwise eligible projects which do not require substantial rehabilitation. Further, the fact that the $3,000 limitation was applied equally in all parts of the country (despite the National Housing Act's recognition of, and provision for, the application of a high-cost factor adjustment to the cost limits of other programs), was forcing a further reduction in permitted work in the higher cost areas of the country.

In considering alternatives to the current repair limitations, attention was also given to simplifying and clarifying the complex description of the types of repairs permitted under current policy, and to contrasting that language more directly and more clearly with the requirements of HUD's substantial rehabilitation mortgage insurance programs.

The Department has decided, therefore, to revise the repair limit upward to keep pace with the actual repair needs of projects not requiring substantial rehabilitation, while providing a simplified definition of the type of work permitted in order to assure mutual exclusivity between permissible activity under this program and the substantial rehabilitation programs.

A dollar limitation of $6,500 per unit, adjusted by any applicable high-cost factor of the area, is proposed to (1) adequately reflect the increased cost of basic repairs and improvements and (2) recognize the differing costs of the same level of repairs and improvements in various parts of the country. A simplified definition of permitted work-type is also provided, which allows the replacement of no more than one major building component under this repair program.

To comply with congressional intent and sound practice, a distinction must necessarily be made between this kind of repair activity and the substantial rehabilitation programs to avoid duplication. The repair limits definition included here is also incorporated by regulation change as the program eligibility qualifier for the basis Section 223(f) program (24 CFR 207.32a) and as the cut-off for the Section 207 mortgage insurance program permitting substantial rehabilitation (24 CFR 207.24). The limitation will generally permit projects which would have been eligible for substantial rehabilitation in the past to continue to make use of the higher loan-to-value ratios and insurance of advances features of the basic section 207 program, while permitting the section 223(f) repair programs (both insured and coinsured) to serve the needs of a larger pool of projects not requiring substantial rehabilitation.

All of these repair-related changes are described in detail in the section-by-section summary of §§ 255.228, 207.24 and 207.32a.

Procedural Requirements With Respect to Rule

This rule does not constitute a "major rule" as that term is defined in Section 1(b) of the Executive Order on Federal Regulation issued by the President on February 17, 1981. Analysis of the proposed rule indicates that it does not (a) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Secretary has determined that good cause exists for making this rule effective as soon after publication as possible. The revisions made to Part 255 in the interim rule promulgated in March of 1982 made private mortgage bankers eligible to originate coinsured loans, added a "sound capital resources" requirement, and provided a GNMA secondary market facility. Both public comments and a continuing program analysis within the Department demonstrate that these changes, by themselves, are inadequate and the further program revisions contained in this rule are essential if the section 223(f) coinsurance program is to realize its potential as a cost-effective way to conserve existing market rate rental housing.

Section 7(o)(3) of the Department of the HUD Act (42 U.S.C. 3535(o)(3)) provides for a delay in effectiveness for a period of 30 calendar days of continuous session of Congress after publication, unless waived by the Chairmen and Ranking Minority Members of the Senate Committee on Banking, Housing and Urban Affairs and the House Committee on Banking, Finance and Urban Affairs. At the time of publication of this interim rule, it is not known whether or when such waivers will be granted. When this is known, or after the 30 day period expires, a notice stating the effective date of this rule will be published in the **Federal Register.**

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement Section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection and copying during regular business hours at the Office of the Rules Docket Clerk, Office of the General Counsel, Room 10278, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

This rule was listed as item H–53–81 under the Office of Housing in the Department's Semiannual Agenda of Regulations published on October 28,

VOL 48 ISS 102 MAY 25 1983 UMI

1982 (47 FR 48437) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

The Catalog of Federal Domestic Assistance program number and title is 14.155, Mortgage Insurance for the Purchase of Refinancing of Existing Multifamily Housing Projects.

Pursuant to 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of shall entities. The changes made by this rule can be considered technical adjustments to the existing structure of the multifamily coinsurance program. They do not change the goals toward which program activities are directed and any effect on small entities should be minor and positive.

Certain of the information collection requirements contained in this regulation (24 CFR Part 255) have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and have been assigned OMB control numbers 2502–0001, 2502–0014, 2502–0018, 2502–0029, 2502–0118, 2502–0178, 2502–0256, 2502–0257, and 2502–0259. The remaining information collection requirements will be submitted to the Office of Management and Budget and, after OMB review and approval, the public will be notified through a technical amendment to this regulation.

Description of Part 255 as Amended

For the convenience of the reader, and to provide a clear record of the changes being made in Part 255, the entire text of that part, as amended, is being republished. What follows is a section-by-section description of Part 255, focusing upon the changes made since its initial publication as a final rule on July 2, 1980.

Part 255—Coinsurance for Mortgage Lenders

Subpart A—General Provisions

This interim rule revises the heading of Part 255 to read "Coinsurance for the Purchase or Refinancing of Existing Multifamily Housing Projects."

Section 255.1 Purpose. This section states that it is the intention of Part 255 to carry out a demonstration multifamily coinsurance program which will assist in the conservation of neighborhoods and existing housing resources. A revised paragraph (f) was added to this section on March 31, 1982, stating that Part 255 permits assignment of coinsured loans under specified conditions (§ 255.408) and provides certain protections to the Government National Mortgage Association. (§ 255.428). No substantive changes are made in this interim rule.

Section 255.2 Effect of implementation of program on mortgage market. This section covers the Secretary's obligation, under section 244(c) of the National Housing Act, to consult with the mortgage lending industry to determine that the demonstration coinsurance program will not disrupt the mortgage market or reduce availability of mortgage credit to borrowers who depend upon full FHA mortgage insurance. No amendments have been made to this section since its initial publication on July 2, 1980.

Section 255.3 Utilization of existing multifamily insurance authorities. This section provides that mortgages covering multifamily projects which meet Part 244 eligibility requirements shall be insured under section 207 of the National Housing Act (the basic FHA multifamily insuring authority) pursuant to section 223(f) (authority to insure existing multifamily properties) and section 244 (authority to enter into coinsurance contracts) of that Act and the "regulations implementing those sections as set forth in Part 255." This interim rule deletes the quoted material as unnecessary and confusing.

Section 255.4 Effect of availability of coinsurance on insurance otherwise authorized. This section states that the full insurance authorized under the National Housing Act shall not be withdrawn, denied or delayed by reason of availability of coinsurance under Part 255. This section reflects a requirement found in section 244(e) of the National Housing Act and remains unamended.

Section 255.5 Effect of availability of coinsurance on flow of mortgage credit to older, declining areas. This section states that insurance will continue to be available under Part 255 only to the extent the Secretary determines its availability does not adversely affect the flow of mortgage credit to older and lower cost housing. Insurance under Part 255 will not be available for mortgages on properties which are eligible to be insured solely pursuant to the authority of section 223(e) of the National Housing Act (special insurance for properties in older declining urban areas).

This interim rule corrects an error in this section by providing that the Secretary must determine that the availability of coinsurance does not adversely affect the flow of mortgage credit "to older and declining neighborhoods and to the purchasers of older and lower cost housing." This more accurately reflects the statutory requirement found in section 244(e) of the National Housing Act.

Section 255.6 Safeguards for consumers. Paragraph (a) of this section provides that the inspection of repairs and improvements on projects coinsured under Part 255 shall be conducted in accordance with the intent of minimum property standards and criteria set forth in Subpart S of Part 200 of the CFR. Paragraph (b) provides that principals involved in Part 255 projects are subject to the Previous Participation and Review Procedure of §§ 200.210–200.218 of Part 200. Paragraph (c) states that the Secretary is responsible for compliance with the National Historic Preservation Act to the extent applicable to properties repaired with assistance under Part 255. This section remains unamended.

Section 255.7 Definition of private lender. Originally, this section limited participation in the Part 255 program to lenders which were insured depository institutions. On March 31, 1982, the section was amended to expand eligibility to lenders meeting the requirements of §§ 203.3 through 203.6 of 24 CFR (approval of FHA mortgagees), plus the additional requirements concerning technical review and sound capital resources set forth in §255.102. In effect, this amendment extended participation in the program to private mortgage companies. In this interim rule eligibility is further extended to lenders meeting the requirements of §203.8(b) (State Housing Agencies). To conform with this change, the heading of the section is changed to *"Definition of lender"*.

Section 255.8 Definitions. This section contains definitions of certain technical terms used throughout Part 255. On March 31, 1982, a new paragraph (h), providing a definition of the term "sound capital resources", was added to this section. In this interim rule the subsection remains as published in March 1982, except that an unconditional irrevocable "letter" of credit (rather than "line" of credit) will be treated as a "sound capital resource." The reason for this change is discussed under §255.101, below.

Also, a provision is added stating that, for purposes of this definition, a loss reserve established with respect to coinsurance liability and treated as a liability in the lender's balance sheets, may be treated as a capital item rather than a liability. (See also comments on §255.102 (b) infra.)

The rule also specifies that a "mortgage insurance premium" is a premium collected pursuant to § 255.402(a). This is to distinguish clearly the required FHA premium due HUD from any reinsurance fee or premium collected on behalf of the lender. (See § 255.402(b)

Subpart B—Approval of Lender as Coinsurer

The heading of Subpart B is revised in this interim rule to read "Subpart B—Approval of Lender as Coinsurer."

Section 255.101 Review of operation prior to approval as coinsurer. This section provides that a lender (as defined in § 255.7) currently approved as an FHA mortgagee may, upon request, be approved for participation in the Part 255 program after a review of the lender's operations by HUD as prescribed in § 255.102. Section 255.101 was amended in March 1982 to make a technical correction to a cross reference to §§ 203.3 through 203.6 of 24 CFR, relating to requirements for approval as an FHA mortgagee. This interim rule extends the cross reference additionally to § 203.8(b), in order to include State Housing Finance Agencies as eligible lenders. It also substitutes the more general term "lender" for the term "private lender" in the first sentence in recognition of this expansion of eligibility.

Section 255.102 Technical review before approval as a coinsurer. This section requires a lender to undergo an on-site technical staff and procedural review before being approved as a Part 255 coinsurer. As part of the review, the following special requirements must be met: (a) opinion of Counsel on legal authority to participate in the program; (b) evidence satisfactory to the Commissioner that the lender has "sound capital resources"; (c) evidence satisfactory to the Commissioner that the lender has the technical capability, either directly or through contract, to carry out necessary underwriting, servicing, management and property disposition functions; (d) agreement to submit to periodic auditing and review by the FHA Commissioner, Inspector General of HUD or the Comptroller General of the U.S.; (e) submission of the lender's most recent detailed audit report of its books by an independent public accountant; (f) agreement to file with the FHA Commissioner similar independent audits on an annual basis; (g) agreement to notify the FHA Commissioner of any adjustments in its processing procedures and to make no adjustments inconsistent with the requirements of Part 255; (h) adequate technical staff in its immediate employ; (i) a staff competent to monitor the performance of any technical work it contracts to have done in its immediate employ; (j) appraisers assigned by the lender to determine the value of coinsurance properties who meet minimum education and experience standards established by the Commissioner; (k) satisfactory proof that the lender has the capacity to service mortgages coinsured under Part 255; and (1) agreement to abide by all applicable requirements issued by the Commissioner for discharging its coinsurance functions under Part 255.

Paragraph (b) of this section (relating to the sound capital resources requirement) was amended on March 31, 1982. Before that time the lender was required to submit such evidence as the Commissioner might require regarding net worth, surplus accounts, equity capital or other similar category satisfactory to the Commissioner of at least $1 million, and acceptable evidence that its assets were properly proportioned to its liabilities and were adequate for the character and extent of its intended operations. The March 1982 amendment (which was published in conjunction with an extension of program eligibility to private mortgage companies) requires that lenders have "sound capital resources" (as defined in § 255.8(h)) of not less than $1.5 million, which includes at least $500,000 in the form of liquid funds or an unconditional irrevocable firm line of credit from a supervised financial institution. The lender is also required to agree that during the period of coinsurance it will maintain these "sound capital resources," plus an additional amount of one dollar of sound capital resources for each 300 dollars of outstanding principal indebtedness of mortgages it has coinsured under this part.

In this interim rule language with respect to the requirement for sound capital resources is clarified to specify that no more than $500,000 of the sound capital resources requirement may be met by an unconditional and irrevocable letter of credit. The term "letter of credit" has been substituted for "line of credit" to assure that the lender's undertaking differs from the traditional warehousing line of credit. It is intended that the letter of credit be issued for Section 223(f) coinsurance purposes only. The dollar ceiling of $500,000 for the letter of credit is intended to assure that a lender cannot meet the sound capital resources requirement predominantly from a letter of credit, since such a letter, when drawn upon, entails an offsetting liability.

Paragraph (c) requires coinsured lenders to have ability, either directly or by contract, to carry out full mortgage underwriting, servicing, and management and property disposition functions. The interim rule expands this paragraph (1) to require that coinsured lenders have operating procedures, as well as the ability, to carry out these functions, and (2) to specify that activities covered include property repair and other necessary functions. This is intended to make explicit the full range of activities which coinsured lenders are expected to carry out. Paragraphs (h) and (k) currently require coinsured lenders to be able to carry out themselves some of the same functions which paragraph (c) permits them to perform by contract. These paragraphs are deleted as confusing and inconsistent.

Section 255.103 Duration of approval. Certification as an approved coinsurer under § 255.102 will be valid until the Secretary's authority to coinsure expires, unless this approval is withdrawn pursuant to § 255.104. This section remains substantially unamended.

Section 255.104 Withdrawal of approval. This section sets forth the conditions under which certification as an approved lender under Part 255 may be suspended or withdrawn. Such an action would be carried out under the provisions of Part 24 which govern the debarment, suspension and ineligibility of HUD contractors and grantees. Except for a technical correction in March of 1982 of an improper cross reference, and the substitution in this interim rule of the more general term "lender" for "private lender", this section remains unamended.

Section 255.105 Effects of withdrawal or suspension of approval as a coinsurer on insurance commitments made by the coinsurer while it was approved. This section remains unamended. It states that withdrawal or suspension of approval will not affect commitments made, or the insurance of mortgages accepted for insurance, while the lender was an approved coinsurer

Section 255.106 Mortgage servicing and insurance of lender's risk. As originally promulgated on July 2, 1980, this section authorized the lender to delegate its servicing functions, provided that the lender retained its Part 255 coinsurance obligations. The lender was required to inform HUD of any servicing transfers and could be required to rescind any servicing so delegated if the servicing is unsatisfactory to HUD. During the coinsurance period, the lender was prohibited from transferring its risk of loss as a result of default, through reinsurance or otherwise.

In March 1982, this section was amended to require that the entity

VOL 48 ISS 102 MAY 25 1983 UMI

delegated servicing functions be a HUD-approved mortgagee pursuant to 24 CFR 203.1 through 203.6 and 203.8. Those sections set forth the requirements, including net worth requirements, that must be met by a HUD-approved mortgagee.

This interim rule retains the March 1982 requirement that the servicer be a HUD-approved mortgage, but adds a condition that any servicing must be consistent with any applicable contractual requirements the coinsuring lender may have entered into. Specifically, if the lender is also a GNMA issuer of mortgage backed securities, it must comply with GNMA policy with respect to servicing. Under this interim rule, the lender also may obtain insurance for all or part of its coinsurance risk as further described below. If such insurance is obtained, the insurance policy is required to name the FHA Commissioner as a contingent beneficiary in the event that default by the lender results in payment by the Commissioner of any amounts contractually owed by the lender to investors in GNMA securities backed by coinsured mortgages.

Essentially, there are now two options for insurance of coinsurance risk. Under the first option, the coinsuring lender may insure, with a licensed mortgage guaranty insurer, 50% of its coinsurance liability. For this option, the loss-sharing formula distributing the losses between HUD and the lender remains the same, i.e., the lender assumes the top portion of the loss up to 5% of the mortgage outstanding at default and then shares (in an amount of 15%) with HUD in any remaining loss.

Under the second option, the lender may insure either 100% of its coinsurance liability or that part of the coinsurance risk which equals the maximum amount which the mortgage guaranty insurer is authorized to insure. If the lender does so, the loss-sharing formula changes as described in new § 255.425(c): i.e., the lender assumes the top portion of the loss up to 5% of the mortgage outstanding at default and the next 15% of any remaining loss, and then shares (in an amount of 15%) with HUD in any remaining loss. Arithmetically, the coinsurer's liability is equal to the 5% deductible plus 27.75% (15% plus 15% of the residual 85%) of the remaining loss; HUD's liability is 72.25% (85% of 85%) of the loss remaining after the 5% deductible.

Both this section and § 225.425(c) allude to "the maximum amount which the insurer is authorized to insure." This will generally be stated in terms such as "25% at risk of the entire indebtedness to the insured," which possibly, although not probably, will be a lesser amount than the coinsuring lender's potential loss. Although there is nothing in this interim rule which specifically precludes the lender from obtaining additional insurance from another source, or the insurer from reinsuring a part of the risk, the limitation of .25% per annum which the lender may charge the mortgagor for such insurance might tend to restrict the attractiveness of this additional insurance.

HUD would prefer that the lender retain its coinsurance liability to assure careful underwriting. If only 50% of the lender's coinsurance liability is insured, the lender is still at risk. With 100% insurance of such risk, or with the maximum insurance which the mortgage guaranty insurer is permitted to underwrite, that risk is substantially, but not necessarily entirely removed. By increasing the proportion of loss which the mortgage guaranty insurer must bear if there is maximum insurance of the coinsurance risk to the 5% deductible plus 27.75% of the remaining loss, HUD is increasing the incentive of the insurer to bring about good credit underwriting by the lender. In addition, the lender has an incentive to provide good underwriting to maintain its status as a HUD-approved mortgagee/GNMA issuer.

In keeping with the addition of authority to insure the lender's risk, the heading of this section is amended to read "Mortgage servicing and insurance of lender's risk."

Section 255.107 Required regulatory agreement with mortgagors. Paragraph (a) of this section requires the lender and mortgagor to enter into a contract whereby the mortgagor agrees to fulfill the provisions of §§ 255.222 through 255.226, relating to lender supervision of mortgagor's rents, sales, charges, capital structure, rate of return, methods of operation, nondiscrimination, etc. Paragraph (b) authorizes the lender to regulate the mortgagor, as a condition to making the loan, on other matters as it may require insofar as such conditions do not conflict with the requirements of the FHA Commissioner under Part 255. This section remains substantially unchanged.

Subpart C—Eligibility Requirements Applicable to Mortgages Coinsured Under Section 207 Pursuant to Section 223(f)

Section 255.201 Application. The application for a commitment to make a coinsured mortgage loan shall be submitted by the project sponsor to the lender. The lender will act as agent for the Secretary and may require such exhibits as it deems necessary to comply with the requirements of Part 255. This section remains unamended.

Section 255.202 Application fees, inspection fees, and service charges. The lender may collect from the mortgagor such application, inspection and initial service charges as it may require to reimburse itself for application, inspection and closing costs. In no event will the total fees be permitted to exceed those allowed in the fully insured Section 223(f) program—insurance of mortgages covering existing multifamily properties. This interim rule revises this section to give the Commissioner discretion to allow charges in excess of those permitted under section 223(f) where necessary. This is intended to assure that coinsured lenders, where necessary, are eligible to receive reimbursement consistent with their responsibilities under the program.

Section 255.203 Processing and commitment. The lender shall, as agent for the Secretary, perform all of the processing, including the issuance of both conditional and firm commitments, and make all of the determinations of the eligibility of a mortgage for coinsurance. The firm commitment to coinsure upon completion shall be effective for 90 days, with provision for amendment or reopening of an expired commitment upon application to the Commissioner. This rule deletes, as unnecessary, the requirement that the Commissioner approve each extension, amendment or reopening of a commitment. This is consistent with HUD's policy of delegating as much responsibility as possible to coinsured lenders.

Eligible Mortgages

Section 255.208 Refinancing of mortgages in portfolio. This section authorizes the Commissioner to coinsure mortgages refinancing loans already held in an approved lender's portfolio if (a) the loan is current in payments and has not been in default, modification, or forbearance at any time during a continuous period of at least two years preceding the date of insurance application, and (b) the number of such loans do not exceed one-fourth of the total number of loans submitted by the lender for coinsurance under Part 255 in any period of twelve consecutive months. The Commissioner retains discretion to review, before commitment, the lender's property appraisal and mortgage credit analysis with respect to such transactions.

This section was not amended in March 1982, but this interim rule amends the section to provide that the Commissioner may grant permission to

exceed the one-fourth limit on refinancing loans already held in an approved lender's portfolio, if the additional refinancing relates to Target Area Preservation projects which meet the eligibility requirements of 24 CFR 207.32a(1). This amendment is made in response to concern expressed by potential loan originators already involved in urban neighborhood rehabilitation that the 1:4 portfolio restriction could penalize this worthwhile lending activity by limiting arbitrarily the number of projects in such areas which could benefit from Section 223(f) refinancing. The Department wishes to encourage, not place restrictions on, use of Section 223(f) coinsurance to facilitate financing of housing conservation in older urban neighborhoods.

The interim rule also provides that the Commissioner retains discretion to review the "entire loan transaction" before commitment. Previously this review was limited to review of property appraisal and the mortgage credit analysis. The Department believes review of an entire loan transaction may sometimes be necessary, especially where the parties have a community of interest as, for example, that between a parent company and its subsidiary or an affiliate. For this reason the rule also broadens the concept of a lender's portfolio to also include the portfolio of any "related entity".

Section 255.209 Mortgage provisions. This section provides that the mortgage shall be on a form approved by the Commissioner; executed by a qualified mortgagor; and be a first lien on property that conforms with the intent of the property standards prescribed by the Commissioner. This section remains unamended.

Section 255.210 Mortgage lien and other obligations. This section provides that the mortgagor shall certify at endorsement of the loan for insurance and the lender shall determine that:

(a) The property covered by the mortgage is free and clear of all liens other than the insured mortgage and such other liens as may be approved by the lender, in accordance with standards established by the Commissioner.

(b) There will not be outstanding unpaid obligations contracted for in connection with the project except obligations approved by the lender, in accordance with standards established by the Commissioner.

(c) When a loan is made to finance the purchase of an existing multifamily housing project, the mortgagor may not have any additional obligations in connection with the transaction which exceed the lesser of (1) seven and one-half percent of the lender's estimate of value; *or* (2) seven and one-half percent of the cost of acquisition.

(d) When a loan is made to refinance an existing multifamly housing project, the mortgagor may not have any additional obligations in connection with the transaction which exceed the lesser of (1) seven and one-half percent of the lender's estimate of value *or* (2) fifty percent of the difference between the cost to refinance (as defined in § 255.211(c)(2)) and the maximum mortgage amount, as determined by the lender.

(e) The additional obligations of the mortgagor, provided for in paragraphs (c) and (d), shall be represented by promissory notes on forms approved by the Commissioner which shall not be due and payable until the maturity date of the coinsured mortgage, but may be prepaid from surplus cash or residual receipts.

This interim rule adds a new paragraph (e) to this section (redesignating the existing paragraph (f)). The new paragraph states that, for projects which meet the eligibility requirements of 24 CFR 207.32a(1) (Target Preservation Area Projects), the limitations with respect to secondary financing found in § 207.32a(j)(4) shall apply. This amendment is added to assure that housing projects in Target Preservation Areas financed under the coinsurance program enjoy mortgage terms comparable to those financed under the Section 223(f) full insurance program. (See also amendments with respect to these areas in §§ 255.211 and 212).

Section 255.211 Maximum mortgage amount. This section sets forth the maximum mortgage amounts which may be insured under Part 255.

(a) Paragraph (a) sets forth specific dollar limitations per family unit which vary according to the number of bedrooms and type of structure—whether elevator or non-elevator. These limitations may be increased by up to 20 percent where the purchase and installation of a solar energy system is involved. They may be increased by up to 75 percent (or by up to 90 percent on a project-by-project basis) in high-cost areas designated by the Commissioner. If the Commissioner finds it necessary due to high costs in Alaska, Guam and Hawaii, these limitations, including high-cost area increases, may be further increased by up to 50 percent.

This rule amends this paragraph to authorize increases on a project-by-project basis of up to 140 (rather than 90) percent, provided that there is no GNMA purchase commitment involved. If such a purchase commitment is involved, the increase would continue to be limited to 90 percent. This new authority to increase mortgage limits was provided in the Further Continuing Appropriations Act of 1983. (Pub.L. 97-377)

Paragraph (b) limits the principal obligation of any insured mortgage to 85 percent of the lender's estimate of value. Value is to be determined in accordance with specific criteria set forth in the paragraph. This interim rule amends this paragraph to permit a principal obligation of up to 90 percent of value if the project meets the eligibility requirements contained in § 207.32a(1)—Target Preservation Area projects. The amendment is intended to further the Department's policy of encouraging the financing of housing rehabilitation in older urban neighborhoods, by providing mortgage terms for coinsured Target Preservation Area projects comparable to the favorable terms enjoyed by these projects under the section 223(f) full insurance program.

Paragraph (c) provides that, if the property is to be refinanced by the insured mortgage, the maximum mortgage amount shall not exceed the greater of (1) 70 percent of value or (2) the cost of refinancing existing indebtedness (which may include estimated repair costs). This paragraph remains unamended.

Paragraph (d) provides that if the property is to be acquired by the mortgagor, the maximum amount shall not exceed 85 percent of the cost of acquisition (which may include estimated repair costs). This interim rule amends this paragraph to permit a mortgage amount of up to 90 percent of cost of acquisition, if the project meets the eligibility requirements contained in § 207.32a(1)—Target Preservation Area projects.

Paragraph (e) requires that debt service on the mortgage must be an amount which can be amortized by 85 percent of the projected net income of the project after payment of operating expenses and taxes. This paragraph remains unamended.

Paragraph (f) requires that, if a mortgage is secured by a leasehold, the value of the property covered by the mortgage shall be the value of the leasehold estate. This paragraph remains unamended.

Section 255.212 Maturity. The mortgage shall have a maturity of not less than 10 years nor more than the lesser of 35 years or 75 percent of the estimated remaining economic life of the physical improvements. This interim rule amends the section to permit a

VOL 48 ISS 102 MAY 25 1983 UMI

maximum term of 40 years or 100 percent of the estimated remaining economic life, if the project meets the eligibility requirements of § 207.32a(1)—Target Preservation Area project. As in § 255.211(b) and (c), the intent of the amendment is to further the Department's policy of encouraging the financing of housing rehabilitation in older urban neighborhoods.

Section 255.213 Payment Requirements. Payments shall be monthly in accordance with an amortization plan agreed upon by mortgagor and lender. The FHA Commissioner may prohibit specific types of mortgage instruments which would have the effect of automatically adjusting the mortgage interest rate as established at the time of endorsement of the loan. This section remains unamended.

Section 255.214 Maximum mortgage interest rate. This section provides that commitments to insure shall be issued at an interest rate not exceeding any HUD limit applicable to section 233(f) loans at the time of commitment. Provision is made for the issuance of amended commitments at higher rates if certain conditions are met. This interim rule does not amend this section except to correct a typographical error (changing the word "request" to "issue") in the fourth sentence of paragraph (b).

Section 255.215 Mortgage to cover the entire property. The mortgage must cover the entire property included in the housing project. This section remains unamended.

Section 255.216 Covenant for hazard insurance. The mortgage shall contain a covenant to keep the property insured against loss from fire or other hazards for no less than 80 percent of the actual cash value of insurable improvements and equipment. This interim rule amends the section by adding a requirement that the lender be responsible for verifying that hazard insurance remains in force. This will help preserve HUD's financial interest in the coinsured property. It also adds a new paragraph (b) requiring the lender to ascertain the general physical condition of the mortgaged property in each calendar year. The lender shall furnish the mortgagor and HUD a copy of its inspection report, which shall contain the lender's recommendations for any necessary corrective actions. This inspection requirement is consistent with a similar requirement found in § 207.260. Also, this rule changes the heading of this section to read *"Hazard insurance and physical inspection."*

Section 255.217 Soundness of project. No mortgage shall be insured unless the lender finds that the property is economically sound or, in Alaska, Guam or Hawaii, unless the lender, with prior notice to the FHA Commissioner, finds the property an acceptable risk giving consideration to the acute housing shortage in those areas. This section remains unamended.

Section 255.218 Accumulation of accruals. This section provides for the timely accrual, through equal monthly payments, of amounts needed for mortgage insurance premiums, taxes, insurance, ground rents or other special assessments. The rule makes no substantive change to this section.

Section 255.219 Application of mortgage payments. This section provides for a single monthly payment by the mortgagor to be applied by the lender in a specified order to the various items required by the mortgage transaction. The section remains unamended.

Section 255.220 Prepayment privileges. The mortgagee may establish such conditions or penalties for prepayment as may be agreed upon by the mortgagee and mortgagor.

The rule amends this section to implement the prepayment restrictions contained in section 223(f) of the National Housing Act. The restrictions are similar to those found in § 207.32a(e)(2) with respect to the Target Area Preservation Program. Generally, prepayment is prohibited (except as required by the Commissioner) for a period of five years unless specified conditions are met demonstrating that prepayment does not adversely affect the provision of adequate rental housing opportunities for low- and moderate-income families.

Section 255.221 Late charges. This section makes provision for the collection of late charges by the lender. It remains unamended.

Supervision of Mortgagors

Section 255.222 In general. In order to be eligible for insured financing, the mortgagor must agree to be regulated by the lender as to rents, sales, charges, capital structure, rate of return, and methods of operation. This section remains unamended.

Section 255.223 Required supervision of mortgagors. This section states that the regulatory agreement required by § 255.107 shall provide that the following items are regulated or restricted as follows:

Paragraph (a) of this section, relating to capital structure, is revised to reflect the fact that the capital structure has been agreed upon before entering into a regulatory agreement and to specify that this structure may not subsequently be changed without the lender's approval.

Paragraph (b), relating to rate of return, contains a technical revision requiring segregation of "an amount equal to the project's total liability for tenant security deposits" rather than segregation of "all tenant security deposits held". It also deletes obsolete references to "dividends".

Paragraph (c), relating to regulation of rents and charges, is revised to delete the requirement for FHA Commissioner review of any charges to be made by the mortgagor for facilities or services offered by the project in excess of those approved by the lender before opening of the project for rental. In lieu of this requirement, the lender would be subject to standards established by the Commissioner with respect to such charges. This is in keeping with HUD policy of delegating servicing and processing functions to the maximum extent feasible under its coinsurance programs.

Section 255.223(d)(4) is revised to include the Inspector General of HUD among the parties to whom the mortgagor's books will be made available for examination and audit, and to provide that the mortgagor's books shall be kept in accordance with requirements of the FHA Commissioner as well as those of the lender. Specific requirements concerning certification of the availability of such books and records by the mortgagor are deleted as unnecessary. The Department believes wide availability for inspection and establishment of specific bookkeeping requirements by the Commissioner provide a more effective method of oversight than the present certification process. The rule also deletes duplicative and unnecessary language regarding the form and timing of submissions of required annual financial reports from the mortgagor.

This interim rule also adds a new paragraph (e) to this section relating to investment of reserves. Money placed in the Reserve for Replacements shall be invested to earn interest in interest-bearing deposits that are Federally insured, in Treasury securities, or in securities issued by a Federal agency or a Federally sponsored agency.

Section 255.224 Nondiscrimination in housing. This section requires the mortgagor to certify in the regulatory agreement required by § 255.107 that, so long as the mortgage is coinsured, the mortgagor will comply with certain specified requirements relating to nondiscrimination in housing. This interim rule amends the section to delete the certification requirement as an unnecessary formality, substituting a requirement (which reflects current practice) that the regulatory agreement contain these nondiscrimination provisions.

Section 255.225 Discrimination in employment. This section requires the mortgagor to certify that it will not discriminate against any employee or applicant for employment. This interim rule amends that section to delete the certification requirement, substituting a requirement that the regulatory agreement contain these nondiscrimination provisions.

Section 255.226 Covenant regarding use of property. This section requires the mortgage to contain a covenant prohibiting the use of the property covered for any purpose other than that for which it was intended at the date the mortgage was executed. The section remains unamended.

Property Requirements

Section 255.227 Eligibility of property. The mortgage, to be eligible for insurance, must be on real estate held in fee simple or on certain specified types of long-term leasehold interests. Also, it must be free and clear of liens except those approved by the lender. This section remains unamended.

Section 255.228 Development of property. Paragraph (a) of this section states that the mortgagor shall be obligated to either purchase or refinance existing housing and make such repairs and improvements as are deemed necessary by the lender. The property must not require substantial rehabilitation, as defined in the section. This interim rule revises the paragraph to make clear that the prohibition against substantial rehabilitation means rehabilitation which consists of repairs, replacements and improvements in excess of the limitations set forth in paragraph (c).

Paragraph (b) requires the mortgagor to include a plan to minimize involuntary displacement of tenants if it is contemplated that repairs financed with insured mortgage proceeds will cause involuntary displacement. This paragraph remains unamended.

Paragraph (c) defines a property requiring substantial rehabilitation. These are properties which do not provide safe and adequate shelter, and in their present condition endanger the health and well-being of the occupants. Such housing has a critical defect (defined in paragraph (e)) or combination of critical defects requiring extensive repair or rebuilding, or necessitating required repairs the cost of which would exceed the greater of: (1) 15 percent of the property's value after repairs; or (2) $3,000 per dwelling unit, or such higher amount that the FHA Commissioner determines is justified when compared with amounts expended in the area for the majority of other rehabilitation projects assisted by the Department.

This interim rule extensively revises paragraph (c). Its heading is changed from "Properties requiring substantial rehabilitation" to "Limitation on cost and nature of repairs, replacements, and improvements". A property would be deemed eligible for Part 255 mortgage insurance if (1) the cost of repairs, replacements and improvements does not exceed the greater of (A) 15 percent of the property's value after completion of all repairs, replacements and improvements, or (B) $6,500 (adjusted by any applicable high-cost area factor) per dwelling unit, and (2) no more than one major building component is being replaced. The term "high-cost area factor" refers to the percentage increases over basic dollar limitations per dwelling unit authorized in § 255.211(a)(4) and the term "major building component" includes roof structures; ceiling, wall or floor structures; foundations; elevators; and plumbing, heating, air conditioning or electrical systems.

Paragraph (d) provides that, in determining whether a property exceeds the substantial rehabilitation threshold described in paragraph (c), the lender may exempt (from the total which must not exceed the threshold), the purchase price, but not the installation cost of, certain specific items of replacement such as ovens, refrigerators, etc., or fire safety equipment required by Federal, State or local law. This paragraph remains unamended.

Paragraph (e) defines the term "critical defect" as including, but not limited to, certain specified types of defects or hazardous conditions. This interim rule deletes this definition as unnecessary, since the term "critical defect" is no longer used in this section as amended.

Paragraph (f) is redesignated as paragraph (e). It provides that a project shall consist of not less than five dwelling units. The substance of the paragraph remains unamended.

Paragraph (g) is redesignated as paragraph (f). It provides that, in order to be eligible for mortgage insurance, 3 years must have elapsed from the date of completion of the project or beginning of occupancy (whichever is later) to date of application for mortgage insurance. This interim rule substitutes a more specific reference to "completion of construction or substantial rehabilitation of the project" for the term "completion of the project."

Paragraph (h) is redesignated as paragraph (g). It relates to financial viability. A project must have attained sustaining occupancy before endorsement of the mortgage for insurance, or else the mortgagor shall provide an operating deficit fund in an amount approved by the lender at the time of endorsement. This paragraph remains unamended.

Section 255.229 Commercial facilities. The project may include such commercial and community facilities as the lender determines to be appropriate to serve the occupants. In no event shall net rentable commercial area exceed 20 percent of total net rentable area unless this limitation is waived, for good cause, by the Commissioner. This section remains unamended.

Title

Section 255.230 Eligibility of title. The lender must determine that marketable title is vested in the mortgagor as of the date the mortgage is filed for record. This section remains unamended.

Section 255.231 Title evidence. This section requires a policy of title insurance or other specified evidence of title to be furnished the lender by the mortgagor upon insurance of the mortgage. This section remains unamended.

Cost Certification Requirements

Section 255.232 Agreement to certify cost requirements. Before the commencement of repairs and endorsement of the loan, the lender shall enter into an agreement with the mortgagor wherein the mortgagor agrees to (1) execute a certificate of actual costs upon completion of all physical improvements and (2) accept the mortgage loan reduced by the amount, if any, required by § 255.239. This section remains unamended.

Section 255.235 Certificate of actual cost—contents in general. The mortgagor shall submit a certificate of actual cost to the lender before endorsement and upon completion of the improvements to the satisfaction of the lender. This submission is not required in those refinancing transactions where 70 percent of value is the controlling mortgage limitation. Items to be included if paid by the mortgagor in acquiring property are listed in § 255.211(d). Items to be included if paid for by the mortgagor in refinancing property are listed in § 255.211(c)(2). This section remains unamended.

VOL 48 ISS 102 MAY 25 1983 UMI

Section 255.239 Reduction in mortgage amount. If the principal obligation of the mortgage exceeds the applicable statutory percentage of the approved actual cost, the mortgage shall be reduced by the amount of such excess before endorsement for insurance upon completion. This rule amends the section to make clear that the principal obligation limitations referred to are those established pursuant to § 255.211 (Maximum Mortgage Amounts).

Section 255.240 Requisites of certification of actual costs. A statement of certification of actual costs shall specifically state that it has been made, presented and delivered for the purpose of influencing an official action of the FHA Commissioner and the lender as a true statement of the facts contained therein. This section remains unamended.

Section 255.241 Cost certification incontestable. Upon lender approval of the mortgagor's certification, it shall be final and incontestable except for fraud or material misrepresentation on the part of the mortgagor. This section remains unamended.

Subpart D—Contract Rights and Obligations

Section 255.401 Insurance endorsement of mortgage. Upon compliance with a commitment, the FHA Commissioner will insure the lender against a portion of losses resulting from nonpayment of the debt, evidencing the insurance by an appropriate endorsement placed on the original credit instrument. This interim rule amends the third sentence of this section to make clear that endorsement of the credit instrument is in fact made by the HUD Area Manager, Service Office Supervisor or other designee.

Section 255.402 Amount of MIP collected from the mortgagor. The lender shall collect from the mortgagor MIP from the date of the contract of coinsurance which shall not exceed an initial MIP of one percent of the principal obligation for the first year of the mortgage and 0.5 percent per annum of the amount of the principal obligation of the mortgage outstanding any time thereafter, without taking into account delinquent payments or prepayments. This interim rule makes clear that the lender shall collect an initial MIP not to exceed one percent per annum of the average outstanding principal balance of the mortgage from the date of contract insurance to one year after the first payment to principal, and thereafter an MIP not to exceed .5 percent per annum of the average outstanding principal balance of the mortgage. This change is made to facilitate HUD's method of accounting for MIP payments.

The rule also adds a new paragraph (b) to this section which provides that, in addition to the MIP required by the FHA Commissioner, beginning not earlier than 12 months after the date of the first payment to principal, the lender may charge the mortgagor an additional annual reinsurance premium for the account of the lender, or a reinsurer, not in excess of .25 percent per annum of the amount of the average annual outstanding principal balance of the mortgage, without taking into account delinquent payments or prepayments. This charge would help cover the cost of reinsurance or of self-insurance by the lender. The .25 percent charge would be subject to any requirements with respect to duration of charge, pro rata payments, etc., that the Commissioner may establish.

Section 255.403 Method of payment of MIP. Payments of MIP to the FHA Commissioner by the lender shall be made annually, in cash or debentures, on a level percentage of the declining principal balance. This rule remains unamended.

Section 255.404 Annual payment of MIP on a level percentage of the declining principal balance. Originally, this section provided that, from the proceeds of the premium collections authorized in § 255.402, the lender would pay to the FHA Commissioner on the effective date of the contract of coinsurance, a first-year mortgage insurance premium, covering a period of one year, equal to 0.75 percent of the outstanding principal balance of the mortgage. Each year thereafter, the lender, on the anniversary date of the contract of coinsurance, was required to pay a premium for the following year, equal to 0.38 percent per annum of the average outstanding principal obligation of the mortgage.

On March 31, 1982, this section was amended by increasing the required initial premium payment from 0.75 percent to 1.0 percent, and by increasing the annual payments thereafter from 0.38 percent per annum to 0.4 percent per annum.

This interim rule further amends this section to accommodate the Department's technical accounting procedures. The initial one percent premium requirement is modified to provide for collection in two installments, one at insurance endorsement (when the coinsurance contract becomes effective), the other at the date of first payment to principal, with the combined payments adding up to one percent of the average principal balance outstanding from the date of insurance endorsement to one year following the initial payment to principal.

The interim rule also changes the heading of this section to read "Payment of MIP by the lender.".

Section 255.405 Duration of MIP. The MIP shall continue to be paid until (1) the mortgage is paid in full, (2) a deed to the lender is filed for record, or (3) the coinsurance contract is otherwise terminated with the consent of the FHA Commissioner. This section remains unamended, except for the correction of a cross reference to § 255.404.

Section 255.406 Pro rata payment of annual MIP. If the contract of coinsurance is terminated by prepayment or voluntary termination after the due date of the initial first year MIP, the FHA Commissioner shall refund to the lender for the account of the mortgagor that portion of the current annual MIP applicable to the portion of the year subsequent to the date of termination. This section remains unamended, except for the correction of a cross reference to § 255.404.

Section 255.407 Late charge—payment of MIP. Mortgage insurance premiums which are paid to the FHA Commissioner more than 15 days after the billing date or due date, whichever is later, shall include a late charge of 4 percent of the payment due.

This interim rule adds a new paragraph (b) to this section which provides that, in addition to the 4 percent late charge, MIP paid to the FHA Commissioner more than 30 days after billing date or due date, whichever is later, shall be subject to interest from the billing or due date at a rate set in conformity with the Treasury Fiscal Requirements Manual. The Treasury Fiscal Requirements Manual prescribes that an interest charge, computed using the current value of funds to the Treasury, be assessed on overdue payments to Federal departments and agencies.

Section 255.408 Assignment of coinsured mortgages. This section was added to Part 255 on March 31, 1982. It permits a lender to assign or transfer a coinsured mortgage if (1) the assignee is an FHA-approved coinsuring mortgagee, (2) the lender shows good cause for such assignment, (3) the FHA Commissioner finds the assignment is for good cause and that there will be an advantage to the FHA, and (4) the FHA Commissioner gives prior written approval for such assignment.

This interim rule revises requirement numbered (3) above to read "the Commissioner finds that such assignment is for good cause and that there will be no disadvantage to FHA." The original language would have been exceedingly difficult to interpret in HUD's Handbook Instructions, because it required a finding that loan assignment by the originator to another approved lender would result in an advantage to FHA. In reality, the impact of such assignment need only be neutral, i.e., no disadvantage.

Default Under the Mortgage

Section 255.410 Definition of default. This section provides that failure to make any payment due under the mortgage, or failure to perform any other covenant, if the lender because of such failure accelerates the debt, shall be considered a default. This section remains unamended.

Section 255.411 Date of default. This section specifies that the date of default shall be considered as 30 days after the first uncorrected failure to perform any obligation under the mortgage or the first failure to make a monthly payment which is not covered by subsequent payments. This interim rule amends this section to establish the date of default as the date of failure to perform or make payment. This change is consistent with § 207.255(d). See also the discussion of public comment 7, above.

Section 255.412 Notice of default. The language of the current section provides that, within 30 days after the date of default, the lender shall give written notice to the FHA Commissioner. This interim rule amends the section to provide that if the default, as defined in § 255.410, continues for a period of 30 days, the lender shall, within 30 days thereafter, give written notice of the default to the Commissioner, unless the default has been cured or the Commissioner has been notified of a previous default which remains uncured. This change retains the current 30-day grace period after default before procedures to acquire title to the property can be taken.

Section 255.413 Reinstatement of a defaulted mortgage. If before completion of foreclosure proceedings the mortgagor cures the default, insurance shall continue as if a default had not occurred. This section remains unamended.

Section 255.414 Forbearance relief. The mortgagor and lender may enter into an agreement for the reduction or suspension of regular mortgage payments, according to standards set forth by the FHA Commissioner, provided that during the forbearance period all project income from rents or other sources are applied toward payment of operating costs, with any excess applied toward mortgage payments. This section remains unamended.

Termination

Section 255.415 Termination of coinsurance contract. The contract of coinsurance shall be terminated if (a) the mortgage is paid or prepaid in full, (b) the lender acquires the property and notifies the FHA Commissioner that no insurance claim will be made, (c) after a foreclosure the property is redeemed, (d) the property is acquired at a foreclosure sale by a party other than the lender, or (e) the mortgagor and lender jointly request termination. This rule adds a new subparagraph (e), providing for termination of coinsurance if the lender fails to file a claim within the period (generally 12 months and 15 days) prescribed in § 255.424(b). Current paragraph (e) is redesignated as paragraph (f).

Section 255.416 Notice and date of termination by Commissioner. This section requires the FHA Commissioner to notify the lender that the contract of coinsurance on a mortgage has been terminated and to establish the effective termination date. This section remains substantially unamended.

Section 255.417 Effect of termination. Upon termination, the obligation to pay any subsequent MIP shall cease and all rights of the mortgagor and lender under the coinsurance contract shall be terminated. This section remains unamended.

Claim Procedure

Section 255.420 Acquisition of property. After default and determination by the lender to accelerate payment under the mortgage, the lender shall (1) commence foreclosure proceedings or (2) acquire possession of, and title to, the property by other means. The lender shall notify the FHA Commissioner of its election. This section remains substantially the same.

Section 255.421 Deed in lieu of foreclosure. Conveyance of the property by deed in lieu of foreclosure is approved subject to certain specified requirements. This section remains unamended.

Section 255.422 Notice to Commissioner. When the lender elects to acquire title either by foreclosure or deed in lieu of foreclosure, it shall give written notice to the FHA Commissioner of its intention to file a claim for insurance benefits. This section remains unamended.

Payment of Insurance Benefits

Section 255.423 Method of payment. Payment of the insurance claim shall be in cash unless the lender files a written request for payment in debentures. This section remains unamended.

Section 255.424 Disposition of property and application for insurance benefits. Paragraph (a) provides that, upon acquisition of marketable title to the property securing a defaulted mortgage, the lender shall obtain an appraisal of the property by an independent appraiser. The appraisal shall be based upon the market value of the property for use for the market originally intended.

This interim rule amends this paragraph to require the lender to obtain two appraisals of the property by independent appraisers selected from a panel approved by the FHA Commissioner. Appraisals shall reflect the market value of the property, as of the date of acquisition, for its highest and best use.

The term "highest and best use" replaces "for the market originally intended." The latter restricts project value to market value as rental housing. The revised version enables appraisers to take into account the higher value which a project might have as condominium or cooperative housing, or for non-residential commercial use, and thereby minimizes the amount of loss where claims are settled on the basis of an appraisal, rather than through sale of the property by the lender. It is assumed that the lender, in disposing of foreclosed property, will maximize sales proceeds. Confining the value basis to rental housing values could make possible windfall gains for lenders, because HUD's claim payment would be offset only by the lower rental market value of a property. On the other hand, there will be cases where "highest and best use" is continued rental housing use. Thus, this provision will not inevitably lead to conversion of rental housing to condominiums or cooperative tenancy or to non-residential use. In any case, HUD's contract of insurance terminates upon claim settlement and HUD retains no leverage to require continued use of the property as rental housing.

Paragraph (b) authorizes the lender, after sale of the property, or after the expiration of 12 months from acquisition, whichever occurs first, to file with the FHA Commissioner a claim for insurance benefits. To be eligible for payment, a claim shall be filed no later than 15 days after sale, or after expiration of this 12 month period.

VOL 48 ISS 102 MAY 25 1983 UMI

whichever is applicable. This paragraph remains essentially unamended. This rule does, however, clarify the language in the last sentence of the paragraph.

Paragraph (c) provides that, upon making a claim for insurance benefits, the lender shall provide the FHA Commissioner with information concerning any sale of the property and shall assign to the FHA Commissioner any and all claims (other than the mortgage financing the sale) which the lender has acquired in connection with the transaction. This interim rule deletes the requirement that the lender assign any and all claims to the FHA Commissioner. Such claims would instead be listed under § 255.427 as items to be deducted from the payment of insurance benefits.

Paragraph (d) provides that, if the property has not been disposed of at the time of the lender's request for payment, the lender shall utilize, in lieu of the sales price, the appraised value of the property secured in accordance with paragraph (a) in its notification to the FHA Commissioner. This interim rule amends this paragraph to require that the higher of the two appraised values of the property secured in accordance with paragraph (a) be utilized in the notification to the FHA Commissioner.

Section 255.425 Amount of payment. Paragraph (a) provides that the basis for the computation of insurance benefits shall be the sum of the unpaid principal balance on the date of the institution of foreclosure proceedings or on the date of acquisition of the property otherwise after default, plus the amount of all payments made by the lender and allowances for items as set forth in § 255.426 (items included in payment), less all items set forth in § 255.427 (items deducted from payment). This paragraph remains unamended.

Paragraph (b) provides that the amount of total insurance benefits shall be 85 percent of the amount computed under paragraph (a). This interim rule limits this 85 percent payment to cases where the lender has obtained no insurance of its coinsurance risk or has insured 50 percent of its coinsurance risk.

This interim rule also adds a new paragraph (c) to this section which provide for the calculation of insurance benefits where the lender has obtained insurance for either 100 percent of its coinsurance risk or that portion of its coinsurance risk which equals the maximum amount which the insurer is authorized to insure. This calculation is explained in detail in the description of § 255.100, above.

Section 255.426 Items included in payment. This section lists the items upon which insurance benefits are payable. Paragraph (b) of the section lists as a payable item an amount equivalent to debenture interest at the rate established pursuant to § 255.423 on the principal amount of the mortgage which is unpaid on the date of the institution of foreclosure proceedings or on the date of the acquisition of the property otherwise after default, which amount is payable from the date of default to the date of acquisition of title.

This interim rule amends paragraph (b) to provide that, instead of debenture interest, a lender shall receive an amount equivalent to mortgage interest on the principal of the mortgage unpaid on the appropriate date. This change recognizes that upon default, a lender-issuer of GNMA mortgage-backed securities is expected to continue periodic payments to securities holders at the securities interest rate, which is the mortgage interest rate, less the GNMA-approved servicing fee of 0.25 percent. Insurance settlement computed at the debenture rate from time of default to acquisition of title would not fully compensate the lender-insurers' cost of making pass-through payments. Therefore, it is deemed reasonable to pay this category of lenders at the mortgage interest rate. In order not to discriminate against financing which does not involve GNMA, the Department is extending this mortgage interest rate payment policy to all lenders.

Section 255.427 Items deducted from payment. This section lists the items which shall be deducted in the computation of insurance benefits. Paragraph (b) of this section lists as deductible items all amounts received by the lender on account of the mortgage after the institution of foreclosure proceedings or the acquisition of the property otherwise after default.

This interim rule revises paragraph (b) to also include as an additional deductable item "any other reimbursement to the lender other than pursuant to the coinsurance contract." This language enables HUD to reduce the claim settlement by the amount of any other reimbursements which the lender obtains to offset its loss.

The rule revises paragraph (f), relating to the sale of the mortgaged property, to make clear that if the property is not sold within 12 months of acquisition or is sold on a negotiated basis, the higher of the appraised values of the property determined in accordance with § 255.424(a) is to be used in determining the amount of claim payment.

Finally, the rule also adds a new paragraph (g) to the section adding, as an item to be deducted, any and all claims which the lender has acquired in connection with the acquisition and sale of the property. This change is in keeping with HUD's policy of delegating as much responsibility as possible to the coinsured lender. The value of these claims would be determined by HUD.

Section 255.428 Remedies in the event of a default by a lender—issuer under the GNMA mortgate backed securities program. This section makes provision for the FHA Commissioner to protect the Government National Mortgage Association from absorbing any coinsurance loss caused by a default of a lender-issuer of GNMA mortgage-backed securities. This section was added to Part 255 on March, 31, 1982. This rule expands the protection of GNMA to include the increased risk exposure to the lender in the case of maximum insurance of its coinsurance risk. It also deletes a reference to the differential in interest between the securities rate and the FHA debenture rate. Since, under §255.426(b), the mortgage interest rate will be paid on insurance claims, this reference is no longer necessary.

Section 255.429 Effect of amendments. Subpart D of Part 255 (Contract Rights and Obligations) may be amended from time to time, but such amendment shall not adversely affect the interests of a lender under (1) an existing contract of coinsurance, or (2) a mortgage to be coinsured on which the lender has made a commitment to insure. This section remains unamended.

Section 255.430 Compliance with National Flood Insurance Program and Coastal Barrier Resources Act. This interim rule adds a new section at the end of the part 255.

Paragraph (a) provides that no insurance shall be made available under Part 255 for acquisition, refinancing or repair of a building or manufactured home located in an area that has been identified by the Federal Emergency Management Agency as having special flood hazards, unless the community in which the area is situated is participating in the National Flood Insurance Program and the regulations thereunder (44 CFR 59–79), or less than a year has passed since FEMA notification regarding such hazards, and flood insurance on the structure is obtained in compliance with Section 102(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234, 42 U.S.C. 4001, *et seq.*)

Paragraph (b) provides that no insurance shall be made available under Part 255, except pursuant to a commitment issued before October 18, 1982, with respect to any property within the Coastal Barriers Resources System established by the Coastal Barriers Resources Act (10 U.S.C. 3501).

Conforming Amendments to Part 207

Part 255 is a program to aid in the conservation of neighborhoods by providing, through combined use of coinsurance authority under section 244 of the National Housing Act, authority to insure existing multifamily properties under section 223(f) of that Act, and the basic authority to insure multifamily rental housing under section 207 of the Act, a viable means for financing the purchase or refinancing of existing multifamily housing resources.

Since its inception in 1980, it was recognized that, incidental to any financing or refinancing that takes place pursuant to section 223(f), certain repairs and improvements to the multifamily properties would often be required. In order that use of the section 223(f) insuring authority not duplicate or overlap existing multifamily authority (in this case section 207 of the National Housing Act), the extent of any repairs and improvements which may be covered by a section 223(f) insured loan was limited to that which clearly would not fall under the category of substantial rehabilitation since, as a general matter, FHA multifamily insuring authorities outside of section 223(f) relate to properties which are to be newly constructed or substantially rehabilitated. Section 255.228 is designed to take account of this issue. It expressly sets forth a limitation on the extent of repairs, replacements and improvements allowable.

The Department deems it necessary, however, in order fully to ensure against a duplication or overlap between the section 223(f) and section 207 insuring authorities, to provide for a complementary description of allowable repairs, replacements and improvements in the section 207 program regulations.

Accordingly, this interim rule also revises §§ 207.24 and 207.32a(f) of Part 207 of the CFR. Section 207.24 relates to the development of properties to be covered by mortgages insured under the basic 207 rental housing program. Eligible properties must involve new construction or require substantial rehabilitation. "Substantial rehabilitation" is then defined as repairs, replacements and improvements which *exceed* the limitations on repairs, replacements and improvements set forth in § 255.228.

Section 207.32a(f) relates to eligibility for section 207 *full* insurance of mortgages covering existing multifamily properties. As in Part 255, the program utilizes the section 223(f) insuring authority. Section 207.32a(f) is revised to provide limitations on allowable repairs, replacements and improvements identical to those set forth in § 255.228.

List of Subjects

24 CFR Part 207

Mobile homes, Mortgage insurance, Solar energy.

24 CFR Part 255

Mortgage insurance.

Accordingly, 24 CFR Part 255, § 207.24 and § 207.32a(f) are amended as set forth below:

1. 24 CFR Part 255 is revised to read as follows:

PART 255—COINSURANCE FOR THE PURCHASE OR REFINANCING OF EXISTING MULTIFAMILY HOUSING PROJECTS

Subpart A—General Provisions

Sec.
255.1 Purpose.
255.2 Effect of implementation of program on mortgage market.
255.3 Utilization of existing multifamily insurance authorities.
255.4 Effect of availability of coinsurance or insurance otherwise authorized.
255.5 Effect of availability of coinsurance on flow of mortgage credit to older, declining areas.
255.6 Safeguards for consumers.
255.7 Definition of lender.
255.8 Definitions.

Subpart B—Approval of Lender as Coinsurer

255.101 Review of operation before approval as coinsurer.
255.102 Technical review before approval as a coinsurer.
255.103 Duration of approval.
255.104 Withdrawal of approval.
255.105 Effects of withdrawal or suspension of approval as a coinsurer on insurance commitments made by the coinsurer while it was approved.
255.106 Mortgage servicing and insurance of lender's risk.
255.107 Required regulatory agreement with mortgagors.

Subpart C—Eligibility Requirements Applicable to Mortgages Coinsured Under Section 207 Pursuant to Section 223(f)

255.201 Application.
255.202 Application fees, inspection fees, and service charges.
255.203 Processing and commitment.

Eligible Mortgages

255.208 Refinancing of mortgages in portfolio.
255.209 Mortgage provisions.
255.210 Mortgage lien and other obligations.
255.211 Maximum mortgage amounts.
255.212 Maturity.
255.213 Payment requirements.
255.214 Maximum mortgage interest rate.
255.215 Mortgage to cover the entire property.
255.216 Hazard insurance and physical inspection.
255.217 Soundness of project.
255.218 Accumulation of accruals.
255.219 Application of mortgage payments.
255.220 Prepayment privileges.
255.221 Late charges.

Supervision of Mortgagors

255.222 In General.
255.223 Required supervision of mortgagors.
255.224 Non-discrimination in housing.
255.225 Discrimination in employment.
255.226 Covenant regarding use of property.

Property Requirements

255.227 Eligibility of property.
255.228 Development of property.
255.229 Commercial facilities.

Title

255.230 Eligibility of title.
255.231 Title evidence.

Cost Certification Requirements

255.232 Agreement to certify cost requirements.
255.233–255.234 (Reserved)
255.235 Certificate of actual cost—contents in general.
255.236–255.238 (Reserved)
255.239 Reduction in mortgage amount.
255.240 Requisites of certification of actual costs.
255.241 Cost certification incontestable.

Subpart D—Contract Rights and Obligations

255.401 Insurance endorsement of mortgage.

Mortgage Insurance Premiums

255.402 Amount of MIP to be collected from the mortgagor.
255.403 Method of payment of MIP.
255.404 Payment of MIP by the lender.
255.405 Duration of MIP.
255.406 Pro rata payment of annual MIP.
255.407 Late charge-payment of MIP.
255.408 Assignment of coinsured mortgages.

Default Under the Mortgage

255.410 Definition of default.
255.411 Date of default.
255.412 Notice of default.
255.413 Reinstatement of a defaulted mortgage.
255.414 Forbearance relief.

Termination

255.415 Termination of coinsurance contract.
255.416 Notice and date of termination by Commissioner.
255.417 Effect of termination.

Claim Procedure

255.420 Acquisition of property.
255.421 Deed in lieu of foreclosure.
255.422 Notice to Commissioner.

Payment of Insurance Benefits

255.423 Method of payment.

VOL 48 ISS 102 MAY 25 1983 UMI

Sec.
255.424 Disposition of property and application for insurance benefits.
255.425 Amount of payment.
255.426 Items included in payment.
255.427 Items deducted from payment.
255.428 Remedies in the event of a default by a lender-issuer under the GNMA mortgage backed securities program.
255.429 Effect of amendments.
255.430 Compliance with national flood insurance program and Coastal Barriers Resources Act.

Authority: Sec. 244 of the National Hbusing Act, 12 U.S.C. 1715z(9), unless otherwise noted.

Subpart A—General Provisions

§ 255.1 Purpose.

(a) Section 307 of the Housing and Community Development Act of 1974 amended the National Housing Act by adding a new section 244 entitled, "Co-insurance." Section 244 authorizes the Secretary of Housing and Urban Development to insure and make a commitment to insure, under any provision of title II of the National Housing Act, any mortgage otherwise eligible for insurance under such provisions, pursuant to a coinsurance contract providing that the lender will (1) assume a percentage of any loss and (2) carry out (subject to audit, exception, or review requirements) such credit approval, appraisal, inspection, commitment, property disposition or other functions as the Secretary approves.

(b) Section 311 of the Housing and Community Development Act of 1974 also added a new section 223(f) to the National Housing Act. Section 223(f) authorizes the Secretary to insure a mortgage executed in connection with the purchase or refinancing of an existing multifamily project.

(c) It is intended that a demonstration coinsurance program under section 244 to provide insured financing or refinancing for existing housing will assist in the conservation of neighborhoods and existing housing resources. By placing some of the risks, which HUD now assumes when insuring mortgages o approved private mortgage lenders, the demonstration program authorized by section 244 could help to assure more careful initial evaluation of existing projects by lenders who are willing to accept some, but are unwilling to accept all, of the risk of mortgage lending for rental housing projects. It could also make feasible assumption by lenders of the processing responsibilities incidental to a mortgage insurance program and perhaps reduce the present length of time required to approve applications for mortgage insurance.

(d) Congress, in enacting section 307 of the Housing and Community Development Act of 1974, which authorized the program which would be implemented by this part, made clear that it was concerned that implementation of this program not disrupt the mortgage market or reduce the availability of mortgage credit to borrowers who depend on mortgage insurance authorized under provisions of the National Housing Act other than section 244. The Congress also indicated its concern that in delegating mortgage insurance processing duties to lenders, physical inspections of dwelling units be continued in accordance with the same standards used under the regular FHA program. To accord with these concepts, this part sets forth HUD regulations describing a coinsurance program for mortgages on existing multifamily projects underwritten by private mortgage lenders.

(e) In recognition of the capabilities of private lenders, these regulations vest the maximum amount of processing responsibilities with these lenders and to the maximum extent permissible under the statutes authorizing this program, permit these lenders to retain autonomy in their underwriting practices.

(f) This part permits originating coinsuring lenders to assign or transfer coinsured loans to other qualified coinsuring lenders with the prior written approval of the Commissioner, and provides protections to the Government National Mortgage Association (GNMA) for expenditures by GNMA to assure full payments of amounts contractually owed to holders of GNMA securities backed by coinsured loans resulting from defaults by coinsuring lenders under their guaranty agreements with GNMA.

§ 255.2 Effect of implementation of program on mortgage market.

Section 244 of the National Housing Act requires that no contract of coinsurance will be entered into under this part until the Secretary has, after due consultation with the mortgage lending industry, determined that the program described in this part will not disrupt the mortgage market or reduce the availability of mortgage credit to borrowers who depend upon mortgage insurance provided under provisions of the National Housing Act other than section 244. The mortgage lending industry has received adequate opportunity through the public comment period which was devoted to these regulations when proposed to make its views known and the issuance of these regulations shall be considered a determination that no adverse effects on the mortgage market are reasonably predictable from such an issuance. The Department intends, however, to continously monitor the impact of this program and to consider evidence submitted at any time which would tend to suggest that disruptions in the mortgage market or reduced availability of mortgage credit to borrowers are causally related to the availability of coinsurance under this part.

§ 255.3 Utilization of existing multifamily insurance authorities.

Mortgages for multifamily projects which meet the requirements for eligibility of this part shall be insured under section 207 pursuant to section 223(f) and pursuant to section 244 of the National Housing Act.

§ 255.4 Effect of availability of coinsurance or insurance otherwise authorized.

No insurance authorized under any provision of the National Housing Act other than section 244 of that Act shall be withdrawn, denied, or delayed by reason of the availability of insurance under the program authorized by this part.

§ 255.5 Effect of availability of coinsurance on flow of mortgage credit to older, declining areas.

Insurance will continue to be available under this part only to the extent the Secretary has determined that the availability of insurance authorized by this part does not adversely affect the flow of mortgage credit to older and declining neighborhoods, and to the purchasers of older and lower cost housing. Insurance authorized by this part will not be available for mortgages on properties which are eligible to be insured solely pursuant to the authority of section 223(e) of the National Housing Act.

§ 255.6 Safeguards for consumers.

(a) The inspection of repairs and improvements on projects covered by mortgages approved for coinsurance prior to the beginning of repairs under this part shall be conducted in accordance with the intent of the standards and criteria set forth in Subpart S of Part 200 of this chapter and used with respect to dwellings or projects approved for mortgage insurance under provisions of title II of the National Housing Act other than section 244.

(b) Principals in projects proposed to be financed with mortgages insured under this part shall comply with the Previous Participation Review and

Clearance Procedure of §§ 200.210–200.218 of 24 CFR Part 200.

(c) The Secretary is responsible for compliance with the National Historic Preservation Act, to the extent applicable to properties repaired with mortgage financing pursuant to this part.

§ 255.7 Definition of lender.

The provisions of §§ 203.3 through 203.6, inclusive, and of § 203.8(b) of this Chapter shall govern the eligibility of mortgagees under this part, except as otherwise provided in § 255.102 of this part. Hereafter, the term "lender" is used to mean mortgagee for the purpose of this part.

§ 255.8 Definitions.

As used in this subpart the following terms shall have the meaning indicated:

(a) "Commissioner" means the Federal Housing Commissioner.

(b) "Act" means the National Housing Act, as amended.

(c) "Mortgage" means such a first lien upon real estate and other property as is commonly given to secure advances on, or the unpaid purchase price of, real estate under the laws of the State, district, or territory in which the real estate is located, together with the credit instruments, if any, secured thereby.

(d) "Insured mortgage" means a mortgage which has been insured by the endorsement of the mortgage note pursuant to this part by the Commissioner, or his duly authorized representative.

(e) "Contract of coinsurance" means the agreement between the private lender and the Commissioner for the coinsurance of a mortgage evidenced by the endorsement of a mortgage note by the Commissioner and includes the terms, conditions and provisions of this part and of the National Housing Act.

(f) "Mortgagor" means the original borrower under a mortgage and its successors and such of its assigns as are approved by the Commissioner.

(g) "Mortgage insurance premium" (MIP) means the mortgage insurance premium collected pursuant to § 255.402(d) of this part.

(h) "Sound capital resources" means the excess of the mortgagee's assets (net of any valuation allowances) over its liabilities generally referred to as its net worth, including paid-in capital stock, surplus, reserves, undistributed earnings and any other unencumbered resource of the mortgagee which may include an unconditional and irrevocable firm letter of credit from a supervised financial institution with assets of not less than $100,000,000. For purposes of determining "sound capital resources", a loss reserve, which is established with respect to coinsurance liability under this part and treated as a liability in the mortgagee's balance sheets, may be deemed a capital item rather than a liability.

Subpart B—Approval of Lender as Coinsurer

§ 255.101 Review of operation before approval as coinsurer.

Approval of a lender as defined in § 255.7, as a coinsurer of mortgage loans, eligible to underwrite and service mortgages on multifamily projects for coinsurance, will be made for lenders who have requested approval and who are currently approved as mortgagees under the provisions of §§ 203.3 through 203.6 or of § 203.8(b) of this chapter, after a review of the lender's operations by HUD as precribed in § 255.102 of this part.

§ 255.102 Technical review before approval as a coinsurer.

A lender's technical staff and procedures must undergo a review by the Commissioner before being approved as a coinsurer. This review shall include an on-site evaluation of the lender's operations, specifically, adequacy of technical staff, procedures for screening and processing applications for mortgage insurance, and capability to service such mortgages, supervise project management and carry out property disposition. As part of this review, the following special requirements are necessary for certification as an approved coinsurer eligible to underwrite mortgages for multifamily projects under this part:

(a) It shall provide a written opinion of its Counsel that it has the necessary powers to participate in the program authorized under this part;

(b) It shall submit evidence satisfactory to the Commissioner that it has sound capital resources, acceptable to the Commissioner, of not less than $1,500,000, which shall include liquid funds of at least $500,000. No more than $500,000 of the sound capital resources requirement may be met by an unconditional and irrevocable firm letter of credit. It shall also agree that, during the period of coinsurance, it will maintain such sound capital resources plus an additional amount of one dollar of sound capital resources for each 300 dollars of outstanding principal indebtedness or mortgages it has coinsured under this part.

(c) It shall submit evidence to the Commissioner that it has the operating procedures and the ability, either through technical staff employed by it, or through contracts with persons not on the lender's staff, for discharging full mortgage underwriting, servicing, and management, property repair and disposition, and other necessary functions in a manner which is consistent with the requirements of this part;

(d) It shall submit to periodic auditing and review by the Commissioner, the Inspector General or the Comptroller General of the United States with respect to its participation in the program authorized by this part;

(e) It shall submit its most recent detailed audit report of its books made by an independent certified public accountant selected in accordance with applicable State law or procedures, or by an independent public accountant licensed by a regulatory authority of a State of other political subdivision on or prior to December 31, 1970. The audit may be supplemented by such additional information as the Commissioner shall request;

(f) It shall file with the Commissioner similar annual audits (1) within such period of time required pursuant to applicable State law and procedures or (2) within 75 days of the closing of its fiscal year so long as it continues as an approved lender;

(g) It shall promptly notify the Commissioner of any adjustments in its processing procedures which take place after its certification as an approved lender and shall make no adjustments in its processing procedures that are inconsistent with the requirements of this part;

(h) It shall have in its immediate employ staff with sufficient professional and technical competence to monitor the performance including fraud, waste, and mismanagement, of any work it contracts to have done by persons not in the lender's employ such as appraisals, cost, credit analysis, architectural, engineering and management services;

(i) All appraisers assigned by the lender to determine the value of properties intended to serve as security for coinsured mortgages must adhere to minimum standards of education and experience established by the Commissioner;

(j) It shall abide by all applicable requirements issued by the Commissioner for discharging its mortgage underwriting, servicing, and management and property disposition functions pursuant to this part.

§ 255.103 Duration of approval.

Initial certification of a private lender as an approved coinsurer under § 255.102 of this part will be valid until the Secretary's authority to coinsure

VOL
48
ISS
102
MAY
25
1983
UMI

pursuant to this part shall have expired, unless such approval is withdrawn under § 255.104 of this part. A temporary lapse in the Secretary's authority to coinsure shall not terminate lenders' approved coinsurer status. However, lenders are responsible during such periods for suspending issuance of commitments, extension of commitment periods, reopening of expired commitments, and mortgage modifications.

§ 255.104 Withdrawal of approval.

(a) Except as provided in § 255.105, the Commissioner may refrain from endorsing a credit instrument for mortgage insurance authorized by this part with respect to any project proposed for coinsurance by a lender which has been given written notice by the Commissioner that its approval as a coinsurer under this part has been suspended or withdrawn. Certification as an approved lender under this part may be suspended or withdrawn pursuant to the provisions of Part 24 of this title for any of the following causes:

(1) Failure to maintain satisfactory capital funds or structure;

(2) Failure to perform underwriting, servicing, or management and property disposition functions consistent with the requirements of this part;

(3) Failure to discharge its responsibilities under a coinsurance contract;

(4) Failure to segregate all escrow funds received from mortgagors on account of ground rents, taxes, assessments and insurance premiums, and to deposit such funds to a special account or accounts;

(5) Use of escrow funds for any purpose other than that for which they were received.

(6) Payment by the lender of any fee, kickback, or other consideration, directly or indirectly, in connection with any insured mortgage transaction or transactions to any person including an attorney, escrow agent, title company, consultant, mortgage broker, seller, builder, or real estate agent if such person has received any other payment or other consideration from the mortgagor, the seller, the builder, or any other person for services related to such transaction or property, except that compensation may be paid for the actual performance of such services as may be approved by the Commissioner.

(7) Such other reasons as the Commissioner determines to be justified in accordance with Part 24 of this title, by action of the agency review board in accordance with Part 25 of this title.

(b) A principal whose participation in a proposed project has been disapproved and whose request for reconsideration has resulted in confirmation of the disapproval may appeal under § 24.10 of this title.

§ 255.105 Effects of withdrawal or suspension of approval as a coinsurer on insurance commitments made by the coinsurer while it was approved.

Withdrawal, suspension, or termination of a private lender as an approved coinsurer under this part will not affect any mortgage insurance commitments issued or the insurance of any mortgages accepted for insurance while the lender was an approved coinsurer.

§ 255.106 Mortgage servicing and insurance of lender's risk.

(a) Servicing functions during the period when the Commissioner is a coinsurer of the mortgage shall be performed only by the lender, except that the lender may, consistent with any applicable contractual requirement, elect to delegate servicing to another entity if the lender retains its obligations under this part. This servicing entity must be a HUD-approved mortgagee under §§ 203.1 through 203.6, or § 203.8(b) of this chapter. The lender is required to inform the Department of any servicing transfers, and may be required to rescind any servicing so delegated if such servicing is unsatisfactory to HUD.

(b) The lender may obtain insurance from a licensed mortgage guarantee insurer for (1) 50 percent of its coinsurance risk under this part, (2) 100 percent of such coinsurance risk, or (3) that portion of such coinsurance risk which equals the maximum amount which the mortgage guarantee insurer is authorized to insure. The insurance benefits payable by the Commissioner under each of these options shall be calculated pursuant to § 255.425. Any such insurance policy shall name the Commissioner as contingent beneficiary in the event that default by the lender results in payment by the Commissioner to GNMA of any amount contractually owed by the lender to investors in GNMA securities backed by mortgages coinsured under this part.

§ 255.107 Required regulatory agreement with mortgagors.

(a) The lender and the mortgagor shall effect an agreement whereby the mortgagor, as further consideration for the making of the mortgage loan, contracts with the lender that it will fulfill the provisions of Subpart C, §§ 255.222 through 255.228. Such regulation or restriction will be in the form of a regulatory contract between the mortgagor and the lender. The lender shall be responsible for enforcing the provisions of the regulatory contract.

(b) The lender may regulate and restrict the mortgagor, as long as the Commissioner and the lender are coinsurers of the mortgage, on such other matters as may be required by the lender as conditions for lending which do not conflict with the requirements of the Commissioner under this part, as determined by the Commissioner.

Subpart C—Eligibility Requirements Applicable to Mortgages Coinsured Under Section 207 Pursuant to Section 223(f)

§ 255.201 Application.

The application for a commitment to make a coinsured mortgage loan on a project shall be submitted to the lender, as agent for the Secretary, by the sponsor of the project. The application shall be accompanied by such exhibits as may be required by the lender to enable the lender to comply with requirements for coinsurance of the mortgage established under this part.

§ 255.202 Application fees, inspection fees, and service charges.

The lender may collect from the mortgagor such application fees, inspection fees, and initial service charges as it may require to reimburse itself for the cost of processing an application, conducting inspections, and closing a mortgage transaction. In no event will the total fees be permitted to exceed those allowed in the fully insured section 223(f) program, except as approved by the Commissioner.

§ 255.203 Processing and commitment.

The lender shall, as agent for the Secretary, perform all of the processing, including the issuance of both conditional and firm commitments, and make all of the determinations of the eligibility of a mortgage for coinsurance under this part. The firm commitment to insure upon completion shall be effective for 90 days. The term of the commitment may be extended or may be amended in such a manner as the lender may prescribe from time to time. An expired commitment may be reopened if a request for reopening is received by the lender from the mortgagor within 90 days of the expiration of the commitment.

Eligible Mortgages

§ 255.208 Refinancing of mortgages in portfolio.

The Commissioner may only coinsure a mortgage refinancing a loan already held in the portfolio of an approved lender or related entity, where (a) the loan is current in payments and has not been in default, modification or forbearance at any time during a continuous period of at least two years preceding the date of insurance application; (b) such portfolio loans of an approved lender do not exceed one-fourth of the total number of loans submitted by that approved lender for coinsurance under this part in any period of twelve consecutive months (except that the Commissioner may permit lenders to exceed this limit if the additional refinancing relates to projects which meet the eligibility requirements of paragraph (a)(1) of § 207.32 of this chapter); and (c) the Commissioner retains discretion to review the entire loan transaction before commitment.

§ 255.209 Mortgage provisions.

The mortgage shall be:

(a) Executed on a form approved by the Commissioner for use in the jurisdiction in which the property covered by the mortgage is situated, which form shall not be changed without the prior written approval of the Commissioner.

(b) Executed by a mortgagor with the qualifications as provided by this subpart.

(c) A first lien on property that conforms with the intent of the property standards prescribed by the Commissioner.

§ 255.210 Mortgage lien and other obligations.

A mortgagor shall certify at endorsement of the loan for insurance and the lender shall determine that:

(a) The property covered by the mortgage is free and clear of all liens other than the insured mortgage and such other liens as may be approved by the lender, in accordance with standards established by the Commissioner. Liens other than the insured mortgage which may be approved (other than liens of taxes and assessments of the State or subdivisions of the State not yet due and payable, or ground rents) may not have under applicable law a priority equal or superior to the insured mortgage.

(b) There will not be outstanding unpaid obligations contracted for in connection with the mortgage transaction, the purchase of the mortgage property, or the repairs and improvements to the project, except obligations approved by the lender, in accordance with standards established by the Commissioner. Obligations of the mortgagor shall be approved by the lender under this section only if such obligations are determined by the lender to be of a lesser priority for payment than the obligation of the insured mortgage.

(c) When a loan is made to finance the purchase of an existing multifamily housing project, the mortgagor may not have any additional obligations in connection with the transaction which exceed the lesser of:

(1) Seven and one-half percent of the lender's estimate of value as defined in § 255.211(b), or

(2) Seven and one-half percent of the cost of acquisition as defined in § 255.211(d).

(d) When a loan is made to refinance an existing multifamily housing project, the mortgagor may not have any additional obligations in connection with the transaction which exceed the lesser of:

(1) Seven and one-half percent of the lender's estimate of value, or

(2) Fifty percent of the difference between the cost to refinance as defined in § 255.211(c)(2) and the maximum mortgage amount as determined by the lender.

(e) For projects which meet the eligibility requirements of § 207.32a(a)(1) of this Chapter, the provisions of § 207.32a(j)(4) shall apply.

(f) The additional obligations, if any, provided for in paragraphs (c) and (d) of this section shall be represented by promissory notes on forms approved by the Commissioner. Such notes shall not be due and payable until the maturity date of the mortgage to be insured pursuant to this part, but may be prepaid from surplus cash and in accordance with the conditions prescribed in the regulatory agreement between the lender and the mortgagor.

§ 255.211 Maximum mortgage amounts.

In addition to the limitations in paragraphs (c) and (d) of this section, a mortgage may not involve a principal obligation in excess of the lesser of the following:

(a) *Dollar limitations on units.* (1) The total of the amounts per family dwelling unit for other than elevator type structures (excluding exterior land improvements as defined by the Commissioner) depending upon the number of bedrooms, which may be: $19,500 per family unit without a bedroom, $21,600 per family unit with one bedroom, $25,800 per family unit with two bedrooms, $31,800 per family unit with three bedrooms, $36,000 per family unit with four or more bedrooms.

(2) The dollar amount limitations per family unit provided in paragraph (a)(1) of this section may be increased by up to 20 percent if such increase is necessary to account for the cost of the purchase and installation of a solar energy system.

(3) *Increased mortgage amount—elevator type structures.* In order to compensate for the higher costs incident to construction of elevator type structures of sound standards of construction and design, the lender may, pursuant to guidelines issued by the Commissioner, increase the dollar amount limitations per family unit for these type structures to not in excess of: $22,500 per family unit without a bedroom, $25,200 per family unit with one bedroom, $30,900 per family unit with two bedrooms, $38,700 per family unit with three bedrooms, $43,758 per family unit with four or more bedrooms.

(4) *Increased mortgage amount—high cost areas.* (i) In any geographical area where the Commissioner finds cost levels so require, the Commissioner may increase, by not to exceed 75 percent, the dollar amount limitations set forth in paragraphs (a) (1) and (3) of this section. In such high cost areas, where the Commissioner determines it necessary on a project-by-project basis, the Commissioner may increase these dollar amount limitations by not to exceed 140 percent, except where the mortgage involved has been or is committed to be purchased by the Government National Mortgage Association in implementing its special assistance functions under section 305 of the National Housing Act, in which case the Commissioner may increase these dollar amount limitations by not to exceed 90 percent.

(ii) If the Commissioner finds that because of high costs in Alaska, Guam, or Hawaii, it is not feasible to construct dwellings without the sacrifice of sound standards of construction, design, and livability within the limitations of maximum mortgage amounts provided in this section, the principal obligation of mortgages may be increased in such amounts as may be necessary to compensate for such costs but not to exceed in any event the maximum, including high cost area increases, if any, otherwise applicable by more than one-half thereof.

(b) *Value.* An amount not exceeding 85 percent of the lender's estimate of value (90 percent if the property meets the eligibility requirements contained in § 207.32a(l) of this chapter).

(1) The final estimate of value for the purpose of this section shall result from consideration of three indicators of value:

(i) The estimated market value of the project by capitalization;

(ii) The estimated market value by direct sales comparison;

VOL 48 ISS 102 MAY 25 1983 UMI

(iii) The total estimated replacement cost of the project (without deducting depreciation).

(2) Capitalization will use net income which results from market rents estimated by comparison with unsubsidized projects, capitalized at rates extracted from market transactions of comparable properties. Market value by direct sales comparison will be estimated by comparison of the subject property with competing properties recently sold, using at least two units of comparison. The total estimated replacement cost of the project (before depreciation) provides only an upper limit. The final estimate of value must lie between that indicated by capitalization and that indicated by direct sales comparison, but in no event shall the final estimate of value exceed the total estimated replacement cost of the project.

(c) *Property to be refinanced.* If the property is to be refinanced by the insured mortgage without a change of ownership, or, if property is sold to a purchaser who has an identity of interest with the seller and the purchase is to be financed with the insured mortgage, then the maximum mortgage amount shall not exceed the greater of:

(1) 70 percent of the lender's estimate of value of the project, or,

(2) The cost to refinance the existing indebtedness which will consist of the following items, the eligibility and amounts of which must be determined by the lender:

(i) The amount required to pay off the existing indebtedness;

(ii) An amount for the initial deposit for the reserve fund for replacements;

(iii) Reasonable and customary legal, organizational, title, and recording expenses, including discounts charged by the lender;

(iv) The estimated repair costs, if any, including the estimated cost of installing safety and fire prevention components, as defined by the Commissioner, in the project;

(v) Architect's municipal inspection and/or engineering fees.

(d) *Property to be acquired.* If the project is to be acquired by the mortgagor and the purchase price is to be financed with the insured mortgage, the maximum amount shall not exceed 85 percent (90 percent if the project meets the eligibility requirements contained in § 207.32a(1) of this chapter) of the cost of acquisition as determined by the lender. The cost of acquisition shall consist of the following items (to the extent that each item is paid by the purchaser separately from the purchase price), the eligibility and amounts of which must be determined by the lender:

(1) Purchase price as indicated in the purchase agreement;

(2) An amount for the initial deposit to the reserve fund for replacements;

(3) Reasonable and customary legal, organizational, title, and recording expenses, including discounts charged by the lender, as permitted by the Commissioner;

(4) The estimated repair cost, if any, including the estimated cost of installing fire prevention and safety components, as defined by the Commissioner, in the project;

(5) Architect's and engineer's fees, municipal inspection fees, and any other required professional or inspection fees.

(e) *Debt service.* Debt service is the amount that can be amortized by 85 percent of the projected net income of the project after payment of operating expenses and taxes.

(f) *Reduced mortgage amount—leaseholds.* In the event the mortgage is secured by a leasehold estate rather than a fee simple estate, the value of the property described in the mortgage shall be the value of the leasehold estate (as determined by the lender) which shall in all cases be less than the value of the property in fee simple.

§ 255.212 Maturity.

The mortgage shall have a maturity satisfactory to the lender, not less than 10 years, nor shall it exceed the lesser of 35 years (40 years if the project meets the eligibility requirements contained in § 207.32a(1) of this chapter) or 75 percent of the estimated remaining economic life of the physical improvements (100 percent if the project meets the eligibility requirements contained in § 207.32a(1) of this chapter). The term of the mortgage shall begin on the first day of the second month following the date of endorsement of the mortgage for insurance upon completion.

§ 255.213 Payment requirements.

Method of payment. The mortgage shall provide for monthly payments on the first day of each month on account of interest and principal and shall provide for payments in accordance with an amortization plan as agreed upon by the mortgagor and the lender. The Commissioner may prohibit specific types of mortgage instruments which would have the effect of automatically adjusting the mortgage interest rate as established at time of endorsement of the loan pursuant to §255.214.

§ 255.214 Maximum mortgage interest rate.

(a) Commitments to insure shall be issued at an interest rate not exceeding any HUD maximum limit applicable to Section 223(f) loans at the time of commitment.

(b) The insured mortgage shall bear interest at such rates as may be agreed upon by the mortgagor and the lender but such rate shall not exceed the rate specified in the commitment to insure. At the option of the lender, it may issue an amended commitment to insure at a higher or lower interest rate. If the amended commitment is to insure at a higher rate, such higher rate shall not exceed the maximum rate in effect at the time of the issuance of the amended commitment, which shall be no later than the date the the mortgage is endorsed for insurance. The lender shall only issue a commitment to insure a mortgage at a higher rate than that specified in the original commitment to insure if it is determined by the lender that the project which is the security for the mortgage will be able to charge the increased rentals required to amortize a mortgage at the higher rate without adversely affecting the economic soundness of the project. Such increase in the interest rate requires reprocessing of the application in order to determine the new debt service limitation and, where appropriate, a new capitalization rate and value.

§ 255.215 Mortgage to cover the entire property.

The mortgage shall cover the entire property included in the housing project.

§ 255.216 Hazard insurance and physical inspection.

(a) The mortgage shall contain a covenant acceptable to the Commissioner binding the mortgagor to keep the property insured by a standard policy or policies against loss from fire and such other hazards as the lender, upon the insurance of the mortgage, may stipulate, in an amount which will comply with the coinsurance clause applicable to the location and character of the property, but not less than 80 percent of the actual cash value of the insurable improvements and equipment of the project. The policies evidencing such insurance shall have attached thereto a standard mortgagee clause making loss payable to the lender and the Commissioner as their interests may appeal. The lender shall be responsible for verifying that such insurance is maintained in force.

(b) *Annual inspection of property by lender.* As long as the mortgage is insured, the lender shall ascertain the general physical condition of the mortgaged property in each calendar year. The lender shall furnish the Commissioner and the mortgagor with a copy of its inspection report, which shall contain the lender's recommendation for any necessary corrective actions.

§ 255.217 Soundness of project.

No mortgage shall be accepted for insurance unless the lender finds that the property or project with respect to which the mortgage is executed is economically sound, except that as to mortgages covering property located in Alaska, or in Guam, or in Hawaii, no mortgage shall be accepted for insurance unless the lender, with prior notice to the Commissioner, finds that the property or project is an acceptable risk giving consideration to the acute housing shortage in Alaska, or in Guam, or in Hawaii.

§ 255.218 Accumulation of accruals.

(a) The mortgage shall provide for payments by the mortgagor to the lender on each interest payment date of an amount sufficient to accumulate in the hands of the lender one payment period prior to its due date, the next annual mortgage insurance premium. Such payments shall continue only so long as the contract of coinsurance shall remain in effect.

(b) The mortgage shall provide for such equal monthly payments by the mortgagor to the lender as will amortize the ground rents, if any, and the estimated amount of all taxes, water rates and special assessments, if any, and fire and other hazard insurance premiums, within a period ending one month before the date on which any such obligation becomes delinquent, the mortgage must also make provisions for adjustments, in case the estimated amount of such taxes, water rates and assessments, and insurance premiums shall prove to be more or less than the actual amount paid by the mortgagor.

§ 255.219 Application of mortgage payments.

The mortgage shall provide that all monthly payments being made by the mortgagor to the lender shall be added together and the aggregate thereof shall be paid by the mortgagor upon each monthly payment date in a single payment. The lender shall apply all payments received from the mortgagor or for the account of the mortgagor to the following items in the order set forth:

(a) Premium charges under the contract of insurance, where applicable.

(b) Ground rents, taxes, special assessments and fire and other hazard insurance premiums.

(c) Interest on the mortgage.

(d) Amortization of the principal of the mortgage.

§ 255.220 Prepayment privileges.

(a) Prepayment of the mortgage indebtedness is prohibited (except as required by the Commissioner) for a period of five years from the date of endorsement of the mortgage (or for a period of twenty-years where the mortgage was purchased by the Government National Mortgage Association under Chapter II of Subtitle B of Title 24) except where, at the time of prepayment:

(1) The mortgagor has entered into an agreement with the Commissioner to maintain the property as rental housing for the remainder of the specified five-year (or twenty-year) period;

(2) The Commissioner has determined that the conversion of the property to cooperative or condominium ownership is sponsored by a bona fide tenants' organization representing a majority of the households in the project;

(3) The Commissioner has determined that continuation of the property as rental housing is unnecessary to assure adequate rental housing opportunities for low- and moderate-income people in the community; or

(4) The Commissioner has determined that continuation of the property as rental housing would have an undesirable and deleterious effect on the surrounding neighborhood.

(b) Subject to the requirements of paragraph (a) of this section the mortgage may establish such further conditions or penalties for prepayment as may be agreed upon by the lender and mortgagor.

§ 255.221 Late charges.

The mortgage may provide for the collection by the lender of a late charge, not to exceed four cents for each dollar, of each payment to interest and principal more than 15 days in arrears, or such other charges as may be agreed to by the lender and the Commissioner, to cover the extra expense involved in handling delinquent payments. Late charges shall be separately charged to and collected from the mortgagor and shall not be deducted from any aggregate monthly payment.

Supervision of Mortgagors

§ 255.222 In general.

In order to be eligible for the benefit of insured financing under this part, a mortgagor must agree to be regulated and restricted by the lender as to rents, sales, charges, capital structure, rate of return, and methods of operation.

§ 255.223 Required supervision of mortgagors.

The regulatory agreement required by § 255.107 shall provide that the following items are regulated or restricted:

(a) *Capital structure.* (1) The number of shares of capital stock, in the case of a corporation, may be issued in such amounts and in a form as may be agreed upon by the sponsors and the lender before the endorsement of the mortgage for insurance. The number of shares may not be changed without the lender's approval; and

(2) In the case of a trust entity, beneficial certificates of interest may be issued in such amounts and form as may be agreed upon by the mortgagor and the lender.

(b) *Rate of return.* Distributions, as defined in the regulatory agreement, may be declared or made only as of or after the end of a semiannual or annual fiscal period. No distributions of any kind may be made from borrowed funds. No distributions shall be made or declared except out of surplus cash legally available and remaining after:

(1) The payment of: (i) All sums due or currently required to be paid under the terms of any mortgage or note insured under this part;

(ii) All amounts required to be deposited in the reserve fund for Replacements;

(iii) All obligations of the project other than the mortgage insured under this part, unless funds for payment are set aside or deferment of payment has been approved by the lender.

(2) The segregation of:

(i) An amount equal to the aggregate of all special funds required to be maintained by the project;

(ii) An amount equal to the project's total liability for tenant security deposits.

(c) *Rents and charges.* No charge shall be made by the mortgagor for the accommodations, facilities, or services offered by the project in excess of those approved by the lender. In approving such charges and in passing upon applications for changes, the lender shall be subject to standards established by the Commissioner, which shall give consideration to the following and similar factors:

(1) Rental income necessary to maintain the economic soundness of the project.

(2) Rental income necessary to provide reasonable return on the investment consistent with providing reasonable rentals to tenants.

(d) *Methods of operation.* (1) The mortgagor shall maintain its project, the grounds, buildings, and equipment appurtenant thereto, in good repair and will promptly complete necessary

VOL 48 ISS 102 MAY 25 1983 UMI

repairs and maintenance as required by the lender.

(2) In all projects, a reserve fund for replacements, shall be established and maintained with the lender. The amount and type of such funds, and the conditions under which it shall be accumulated, replenished, and used, shall be specified in the regulatory agreement.

(3) The mortgagor, its property, equipment, buildings, plans, offices, apparatus, and devices, books, contracts, records, documents, and papers shall be subject to inspection and examination by the Commissioner and the lender, or their authorized agents at all reasonable times. The books and accounts of the mortgagor shall be established in a manner satisfactory to the Commissioner and the lender. So long as the mortgage is coinsured, the mortgagor's books and accounts shall be maintained in accordance with the requirements of the Commissioner and the lender, shall be in such form as to permit an effective audit and as may otherwise be prescribed by the Commissioner and the lender, be maintained for such periods of time as may be prescribed by the lender and the Commissioner, and will be available to the Commissioner, the Inspector General of HUD, the lender and the Comptroller General of the United States for such examination and audits as they may desire to make. The mortgagor shall file with the Commissioner and the lender the following reports verified by the signature of such officers of the mortgagor as the lender may designate and in such form as prescribed by the Commissioner and the lender.

(i) Monthly occupancy reports, when required by lender.

(ii) Complete annual financial reports based upon examinations of the books and records of the mortgagor, prepared in accordance with the requirements of the Commissioner and the lender.

(iii) Specific answers to questions upon which information is desired from time to time relative to the actual cost of repairs and improvements, the disposition of mortgage funds, the operation and condition of the property and the status of the insured mortgage.

(iv) Properly certified copies of minutes of meetings of the directors, officers, stockholders, shareholders, or beneficiaries.

(e) *Investment of Reserve for Replacements.* Money placed in the Reserve for Replacements shall be invested in interest bearing deposits that are federally insured, in Treasury securities, or in securities issued by a Federal agency or a federally sponsored agency.

§ 255.224 Nondiscrimination in housing.

The regulatory agreement required by § 255.107 shall provide that so long as the mortgage is coinsured under this part the mortgagor shall:

(a) Agree to refrain from utilizing criteria or methods of selecting tenants which discriminate against any family because there are children in the family, unless the project was designed specifically for occupancy by elderly people; or discriminate against any family because of the sex of the head of the household.

(b) Comply with the provisions of title VIII of the Civil Rights Act of 1968 and regulations issued under that Act which prohibit discrimination because of race, color, religion, sex, or national origin, and administer the program and related activities in a manner to affirmatively further fair housing. The mortgagor shall also comply with State and local fair housing laws and ordinances.

(c) Comply with the provisions of Executive Order 11063 on Equal Opportunity in Housing which prohibits discrimination on the basis or race, color, creed or national origin in housing and related facilities provided through Federal financial assistance, and all regulations issued pursuant thereto.

(d) Not rent, permit the rental or permit the offering for rental of the housing, or any part thereof, covered by such mortgage, for transient or hotel purposes. For the duration of the regulatory agreement, the term rental for transient or hotel purposes shall mean (1) rental for any period less than 30 days, or (2) any rental, if the occupants of the housing accommodations are provided customary hotel services, such as room service for food and beverages, maid service, furnishing and laundering of linens, and bellboy service.

(e) Not sell the project as long as the mortgage is coinsured under this part, unless the purchaser agrees to comply with the requirements of this section.

§ 255.225 Discrimination in employment.

The regulatory agreement required by § 255.107 shall provide that the mortgagor shall not discriminate on the basis of race, color, religion, sex or national origin against any employee or applicant for employment. Any contract or subcontract executed for project repairs and improvements shall contain a provision to this effect. In addition, the provisions of Executive Order 11246 and title 24 CFR Part 130 shall apply, when appropriate, to such contracts.

§ 255.226 Convenant regarding use of property.

The mortgage shall contain a covenant prohibiting the use of the property covered thereby for any purpose other than that for which it was intended at date the mortgage was executed.

Property Requirements

§ 255.227 Eligibility of property.

(a) A mortgage to be eligible for insurance shall be on real estate held:

(1) In fee simple; or

(2) On the interest of the lessee under a lease for not less than 99 years, which is renewable; or

(3) Under a lease having a period of not less than 75 years to run from the date the mortgage is executed; or

(4) Under a lease executed by a governmental agency, or such other lessor as the Commissioner approves, for the maximum term consistent with the legal authority for the execution of such lease, provided that the term of any such lease shall run for a period of not less than 50 years from the date the mortgage is executed.

(b) The property constituting security for the mortgage must be held by an eligible mortgagor as herein defined and must at the time the mortgage is insured be free and clear of other liens except those approved by the lender.

§ 255.228 Development of property.

(a) *Obligation of the mortgagor.* The mortgagor shall be obligated to either purchase or refinance existing housing and make such repairs and improvements as are deemed necessary by the lender. The property must not require substantial rehabilitation which consists of repairs, replacements, and improvements in excess of the limitations set forth in paragraph (c) of this section. The property, including improvements, shall comply with any material zoning or deed restrictions applicable to the project site and with all applicable building and other governmental regulations.

(b) *Displacement.* In accordance with the policy of minimizing displacement in the conduct of HUD programs, the mortgagor's application shall include a plan to minimize involuntary displacement of tenants if it is contemplated that repairs financed with insured mortgage proceeds will cause involuntary displacement.

(c) *Limitation on cost and nature of repairs, replacements, and improvements:*

(1) A property is eligible for mortgage insurance under this part if:

(i) the cost of repairs, replacements, and improvements does not exceed the greater of:

(A) 15 percent of the property's value after completion of all repairs, replacements, and improvements, or

(B) $6,500 (adjusted by any applicable high-cost area factor) per dwelling unit, and

(ii) no more than one major building component is being replaced.

(2) For purposes of this paragraph the term "high cost area factor" refers to the percentage increases over basic dollar limitations per dwelling unit authorized in § 255.211(a)(4). The term "major building component" includes roof structures; ceiling, wall, or floor structures; foundations; elevators; and plumbing, heating, air-conditioning or electrical systems.

(d) *Costs of replacement items and fire safety equipment.* In determining whether a property exceeds the substantial rehabilitation threshold described in paragraph (c) of this section, the lender may exempt from the total which must not exceed the threshold, the purchase price but not the installation cost of the following specific items of replacement or fire safety equipment:

(1) Replacement of:

(i) Ranges/hoods,

(ii) Ovens,

(iii) Refrigerators,

(iv) Garbage disposals, and

(v) Dishwashers.

(2) Fire safety equipment required by Federal, State or local law.

(e) *Minimum number of units.* A project shall consist of not less than five dwelling units.

(f) *Date of application.* In order to be eligible for mortgage insurance under this part, 3 years must have elapsed from the date of completion of construction or substantial rehabilitation of the project or beginning of occupancy (whichever is later) to the date of application for mortgage insurance.

(g) *Financial viability.* The project shall have attained sustaining occupancy (occupancy that would produce rental income sufficient to pay operating expenses, annual debt service and reserve fund for replacement requirements) as determined by the lender, before endorsement of the project for insurance; alternatively, the mortgagor shall provide an operating deficit fund at the time of endorsement for insurance, in an amount, and under an agreement, approved by the lender.

§ 255.229 Commercial facilities.

The project may include only such commercial and community facilities as the lender determines will be adequate and appropriate to serve the occupants. In no event shall net rentable commercial area exceed 20 percent of the total net rentable area, both commercial and residential. Notwithstanding the above, this limitation may be waived, for good cause, by the Commissioner.

Title

§ 255.230 Eligibility of title.

In order for the mortgaged property to be eligible for insurance, the lender must determine that marketable title thereto is vested in the mortgagor as of the date the mortgage is filed for record. The title evidence will be examined by the lender and the original endorsement of the credit instrument for insurance will be evidence of its acceptability.

§ 255.231 Title evidence.

Upon insurance of the mortgage, the mortgagor shall furnish to the lender a survey of the mortgaged property, satisfactory to the lender, and a policy of title insurance covering such property, as provided in paragraph (a) of this section. If, for reasons the lender deems satisfactory, title insurance cannot be furnished, the mortgagor shall furnish such evidence of title in accordance with paragraph (b), (c), or (d) of this paragraph as the lender may require. Any policy of title insurance, or evidence of title required under this section shall be furnished without expense to the lender. The types of title evidence are:

(a) A policy of title insurance issued by a company and in a form satisfactory to the lender. The policy shall name as the insured the lender and the mortgagor as their interests may appear. The policy shall provide that upon acquisition of title by the lender, it will become an owner's policy running to the lender.

(b) An abstract of title satisfactory to the lender, prepared by an abstract company or individual engaged in the business of preparing abstracts of title, accompanied by the legal opinion satisfactory to the lender as to the quality of such title, signed by an attorney at law experienced in the examination of titles.

(c) A Torrens of similar title certificate.

(d) Evidence of title conforming to the standards of a supervising branch of the Government of the United States of America, or of any State or territory thereof.

Cost Certification Requirements

§ 255.232 Agreement to certify cost requirements.

Before the commencement of repairs and endorsement of the loan the lender shall enter into an Agreement and Certification with the mortgagor in form and content satisfactory to the Commissioner for the purpose of precluding any excess of mortgage proceeds over statutory and regulatory limitations. Under this agreement, the mortgagor shall agree:

(a) To execute a certificate of actual costs, upon completion of all physical improvements on the mortgaged property, in accordance with § 255.235.

(b) To accept the mortgage loan reduced by the amount, if any, required by § 255.239.

§§ 255.233–255.234 [Reserved]

§ 255.235 Certificate of actual cost—contents in general.

(a) *Submission of certificate.* The mortgagor's certificate of actual cost, in a form approved by the Commissioner, shall be submitted to the lender before endorsement and upon completion of the improvements to the satisfaction of the lender. Cost certification is not required in those refinancing transactions where 70 percent of value is the controlling mortgage limitation.

(b) The certificate shall show the actual cost to the mortgagor of acquiring the property or refinancing property which secures an existing indebtedness. Items which shall be included if paid by the mortgagor in acquiring property are listed in § 255.211(d). Items which shall be included if paid by the mortgagor in refinancing property are listed in § 255.211(c)(2).

(c) The certificate shall be verified by an independent certified public accountant, or by an independent public accountant licensed by a regulatory authority of a State or other political subdivision on or prior to December 31, 1970.

§§ 255.236–255.238 [Reserved]

§ 255.239 Reduction in mortgage amount.

If the principal obligation of the mortgage exceeds the applicable limitations established under § 255.211, the mortgage shall be reduced by such excess amount before endorsement for insurance upon completion.

§ 255.240 Requisites of certification of actual costs.

Any statement of certification required by § 255.232 shall specifically state that it has been made, presented, and delivered for the purpose of influencing an official action of the Commissioner and may be relied upon by the Commissioner and the lender as a true statement of the facts contained therein.

VOL 48 ISS 102 MAY 25 1983 UMI

§ 255.241 Cost certification incontestable.

Upon the lender's approval of the mortgagor's certification, such certification shall be final and incontestable except for fraud or material misrepresentation on the part of the mortgagor.

Subpart D—Contract Rights and Obligations

§ 255.401 Insurance endorsement of mortgage.

Upon compliance with a commitment, the Commissioner will insure the lender against a portion of losses resulting from nonpayment of the debt, evidencing the insurance by an appropriate endorsement placed on the original credit instrument, which will identify the regulations under which the loan is insured and the date of insurance. To obtain insurance endorsement, the lender shall certify to completion of repairs and improvements, and inspections thereof, and satisfaction of all conditions of the commitment, as evidenced by submission to the Commissioner of the commitment, and supporting documents, such as note, mortgage, and any other exhibits required by the terms of the commitment. The mortgage shall be insured from the date of the endorsement of the credit instrument by the Commissioner, HUD Area Manager, Service Office Supervisor or other designee. The Commissioner and the lender shall thereafter be bound by the regulations in this part with the same force and to the same extent as if a separate contract has been executed relating to the insured mortgage, including the provisions of the regulations in this subpart and the provisions of the of the Act.

Mortgage Insurance Premiums

§ 255.402 Amount of MIP to be collected from the mortgagor.

(a) The lender shall collect from the mortgagor an initial MIP calculated from the date of the contract of coinsurance which shall not exceed the sum of one percent per annum of the average outstanding principal balance of the mortgage for the period from the date of the contract of coinsurance to one year following the date of the first payment to principal. For each year thereafter, the lender shall collect an annual MIP in an amount not to exceed 0.5 percent of the average outstanding principal balance of the mortgage. MIP shall be determined without taking into account delinquent payments or prepayments.

(b) In addition to the MIP required in the preceding paragraph, beginning not earlier than 12 months after the date of the first payment to principal, the lender may charge the mortgagor, subject to standards established by the Commissioner, an additional annual premium, for the account of the lender or an insurer of the lender, in an amount not in excess of 0.25 per annum of the average outstanding principal balance of the mortgage, without taking into account delinquent payments or prepayments.

§255.403 Method of payment of MIP.

The payment of any MIP under this part shall be made to the Commissioner by the lender in cash or debentures. The MIP will be paid annually on a level percentage of the declining principal balance.

§ 255.404 Payment of MIP by the lender.

(a) On the date of the contract of coinsurance, the lender shall pay to the Commissioner a first MIP equal to one percent of the original face amount of the mortgage. On the date of the first principal payment, the lender shall be liable for a second MIP equal to one percent of the average outstanding principal obligation of the mortgage for the year following the date of the first principal payment. The first and second MIP shall be adjusted as of the date of the first principal payment so that the aggregate of the first and second MIP shall equal the sum of one percent per annum of the average outstanding principal balance of the mortgage for the period from the date of the contract of coinsurance to one year following the date of the first principal payment.

(b) The lender, on each anniversary of the date of the first principal payment, shall pay an annual MIP equal to 0.4 percent of the average outstanding principal balance of the mortgage for the year following the date on which such MIP becomes payable.

(c) The MIP payable on and after the date of the first principal payment shall be calculated in accordance with the amortization provisions of the mortgage, without taking into account delinquent payments or prepayments. All MIP are payable in advance, and no refund can be made of any portion thereof, except as provided in § 255.406.

§ 255.405 Duration of MIP.

The MIP under § 255.404 shall continue annually until the earliest date on which one of the following occurs:

(a) The mortgage is paid in full.

(b) A deed to the lender is filed for record, or

(c) The contract of coinsurance is otherwise terminated with the consent of the Commissioner.

§ 255.406 Pro rata payment of annual MIP.

(a) If the contract of coinsurance is terminated by prepayment or voluntary termination after the due date of the initial first year MIP due in accordance with § 255.404, the Commissioner shall refund to the lender for the account of the mortgagor that portion of the current annual MIP applicable to the portion of the year subsequent to the date of termination.

(b) For the purpose of computing the pro rata portion of the annual MIP, the date of termination of coinsurance shall be the last day of the month in which the mortgage was prepaid or a voluntary termination request is received by the Commissioner.

§ 255.407 Late charge-payment of MIP.

(a) Mortgage insurance premiums which are paid to the Commissioner more than 15 days after the billing date or due date, whichever is later, shall include a late charge of 4 percent of the amount of the payment due.

(b) In addition to the late charge required under paragraph (a), MIP paid to the Commissioner more than 30 days after the billing date or due date, whichever is later, shall be subject to interest from the billing or due date, whichever is later, at a rate set in conformity with the Treasury Fiscal Requirements Manual.

§ 255.408 Assignment of coinsured mortgages.

A lender may assign or transfer a coinsured mortgage if the following requirements are satisfied:

(a) The assignee is an FHA-approved coinsuring mortgagee;

(b) The lender shows good cause for such assignment;

(c) The Commissioner finds that such assignment is for good cause and that there will be no disadvantage to FHA; and

(d) The Commissioner gives prior written approval for such assignment.

Default Under the Mortgage

§ 255.410 Definition of default.

The following shall be considered a default under this subpart:

(a) Failure of the mortgagor to make any payment due under the mortgage;

(b) Failure of the mortgagor to perform any other covenant under the provisions of the mortgage if the lender, because of such failure, has accelerated the debt.

§ 255.411 Date of default.

For purposes of this subpart, the date of default shall be considered as:

(a) The date of the first uncorrected failure to perform any obligation under the mortgage; or

(b) The date of the first failure to make a monthly payment which is not covered by subsequent payments made by the mortgagor when such subsequent payments are applied to the overdue monthly payments in the order in which they became due.

§ 255.412 Notice of default.

If the default as defined in § 255.410 continues for a period of 30 days, the lender shall, within 30 days thereafter, give written notice of the default to the Commissioner on a form prescribed by the Commissioner unless the default has been cured or unless the Commissioner has been notified of a previous default which remains uncured.

§ 255.413 Reinstatement of a defaulted mortgage.

If, after default and before the completion of foreclosure proceedings, the mortgagor cures the default, the insurance shall continue as if a default had not occurred. The mortgagor shall pay to the lender such expenses as the lender has incurred in connection with the foreclosure proceedings, and the lender shall give written notice of reinstatement to the Commissioner.

§ 255.414 Forbearance relief.

A mortgagor and a lender may enter into an agreement for the reduction or suspension of regular mortgage payments according to standards set forth by the Commissioner. However, during such periods of modification of terms of forbearance, all moneys received from rents or other sources must be applied toward the payment of operating costs, with any receipts in excess of operating costs applied during such period to payments required under the mortgage. During periods of modification in mortgage terms of forbearance in requiring payment-in-full of all payments when due under the mortgage, the mortgagor shall agree that no distribution or dividends shall be payable by the mortgagor to any shareholder, partner, or other investor in the mortgagor entity.

Termination

§ 255.415 Termination of coinsurance contract.

The contract of coinsurance for each individual mortgage shall be terminated if:

(a) The mortgage is paid in full at maturity or is prepaid in full;

(b) The lender acquires the mortgaged property and notifies the Commissioner that no claim for insurance benefits will be made;

(c) After foreclosure the property is redeemed;

(d) The property is acquired at a forelosure sale by a party other than the lender;

(e) The lender fails to file a claim within the period prescribed in § 255.424(b); or

(f) The mortgagor and lender jointly request termination.

§ 255.416 Notice and date of termination by Commissioner.

The Commissioner shall notify the lender that the contract of coinsurance on a mortgage has been terminated and shall establish the effective termination date. The termination date shall be the last day of the month in which any one of the events specified in § 255.415 occur.

§ 255.417 Effect of termination.

Upon termination of the contract of insurance, the obligation to pay any subsequent MIP shall cease and all rights of the mortgagor and lender under the contract for insurance shall be terminated.

Claim Procedure

§ 255.420 Acquisition of property.

Any time after a default and a determination by the lender to accelerate the total principal amount of the mortgage, the lender, at its election, shall (if no other eligible entity has assumed the obligations of the mortgagor) either (a) commence foreclosure of the mortgage or (b) acquire title to the mortgage property by deed in lieu of foreclosure. The lender shall notify the Commissioner of its election either to commence foreclosure of the mortgage or acquire title by deed in lieu of foreclosure.

§ 255.421 Deed in lieu of foreclosure.

In lieu of instituting or completing a foreclosure, the lender may acquire property by voluntary conveyance from the mortgagor. Conveyance of the property by deed in lieu of foreclosure is approved subject to the following requirements:

(a) The mortgage is in default at the time the deed is executed and delivered;

(b) The credit instrument is canceled and surrendered to the mortgagor;

(c) The mortgage is satisfied of record as a part of the consideration for such conveyance; and

(d) The deed from the mortgagor conveys marketable title and contains a covenant which warrants against the acts of the grantor and all claiming by, through, or under him.

§ 255.422 Notice to Commissioner.

At the time the lender elects to acquire title either by foreclosure or deed in lieu of foreclosure, it shall give written notice to the Commissioner of its intention to file a claim for insurance benefits.

Payment of Insurance Benefits

§ 255.423 Method of payment.

Payment of the insurance claim shall be made in cash unless the lender files a written request for payment in debentures. In the event that the lender requests debentures, all of the provisions of § 207.259(e) of this chapter shall apply.

§ 255.424 Disposition of property and application for insurance benefits.

(a) Upon the acquisition of marketable title to the property securing a defaulted mortgage in accordance with § 255.420, the lender shall obtain two appraisals of the property performed by independent appraisers selected from a panel approved by the Commissioner. The appraisals shall reflect the market value of the property, as of the date of acquisition, for its highest and best use.

(b) After the lender sells the property, or after the expiration of 12 months from the date of acquisition of title, whichever occurs first, the lender may file with the Commissioner a claim for the insurance benefits to which it is intitled in accordance with § 255.425. To be eligible for payment, a claim shall be filed no later than 15 days after sale or expiration of the 12 month period, whichever is applicable.

(c) Upon making a claim to the Commissioner for insurance benefits, the lender shall notify the Commissioner, on an approved form, of the sale of the property, the sales price, and income and expenses incurred in connection with the acquisition, repair, operation, and sale of the property.

(d) If the property has not been disposed of at the time of the lender's request for payment, the lender shall use the higher of the two appraised values of the property secured in accordance with paragraph (a) of this section in its notification to the Commissioner, in lieu of the sales price.

§ 255.425 Amount of payment.

(a) The basis for the computation of insurance benefits shall be the sum of the unpaid principal balance on the date of the institution of foreclosure proceedings or on the date of acquisition of the property otherwise after default, plus the amount of all payments made by the lender and allowances for items

VOL 48 ISS 102 MAY 25 1983 UMI

as set forth in § 255.426, less all items as set forth in § 255.427.

(b) The amount of such insurance benefits shall be 85 percent of the amount computed under paragraph (a) of this section if the lender has obtained no insurance of its coinsurance risk or has insured 50 percent of its coinsurance risk.

(c) The amount of insurance benefits payable by the Commissioner shall be 72.25 percent of the amount computed under paragraph (a) of this section if the lender has obtained insurance for either 100 percent of its coinsurance risk or that portion of its coinsurance risk which equals the maximum amount which the insurer is authorized to insure.

§ 255.426 Items included in payment.

The insurance benefits paid shall include the following items:

(a) The amount of all payments made by the lender for taxes, special assessments, and water rates which are liens prior to the mortgage; for fire and hazard insurance on the property; and for any mortgage insurance premiums paid after default;

(b) An amount equivalent to mortgage interest on the principal amount of the mortgage unpaid on the date of the institution of foreclosure proceedings or on the date of the acquisition of the property otherwise after default, which amount shall be payable from the date of default to the date of payment of the insurance benefits.

(c) [Reserved]

(d) Costs, actually paid by the lender and approved by the Commissioner, of acquiring the property through foreclosure or otherwise, in an amount not in excess of two-thirds of such costs. Such costs shall not include loss or damage resulting from the invalidity or unenforceability of the lien of the mortgage or the unmarketability of the title of the mortgagor;

(e) Reasonable payments made by the lender for:

(1) Preservation, operation, and maintenance of the property;

(2) Repairs necessary to meet the objectives of the HUD minimum property standards, those required by local law, and such additional repairs as may be specifically approved in advance by the Commissioner;

(3) Expenses in connection with the sale of the property.

§ 255.427 Items deducted from payment.

The following items shall be deducted in the computation of insurance benefits:

(a) An amount equal to 5 percent of the outstanding principal balance of the mortgage on the date of institution of foreclosure proceedings or on the date of acquisition of the property otherwise after default.

(b) All amounts received by the lender on account of the mortgage after the institution of foreclosure proceedings or the acquisition of the property by direct conveyance or otherwise after default, and any other reimbursement to the lender, other than pursuant to the coinsurance contract.

(c) All cash or funds related to the mortgaged property and held by the lender or its agent or to which the lender is entitled, including deposits and escrows made for the account of the mortgagor.

(d) The amount of any undrawn balance under a letter of credit accepted by the lender in lieu of a cash deposit for an escrow agreement.

(e) Any net income received by the lender from the property securing the mortgage after the date of default.

(f) The proceeds from the sale of the project, except that if the lender sells the project for an amount less than the appraised value in a negotiated sale, the amount to be deducted will be the higher of the appraised values determined in accordance with § 255.424(a). If the property is sold on the basis of a competitive bidding procedure approved by the Commissioner, the sales price will be deducted notwithstanding that it is lower than the appraised value. If the property has not been disposed of within 12 months from the date of acquisition, the lender shall use the higher of the appraised values of the property, determined in accordance with § 255.424(a), as a substitute for the sales price.

(g) Any and all claims which the lender has acquired in connection with the acquisition and sale of the property.

§ 255.428 Remedies in the event of a default by a lender-issuer under the GNMA mortgage backed securities program.

(a) If, after payment by the Commissioner of a coinsurance claim, the lender-issuer fails to pay the full amount, or any part thereof, which is contractually owed to an investor which holds Government National Mortgage Association (GNMA) securities backed by coinsured mortgages, the Commissioner shall pay such amount to GNMA upon request, which amount shall not exceed 15 percent, or 27.75 percent, whichever is appropriate, of the amount computed pursuant to § 255.425(a), plus the amount referenced in § 255.427(a) of this Part. The Commissioner shall make such payments in cash. After such payment by the Commissioner, the lender-issuer shall have no claim against the Commissioner for any such funds.

(b) If the Commissioner is required to make such payments because of the lender-issuer's failure to pay any amount contractually owed to an investor which holds GNMA securities backed by coinsured mortgages, the Commissioner may request that the Mortgagee Review Board withdraw approval of the lender-issuer as a HUD-approved mortgagee, under the provisions of Part 25 of this title.

(c) If the Commissioner is required to make such payments because of the lender-issuer's failure to pay any amount contractually owed to an investor which holds GNMA securities backed by coinsured mortgages, the lender-issuer shall be liable for reimbursing the Commissioner for such payments.

(d) If there occurs a default under the GNMA Mortgage-Backed Securities Program by a coinsuring lender-issuer, GNMA shall have the right, notwithstanding the requirements of § 255.408, to cause all coinsured mortgages held in GNMA pools by the defaulting coinsuring lender-issuer to be assigned to another GNMA-approved coinsuring lender-issuer or to itself, subject to the requirements of this paragraph.

(1) For any coinsured mortgage which is not in default and is held by a defaulting lender-issuer, GNMA shall first attempt to have such mortgage assigned to another eligible coinsuring lender by soliciting offers to assume the defaulting lender-issuer's rights and obligations under the mortgage from those eligible coinsuring lenders which are indicated on a periodically updated listing furnished to GNMA by the Commissioner and are also GNMA issuers.

(2) If all such offers are rejected by GNMA as nonresponsive or otherwise acceptable, or if no offers are received, GNMA shall have the right to perfect an assignment of the nondefaulted mortgage to itself.

(3) For any coinsured mortgage which is in default and held by a defaulting lender-issuer, GNMA shall have the right to perfect an assignment of the coinsured mortgage directly to itself before extinguishing the mortgage by completion of foreclosure action or acquisition of title by deed in lieu of foreclosure in accordance with § 255.420.

(4) GNMA as assignee shall give the Commissioner written notice within 30 days after taking a mortgage by assignment pursuant to this paragraph, in order to allow an appropriate

endorsement and necessary changes in the Commissioner's records.

(5) Any coinsured mortgage so assigned to GNMA shall be endorsed for full insurance in accordance with § 207.254 of this title, effective as of the date of the assignment. Any subsequent insurance claim by GNMA or any assignee of the fully insured mortgage shall be governed by §§ 207.255 through 207.259 of this title, except that payment will be made in cash instead of debentures.

§ 255.429 Effect of amendments.

The regulations in this subpart may be amended by the Commissioner at any time and from time to time, in whole or in part, but such amendment shall not adversely affect the interests of a lender under the contract of coinsurance on any mortgage already coinsured and shall not adversely affect the interest of a lender on any mortgage to be coinsured on which the lender has made a commitment to insure.

§ 255.430 Compliance with National Flood Insurance Program and Coastal Barriers Resources Act.

(a) No insurance shall be made available under this part for acquisition, refinancing or repair of a building or manufactured home located in an area that has been identified by the Federal Emergency Management Agency as having special flood hazards unless the community in which the area is situated is participating in the National Flood Insurance Program and the regulation thereunder (44 CFR 59–79) or less than a year has passed since FEMA notification regarding such hazards, and flood insurance on the structure is obtained in compliance with Section 102(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234, 42 U.S.C. 40001, *et seq*).

(b) No insurance shall be made available under this part, except pursuant to a commitment issued before October 18, 1982, with respect to any property within the Coastal Barriers Resources System established by the Coastal Barriers Resources Act (16 US.C. 3501).

2. 24 CFR § 207.24 is revised to read as follows:

§ 207.24 Development of property.

(a) At the time the mortgage is insured, the mortgagor shall be obligated to construct and complete new housing accommodations on the mortgaged property, designed principally for residential use, conforming to standards statisfactory to the Commissioner, and consisting of not less than five rental dwelling units on one site and may be detached, semi-detached, or row houses, or multifamily structures; except that the Commissioner may insure a mortgage on a completed project constructed pursuant to a Commitment to Insure upon Completion, or

(b) At the time the mortgage is insured, there shall be located on the mortgaged property a building or buildings which require substantial rehabilitation (as defined in paragraph (c) of this section) and which, upon completion of substantial rehabilitation, shall constitute a single project and provide housing accommodations designed principally for residential use, conforming to standards satisfactory to the Commissioner, and containing at least five rental dwelling units so located in relation to one another as to effect a substantial improvement of housing standards and conditions in the neighborhood; and in either case such dwelling and other improvement if any, must not violate any material zoning or deed restrictions applicable to the project site, and must comply with all applicable building and other governmental regulations; and any project may include such commercial and community facilities as the Commissioner deems adequate to serve the occupants.

(c)(1) "Substantial rehabilitation" consists of repairs, replacements, and improvements:

(i) the cost of which exceeds the greater of:

(A) 15 percent of the property's value after completion of all repairs, replacements and improvements, or

(B) $6,500 (adjusted by any applicable high-cost area factor) per dwelling unit, or

(ii) which involve the replacement of more than one major building component.

(2) For purposes of this paragraph, the term "high-cost area factor" refers to the percentage increases over basic dollar limitations per dwelling unit authorized in § 207.4(c). The term "major building component" includes roof structures; ceiling, wall, or floor structures; foundations; elevators; and plumbing, heating, air conditioning, or electrical systems.

(3) In determining whether repairs, replacements, and improvements are substantial rehabilitation for purposes of this paragraph, the purchase price, but not the installation cost, of the following specific items of replacement or fire safety equipment shall be exempted:

(i) Replacement of:

(A) Ranges/hoods,

(B) Ovens,

(C) Refrigerators,

(D) Garbage disposals, and

(E) Dishwashers.

(ii) Fire safety equipment required by Federal, State or local law.

3. Paragraphs (f) and (g) of 24 CFR § 207.32a are revised to read as follows:

§207.32a Eligibility of mortgages on existing projects.

* * * * *

(f)(1) *Eligible property.* A mortgage given to purchase or refinance an existing project shall be eligible for insurance if such project contains at least five dwelling units. The project shall have attained sustaining occupancy (occupancy that would produce rental income sufficient to pay operating expenses, annual debt service and reserve fund for replacement requirements), as determined by the Commissioner, prior to endorsement of the mortgage for insurance, or the mortgagor shall provide an operating deficit fund at the time of endorsement for insurance, in an amount and under an agreement, approved by the Commissioner.

(2) A property is eligible for mortgage insurance under this section if:

(i) The cost of repairs, replacements, and improvements does not exceed the greater of

(A) 15 percent of the property's value after completion of all repairs, replacements, and improvements, or

(B) $6,500 (adjusted by any applicable high cost area factor) per dwelling unit, and

(ii) No more than one major building component is being replaced.

(3) For purposes of this paragraph, the term "high-cost area factor" refers to the percentage increases over basic dollar limitation per dwelling unit authorized in § 207.(4)(c). The term "major building component" includes roof structures: ceiling, wall, or floor structures; foundations; elevators; and plumbing, heating, air conditioning, or electrical systems.

(4) In determining whether a property exceeds the rehabilitation threshold described in paragraphs (f) (2) and (3) of this section, the purchase price, but not the installation cost, of the following specific items of replacement or fire safety equipment shall be excluded:

(i) Replacement of:

(A) Ranges/hoods,

(B) Ovens,

(C) Refrigerators,

(D) Garbage disposals and

(E) Dishwashers.

(ii) Fire safety equipment required by Federal, State or local law.

(5) Before filing an application for mortgage insurance, the project, except

VOL 48 ISS 102 25 1983 MY UMI

one which meets the requirements of paragraph (k) of this section, must have been fully completed and at least three years must have elapsed from the date of completion or initial occupancy, as determined by the Commissioner, whichever is later.

(g) *Eligible property in older declining urban areas.* In addition to meeting the requirement in paragraph (f)(5) of this section, and the other requirements of this section, an existing project to be purchased or refinanced in an older, declining urban area, shall comply with the following conditions:

(1) The maximum mortgage amount shall be limited by the lesser of paragraphs (b)(1), (b)(2), (c) or (d)(2) of this section.

* * * * *

Authority: Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d), sec. 244, National Housing Act, 112 U.S.C. 1715z(9).

Dated: April 28, 1983.

Philip Abrams,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210-27-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 913

Removal of Certain Conditions and Extension of the Deadline for Meeting Other Conditions on the Approval of the Illinois Permanent Program Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: This document amends 30 CFR Part 913 by removing one condition concerning performance bonds and part of a second condition relating to blasting, and modifying the deadline for Illinois to meet a third condition relating to abatement and the remaining part of the second condition on the Illinois program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Illinois received conditional approval of its permanent program on June 1, 1982 (47 FR 23858–23883), subject to the correction of five minor deficiencies. On November 30, 1982, Illinois submitted to OSM provisions intended to satisfy three of the conditions. Approval of these rules as program amendments will be reflected in 30 CFR Part 913.

EFFECTIVE DATE: The removal of these conditions and the extension of the deadline are effective May 25, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. James Fulton, Field Office Director, Springfield Field Office, Office of Surface Mining, No. 4 Old Capitol Plaza North, Springfield, Illinois 62701; Telephone: (217) 492–4495.

SUPPLEMENTARY INFORMATION:

I. Background

The Illinois program was approved on June 1, 1982 (47 FR 23858–23883). The approval was conditioned on the correction of five minor deficiencies. In accepting the Secretary's conditional approval, Illinois agreed to correct deficiencies (a), (d), and (e) by December 1, 1982, and deficiencies (b) and (c) by June 1, 1983. Information pertinent to the general background, revisions, modifications, and amendments to the Illinois permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Illinois program can be found in the June 1, 1982 **Federal Register**.

II. Submission of Amendments

Illinois submitted rules, by letter dated November 30, 1982, intended to satisfy conditions (a), (d), and (e). On December 28, 1982, OSM published notice in the **Federal Register** announcing receipt of these provisions and inviting public comment on whether the provisions satisfied the conditions of approval (47 FR 57739).

III. Secretary's Findings

(1) To satisfy condition (a), Illinois amended its rules 1816.64(a) and 1817.65(a) as follows:

Section 1816.64 Use of Explosives: Public Notice of Blasting Schedule

(a) Blasting schedule publication.

(1) Each person who conducts surface mining activities shall publish a blasting schedule at least 30 days, but not more than 60 days, before beginning a blasting program in which blasts that use more than 5 pounds of explosive or blasting agent are detonated. The blasting schedule shall be published in a newspaper of general circulation in the locality of the blasting site.

Section 1817.65 Use of Explosives: Surface Blasting Requirements

(a) A resident or owner of a dwelling or structure that is located within one-half mile of any area affected by any surface blasting event shall be notified in writing at least 30 days, but not more than 60 days, before beginning a blasting program in which blasts that use more than 25 pounds of explosive or blasting agent are detonated. Such notification shall be accompanied by information advising the owner or resident how to request a pre-blast or condition survey.

Condition (a), as set forth in the June 1, 1982 **Federal Register**, required Illinois to amend its program to: (1) Allow only five pounds of explosives or less to be detonated without-publishing notice of the operator's blasting schedule as required in 30 CFR 816.64(a)(1); and (2) require that surface owners or residents be notified prior to any surface blasting event as required by 30 CFR 817.65(a).

The Secretary finds that the amended Illinois rule 1816.64(a) satisfies condition (a)(1) by substituting "5 pounds" for "25 pounds".

The Secretary further finds that Illinois has amended its rule 1817.65(a) to require notification of owners and residents for *any surface blasting event* before beginning a blasting program in which *blasts that use more than 25 pounds* of explosives or blasting agent are detonated. While Illinois has added the phrase "any surface blasting event", the net result is that notification would be required only for blasts using more than 25 pounds of explosives. This requirement is not as effective as 30 CFR 817.65(a), and does not satisfy condition (a)(2).

However, because Illinois submitted material to satisfy this condition which the State, in good faith, believed to be adequate to satisfy this deficiency, the Secretary has decided to extend the date by which Illinois must submit new material to satisfy condition (a)(2). OSM has discussed this matter with the State, including the State administrative procedures involved in rulemaking. In order to allow Illinois adequate time to draft and promulgate a suitable amendment, the Secretary hereby extends the date by which Illinois must satisfy condition (a)(2) to August 15, 1983.

(2) To satisfy condition (d), Illinois amended its rule 1807.11(d) as follows:

Section 1807.11 Procedures for Seeking Release of Performance Bond

(d) Inspection by Department. The Department shall inspect and evaluate the reclamation work involved within 30 days after receiving a completed application for bond release, or as soon thereafter as weather conditions permit. The surface owner, or lessee, or agent thereof shall be given notice of such inspection, and may participate with the regulatory authority in making the bond release inspection.

Condition (d), as set forth in the June 1, 1982 **Federal Register**, required Illinois to amend its program to guarantee the surface owner the right to participate in the inspection prior to bond release, consistent with 30 CFR 807.11(d).

The Secretary finds that the amended Illinois rule expressly provides that the surface owner may participate in the bond release inspection and thus satisfies condition (d).

(3) Condition (e), as set forth in the June 1, 1982 **Federal Register**, and discussed in Finding 21.3, required Illinois to amend its program to provide for extensions of time beyond 90 days for abatement of violations in accordance with 30 CFR 843.12(f) and 843.12(j). Finding 21.3 noted that Illinois rule 1843.12(f)(1) authorized an extension in any situation where abatement would cause more environmental harm than it would prevent. The Federal rule, 30 CFR 843.12(f)(4), limits this basis for an extension to situations where climatic conditions preclude abatement within 90 days, or where due to climatic conditions, abatement within 90 days clearly: (i) would cause more environmental harm than it would prevent, or (ii) requires action that would violate safety standards established by statute or regulation under the Mine Safety and Health Act. Further, the Federal rule, 30 CFR 843.12(j), also requires that no extension may be granted for longer than 90 days. Instead, where the condition which prevented abatement within 90 days exists at the expiration of the extension, the operator must make a fresh showing and meet all other requirements for an additional extension.

To satisfy condition (e), Illinois submitted provisions intended to be substantively identical to 30 CFR 843.12(f)(4) and (j). Illinois amended its rule 1843.12(f) to remove subparagraph (f)(1) and reword subparagraph (f)(4), and added a new 1843.12(i). The revised Illinois rule is as follows:

Section 1843.12 Notices of Violation

* * * * *

(f) Circumstances which may qualify a surface coal mining operation for an abatement period of more than 90 days are:

(1) Where the permittee of an ongoing permitted operation has timely applied for and diligently pursued a permit renewal or other necessary approval of designs or plans but such permit or approval has not been or will not be issued within 90 days after a valid permit expires or is required, for reasons not within the control of the permittee;

(2) Where there is a valid judicial or administrative order precluding abatement within 90 days as to which the permittee has diligently pursued all rights of appeal and as to which he or she has no other effective legal remedy;

(3) Where the permittee cannot abate within 90 days due to a labor dispute;

(4) Where climatic conditions preclude abatement within 90 days, clearly:

(i) Would cause more environmental harm than would prevent; or

(ii) Requires action that would violate safety standards established by statute or regulation under the Mine Safety and Health Act.

(5) Where abatement of the violation within 90 days would create an imminent danger to the health or safety of the public or would cause, or could reasonably be expected to cause, significant imminent environmental harm to land, air, or water resources.

* * * * *

(i) No extension granted under paragraph (h) exceed 90 days in length. Where the condition or circumstances which prevented abatement within 90 days exists at the expiration of any such extension, the permittee may request a further extension in accordance with the procedures of paragraph (h).

Although the revised Illinois rule is intended to be substantively identical to the Federal rule, several key words and phrases have been omitted. Listed below are the relevant portions of the Illinois rule, with the omitted words and phrases underlined.

(f)(4) Where climatic conditions preclude abatement within 90 days, *or where, due to climatic conditions, abatement within 90 days* clearly:

(i) would cause more environmental harm than *it* would prevent; or * * *.

(i) No extension granted under paragraph (h) *may* exceed 90 days in length. * * *

The omitted words and phrase are substantive, not merely typographical omissions, and therefore, render the meaning unclear. Although the revised rule satisfies a number of the concerns raised by the condition, the Secretary is unable to find that it is no less effective than the Federal regulations when taken in its entirety. However, because Illinois submitted material to satisfy this condition which the State in good faith believed to be adequate to correct this deficiency, the Secretary has decided to extend the date by which Illinois must submit new material to satisfy condition (e). OSM has discussed this matter with the State, including the State's rulemaking procedures. Accordingly, in order to allow Illinois adequate time to draft and promulgate a suitable amendment, the Secretary hereby extends the date by which Illinois must satisfy condition (e) to August 15, 1983.

IV. Public Comments

Public comments were submitted by the Illinois South Project, Inc. on behalf of itself and other commenters. The comments will be referred to as ISP et al.

1. ISP et al commented (Comment No. 1) that the rule change to section 1816.64 appeared to meet the condition and should be approved.

The Secretary is removing that part of the condition pertaining to 1816.64(a).

2. ISP et al commented (Comment No. 2) that the amended Illinois rule 1817.65(a) does not provide for notice prior to any blasting event as do the Federal rules.

The Secretary agrees and has extended the date by which Illinois must submit amended material to satisfy condition (a)(2).

3. ISP et al commented (Comment No. 3) that amended rule 1807.11(d) appears to meet the condition and should be approved.

The Secretary is removing condition (d) which pertains to rule 1807.11(d).

4. ISP et al commented (Comment Nos. 4, 5, 6, 7 and 8) that Illinois rule 1843.12 contains defects in addition to those noted in Finding 21.3 and thus fails to provide for extensions of the 90-day abatement period in accordance with 30 CFR 843.12.

However, these comments are addressed to issues not within the scope of the present rulemaking. The Secretary requested public comment only on whether the provisions submitted by Illinois satisfy the condition set forth in the June 1, 1982 **Federal Register**, and discussed under Finding 21.3. The Secretary will consider these additional comments in the course of his oversight responsibility and will, if necessary, advise Illinois that further changes to its program may be required.

5. ISP et al commented (Comment No. 9) that the Illinois rule must contain a counterpart to 30 CFR 843.12(j) which requires that further extensions beyond 90 days must meet the same standards as the original extension.

Illinois has adopted rule 1843.12(i), which is a virtually identical counterpart to 30 CFR 843.12(j), and provides that further extensions must meet the same standards as the original extension.

6. ISP et al commented (Comment No. 10) that it supports the deletion of existing 1843.12(f)(1) and the corresponding change in (f)(4).

The Secretary agrees, but for the reasons explained above under Secretary's Findings, is extending the deadline for Illinois to meet condition (e).

VOL 48 ISS 102 MAY 25 1983 UMI

7. ISP et al commented (Comment No. 11) that Illinois failed to follow §9.01 of the Illinois Surface Coal Mining Land Conservation and Reclamation Act (SCMLCRA) in proposing the rule changes and therefore the proposed rule changes should be disapproved. ISP et al charged that Illinois failed to provide ISP with an advance notice of the proposed rulemaking and as a result, ISP had only 14 days, rather than the required 35 days, in which to submit comments.

The Secretary notes that the Illinois Department of Mines and Minerals (IDMM) itself had not received a copy of the September 10 Illinois Register when ISP requested it on September 29. ISP was sent a copy of the official Illinois Register as soon as the IDMM received one. The Secretary will review the State's rulemaking procedures during oversight to ensure that they are being conducted in accordance with the approved State program.

8. ISP et al. commented (Comment No. 12) that the proposed amendments must be disapproved because the State failed to respond to comments submitted during the State's rulemaking proceedings.

IDMM did file copies, in the Secretary of State's office, of its responses to comments in accordance with the Illinois Administrative Procedures Act. As noted above, the Secretary will consider these additional comments in the course of his oversight responsibility for monitoring the State's administration of its permanent program.

9. ISP et al. commented (Comment No. 13) that in the decision on these program amendments, the Director should inform the State that its request to have the submittal "not be deemed a formal 'amendment' under your rules" and the State's assertion that its submittal is not substantively an amendment to its State program is contrary to 30 CFR 732.17(a) that "*any* alteration of an approved State program" (emphasis added) must be considered as a program amendment.

The Secretary agrees that 30 CFR 732.17(a) requires any alteration of an approved State program be submitted as a program amendment. Section 503 of SMCRA establishes that a State may not exercise jurisdiction under the Act unless the State program is approved by the Secretary. Thus, any changes to the program are not enforceable by the State until approved by the Secretary. 30 CFR 732.17(g) clearly prohibits any unilateral changes to approved State programs, thus implementing Section 503 of SMCRA. In his oversight of the State program the Secretary will recognize only the statutes and regulations approved by him, and will require the enforcement by the State of only such provisions.

V. Approval of Amendments To Satisfy Conditions

Accordingly, conditions (a)(1) and (d) are hereby removed and 30 CFR Part 913 is amended to: (1) indicate approval of the Illinois program amendments and (2) extend the time by which Illinois must satisfy conditions (a)(2) and (e).

VI. Procedural Matters

1. *Compliance with the National Environmental Policy Act.* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act.* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any new requirements; rather, it ensures that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 913

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, Part 913 of Title 30 is amended as set forth herein.

Dated: May 18, 1983.

William P. Pendley,

Acting Assistant Secretary for Energy and Minerals.

PART 913—ILLINOIS

1. 30 CFR 913.11 is amended by revising paragraphs (a) and (e) and removing and reserving paragraph (d) as follows:

§ 913.11 Conditions of State regulatory program approval.

* * * * *

(a) Steps will be taken to terminate the approval found in § 913.10 unless Illinois submits to the Secretary by August 15, 1983, copies of promulgated regulations or otherwise amends its program to require that surface owners or residents be notified prior to any surface blasting event as required by 30 CFR 817.65(a).

* * * * *

(d) [Reserved]

(e) Steps will be taken to terminate the approval found in § 913.10 unless Illinois submits to the Secretary by August 15, 1983, copies of promulgated regulations or otherwise amends its program to provide more than 90 days for abatement of violations in accordance with 30 CFR 843.12(f) and 843.12(j).

2. 30 CFR 913.15 is revised to read as follows:

§ 913.15 Approval of regulatory program amendments.

(a) The following amendment was approved effective November 23, 1982: Illinois revised rule 1823.14(a), adopted August 13, 1982.

(b) The following amendments were approved effective May 25, 1983: Illinois revised rules 1816.64(a) and 1807.11(d), adopted December 10, 1982.

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*)

[FR Doc. 83–14007 Filed 5–24–83; 8:45 am]

BILLING CODE 4310–05–M

---

30 CFR Part 936

Oklahoma Permanent Regulatory Program; Informal Conference on Status

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Notice of informal conference.

SUMMARY: On January 19, 1981, the Secretary of the Interior approved Oklahoma's program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA) (See 46 FR 4902). On March 10, 1983, the Director, OSM, notified Oklahoma's Governor that OSM had reason to believe that serious problems exist which are adversely affecting the effective implementation, administration, maintenance and enforcement of Oklahoma's approved regulatory program (See "Supplemental Information" below).

Under the provisions of OSM's regulations at 30 CFR 733.12(c), the Director may hold an informal conference to discuss the facts surrounding the Director's notification if such an informal conference is requested by the State. By letter dated April 27, 1983, the Oklahoma Department of Mines requested that the Director hold an informal conference. Accordingly, the Director hereby notifies Oklahoma and the public that OSM will hold an informal conference on June 15, 1983, at the address shown below under **"ADDRESSES."** All interested persons may attend the informal conference.

DATE: OSM has scheduled an informal conference on June 15, 1983, to be held at the address below.

ADDRESSES: The informal conference will be held on June 15, 1983, beginning at 9:00 a.m. at the Old Post Office Building, Room 129, 215 Dean A. McGee Avenue, Oklahoma City, Oklahoma.

Copies of Administrative Record documents referenced in this notice are available for public inspection and copying during normal business hours at:

Office of Surface Mining, 333 West Fourth Street, Room 3432, Tulsa, Oklahoma 74103

Office of Surface Mining, Administrative Record, Room 5315, 1100 L Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Markey, Tulsa Field Office Director, Office of Surface Mining Reclamation and Enforcement, 333 West Fourth Street, Room 3432, Tulsa, Oklahoma 74103; Telephone: (918) 581–7927.

SUPPLEMENTARY INFORMATION: On January 19, 1981, the Secretary of the Interior conditionally approved the Oklahoma program (46 FR 4902–4911).

On March 10, 1983, the Director, OSM, notified the Governor of Oklahoma that OSM had reason to believe that serious problems exist which are adversely affecting the effective implementation, administration, maintenance, and enforcement of Oklahoma's approved permanent regulatory program under SMCRA. (OK–458)

Since the approval of Oklahoma's program, and in keeping with its policy of working closely with the State, OSM has had numerous discussions with officials from the Oklahoma Department of Mines (ODOM) about the State's performance. Recent discussions and investigations have centered on inadequacies of ODOM's implementation of the approved program in the areas set forth below.

1. *State actions on petitions to designate lands as unsuitable for mining:* OSM has received information from a citizen group that ODOM failed to process an unsuitability petition in accordance with the provisions of its approved program. OSM has made a prima facie determination that ODOM may have violated its rules when it rejected an unsuitability petition on procedural grounds.

2. *Permitting:* OSM has reason to believe that ODOM is: (a) not processing permit applications in accordance with the provisions of Oklahoma's program; (b) making inadequate completeness determinations on permit applications; (c) conducting inadequate technical review of permit applications; and (d) allowing the processing of applications for new mines to take precedence over applications for existing mine operations that are continuing to operate illegally under initial regulatory program permits (including those permits issued during the period between January 1981 and April 1982 when the State did not have regulations in effect). OSM is also concerned that ODOM is not allowing for public comment on significant modifications made to permit applications, failing to follow up on requests from applicants for additional permit application information, and is not requiring the posting of adequate performance bond.

3. *Inspection and Enforcement:* OSM has identified certain problems in ODOM's inspection and enforcement actions including information causing OSM to have reason to believe that operators who did not file a timely permanent program permit application are continuing to mine. Furthermore, OSM is concerned that: (a) ODOM inspectors have overlooked serious violations which should have been cited during State inspections; (b) ODOM has failed to take follow-up action on notices of violation that it has previously issued; and (c) ODOM has failed to respond promptly to most ten-day notices issued by OSM. Moreover, OSM has reason to believe that ODOM is not meeting the required standards for frequency of complete and partial inspections, and the ODOM has failed to adequately assess civil penalties for violations ODOM did cite.

4. *Administrative Procedures and Records:* OSM is concerned that ODOM has not created or maintained adequate administrative record procedures or tracking systems for such matters as permit application reviews, unsuitability petitions, citizen complaints, ten-day notices from OSM, enforcement actions, civil penalty assessments, and bonding.

5. *Conditions of Approval:* The Director's March 10, 1983, letter to the Governor of Oklahoma expressed concerns about the State's ability to meet the Secretary's four conditions of approval by the May 15, 1983, deadline. ODOM has since submitted program amendments on May 13, 1983, to address its conditions of approval. OSM will conduct a review of those program amendments and announce a public comment period for that purpose by separate notice in the **Federal Register**. However, it is possible that discussions at the June 15, 1983, informal conference may focus on the adequacy of the State's May 13, 1983, program amendments. Briefly, the four conditions of approval which may be discussed are: (1) a requirement that Oklahoma provide citizens with the same access to courts (i.e., without having to exhaust administrative remedies) as provided under section 520 of SMCRA; (2) a requirement that Oklahoma amend its rules of practice for hearings to make the public participation aspects of those rules no less effective than the Federal requirements; (3) that Oklahoma provide for the award of costs and expenses, including attorney's fees, in administrative proceedings; and (4) that Oklahoma provide for the administration of the Small Operator Assistance Program in accordance with section 507(c) of SMCRA and 30 CFR 795.

Pursuant to 30 CFR 733.12(b)(3), the Director specified a proposed schedule for ODOM to correct the dificiencies in its program.

Section 733.12(c) of 30 CFR requires, in part, that the Director provide the State regulatory authority an opportunity for an informal conference within 15 days of receipt of the Director's written notification. On April 27, 1983, the Deputy Chief Mine Inspector of the ODOM requested that the Director hold such an informal conference. (OK–465)

The Director has agreed to Oklahoma's request, and hereby gives public notice of the informal conference for all persons wishing to attend. The date, time and location of the informal conference are identified above under the "Date" and "Addresses" sections of this notice.

The informal conference may pertain to the facts or the time period for accomplishing remedial actions as specified in the Director's notification.

Conference Rules

The informal conference is an opportunity for the Director to discuss the status of the implementation of Oklahoma's program with Oklahoma officials.

No testimony from the public will be taken but a verbatim transcript of the meeting will be kept.

VOL 48 ISS 102 MAY 25 1983 UMI

Dated: May 19, 1983.

William B. Schmidt,

Assistant Director, Program Operations and Inspection.

BILLING CODE 4310-05-M

30 CFR Part 938

Permanent State Regulatory Program of Pennsylvania; Modification of Deadline

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: The Secretary of the Interior is modifying the deadline for Pennsylvania to meet portions of seven of the conditions of approval of the State permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act), 30 U.S.C. 1201 *et seq.* The Secretary is extending the deadline for the State to resolve conditions (a)(1), (b), (e), (f), (g), (h) and (j)(1) to November 1, 1983, and condition (j)(2) to June 1, 1983. These conditions relate to archeological information in permit applications, historic land use information in permit applications for anthracite mining operations, preparation of the general plan for impoundments, existing non-conforming structures, impoundment requirements, variances to approximate original contour in non-steep slope areas, vegetative cover for underground mining operations, abatement times in excess of 90 days, and review of permits for patterns of violation.

EFFECTIVE DATE: May 25, 1983.

FOR FURTHER INFORMATION CONTACT: Robert Biggi, Director, Pennsylvania Field Office, Office of Surface Mining, 101 South 2nd Street, Suite L-4, Harrisburg, Pennsylvania 17101, (717-782-4036).

SUPPLEMENTARY INFORMATION: On April 15, 1983, the Director, OSM, published a proposed rule to extend the deadline for Pennsylvania to meet eight of the conditions of approval of its approved regulatory program under the Act (48 FR 16294-16295). Public comment was invited for 15 days.

Parts 730-732 of OSM's regulations establish the procedures for the submission, review, and decision on State permanent regulatory programs whereby the State assumes primary jurisdiction to regulate surface coal mining under the Act. Under § 732.13(j), the Secretary may conditionally approve a State program which contains minor deficiencies if the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval. The schedule is established in consultation with the State, based on its administrative needs and the time required for changes to be adopted under State rulemaking or legislative procedures.

The Pennsylvania program was conditionally approved on July 30, 1982 (47 FR 33050-33080). The Secretary's approval was conditioned on the State's correction of 10 minor deficiencies. Eight of these deficiencies were to be corrected by May 1, 1983, and two by August 1, 1983.

On March 24, 1983, OSM received a letter from the Commonwealth of Pennsylvania, requesting an additional 6 months to satisfy conditions (a), (b), (c), (e), (f), (g), (h) and (j). By the terms of the conditional approval, these conditions were to be met by May 1, 1983. The State explained that because of the recently passed Regulatory Review Act, which took effect on March 1, 1983, proposed regulations must be submitted to both houses of the Pennsylvania General Assembly and an Independent Regulatory Review Commission prior to adoption. Proposed regulations can be disapproved by either the General Assembly or the Commission. Since portions of these conditions require regulatory changes, and such revisions must be submitted to the General Assembly and the Commission, Pennsylvania claimed it would be highly unlikely that the State would be able to meet the May 1, 1983, deadline for these conditions.

Therefore, the Secretary proposed to allow the State until November 1, 1983, to meet the following conditions: (a) on archeological information in permit applications, and historic land use information in permit applications for anthracite mining operations; (b) on preparation of the general plan for impoundments; (c) on maps for anthracite and bituminous underground mining operations; (e) on existing, non-conforming structures; (f) on impoundment requirements; (g) on variances to approximate original contour in non-steep slope areas; (h) on vegetative cover for underground mining operations; and (j) on abatement times in excess of 90 days, and review of permits for patterns of violation.

Secretary's Findings

By letter dated April 25, 1983 (Administrative Record No. PA-403), Pennsylvania further defined its request for an extension of the above mentioned conditions. The State therein requested an extension to November 1, 1983, to meet the following conditions: (a)(1) on archeological information in coal refuse permit applications; (b) on the preparation of the general plan for impoundments; (e) on existing, non-conforming structures; (f) on impoundment requirements; (g) on variances to approximate original contour in non-steep slope areas; (h) on vegetative cover for underground mining operations; and (j)(1) on abatement times in excess of 90 days.

The State also requested an extension to June 1, 1983, to meet condition (j)(2) on review of permits for patterns of violations.

Pennsylvania further stated that it believes it has satisfied the following conditions by incorporating their requirements into the State permit application: (a)(2) on historic land use information in permit applications for anthracite mining operations; and (c) on maps for anthracite and bituminous underground mining operations. The satisfaction of these conditions will be the subject of a later rulemaking.

Finally, Pennsylvania agreed to implement the requirements of the following conditions as a matter of policy until the applicable regulations are promulgated, and to submit such policies to OSM by June 1, 1983: (e) on existing, non-conforming structures; and (j)(1) on abatement times in excess of 90 days.

The Secretary has decided to grant the State's request for extensions as explained in the April 25, 1983, letter except that the Secretary hereby requires Pennsylvania, in regard to condition (j)(1), not to authorize a total time for the abatement for any State notice of violation, abatement order or any combination thereof in excess of 90 days except as set forth in 30 CFR 843.12.

Public comment: The public comment period on the proposed extension ended May 2, 1983. No comments were received.

Additional Findings

Paperwork Reduction Act. This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

National Environmental Policy Act. The Secretary has determined that pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no Environmental Impact Statement need be prepared on this rulemaking.

Executive Order 12291 and the Regulatory Flexibility Act. On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any new requirements; rather, it ensures that existing requirements established by SMCRA and the Federal rules will be met by the State.

List of Subjects in 30 CFR Part 938

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: May 18, 1983.

William P. Pendley,

Acting Assistant Secretary for Energy and Minerals.

PART 938—PENNSYLVANIA

§ 938.11 [Amended]

30 CFR 938.11 is amended as follows:

1. 30 CFR 938.11(a)(1), (b), (e), (f), (g), (h) and (j)(1) are amended by substituting "November 1, 1983", for May 1, 1983, each time it appears.

2. 30 CFR 938.11(j)(2) is amended by substituting "June 1, 1983", for May 1, 1983, each time it appears.

Authority: Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*)

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 30

[SWH-FRL 2365-Y]

General Grant Regulations and Procedures

AGENCY: Environmental Protection Agency.

ACTION: Deviation from rule.

SUMMARY: Under the Authority of 40 CFR 30.1000, the Environmental Protection Agency (EPA) has issued a class deviation from 40 CFR 30.720(a) of EPA's general grant regulations for cooperative agreements awarded for remedial planning activities under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA). This deviation waives EPA's usual ten percent cost-sharing requirement for these planning activities. We are publishing the class deviation as a part of this document. Remedial planning activities are the first stage of EPA's response to releases or threats of releases of hazardous substances.

EFFECTIVE DATE: This deviation was effective on May 12, 1983.

FOR FURTHER INFORMATION CONTACT: Marshall Schy, Grants Administration Division (PM-216), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460 (202-382-5298)

SUPPLEMENTARY INFORMATION: Section 104 of CERCLA authorizes EPA to undertake investigations, monitoring, surveys, testing and other information gathering in addition to planning, legal, fiscal, economic, engineering, architectural and other studies or investigation as deemed necessary or appropriate to plan and direct response actions.

EPA's experience has shown that a ten percent cost-share impedes the progress of remedial actions at CERCLA identified priority sites.

There are several reasons for not requiring grantees to share in the costs of this aspect of the program. First, requiring cost-sharing would delay the implementation of these program activities until States were able to provide additional funds to meet their share. Second, response efforts at directed remedying serious threats to public health and the environment would be unreasonably delayed while EPA was awaiting the State cost-share. Finally requiring State cost-sharing for these activities might, because of limited resources, make it more difficult for States to meet their cost-sharing obligations under CERCLA projects.

A copy of the class deviation follows this document.

Memorandum

To: William N. Hedeman, Jr., Director, Office of Emergency and Remedial Response (WH-548)

From: Harvey Pippen, Jr., Director, Grants Administration Division (PM-216)

Subject: Class Deviation from 40 CFR 30.720(a)

This responds to your April 1, 1983, request for a class deviation from 40 CFR 30.720(a) of the general grant regulations for remedial planning activities under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA).

Section 30.720(a) requires EPA assistance receipients to share project costs: at a minimum, recipients must contribute five percent of allowable project costs. In addition, your March 11, 1982, memorandum to Regional Administrators and Regional Superfund Coordinators stated that "* * * States are now required to pay 10 percent of remedial planning * * *." This action implemented a policy decision made by EPA Administrator Anne Gorsuch. On May 11, 1983, I received a memorandum from Acting Deputy Administrator Lee M. Thomas reversing the previous policy of requiring cost-sharing for Superfund remedial planning actions.

EPA believes there are several reasons for not requiring grantees to share the cost of this program. First, States maintain that the cost-sharing requirement is an unrealistic financial burden which, given their limited resources, reduces the number of sites at which they are able to take action. In addition, since many States do not have existing response funds, remedial planning activities often are delayed while the State legislature appropriates funds on a site specific basis. Many of these sites contain a variety of carcinogenic, mutagenic, and other toxic chemicals. Thus, imposing a cost-share delays EPA response actions to threats to public health and the environment.

Therefore, I am approving a class deviation from 40 CFR 30.720(a) for remedial planning activities under CERCLA. This deviation waives the cost-sharing requirement in EPA's general grant regulation (40 CFR Part 30) for this program.

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Permethrin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the insecticide permethrin and its metabolites in or on certain raw agricultural commodities. This regulation to establish maximum permissible levels for the combined residues of permethrin was requested, pursuant to petitions, by FMC Corporation.

EFFECTIVE DATE: Effective on May 25, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTRACT: Timothy Gardner, Product Manager (PM) 17, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 207, CM 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2690).

SUPPLEMENTARY INFORMATION: EPA issued notices in the **Federal Register** that announced that FMC Corporation, Agricultural Chemical Group, 2000 Market Street, Philadelphia, PA 19103, had filed the following pesticide petitions (PP) proposing establishing tolerances for the combined residues of the insecticide permethrin [(3)-phenoxyphenyl)methyl 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate] and its metabolites 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylic acid (DCVA) and (3-phenoxyphenyl)methanol (3-PBA) calculated as parent in or on plant commodities; and for residues of permethrin and its metabolites indicated above plus 3-phenoxybenzoic acid calculated as parent in or on animal commodities.

1. *PP 9F2196,* published June 7, 1979 (44 FR 32727). Proposed establishing tolerances for the combined residues of the insecticide permethrin and its metabolites in or on the raw agricultural commodity soybeans at 0.1 ppm. The proposed tolerance was subsequently amended to 0.05 ppm.

2. *PP 1F2562,* published October 19, 1981 (46 FR 51282). Proposed establishing tolerances for the combined residues of permethrin and its metabolites in or on the raw agricultural commodity apples at 2.0 ppm. The proposed tolerance was subsequently amended to 0.05 ppm.

3. *PP 2F2675,* published June 16, 1982 (47 CFR 26019). Proposed establishing tolerances for the combined residues of permethrin and the metabolites in or on the raw agricultural commodities almonds at 0.05 ppm and almond hulls at 19.0 ppm. The petition was subsequently amended by increasing the proposed tolerance to 20.0 ppm for almond hulls.

No comments were received in response to the notices of filing.

The tolerance requests for apples and soybeans were originally submitted with accompanying food additive petitions. The initial petition proposing the establishment of a tolerance for soybeans expressed a 21-day preharvest interval (PHI). At this PHI, food additive tolerances would have been required for soybean byproducts (hulls, oil, and soapstock). However, the amended petition, which proposed a tolerance of 0.05 ppm in or on soybeans, indicated that a 60-day PHI would be required on the product's labeling. Data reflecting the 60-day PHI and an exaggerated rate of application show no residues of permethrin and its metabolites were reported in or on the raw agricultural commodity (RAC) above the level of detectability of the method (0.01 ppm). Since permethrin is a non-systemic compound, and no residues were detected in or on the RAC after using an exaggerated rate, the 0.05 ppm tolerance is more than adequate to cover residues in or on soybeans; thus, food additive tolerances for soybean byproducts is unnecessary.

In the original petition proposing the establishment of a tolerance of 2.0 ppm in or on apples, the use directions proposed would have allowed multiple applications (after the fruit had started to form). However, the amended petition states that the use directions will allow application only before blossom or at blossom before the appearance of fruit-set. Based on residue data from a similar use pattern (PP OF2425-pears) which demonstrated no residues at or above the detectability of the residue analysis method even at an exaggerated rate, the 0.05 ppm tolerance on apples is more than adequate to cover residues, and a food additive tolerance on apple pomace is unnecessary.

The data submitted and other relevant material have been evaluated. The toxicological data considered in support of the tolerances have been discussed in detail in the **Federal Register** of October 13, 1982 (47 FR 45008).

Granting these tolerances will increase the theoretical maximum residue contribution from 0.6496 to 0.6522 mg/day. This increase is slight and, thus, the discussion of the toxicological concerns applies, without revision, to the newly listed commodities. The percentage of the maximum permissible intake used will increase from 21.65 to 21.74 percent.

The metabolism of permethrin is adequately understood and an adequate analytical method, gas-liquid chromatography with an electron capture detector, is available for enforcement purposes. No actions are pending against continued registration of permethrin, nor are any other considerations involved in establishing the tolerances.

The tolerances established by amending 40 CFR 180.378 will be adequate to cover secondary residues that would result in eggs, milk, meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep as delineated in 40 CFR 180.6(a)(2).

The pesticide is considered useful for the purpose for which the tolerances are sought. It is concluded that the tolerances will protect the public health and are established as set forth below.

Any person adversly affected by this regulation may, within 30 days after publication of this notice in the **Federal Register,** file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291. (Sec. 408(d)(2), 68 Stat. 512 (21 U.S.C. 346a(d)(2))).

Dated: May 16, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR 180.378(b) is amended by adding and alphabetically inserting the following commodities to read as follows:

§ 180.378 Permethrin; tolerances for residues.

* * * * *

(b) * * *

Commodities	Parts per million
Almonds	0.05
Almond hulls	20.0
Apples	0.05
Soybeans	0.05

[FR Doc. 83–13778 Filed 5–24–83; 8:45 am]

BILLING CODE 6560–50–M

40 CFR Part 180

[PP 3F2810/R564; PH–FRL 2366–1]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Iprodione

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the fungicide iprodione [3-(3,5-dichlorophenyl)-*N*-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide], its isomer [3-(1-methylethyl)-*N*-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide], and its metabolite [3-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide] in or on the raw agricultural commodities apricots, plums, and prunes. This regulation to establish maximum permissible levels for residues of the pesticide was requested, pursuant to a petition, by Rhone-Polenc, Inc.

EFFECTIVE DATE: Effective on May 25, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Henry Jacoby, Product Manager (PM) 21, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 229, CM# 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1900).

SUPPLEMENTAL INFORMATION: EPA issued a notice published in the **Federal Register** of February 9, 1983 (48 FR 6018) which announced that Rhone-Polenc, Inc., PO Box 125, Monmouth Junction, NJ 08852, had submitted pesticide petition 3F2810 proposing to amend 40 CFR 180.399 by establishing tolerances for the combined residues of the fungicide iprodione [3-(3,5-dichlorophenyl)-*N*-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide], its isomer [3-(1-methylethyl)-*N*-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide], and its metabolite [3-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide] in or on the raw agricultural commodities stone fruits at 20 parts per million (ppm).

The petition was subsequently amended to propose tolerances on apricots, plums, and prunes at 20 ppm vice "stone fruits" as a result of application of the fungicide to the commodities apricots, plums, and prunes.

There were no comments received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicology data considered in support of the tolerances include a 2-year rat feeding study with a no-observed-effect level (NOEL) of 1,000 ppm (50 mg/kg/day); a 90-day dog feeding study with a NOEL of 2,400 ppm (60 mg/kg/day); an 18-month mouse oncogenic study, negative for oncogenic potential at 1,250 ppm (187.5 mg/kg/day); a 3-generation rat reproduction study with a NOEL of 500 ppm (25 mg/kg/day); and a mutagenicity study in the mouse with no evidence of mutagenicity or adverse effect on fertility at 1,500 and 6,000 ppm.

Data current lacking include a teratology study in a second species, and mutagenicity studies including at least the following: (1) DNA repair, (2) gene mutation, mammalian, preferably in vitro, and (3) chromosomal aberration, mammalian, preferably in vitro.

The acceptable daily intake (ADI) based on the 3-generation rat reproduction study (NOEL of 25 mg/kg/day) and using a 100-fold safety factor is calculated to be 0.2500 mg/kg/ or bw/day. The maximum permissible intake (MPI) for a 60-kg human is calculated to be 15.00 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5 kg daily diet is calculated to be 0.0045 mg/day. The current action will utilize 2.49 percent of the ADI. Published tolerances utilize 5.67 percent of the ADI.

The nature of the residues is adequately understood and an analytical method, gas chromatography using an electron capture detector, is available for enforcement purposes. Since no feed items are associated with apricots, plums, and prunes, there will be no secondary residues anticipated in eggs, meat, milk or poultry. There are presently no actions pending against the continued registration of the chemical.

The pesticide is considered useful for the purpose for which the tolerances are sought. It is concluded that the tolerances would protect the public health and are established set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register,** file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950). (Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e))).

VOL 48 ISS 102 1983 MAY 25

List of Subjects in 40 CFR Part 180

BILLING CODE 6560-50-M

40 CFR Part 704

[OPTS-82006; FRL 2370-7]

Recordkeeping and Reporting Requirements; Recodification

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; Redesignation.

SUMMARY: EPA established 40 CFR Part 704 to consolidate the regulations for reporting of chemical information. In the interest of making the Code of Federal Regulations easier to use, EPA is now recodifying Part 704 to create a simpler and more comprehensive organization.

EFFECTIVE DATE: May 25, 1983.

FOR FURTHER INFORMATION CONTACT: Jack P. McCarthy, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-511, 401 M St., SW., Washington, D.C. 20460, Toll free: (800-424-9065), In Washington, D.C.: (554-1404), Outside the USA: (Operator—202-554-1404).

SUPPLEMENTARY INFORMATION: For the convenience of the user, the following redesignation table shows where the recodified materials may be found.

Old Section	*New Section*
704.95(a)	704.1(a)
704.95(b)	704.1(b)
704.95(c) (1) through (9), (11) and (14)	704.3
704.95(c)(10)	704.195(a)
704.95(c)(12)	704.195(c)(2) and 704.205(c)(2)
704.95(c)(13)	704.205(a)
704.95(d)	704.195(b) and 704.205(b)
704.95(e)(1)	704.195(c)(2) and 704.205(c)(2)
704.95(e) (2) through (4)	704.5 (a) through (c)
704.95(f) (1) and (2)	704.195(d) and 704.205(d)
704.95(f)(1)	704.195(e) and 704.205(e)
704.95(f)(3)	704.195(f) and 704.205(f)
704.95(g)	704.7
704.95(h)	704.195(g) and 704.205(g)

At this time EPA is also adding language to the definition of "Manufacture for commercial purposes" in the new § 704.3(j)(2). The language had been omitted inadvertently when the definition was first published as § 713.11(h)(2) in the **Federal Register** of October 24, 1980 (45 FR 70728). This error was not corrected when the definition was first recodified as § 704.95(c)(8)(ii) in the **Federal Register** of June 30, 1981 (46 FR 33525). The corrected definition now reads as EPA originally intended it to read in 1980.

This regulation is a nonsubstantive redesignation and reorganization and as such requires no opportunity for comment or public participation.

List of Subjects in 40 CFR Part 704

Environmental protection, Hazardous materials, Imports, Recordkeeping and reporting requirements.

Dated: May 17, 1983

Don R. Clay,

Acting Assistant Administrator for Pesticides and Toxic Substances.

Therefore, Chapter 1 of 40 CFR is amended by revising Part 704 to read as follows:

PART 704—REPORTING AND RECORDKEEPING REQUIREMENTS

Subpart A—General Provisions

Sec.

704.1 Scope and compliance.
704.3 Definitions.
704.5 Exemptions.
704.7 Confidentiality claims.

Subparts B-D—[Reserved]

Subpart E—Specific Chemical Reporting Requirements

Sec.

704.195 Polybrominated Biphenyls (PBBs).
704.205 Tris (2,3-dibromopropyl).

Authority: Sec. 8(a), Pub. L. 94-169, 90 Stat. 2027, (15 U.S.C. 2607(a)).

Subpart A—General Provisions

§ 704.1 Scope and compliance.

(a) *Scope.* This part establishes procedures governing reporting by persons who manufacture or import or who propose to manufacture or import chemicals listed in Subpart E.

(b) *Compliance.* Violation of the requirements of this part may result in civil penalty or criminal prosecution, as provided in sections 15 and 16 of TSCA. In addition, under section 17, the Government may seek judicial relief to compel submission of required information.

§ 704.3 Definitions.

All definitions as set forth in the Toxic Substances Control Act (TSCA) section 3 apply for this part. In addition, the following definitions are provided for the purposes of this part.

(a) [Reserved]

(b) "Article" means a manufactured item (i) which is formed to a specific shape or design during manufacture, (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use, and (iii) which has either no change of chemical composition during its end use or only those changes of composition which have no commercial purpose separate from that of the article, and that result from a chemical reaction that occurs upon end use of other chemical substances, mixtures, or articles; except that fluids and particles are not considered articles regardless of shape or design.

(c) "Byproduct" means a chemical substance produced without a separate commercial intent during the manufacture, processing, use, or disposal of another chemical substance(s) or mixture(s).

(d) [Reserved]

(e) "EPA" means the United States Environmental Protection Agency.

(f) "Importer" means (1) any person who imports any chemical substance or any chemical substance as part of a mixture or article into the customs territory of the United States, and includes:

(i) The person primarily liable for the payment of any duties on the merchandise, or

(ii) An authorized agent acting on his behalf (as defined in 19 CFR 1.11).

(2) Importer also includes, as appropriate:

(i) The consignee.

(ii) The importer of record.

(iii) The actual owner if an actual owner's declaration and superseding bond has been filed in accordance with 19 CFR 141.20.

(iv) The transferee, if the right to draw merchandise in a bonded warehouse has been transferred in accordance with Subpart C of 19 CFR Part 144. For the purpose of this definition, the customs territory of the United States consists of the 50 states, Puerto Rico, and the District of Columbia.

(g) "Import in bulk form" means to import a chemical substance (other than as part of a mixture or article) in any quantity, in cans, bottles, drums, barrels, packages, tanks, bags, or other containers, if the chemical substance is intended to be removed from the container and the substance has an end use or commercial purpose separate from the container.

(h) "Impurity" means a chemical substance which is unintentionally present with another chemical substance.

(i) "Manufacture" means to manufacture for commercial purposes.

(j) "Manufacture for commercial purposes" means (1) to import, produce, or manufacture with the purpose of obtaining an immediate or eventual commercial advantage for the manufacturer, and includes, among other things, such "manufacture" of any amount of a chemical substance or mixture:

(i) For commercial distribution, including for test marketing, and

(ii) For use by the manufacturer, including use for product research and development, or as an intermediate.

(2) Manufacture for commercial purposes also applies to substances that are produced coincidentally during the manufacture, processing, use, or disposal of another substance or mixture, including both byproducts that are separated from that other substance or mixture and impurities that remain in that substance or mixture. Such byproducts and impurities may, or may not, in themselves have commercial value. They are nonetheless produced for the purpose of obtaining a commercial advantage since they are part of the manufacture of a chemical product for a commercial purpose.

(k) [Reserved]

(l) [Reserved]

(m) [Reserved]

(n) "Person" includes any individual, firm, company, corporation, joint venture, partnership, sole proprietorship, association, or any other business entity; any State or political subdivision thereof; any municipality; any interstate body; and any department, agency, or instrumentality of the Federal Government.

(o) [Reserved]

(p) "Propose to manufacture or import" means that a person has made a firm management decision to commit financial resources for the manufacture or import of the specified chemical.

(q) [Reserved]

(r) [Reserved]

(s) [Reserved]

(t) "TSCA" means the Toxic Substances Control Act, 15 U.S.C. 2601 *et seq.*

§ 704.5 Exemptions.

Unless otherwise indicated, the following persons are not subject to this part.

(a) *Research and development.* Persons who manufacture or import and persons who propose to manufacture or import the specified chemical solely for research and development.

(b) *Byproducts and impurities.* Persons who manufacture or import and persons who propose to manufacture or import the specified chemical as a byproduct or impurity.

(c) *Import as part of an article.* Persons who import or propose to import the specified chemical as part of an article.

§ 704.7 Confidentiality claims.

(a) Any person submitting a notice under this rule may assert a business confidentiality claim covering all or any part of the notice. Any information covered by a claim will be disclosed by EPA only to the extent and by means of the procedures set forth in Part 2 of this title.

(b) If no claim accompanies the notice at the time it is submitted to EPA, the notice will be placed in an open file available to the public without further notice to the respondent.

(c) To assert a claim of confidentiality for data contained in a notice, the respondent must submit two copies of the notice.

(1) One copy of the notice must be complete. In that copy the respondent must indicate what data, if any, are claimed as confidential by marking the specific information on each page with a label such as "confidential", "proprietary", or "trade secret".

(2) If some data in the notice are claimed as confidential, the respondent must submit a second copy. The second copy must be complete except that all information claimed as confidential in the first copy must be deleted.

(3) The first copy of the notice will be for internal use by EPA. The second copy will be placed in an open file to be available to the public.

(4) Failure to furnish a second copy of the notice when information is claimed as confidential in the first copy will be considered a presumptive waiver of the claim of confidentiality. EPA will notify the respondent by certified mail that a finding of a presumptive waiver of the claim of confidentiality has been made. The respondent has 15 days from the date of receipt of notification to submit the required second copy. Failure to submit the second copy will cause EPA to place the first copy in the public file.

(d) In submitting a claim of confidentiality, a person attests to the truth of the following four statements concerning all information which is claimed confidential:

(1) My company has taken measures to protect the confidentiality of the information, and it intends to continue to take such measures.

(2) The information is not, and has not been, reasonably obtainable without our consent by other persons (other than government bodies) by use of legitimate means (other than discovery based on a showing of special need in a judicial or quasi-judicial proceeding).

(3) The information is not publicly available elsewhere.

(4) Disclosure of the information would cause substantial harm to our competitive position.

Subpart E—Specific Chemical Reporting Requirements

§ 704.195 Polybrominated Biphenyls (PBBs).

(a) *Definitions.* "PBBs" (polybrominated biphenyls) means chemical substances the compositions of which, without regard to impurities, consist of brominated biphenyl molecules having the molecular formula $C_{12}H_xBr_y$, where $x+y=10$ and y ranges from 1 to 10.

(b) *Persons who must report.* Except as provided in paragraph (c) of this section, the following persons are subject to the rule:

(1) Persons who manufacture or propose to manufacture PBBs which have been reported for the Inventory.

(2) Persons who import (importers) or propose to import PBBs which have been reported for the Inventory as a chemical substance in bulk or as part of a mixture.

(c) *Persons not subject to this rule.* The following persons are not subject to this rule:

(1) Persons described at § 704.5 (a) through (c).

(2) Persons who are small manufacturers or importers, as described in this paragraph.

A small manufacturer or importer is a manufacturer or importer whose total annual sales are less than $500,000, based upon the manufacturer's or importer's latest complete fiscal year, except that no manufacturer or importer is a small manufacturer or importer with respect to PBBs which such person manufactured at one site or imported in quantities greater than 10,000 pounds

during the latest calendar year. In the case of a company which is owned or controlled by another company, total annual sales shall be based on the total annual sales of the owned or controlled company, the parent company, and all companies owned or controlled by the parent company taken together.

(d) *What information to report.* Persons subject to this rule as described in paragraph (b) of this section must notify EPA of current or proposed manufacture or import of PBBs. The notice must include, to the extent that it is known to the person making the report or is reasonably ascertainable, the following information:

(1) Company name and address.

(2) Principal technical contact.

(3) A description of the use or intended use for the PBBs.

(4) Estimated number of persons exposed to the PBBs during manufacture or importation, processing, distribution, use, and disposal.

(5) Quantity (by weight) manufactured or imported within twelve months prior to the effective date of the rule and/or estimated quantity (by weight) to be manufactured or imported in the foreseeable future.

(6) The proposed date for the initiation of manufacturing or importation of PBBs, if appropriate.

(e) *When to report.* Persons who are manufacturing or importing PBBs on the effective date of the rule must notify EPA within 30 days of the effective date of the rule. Persons who propose to manufacture or import PBBs must notify EPA within 15 days when they propose to manufacture or import the substance.

(f) *Where to send reports.* Notices shall be submitted by certified mail to the Document Control Officer, for TSCA, Office of Pesticides and Toxic Substances (TS–793), Environmental Protection Agency, Washington, DC 20460. ATTN: PBB notification.

(g) *Sunset provision.* The reporting requirements of paragraph (d) of this section will terminate on May 1, 1985.

§ 704.205 Tris (2,3-dibromopropyl) phosphate.

(a) *Definitions.* "Tris" means tris (2,3-dibromopropyl) phosphate (also commonly named DBPP, TBPP, and Tris-BP).

(b) *Persons who must report.* Except as provided in paragraph (c) of this section, the following persons are subject to the rule:

(1) Persons who manufacture or propose to manufacture Tris.

(2) Persons who import (importers) or propose to import Tris as a chemical substance in bulk or as part of a mixture.

(c) *Persons not subject to this rule.* The following persons are not subject to this rule:

(1) Persons described at § 704.5 (a) through (c).

(2) Persons who are small manufacturers or importers, as described in this paragraph.

A small manufacturer or importer is a manufacturer or importer whose total annual sales are less than $500,000, based upon the manufacturer's or importer's latest complete fiscal year, except that no manufacturer or importer is a small manufacturer or importer with respect to Tris which such person manufactured at one site or imported in quantities greater than 10,000 pounds during the latest calendar year. In the case of a company which is owned or controlled by another company, total annual sales shall be based on the total annual sales of the owned or controlled company, the parent company, and all companies owned or controlled by the parent company taken together.

(d) *What information to report.* Persons subject to this rule as described in paragraph (b) of this section must notify EPA of current or proposed manufacture or import of Tris. The notice must include, to the extent that it is known to the person making the report or is reasonably ascertainable, the following information:

(1) Company name and address.

(2) Principal technical contact.

(3) A description of the use or intended use for Tris.

(4) Estimated number of persons exposed to the Tris during manufacture or importation, processing, distribution, use, and disposal.

(5) Quantity (by weight) manufactured or imported within twelve months prior to the effective date of the rule and/or estimated quantity (by weight) to be manufactured or imported in the foreseeable future.

(6) The proposed date for the initiation of manufacturing or importation of Tris, if appropriate.

(e) *When to report.* Persons who are manufacturing or importing Tris on the effective date of the rule must notify EPA within 30 days of the effective date of the rule. Persons who propose to manufacture or import Tris must notify EPA within 15 days when they propose to manufacture or import the substance.

(f) *Where to send reports.* Notices shall be submitted by certified mail to the Document Control Officer for TSCA, Office of Pesticides and Toxic Substances (TS–793), Environmental Protection Agency, Washington, DC 20460. ATTN: Tris notification.

(g) *Sunset provision.* The reporting requirements of paragraph (d) of this section will terminate on May 1, 1985.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[CC Docket No. 80–634; FCC 83–121]

Changes in the Corporate Structure and Operations of the Communications Satellite System

AGENCY: Federal Communications Commission.

ACTION: Denial of petitions for reconsideration of policy statement.

SUMMARY: This order disposes of two petitions for reconsideration or clarification of the Commission's Memorandum Opinion and Order, *In the Matter of changes in the corporate structure and operations of the Communications Satellite Corporation*, 90 FCC 2d 1159 (1982); 47 FR 41116, Sept. 17, 1982. The order denies the petitions filed by Western Union International, Inc. and RCA Global Communications, Inc., except to the extent that the order clarifies the degree of separation required between the Comsat parent corporation and its subsidiaries.

FOR FURTHER INFORMATION CONTACT: Joel Pearlman, International Facilities Planning Division, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554. (202) 632–4047.

Memorandum Opinion and Order

In the matter of changes in the corporate structure and operations of the Communications Satellite System; CC Docket No. 80–634, (11–2–82; 47 FR 49744).

Adopted: March 31, 1983.
Released: April 20, 1983.

By the Commission: Commissioner Jones concurring in part and dissenting in part and issuing a statement; Commissioner Dawson concurring and issuing a statement.

I. Background

1. On August 5, 1982, we adopted our Memorandum Opinion and Order in the above-captioned proceeding, *Communications Satellite Corporation*, 90 FCC 2d 1159 (1982) (hereinafter *Structure*). We now have before us a Petition for Reconsideration or Clarification of this order filed on October 20, 1982, by Western Union International, Inc. (WUI) and a Petition for Partial Reconsideration filed on October 18, 1982, by RCA Global Communications, Inc. (RCA Globcam). Also before us are oppositions to these petitions submitted on November 17, 1982, by the Communications Satellite Corporation (Comsat) and Aeronautical Radio, Inc. (ARINC). In addition, on November 26 and November 29, 1982, respectively, WUI and RCA Globcom filed replies to the Comsat and ARINC oppositions.

2. In the *Comsat Study*,[1] we undertook a comprehensive examination of Comsat and its operations. In that study, we noted that Comsat had in recent years begun to engage in activities other than its traditional statutory INTELSAT/INMARSAT functions and we found a number of areas where those new activities might create conflicts with its appropriate discharge of those statutory functions. On balance, though, we found that the public interest would be served by allowing Comsat to participate in non-INTELSAT/INMARSAT business activities so long as such participation is not inconsistent with its statutory responsibilities. We did, however, identify a number of specific changes in Comsat's structure and operations we felt should be made. Following that order, Comsat voluntarily reorganized itself to separate its INTELSAT and INMARSAT operations from its other functions.

3. In the *Structure* order which followed, we again affirmed that the public interest would be served by allowing Comsat to participate in non-INTELSAT/INMARSAT business activities so long as such participation is not inconsistent with its statutory responsibilities. We also said that Comsat's participation in all present and future non-INTELSAT/INMARSAT activities would be through its subsidiaries only; the parent organization would be limited to INTELSAT/INMARSAT functions.[2] We found that Comsat's reorganization generally conformed to this approach. However, in reviewing Comsat's reorganization, we found several areas where we believed Comsat's efforts had not gone far enough to answer the concerns we stated in the *Comsat Study*. These deficiencies concerned Comsat's accounting for research and development, its accounting for shared administrative and support services and its method of public dissemination of INTELSAT/INMARSAT information. We directed Comsat, within 90 days of the release of the order, to file with us reports explaining how it intended to establish mechanisms to remedy these deficiencies.[3] We stated that if Comsat were unable to implement appropriate accounting and information flow control mechanisms, then we would consider whether further structural separation is warranted.

[1] Communications Satellite Corporation, 77 FCC 2d 564 (1980) (hereinafter Comsat Study).

[2] We use the terminology "Comsat parent" in this order to refer to that part of the parent company which performs certain international common carrier functions and related duties with respect to the INTELSAT and INMARSAT systems. This entity is called the World Systems Division.

[3] Two extensions were granted. Comsat filed a report on information flow on December 13, 1982 and a report on allocation of shared services and capitalization of Comsat Labs on January 24, 1983.

II. Summary of Petitions

4. RCA Globcom seeks partial reconsideration of the *Structure* order in two respects. First, it requests us to modify the *Structure* decision to require that Comsat provide all communications services to non-carriers, including basic INTELSAT satellite transmission capacity at the earth stations,[4] exclusively through a retail subsidiary. RCA Globcom wants this modification to remain in effect at least until we have concluded our inquiries in CC Dockets Nos. 82–540 and 82–546 into the right of other carriers to have direct access to INTELSAT space segment and independent ownership of U.S. earth stations that operate with the INTELSAT system.[5] Second, it requests that, during the pendency of these proceedings, we establish adequate controls over rates to be charged by the subsidiary.

5. WUI seeks reconsideration or clarification of the order in six respects. First, it asks us to require Comsat to provide all non-carrier services through a separate subsidiary, irrespective of whether those services are provided at customers' premises or at earth stations. Second, it requests that we afford WUI and the other international service carriers access to INTELSAT information by granting them observer status at INTELSAT meetings. Third, it contends that we should restrain Comsat from serving end users until Comsat remedies the problems indentified in the *Structure* order. Fourth, it argues that we do not have power under the Communications Satellite Act of 1962, 47 U.S.C. §§ 701–744 (1976), to authorize or permit Comsat to engage in any activities other than those which are not intimately connected with, and directly and substantially in furtherance of, its limited statutorily mandated INTELSAT and INMARSAT missions. Fifth, it argues that our proposed structural and operational changes to Comsat will not adequately preserve competition or protect the public interest. Finally, WUI requests that we immediately grant its pending requests for: (1) cost-based access to INTELSAT space segment rates; (2) unbundled rates for the space-segment and earth-segment components of INTELSAT service; and (3) independent access and operational capability at the U.S. INTELSAT earth stations.

6. In the following sections we shall address each argument raised by RCA Globcom and WUI. At the same time, we shall consider matters raised by the responsive pleadings filed by the parties.

III. Discussion

A. Applicability of Separate Subsidiary Requirement to the Provision of INTELSAT Transmission Capacity

1. Arguments of the parties on separate subsidiary issue.

7. The parties to this proceeding are polarized on the issue whether Comsat should be required to provide INTELSAT transmission capacity to non-carrier users through a separate subsidiary, rather than through the parent. Both WUI and RCA Globcom argues that the service should be provided through a separate subsidiary, at least until we resolve the *Direct Access* and *Earth Station Ownership* inquiries. Comsat and ARINC disagree.

8. WUI argues that our action in the *Authorized User* order[6] was contrary to our pronouncements in the *Structure Order*. WUI sees possible contradictions in two areas—the definitions of "monopoly" and "competitive" services and the determination of which arm of Comsat would provide each type of service. As to the first point, WUI claims that the Commission recognized in *Authorized User* that provision of "basic" transmission capacity to non-carriers is a "competitive" service.[7] WUI

[4] The Structure order used the term "basic transmission capacity" to refer to INTELSAT transmission capacity. However, in order to avoid any possibility of confusion with the definition of "basic" in other Commission proceedings, we will henceforth refer to this capacity as INTELSAT transmission capacity.

[5] INTELSAT Satellite Facilities, 90 FCC 2d 1446 (1982) (hereinafter Direct Access); U.S. Earth Stations, 90 FCC 2d 1458 (1982) (hereinafter Earth Station Ownership).

[6] Authorized Users Policy, 90 FCC 2d 1394 (1982), *review pending sub nom.* RCA Global Communications Inc. v. FCC, No. 82–1972 (D.C. Cir., filed August 20, 1982), *case consolidated with* ITT v FCC, Nos. 79–1046 *et al.* (D.C. Cir. filed January 12, 1979) (hereinafter Authorized User).

[7] In Authorized User we defined "basic transmission capacity" as a two-way communications link—called a half circuit—between a U.S. earth station and an INTELSAT

VOL 48 ISS 102 MAY 25 1983 UMI

cites the following language in the decision as the basis for its claim: "Even if Comsat elects to limit itself to its current role of providing basic satellite transmission capacity at U.S. earth stations, affording customers the opportunity to deal directly with Comsat will impose competitive pressures on the existing carriers." 90 FCC 2d at 1142. In addition, WUI argues that competition has already developed between Comsat and WUI in the provision of "basic" transmission capacity to DOD at earth stations in Hawaii and Guam. WUI states that such competition will divert leased channel revenues from the international record carriers. WUI believes, however, that the definition of a "competitive" service as used in the *Structure* order may not encompass the provision of INTELSAT transmission capacity. WUI notes that the *Structure* order defines "competitive" as referring to all existing and future non-INTELSAT/INMARSAT activities in which Comsat engages. 90 FCC 2d at 1172 n.9. WUI states that it is unsure whether or not the provision of "basic" transmission capacity would be classed as an INTELSAT or a non-INTELSAT activity within the meaning of this definition. WUI concludes that if we meant "basic" transmission capacity to be an INTELSAT monopoly activity, such a result would be inconsistent with our pronouncements in *Authorized user.*[8]

9. The other inconsistency between the *Authorized User* and *Structure* orders, WUI alleges, relates to whch subdivision of Comsat we directed to provide competitive services. WUI reads the *Structure* decision as restricting the prent to monopoly INTELSAT/INMARSAT activities and allowing competitive activities only in the subsidiaries. WUI notes, however, that the *Authorized User* order directs the parent to lease INTELSAT transmission capacity to non-carriers. Since, WUI argues, the provision of INTELSAT transmission capacity is competitive with IRC leased-channel service,[9] WUI concludes that our *Authorized User* order thereby directs the Comsat parent to provide a competitive service in conflict with the limitation set out in the *Structure* decision. Therefore, WUI alleges these companion orders have this additional inconsistency.

10. RCA Globcom does not argue that the *Structure* order contradicts the *Authorized User* order, but that the latter order is wrong in that, by allowing the Comsat parent to mix competitive and monopoly activities, it fails to protect fair competition and important user interests.[10] Since it believes that *Authorized User* is incorrect, it asks us to change the *Structure* order to bring it into conformity with our alleged earlier recommendations in the *Comsat Study, supra,* by requiring Comsat to provide all communications services to non-carrier users, including INTELSAT satellite transmission capacity, exclusively through its "retail" subsidiary. RCA Globcom Petition, p. 8.

11. RCA Globcom states that, absent such safeguards, the actions we took, which were purportedly taken to foster competition, will have the opposite effect of giving Comsat a *de jure* monopoly over the provision of "basic" transmission capacity to users at the earth stations long before we have had a chance to determine whether INTELSAT services should continue to be provided on a monopoly basis. This monopoly is accentuated, RCA Globcom argues, because *Authorized User* directs the Comsat parent to lease INTELSAT satellite transmission capacity to carriers and to non-carriers at the same rate. It believes that such a result is directly contrary to the thrust of the *Comsat Study* which it asserts envisions that a subsidiary provide such capacity to non-carriers. RCA claims that it cannot engage in meaningful price competition under such circumstances and that, as a result, a considerable portion of its and the other international service carriers' revenues are at risk. Also, RCA Glocom avers that important consumer interests will be jeopardized by our policy. It argues that consumers may construct their own domestic facilities near the INTELSAT earth stations and, thus, become locked into Comsat's monopoly service for long periods of time. Finally, it claims that there will be a substantial diversion of traffic caused by the Comsat parent's entry into the "retail" market and this diversion will idle existing facilities, and shift those costs to users of remaining facilities.

12. In its opposition, Comsat asserts that the petitioners' contention that we should not have permitted the Comsat parent—as opposed to a Comsat subsidiary—to provide "basic" transmission capacity to non-carrier entities is improperly raised here. Comsat argues that the petitioners should have raised their arguments in the *Authorized User* proceeding since that is where we determined that the Comsat parent should provide such "basic" capacity. Comsat contends that even if the petitioners' arguments of inconsistency and of lack of promotion of competitive policies were valid, the relief that RCA Globcom and WUI seek is not a change in the *Structure* order to conform to *Authorized User,* as they assert, but a change in the *Authorized User* order to conform to *Structure*—relief which cannot appropriately be granted in this proceeding.

13. Although Comsat raises this procedural point as a threshold issue, it also addresses the substance of the petitioners' arguments. In so doing, it disputes the petitioners' contentions of inconsistency among the *Authorized User,* the *Structure* and the *Comsat Study* proceedings. It reads the *Comsat Study* and *Structure* proceedings as limiting the Comsat parent to performing jurisdictional monopoly—defined as INTELSAT/INMARSAT—activities while allowing the subsidiaries to carry out all other ventures. Further, it contends that it is the *Authorized User* proceeding, not the Comsat Study or *Structure* proceedings, which defined the contours of Comsat's INTELSAT jurisdictional monopoly activities. First, Comsat argues that the *Authorized User* decision clarified that the provision of "basic" satellite capacity is an INTELSAT jurisdictional monopoly activity. Second, Comsat points out that in *Authorized User* we interpreted the term "authorized users" in the satellite Act to include non-carrier entities. Comsat concludes that we thus found that non-carrier entities are entitled to obtain "basic" INTELSAT satellite capacity directly from Comsat. Comsat concludes that the provision of such satellite capacity to non-carriers is a jurisdictional monopoly activity and that it should therefore be provided by the parent consistent with the requirements of the *Structure* order.

14. ARINC, in its opposition, states that RCA Globcom's and WUI's petitions are noting but attempts to attack collaterally the Commission's determination in *Authorized User* that users should be permitted to acquire satellite capacity from Comsat on the same terms and conditions as the international record carriers. ARINC contends that we should not further delay the public benefits which we have found will accrue from permitting non-carrier users to obtain "basic" INTELSAT capacity directly from Comsat.

15. ARINC also finds no inconsistency among the Commission's decisions. ARINC notes that our *Structure* order defines "competitive" to include "existing and future non-INTELSAT/INMARSAT activities engaged in by Comsat." 90 FCC 2d at 1172 n.9. ARINC asserts that the provision of "basic" satellite capacity is an "INTELSAT activity" since Comsat currently obtains the space-segment and earth-station services it provides users as a result of its role as the United States signatory to INTELSAT and that the provision of such capacity therefore does not fall within the scope of "competitive" services as that term is used in the *Structure* order. Further, since, at present, Comsat is the only entity authorized to acquire satellite circuits directly from INTELSAT, ARINC argues that the provision of this capacity to Comsat's customers, such as the international record carriers (IRCs), DOD, ARINC, and others, cannot be deemed "competitive" even in the ordinary sense of the word. ARINC contends that the mere desire of the IRCs to become competitors in providing such capacity does not in and of itself change the nature of the service from monopoly to competitive.

16. RCA Globcom in its reply disputes Comsat's procedural arguments and contends that we can grant the relief sought in either the *Authorized User* or the *Structure* proceeding. RCA also reasserts its view that the provision of "basic" capacity is "competitive" with the IRCs' leased channel services and that Comsats position that "basic" INTELSAT transmission service is "jurisdictional" is irrelevant to the issue involved, since both INTELSAT transmission and end-to-end services are "jurisdictional" to the extent that they fall within Title II of the Communications Act of 1934, 47 U.S.C. 201–224 (1976). It further states that equality of competitive opportunity can be achieved only if the Comsat parent is prohibited from providing either type of service directly to non-carrier users.

17. WUI in its reply claims that Comsat's opposition is essentially procedural and not helpful to the Commission's resolution of the substance of the issues. WUI notes that Comsat did not deny that the *DOD Hawaii-Guam* [11] case demonstrated that Comsat and WUI were "competitors" for DOD's "private line" business at the earth stations.[12] WUI Reply, p. 3. WUI also faults ARINC's opposition for failing to justify its claim that the Commission's interrelated satellite orders of August 5, 1982 are clear and complete.

2. Discussion of separate subsidiary issue

18. As an initial procedural matter, we question whether the relief sought appropriately may be granted in this proceeding. We shall first address WUI's arguments. WUI does not argue with our findings in *Structure* that the Comsat parent shall provide jurisdictional monopoly services and the Comsat subsidiary(ies) shall provide other than jurisdictional monopoly services.[13] Rather, WUI disagrees with our treatment in *Authorized User* of the provision of INTELSAT transmission capacity to non-carriers as a jurisdictional monopoly service. Therefore, WUI is really asking us to change our definition in *Authorized User,* not in *Structure.*

19. Similarly, RCA Globcom argues that the relief it seeks is necessary because our decision in *Authorized User* is directly contrary to the thrust of the *Comsat Study. RCA Petition, p. 8. Again, even were we to accept RCA Globcom's argument, the appropriate relief would be a modification of the Authorized User* decision and not the *Structure* decision. The *Structure* decision does not even mention the provision of INTELSAT transmission capacity; it merely states that activities in furtherance of Comsat's INTELSAT functions are to be provided by the parent and non-INTELSAT activities by the subsidiary(ies). The *Authorized User* decision clarifies the status of the provision of INTELSAT transmission capacity as an INTELSAT activity regardless of whether it is provided to carriers or directly to non-carrier users. It is this latter interpretation with which RCA Globcom takes issue here and for which it seeks relief. As a result, RCA Globcom is similarly seeking relief which cannot appropriately be granted in this proceeding.

20. Although we could dismiss this aspect of the petitions on procedural grounds, we believe that the petitioners have misconstrued our *Structure* and *Authorized User* orders, as well as the nature of the service Comsat will be providing, and that it would be helpful for us to clear up those misunderstandings. First, we will discuss the allegations of inconsistency and, second, the allegations of unfairness. The petitioners have argued that our orders are inconsistent in that they could allow the Comsat parent to engage in competitive activities which we have found it should not engage. The petitioners have each alleged a different inconsistency. WUI contends that the *Structure* decision is inconsistent with the *Authorized User* decision, while RCA Globcom seems to be contending that both the *Structure* and *Authorized User* decisions are inconsistent with the *Comsat Study.*

21. As noted in paras. 8 and 9, *supra,* WUI believes that our *Authorized User* policy directed the Comsat parent, rather than a subsidiary, to compete for what WUI characterizes as the "private line" business of larger users at the U.S. earth stations. WUI reasons that since it and other carriers intend to compete with Comsat for this "private line" business the provision of such service must then be a competitive and not a monopoly activity. It follows, argues WUI, that to be consistent with *Structure,* a Comsat subsidiary, rather than the parent, should have been required to provide this service.

22. We disagree with WUI's analysis. The *Authorized User* order did not direct, or even allow, the Comsat parent to offer "private line" service to large users. Rather, it directed the Comsat parent to make available to all users only INTELSAT satellite-transmission capacity at U.S. earth stations. Nothing in the *Authorized User* decision alters the fact that Comsat is currently the only entity with access to this INTELSAT capacity. Because of Comsat's unique position, the provision of INTELSAT capacity is effectively a monopoly service. The nature of this monopoly service, which had previously been supplied primarily to carriers, does not change because Comsat may now supply it directly to non-carriers, who are also potential customers of end-to-end carriers. Since in either case the provision of INTELSAT satellite capacity is essentially the same service, it retains its monopoly characteristics, independent of the nature of the buyer.

satellite. Provision of "basic" or INTELSAT transmission capacity does not include the making of additional service arrangements including those with a U.S. domestic carrier for connecting circuits to the U.S. earth station and with a foreign telecommunications entity for the foreign satellite half circuit and the necessary connecting links within the foreign country. 90 FCC 2d at 1402–03.

[8] *See* para. 6, *supra.*

[9] Similarly, WUI states that if we intended by this definition to exclude from competition the provision to non-carrier users of "basic" transmission capacity, then the *Structure* order is also "internally inconsistent and totally at odds with reality." WUI Petition, p. 6.

[10] Nevertheless, RCA Globcom contends that it is not challenging the *Authorized User* decision, but that it merely seeks "safeguards to preserve the *status quo* while the Commission resolves the claims of other carriers that they should not have to use Comsat as a middleman for access to INTELSAT." RCA Globcom Petition, p. 2.

[11] Western Union International, Inc. v. Communications Satellite Corporation, CC Docket No. 81–356 (released December 10, 1981) (hereinafter, DOD Hawaii-Guam).

[12] We are not certain that WUI means by the term "private line" in this connection. We assume that WUI is referring to IRC leased channel service. *See* 90 FCC 2d at 1397 n.3.

[13] Jurisdictional monopoly services are those granted to Comsat by virtue of its unique roles under the Communications Satellite Act of 1962, 47 U.S.C. 701–744 (1976). They are not necessarily delineated by economic forces or theories, such as those arising from a natural monopoly position.

VOL 48 ISS 102 MAY 25 1983 UMI

Further, the Comsat parent realizes no additional profit by providing capacity directly to non-carriers, than by providing the same capacity indirectly to non-carriers through "middlemen" carriers who put together an "end-to-end" service. Therefore the Comsat parent cannot be said to be competing with the end-to-end carriers for "private line" service to non-carrier users since Comsat is indifferent financially as to whether it leases capacity directly or indirectly to these users.

23. Nowhere in the *Authorized User* order did we state, or even imply, that the provision of INTELSAT transmission capacity is a competitive activity. We did recognize that the provision of end-to-end service is a competitive activity when we stated that Comsat's entry into the end-to-end market would increase competition in that market.[15] We did not treat the provision of INTELSAT capacity in a similar fashion. Instead, we distinguished between a competitive activity and an activity which only exerted "competitive pressures." We reasoned that provision of INTELSAT capacity to non-carrier users does not include services traditionally provided by end-to-end carriers. Instead we said that a user must make its own communications arrangements for the facilities necessary to transmit its message between its office and a U.S. earth station, and must also make its own arrangements with a correspondent for the foreign end of the circuit. Under this scheme, the existing carriers would not be competing with Comsat to serve non-carrier users, although they would be under "competitive pressures" to reduce their end-to-end rates. The competitive pressures arise because of the possible differences in the charges set by carriers to provide the domestic and foreign segments of international service with the costs to users of making their own domestic and foreign arrangements. Comsat's provision of INTELSAT capacity is the same in either case. Further, pursuant to Comsat's *Authorized User* tariff, this INTELSAT satellite capacity is available to carriers and non-carriers at the same rate and on the same terms and conditions. Thus, giving non-carrier users the option of dealing directly with Comsat for monopoly satellite capacity permits these users to decide whether they can arrange a better deal for the additional facilities and services necessary to complete an end-to-end service than that offered by the existing "middlemen" carriers. The availability of this option to users does not make the provision of INTELSAT transmission capacity "competitive" with the provision of end-to-end service, because INTELSAT capacity is an input to end-to-end service, not a substitute for it.[16]

24. The competitive/monopoly distinction in the above decision is also consistent with that in our *Structure* order. In the *Structure* order we defined "competitive" as follows: "We use the term competitive in this document to refer to existing and future non-INTELSAT/INMARSAT activities engaged in by Comsat." 90 FCC 2d at 1172, n.9. Therefore, non-competitive refers to existing and future INTELSAT/INMARSAT activities engaged in by Comsat. Looking at the INTELSAT side, we observe that the furnishing of INTELSAT transmission capacity—defined as the provision of INTELSAT half circuits—is clearly an INTELSAT activity, and thus "non-competitive" within the meaning of the *Structure* dichotomy.[17]

25. As we have indicated, the fact that Comsat's provision of INTELSAT capacity is non-competitive does not change simply because Comsat offers it directly to non-carriers as well as to carriers. Under current policy, Comsat is the only entity authorized to participate in INTELSAT and is therefore the only entity who can supply INTELSAT capacity in the United States. We, therefore, recognize that competition in the form of additional suppliers of INTELSAT capacity is virtually impossible under current INTELSAT earth station and space segment access policies.[18] In fact, one of the reasons we have instituted the inquiries in CC Dockets Nos. 82–540 and 82–548 is to gauge the possibility of competition in the provision of INTELSAT capacity. Should we find such additional competition feasible and desirable, we can take any actions to implement that finding—including further changes to Comsat's corporate structure and operations—at that time. Until such time, however, we find no public interest benefit to be gained from trying even temporarily to make the provision of INTELSAT capacity "competitive" by inserting a layer of carrier middlemen between the sole supplier of such capacity, Comsat, and its non-carrier customers. Such a scheme would only produce inefficiency as far as non-carrier users are concerned. The benefits of the *Authorized User* policy are primarily in the "add-on" category; users can now benefit if they can perform the services added by end-to-end carriers to Comsat's INTELSAT service more efficiently than the carriers themselves perform these services.

26. Therefore, we reject WUI's arguments that the *Authorized User* decision improperly directed the Comsat parent to provide INTELSAT transmission capacity. Such provision is a monopoly INTELSAT activity which the *Structure* decision correctly relegated to the parent company.

27. RCA Globcom makes a somewhat different argument concerning inconsistencies. RCA Globcom recognizes that both the *Authorized User* and the *Structure* decisions provide that the Comsat parent lease INTELSAT transmission capacity at U.S. earth stations to non-carrier users as well as to carriers. However, RCA Globcom argues that such a policy is inconsistent with the policy of the *Comsat Study*. We do not find this argument persuasive. The recommendations in the *Comsat Study* were clearly only tentative findings pending completion of a notice and comment rulemaking proceeding. All of the findings in the *Structure* decision are not necessarily present in the *Comsat Study*. Therefore, resolution of this issue is not relevant to the instant reconsideration. Nevertheless, in the interests of clarity, we shall address RCA Globcom's argument to determine if the *Comsat Study* recommendation differs from the procedures adopted in the above decisions.

28. RCA Globcom cites the following language in the study:

> The structural changes we describe in this Report would establish a framework to locate all of Comsat's jurisdictional monopoly activities with [the Comsat parent] Comsat Global . . . . [These] jurisdictional monopoly activities will be isolated from activities in the competitive environment in which the corporation could engage through its Comsat National subsidiary. COMSAT Global would be required to sell INTELSAT half-circuits including space segment and ground segment (earth station services), to all competitive retailers on fair and equal terms pursuant to tariff. . . . [the Comsat competitive subsidiary] Comsat National could enter the competitive retail market for provision of international satellite services directly to end-users. 77 FCC 2d at 750 (footnote omitted)[19]

RCA Globcom apparently believes that our failure to include in this paragraph the lease of INTELSAT half circuits to non-carriers was intended to indicate that the Comsat parent is not to offer them.[20] We disagree. First of all the focus of this sentence was simply to make it clear that when Comsat provided this capacity to the end-to-end carriers it had to make it available on fair and equal terms pursuant to tariff. Moreover, the *Comsat Study* was adopted well before we issued our *Authorized User* order and, thus, could not dispose of matters which were still at issue in the then pending *Authorized User* rulemaking. We note, however, that the *Comsat Study* cited (in a footnote to the same paragraph quoted by RCA Globcom) proposals in the *Authorized User-NPRM*[21] which were intended to allow non-carrier entities to obtain INTELSAT half circuits (what *Authorized User* called "basic" INTELSAT transmission capacity) for their own use.[22] The *Comsat Study* further recognized that this NPRM proposed to treat these non-carrier entities as "authorized users" with the authority to acquire space segment directly from Comsat's monopoly are (i.e., the parent).[23] It is thus apparent that when we decided the *Comsat Study* we were aware of the fact that the Comsat parent would likely be authorized to deal directly with non-carrier users. Therefore, we conclude that these *Comsat Study* recommendations are not inconsistent with both the *Authorized User* and *Structure* orders.

29. Finally, both petitioners make arguments based on equity for preventing the Comsat parent from offering capacity to non-carriers. They claim that allowing Comsat to lease INTELSAT capacity to non-carrier users will allow Comsat to capture the major share of this market before we have had a chance to decide the issues of direct access and independent earth station ownership. They contend that Comsat's "basic" INTELSAT service customers will be permanently lost to them because of the timing advantage Comsat would have. Further, they contend that traffic will be diverted from their private line services to Comsat's INTELSAT transmission service.

30. We do not agree with these bleak predictions of future harm. If the IRCs and other carriers are permitted at some future time to compete for some or all aspects of the provision of INTELSAT satellite capacity they should be able with superior price and/or service to attract Comsat's customers. There may be some cases in which Comsat has received a relatively long term commitment from a customer so that the customer is not immediately in a position to obtain competitive services from these carriers. We believe, however, that such situations will constitute a small share of the market. As to diversion of traffic from IRC private line service to Comsat's INTELSAT transmission service, we have recently addressed this issue in our order authorizing Comsat to provide INTELSAT transmission capacity directly to non-carriers. In that order, we found that the conclusions of the RCA submitted traffic and revenue diversion study were speculative and that any diversion of traffic that may occur would not likelt be so substantial as to threaten the IRCs' ability to provide service to the public.[24] Therefore, we see no reason to withhold the benefits of reduced costs to those customers who can efficiently use INTELSAT satellite capacity by providing themselves the services added by end-to-end carriers. We find that the benefit of this customer choice outweighs the above speculative detriment to a framework for the competitive provision of INTELSAT capacity that may result from future Commission actions.

B. Commission Measures To Ensure That the Separate Subsidiary Establishes Just and Reasonable Charges

31. RCA Globcom addressed ways it believes the separate subsidiary approach in the *Structure* decision should be strengthened to promote competition. RCA Globcom contends that merely requiring Comsat to operate through a separate subsidiary in all its "retail" ventures will not, without supplemental safeguards, adequately protect other carriers from anti-competitive abuses or avoid burdening INTELSAT ratepayers while the Commission is resolving the *Direct Access* and *Earth Station Ownership* proceedings. It asks us to establish additional procompetitive safeguards to assure that the subsidiary establishes lawful charges, free of any cross-subsidization or misallocation of costs resulting from its corporate affiliation with the parent company. It argues that such safeguards should be established by modifying the *Structure* order in three respects. First, it asks us to affirm that the subsidiary must have separate officers, facilities, advertising and marketing, records and books of account, procurement, and operating personnel from the parent. Second, it requests us to scrutinize carefully Comsat's response pertaining to changes in allocation of common costs ordered by the *Structure* decision. Finally, it requests us to require the Comsat subsidiary to justify any rate initiatives on the basis of fully allocated costs.

32. Comsat, in its opposition, contends that RCA Globcom's argument is not germane to the order under reconsideration. Comsat states (1) that the Commission has already approved of Comsat's organizational changes, (2) that the Commission has already made clear that it would strutinize Comsat's allocation of costs, and (3) that once the *Structure* issues are resolved by the Commission, there is no reason to treat the rates of a Comsat subsidiary differently from those of other carriers. ARINC's opposition avers that RCA Globcom's argument is not novel and was adequately considered by the Commission in Dockets Nos. 80–170 and 80–634.

33. We shall address RCA Globcom's contentions in the same order as RCA Globcom presents them. First, to the extent that the *Structure* order only implicitly described the structural separation required between the Comsat parent and its competitive subsidiaries, we shall now state these separation requirements more explicitly. We affirm

---

[14] ". . . our decision permits Comsat to provide additional end-to-end services directly to the public. Although Comsat has expressed no present intention to do so, we find that the industry would benefit from entry of a new competitor such as Comsat which has the resources and experience to play a major role in providing satellite services to the public." 90 FCC 2d at 1420.

[15] When we indicate that our Authorized User decision has not provided for direct competition in the provision of INTELSAT capacity (earth segment and space segment) between the Comsat-parent and the end-to-end carriers, we do not imply that this decision has not altered the structure of the market. It has, of course, intentionally done so. But the "competition" it creates is among the end-to-end carriers who are competing both with each and with potential customers for the "packaging" type functions required to put together an end-to-end service.

[16] We are not taking issue with WUI's assumption that "private line" or "leased channel" service is competitive. Indeed, the Authorized User decision found that Comsat can provide "leased channel" service only through a subsidiary. *See* 90 FCC 2d at 1421.

[17] However, some form of competition is feasible through the offering of services over substitutable media, such as coaxial or fiber optic submarine cable.

[18] Comsat Global was used to refer to the parent company and Comsat National to a subsidiary.

[19] RCA Globcom also believes that the Commission's use of the term "jurisdictional" in this quotation is irrevelant to a determination of whether basic service should be provided by the parent or by a subsidiary. RCA Globcom believes that "jurisdictional" means all services subject to Title II of the Communications Act of 1934, 47 U.S.C. 201–224 (1976). We disagree with this interpretation. The quotation speaks of "jurisdictional monopoly" activities, not merely "jurisdictional" activities. As indicated in footnote 12, *supra*, by "jurisdictional monopoly" we were referring to Comsat's role under the Communications Satellite Act of 1962, 47 U.S.C. 701–744 (1976). A part of this role is to provide INTELSAT half circuits—"basic" transmission capacity—to authorized users.

[20] Aeronautical Radio Inc., *et al.*, 77 FCC 2d 535 (1980) (hereinafter Authorized User-NPRM).

[21] 77 FCC 2d 750 n.245.

[22] 77 FCC 2d 752.

[23] Communications Satellite Corporation, FCC 83–41 (released February 2, 1983). *See also* Authorized User, 90 FCC 2d at 1415–19.

VOL 48 ISS 102 MAY 25 1983 UMI

the *Structure* conclusion that Comsat's current organization is generally adequate. Under Comsat's current structure, the parent has separate officers, records and books of accounts, and operating personnel from the subsidiaries. The parent and subsidiaries also provide their own facilities and their own financial, personnel, procurement, advertising and marketing services, except for sharing of certain corporate administrative support services and the laboratories. We said in the *Structure* decision that we would permit this limited sharing of resources if Comsat submitted a plan to ensure proper allocation of common costs associated with such sharing. We also said that if Comsat is unable to establish appropriate accounting and information control mechanisms, then we would consider whether additional structural separation is warranted. We have not as yet completed evaluation of Comsat's plans and therefore have not made a final decision as to the required degree of separation. We also note that we have required Comsat to provide us with 90 days notice if it intends on its own initiative to alter the current structure of the company. If we should receive such notification, we shall determine at that time if the new proposed structure adequately addresses our goal of maximal separation of competitive and regulatory activities and properly handles the allocation of any justifiable common costs.

34. Second, we have already instructed the Chief, Common Carrier Bureau, to assess the proposals submitted by Comsat to remedy the problems we raised in the *Comsat Study* and the *Structure* orders and to apprise Comsat of any deficiencies found. 90 FCC 2d at 1198. These proposals relate to deficiencies in Comsat's allocation of research and development costs among regulated and unregulated accounts, its accounting for its labs, its accounting of shared administrative and common costs, and its procedures for use and dissemination of technical data generated by INTELSAT and INMARSAT funded work. We direct the Bureau to scrutinize carefully these proposals in order to assure that our policies are effectively implemented.

35. Finally, we note that no Comsat subsidiary has yet filed an application for authority to provide any end-to-end communications service between the United States and overseas points and that there is no tariff covering such service. Hence, only fears that such filings devoid of cost justification might be forthcoming have been cited. We believe that our rules adequately address such fears. For example, if an existing Comsat subsidiary were to file a tariff for such a service, it would be subject to Section 61.38 of the Commission's Rules and Regulations, 47 CFR 61.38 (1981). In particular, Section 61.38(a) requires that economic data and information be submitted to support a tariff request for a new service. Therefore, we will be in a position to determine if the tariff is justified and we conclude that no additional rules are required to satisfy WUI's request.

C. Observer Status at INTELSAT Meetings

36. WUI cites the Commission's finding in *Structure* that Comsat has an advantage over competitors by reason of its access to information flow from INTELSAT. It believes, though, that our proposed remedy in that order under what it terms the "Freedom of Information Act" is cumbersome and does not offset Comsat's lead time advantages. It restates its earlier proposal to allow the international carriers observer status at INTELSAT meetings. It asks that we instruct Comsat to advocate this position before INTELSAT. Comsat, in its opposition, states that this matter has already been fully briefed by the parties and fully considered by the Commission. It argues that WUI presents no new facts or analysis here.

37. First, we also affirm our conclusion in the *Comsat Study* that the INTELSAT Agreement does not explicitly provide for attendance of private corporations or entities as observers at INTELSAT meetings. On the issue of whether or not such attendance is implicitly permitted by the INTELSAT Agreement, the Department of State would be the appropriate agency to render an interpretation on this point. In any case, we believe that carrier attendance at meetings is not necessary at this time to offset possible advantages that Comsat may gain as signatory. In the *Structure* order, we have directed Comsat to broaden public access to INTELSAT Board of Governors' documents consistent with requirements imposed on us by the Freedom of Information Act. We have also prohibited Comsat from releasing these documents to its subsidiaries before release to the public. We believe these measures should be sufficient to satisfy any concerns about possible lead time advantages Comsat's subsidiaries may have over competitors. However, we have not permanently foreclosed consideration of carrier observer status should future conditions warrant and should the Department of State issue an opinion that some form of private participation is implicitly permitted by the Agreement.

D. Restraint on Comsat's Service to Users Pending Resolution of Structure Issues

38. WUI has asked that we restrain Comsat from serving end users unless and until Comsat remedies the problems set forth in the *Structure* order. It argues that Comsat could be competing for "earth station forward" services [35] with WUI and others for an indefinite period of time, during which period Comsat could continue to misuse its monopoly powers and to misallocate costs—all to the detriment of its carrier competitors. Comsat states in its opposition that this complaint is wholly frivolous and does not warrant substantive response.

39. We find that WUI's concerns have already been adequately addressed by our *Authorized User* order. In that order, we distinguished between two types of international service Comsat may offer to users through the INTELSAT system. The first type is the provision of INTELSAT capacity. As we have earlier indicated, this service is currently provided on a monopoly basis. Therefore, we see no need to condition the offering of this service to users on the implementation of competitive safeguards contained in the *Structure* order.[36] The second type is the provision of so called "end-to-end" communications service between the United States and overseas points. This type of service, should Comsat choose to initiate it, would be provided by a subsidiary on a competitive basis. The *Authorized User* order states that as a condition of providing this latter service, Comsat must comply with the requirements set forth in the *Structure* decision. 90 FCC 2d at 1435. We see no reason to change this requirement. Therefore, before any Comsat subsidiary is authorized to provide any international communications service through INTELSAT, we will verify that Comsat has made sufficient changes in its accounting, cost allocation and information flow procedures which satisfy the concerns we expressed in that decision.

[35] WUI does not define "earth station forward" service. Notwithstanding, we shall address WUI's argument giving the term its broadest possible interpretation in this INTELSAT context.

[36] *See* Paragraph 108 of the Authorized Users order in which we required Comsat to file for appropriate amendments to its Section 214 authorizations and its FCC Tariff No. 101.

E. Restrictions on Comsat's Business Activities

40. WUI argues that, as a matter of law, all of Comsat's activities must be intimately connected with, and directly and substantially in furtherance of, its statutorily mandated and limited INTELSAT and INMARSAT missions. It avers that the Commission may not legally authorize or permit Comsat to expand beyond these activities into regulated or unregulated markets. In its opposition, Comsat contends that this argument has been fully briefed by the parties and fully considered by the Commission. It believes that WUI has presented no new facts or analysis here.

41. WUI has presented no new facts or analysis to support changing our prior findings. In the *Structure* order, we affirmed our *Comsat Study* determination that no legal bar exists to Comsat's participation in non-INTELSAT/INMARSAT business so long as such participation is not inconsistent with Comsat's statutory responsibilities under the 1962 Satellite Act or its Articles of Incorporation. We also affirmed in the *Structure* order our prior determination in the *Comsat Study* that as a matter of law and regulatory policy Comsat should not be limited to its INTELSAT/INMARSAT roles. We reasoned that Comsat's involvement in diversified satellite-related activities would contribute to the overall development of satellite communications technology and would therefore serve the public interest. We do not believe WUI has shown anything to justify changing those determinations.[37]

F. Adequacy of Structural and Operational Changes

42. WUI argues that the Commission's proposed structural and operational changes to Comsat will not be adequate either to preserve competition or to protect the public interest. It avers that the Comsat parent and subsidiary(ies) will have both the incentive and the ability to engage collusively in anticompetitive activities, conflicts of interest and cross-subsidization schemes. Neither Comsat nor ARINC addressed this contention in its opposition.

43. WUI does not specify what relief it seeks were we to agree with its contentions. It merely states that it disagrees with certain concepts in the *Structure* order. This bare statement of disagreement is not sufficient to conform to the requirements of our Rules and Regulations. Section 1.429(c) of the Rules requires that the petition for reconsideration shall state with particularity the respects in which petitioner believes the action should be changed. WUI has not stated how it would want to have the *Structure* order changed to satisfy its concerns. In any event, we adhere to our earlier view that our required structural and operational safeguards are adequate. Therefore, we deny this aspect of WUI's request.

G. Acceleration of the Commission's Schedule for Other Matters

44. WUI argues that the Commission should immediately grant its requests for: (1) "cost-based" access to INTELSAT space segment rates; (2) unbundled rates for INTELSAT space segment and earth station segment components; and (3) independent access and operational capability at U.S. INTELSAT earth stations. WUI contends that deferral of these matters will irreparably harm WUI through customers and revenues lost to Comsat and severely abridged operational flexibility at U.S. INTELSAT earth stations. Comsat states in its opposition that this complaint is wholly frivolous and does not warrant substantive response.

45. We find that WUI has presented no new facts or analysis to support our changing our prior findings in the *Authorized User* proceeding. 90 FCC 2d at 1432–35. See also *Communications Satellite Corporation, supra*, n.20. We have considered WUI's contentions of unfairness in paras. 29 and 30, *supra*, and have found that WUI will not be irreparably harmed from revenues lost by a policy allowing customers to provide their own arrangements in lieu of paying "middlemen" end-to-end carriers for their services. We also have fully addressed WUI's contentions in the *Authorized User* proceeding and have found that there is no direct connection between the policies we announced in that proceeding and our inquiries into potential changes in earth-station ownership and INTELSAT access policies. In general, by permitting Comsat to offer end-to-end services through a subsidiary, we have established a mechanism to strengthen competition in the provision of communications services. This mechanism for strengthened competition is present regardless of the outcome of the earth-station ownership and INTELSAT access inquiries. The possibility that these inquiries may ultimately result in additional competition in a different market (e.g., provision of INTELSAT capacity) does not make resolution of these inquiries a prerequisite for the actions that we have taken in the *Authorized User* proceeding. In particular, as to the earth-station-ownership issue, we said that our current ownership policy does not prevent the carriers from competing with a Comsat subsidiary for end-to-end services. The ability to compete results from the requirement that ESOC make earth station facilities and services available to other carriers on the same reasonable and non-discriminatory terms available to the Comsat subsidiary. As to the INTELSAT access issue, we similarly found that carriers would be able to compete with a Comsat subsidiary for end-to-end services adequately through their ability to obtain INTELSAT half circuits from Comsat at the same reasonable and non-discriminatory rates charged a Comsat subsidiary. Finally, as to the unbundling aspect, we found no reason to require immediate tariff unbundling of space and earth segment rates since we had not yet decided which entities may individually own earth stations or obtain direct access to INTELSAT. WUI presents no new facts or arguments here. We, therefore, affirm our findings in the *Authorized User* proceeding.

IV. Ordering Clauses

46. Accordingly, it is ordered, that the Petitions for Reconsideration or Clarification filed by Western Union International, Inc. and RCA Global Communications, Inc. are denied, except as indicated in paragraph 33 herein.

Federal Communications Commission.[38]

Secretary.

March 31, 1983.

Separate Statement of Commissioner Anne P. Jones Concurring and Dissenting in Part

In Re: Changes in the corporate structure and operation of the Communications Satellite Corporation (CC Docket No. 80–634)

When the Commission issued the Memorandum Opinion and Order for which reconsideration is sought here, I dissented because I was not convinced of the correctness of the Commission's position on two threshold points. I take this opportunity to state my position on those points and thereby explain my dissent.

First, I was and am not persuaded that it is the proper function of this Commission to bless Comsat's diversification into non-INTELSAT/INMARSAT business activities. As indicated in the Comsat Study, the Notice of Proposed Rulemaking in this proceeding, and the August MO&O, entry by Comsat into such activities involves substantial risk of

[37] *See also* Application of Satellite Television Corporation for Authority to Construct an Experimental Direct Broadcast System, FCC 82–427, at 9–15 (released October 13, 1982).

[38] See attached statements of Commissioners Anne P. Jones and Mimi Weyforth Dawson.

VOL 48 ISS 102 MAY 25 1983 UMI

behavior by Comsat detrimental to its competitors, its rate-payers, and its statutory INTELSAT/INMARSAT functions. In view of this risk, I believe the Commission was quite correct in suggesting in the Study and the Notice that Congress should address in further legislation the scope of Comsat's authority, if any, to engage in non-INTELSAT/INMARSAT activities.

My second concern relates to the Commission's decision to rely entirely on structural safeguards and existing statutory filing requirements to monitor entry by Comsat into non-INTELSAT/INMARSAT activities. In this regard, it seems to me well arguable that repeated references in the Comsat Study and the Notice of Proposed Rulemaking to the possibility that particular proposed activities by Comsat might conflict with its INTELSAT/INMARSAT activities implied that the Commission would establish some monitoring mechanism to guard against such conflict. It is therefore also arguable that the Commission's decision not to establish *any* monitoring mechanism, but to rely instead entirely on structural safeguards and existing filing requirements, was not fairly within the scope of this rulemaking as required by notice and comment provisions of the Administrative Procedure Act (5 U.S.C. 553).

I concur in the present Memorandum Opinion and Order insofar as it denies reconsideration of the structural and operational limitations imposed last August. In my judgment those limitations should be retained, despite my own doubts that they, or any other limitations within the power of this Commission to impose and enforce, will or can achieve their purpose.

I understand the argument reflected in paragraph 41 of this MO&O that entry by Comsat into diversified, unregulated, satellite-related activities may contribute to the overall development of satellite communications technology and thereby serve the public interest. But I am not persuaded by that argument.

For one thing, I am not convinced that whatever contribution ComSat's entry into unregulated activities may make to overall development of satellite communications technology could not or would not be made by others.[*] And even assuming *arguendo* that ComSat is uniquely able to make such contributions, it is not clear that the possibility of its doing so outweighs the dangers which the limitations imposed on it in this proceeding are intended to prevent. And finally, it seems to me that the unhappy history of this Commission's efforts to police the boundary between regulated and unregulated activities of communications common carriers strongly suggests that such efforts are expensive, frustrating, and frequently vain.

It is with some reluctance that I conclude that a company with ComSat's resources and energy should be confined to statutorily mandated, regulated activities. However, I am even more reluctant to approve the creation of yet another partly regulated, partly unregulated telecommunications company, with all the dangers and regulatory problems such companies generate, without a much more convincing case for doing so than has in my judgment been made in this proceeding. I therefore again dissent from the basic decision to permit Comsat to engage in unregulated activities, regardless of the structure through which it does so.

Concurring Statement of Commissioner Mimi Weyforth Dawson Re: Comsat Structure Reconsideration

In the Comsat Structure and Authorized User decisions we have taken another step in establishing the framework for introducing additional competition in the provision of international telecommunications services. In the Comsat Structure decision we have followed the recommendations of our Comsat Study to require the separation of Comsat's monopoly (Intelsat/Inmarsat) services from its other activities. We have thus required the establishment of separate subsidiaries and the institution of appropriate accounting techniques to preclude Intelsat ratepayers from subsidizing non-Intelsat endeavors. In Authorized User we authorized Comsat to provide Intelsat capacity directly to users through its jurisdictional arm, the World Systems Division, and to provide end-to-end services through a separate subsidiary.

These and other decisions have permitted Comsat to enter new markets and to compete with other carriers. For example, Comsat may now directly compete with the international record carriers, Western Union, direct broadcast satellite providers and AT&T. Additionally, as in the Authorized User decision, we can modify the structure of a market so that all service providers will have an incentive to establish rates closer to cost. Yet Comsat remains a monopoly service provider of international earth station facilities and the Intelsat space segment. I anticipate, at least for reasons of equity, that the Commission will consider in the not too distant future the outstanding NOIs on earth station ownership and direct access. While considerations unique to international services and facilities must be recognized, the introduction of additional competition in the provision of international satellite services may provide the same public benefits that augmented competition has produced domestically, i.e., additional service offerings, greater efficiencies and lower rates.

[FR Doc. 83-14017 Filed 5-24-83; 8:45 am]

BILLING CODE 6712-01-M

[*] As I noted in dissenting from the Commission's approval of ComSat's entry into the manufacturing and marketing of shipboard earth stations and into direct satellite broadcasting, there is no shortage of other entrants or would-be entrants into these businesses. See 90 FCC 2d 505 and FCC 82-427 (released October 13, 1982).

47 CFR Part 0

[FCC 83-197]

Delegation of Authority to the Chief, Private Radio Bureau and to the Chief, Common Carrier Bureau

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action delegates certain authority to the Chief, Common Carrier Bureau concerning public coast stations in the maritime service. This action was staff initiated and is intended to improve Commission organization.

EFFECTIVE DATE: June 13, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Robert P. DeYoung, Private Radio Bureau, (202) 632-7175.

List of Subjects in 47 CFR Part 0

Commission organization, Organization and functions (Government agencies).

Order

In the matter of Amendment of Part 0 of the rules concerning authority delegated to the Chief of the Private Radio Bureau and to the Chief of the Common Carrier Bureau.

Adopted: April 27, 1983.
Released: May 5, 1983.

By the Commission. Commissioner Jones absent.

1. By Order, released April 7, 1980 (FCC 80-179), The Commission adopted § 0.335 of the rules which delegates authority for all common carrier matters involving public coast stations in the maritime service to the Chief, Private Radio Bureau. Before this action was taken, authority had been delegated jointly to the Chief, Common Carrier Bureau and the Chief, Private Radio Bureau.

2. After almost three years of experience with the new arrangement, it now appears that improved administration of public coast stations can be achieved by restoring some of the delegated authority and responsibility to the Chief of the Common Carrier Bureau. This Order does so. Under § 1.412(b)(5) of the rules, a rule making proceeding is not needed to accomplish this action because these rule changes affect only internal Commission organization.

3. For these reasons, it is ordered, that part 0 of the rules regarding authority delegated to the Chief of the Common Carrier Bureau and the Chief of the Private Radio Bureau is amended as set forth in the attached appendix, effective June 13, 1983.

4. Authority for this action is contained in 1.4(i) and 303(r) of the Communications Act of 1934, as amended, and in § 1.412(b)(5) of the Commission's rules.

5. For information concerning this action, contact Robert DeYoung at (202) 632-7175.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William Tricarico,

Secretary.

Part 0 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 0—COMMISSION ORGANIZATION

1. In § 0.91, paragraph (k) is added as follows:

§ 0.91 Functions of the Bureau.

* * * * *

(k) Acts on matters affecting public coast stations in the maritime service which concern tariffs, terms of interconnection, rate or economic analysis, and applications for closure pursuant to Section 214 of the Communications Act.

2. In § 0.291, paragraph (i) is added as follows:

§ 0.291 Authority delegated.

* * * * *

(i) *Authority concerning public coast stations in the maritime service.*

The Chief, Common Carrier Bureau, shall have authority to act on matters affecting public coast stations in the maritime service which concern tariffs and rates, terms of interconnection, and applications for closure pursuant to Section 214 of the Communications Act.

§ 0.335 [Removed and reserved]

3. Section 0.335 is removed and designated reserved.

[FR Doc. 83-14014 Filed 5-24-83; 8:45 am]

BILLING CODE 6712-01-M

47 CFR Part 0

[FCC 83-201]

Authority Delegation to Engineer-In-Charge of Each Field Office To Extend Safety Radiotelephony Certificates

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action delegates to the Engineer-in-Charge of each field office authority to extend the Communications Act Safety Radiotelephony Certificate for a period of up to 90 days. The Commission initiated this action to increase agency efficiency in scheduling compulsory ship radiotelephone inspections. This rule change should also result in more convenient service to the maritime public.

EFFECTIVE DATE: May 25, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Organization and functions (Government agencies).

Order

In the matter of amendment of Part 0 to delegate to the Engineer-in-Charge of each field office authority to extend Safety Radiotelephony Certificates.

Adopted: April 27, 1983.
Released: May 5, 1983.

By the Commission. Commissioner Jones absent.

1. In this Order we are delegating to the Engineer-in-Charge (EIC) of each field office, authority to extend Communications Act Safety Radiotelephony Certificates for a period of up to 90 days.

Background and Discussion

2. Small passenger vessels subject to Title III, Part III of the Communications Act [1] are currently required to have their radiotelephone stations inspected each 24 months. These vessels are usually employed in such activities as party fishing trips, scuba diving and sightseeing. Because of their relatively small size, these vessels are able to operate from the myriad of harbors and marinas along the entire coastline of the United States, often at considerable distances from the FCC field offices. Due to the large distances involved and the limited resources available, field offices are not always able to timely perform the required inspections when requested by the licensees. When it is not possible for a FCC field office to timely perform such an inspection, the licensee is instructed to contact the Commission's Private Radio Bureau to request that the vessel's Safety Certificate be extended. Typically, such temporary relief is routinely granted for a period of 30 to 90 days after coordination with the particular field office. An extension of 30 to 90 days allows the field office to perform the inspection when an engineer is scheduled to be in the given geographical area.

3. A valid Safety Radiotelephony Certificate is a prerequisite for legal operation of these passenger vessels. Further, the U.S. Coast Guard will not issue a Passenger Ship Safety Certificate unless the vessel has a valid Safety Radiotelephony Certificate. Therefore, it is important that the Commission act promptly when an inspection cannot be timely performed and the licensee requests an extension of the Safety Certificate.

4. We believe that by delegating authority to extend Safety Certificates to the Commission's field offices, we will be able to process such requests more efficiently. In essence, the new streamlined procedure will eliminate the current necessity for coordination between the field office and Commission Headquarters in Washington. Additionally, this new procedure will be more convenient for the ship station licensee since it will only be necessary to contact one Commission office for the subject radiotelephone inspection and, if required, to request an extension of the Safety Certificate.

5. Authority for this amendment to the Commission's rules is contained in Sections 4(i), 5(d) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 155(d) and 303(r). Because the amendment relates to matters of procedure and internal organization, the procedural and effective date provisions of Section 4 of the Administrative Procedure Act, 5 U.S.C. 553, are not applicable.

6. Regarding questions on matters covered in this document contact Nicholas G. Gagnato (202) 632-7175.

7. Accordingly, it is ordered, that §0.314 of the Commission's rules is amended as set forth in the attached Appendix, effective on the date that this order is published in the Federal Register.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

[1] In Title III, Part III, of the Act, the first section, 47 U.S.C. 381, reads as follow: "Except as provided in section 382, it shall be unlawful for any vessel of the United States, transporting more than six passengers for hire, to be navigated in the open sea or any tidewater within the jurisdiction of the United States adjacent or contiguous to the open sea, unless such vessel is equipped with an efficient radiotelephone installation in operating condition."

Federal Communications Commission.
William J. Tricarico,
Secretary.

Part 0 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 0—COMMISSION ORGANIZATION

In § 0.314, paragraph (e) is amended by designating existing paragraph (e) as (e)(1) and adding new paragraph (e)(2) as follows:

§ 0.314 Additional authority delegated.

* * * * *

(e)(1) For periodic survey as required by section 385 of the Communications Act of 1934, as amended, and issuance of Communications Act radiotelephony certificates in accordance with § 83.512 of this chapter.

(2) Extend the Communications Act Safety Radiotelephony Certificate for a period of up to 90 days beyond the specified expiration date.

[FCC 83-203]

Amendment To Expedite Operation of Shore Based Radionavigation Radar Stations, Permit the Use of the 14.0 to 14.05 GHz Band by Maritime Radar Test Stations and To Delineate the Equipment Specifications for Ships Required To Carry Two Radar Systems

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document deletes the rule which requires shore based radionavigation radar station licensees to obtain approval from the U.S. Coast Guard to operate their stations; adopts rules to permit maritime radar test stations to use the 14.0 to 14.05 GHz band; and delineates the equipment specifications for ships which are required to carry two radar systems. The Commission initiated these actions in order to eliminate unnecessary rules and policies and to implement new radar requirements applicable to certain large ocean-going ships.

EFFECTIVE DATE: June 13, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: William P. Berges, Private Radio Bureau, (202) 632-7175.

List of Subjects

47 CFR Part 81

Communications equipment, Vessels.

47 CFR Part 83

Communications equipment, Vessels.

Order

In the matter of amendment of Parts 81 and 83 of the Commission's rules to expedite operation of shore based radionavigation radar stations, permit the use of the 14.0 to 14.05 GHz band by maritime radar test stations and to delineate the equipment specifications for ships required to carry two radar systems.

Adopted: April 27, 1983.
Released: May 5, 1983.
By the Commission: Commissioner Jones absent; Commissioner Sharp concurring in the result.

1. This Order makes three unrelated changes to the Commission's maritime rules. First, it removes the condition which requires shore based radionavigation radar station licensees to obtain approval from the U.S. Coast Guard for the operation of these stations. Second, it adds the band 14.0 to 14.05 GHz to the frequencies available to shore test stations. Third, it delineates the radar specifications applicable to ships that are required to carry two radar stations.

Shore Based Radionavigation Stations

2. Section 81.403 of the Commission's rules states that shore radionavigation stations shall be treated as private aids to navigation (NAVAIDS) and that licensees are required to obtain approval from the U.S. Coast Guard for their operation. The U.S. Coast Guard no longer considers these stations to be NAVAIDS and, therefore, no longer desires to approve their operations. Accordingly, we are removing the requirement for U.S. Coast Guard approval by deleting § 81.403 of the rules.

Shore Radar Test Stations

3. Section 83.404 of the Commission's rules authorizes the operation of shipboard maritime radar equipment in the 14.0 to 14.05 GHz band.[1] This band is not included among the frequencies available to maritime radar test stations which may be used as sales equipment demonstrators. The Commission receives and grants a number of requests for rule waivers each year from sales representatives seeking to demonstrate the use of radars operating in the 14.0 to 14.05 GHz band. We believe that this procedure is unnecessary and burdensome for the public and the Commission. Accordingly, we are including the 14.0 to 14.05 GHz band in Section 81.402 of the Commission's rules for assignments to shore radar test stations on a routine basis.

Second Radar Specifications

4. The International Convention for the Safety of Life at Sea (SOLAS), 1974, currently requires vessels of 1,600 gross tons or more to be equipped with at least one radar systems Section 83.465 of the Commission's rules references the specifications for such compulsory radar system. Regulation 12 of Chapter V of SOLAS, 1974, as amended, requires ships of 10,000 gross tons or more engaged in international voyages on or after September 1, 1984, to carry two radar systems. Additionally, we note that the U.S. Coast Guard recently adopted requirements for certain tankers of 10,000 gross tons or more carrying oil or bulk hazardous materials to be equipped with two radar systems. (See 47 FR 34388, August 9, 1982.) In view of the above, a new paragraph is added in § 83.465 of the Commission's rules applying specifications for a compulsory second radar system.

Conclusion

5. Regarding questions on matters covered in this document contact William P. Berges at (202) 632-7175.

6. Authority for this amendment is contained in Section 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r). The prior notice and public procedure provisions of the Administrative Procedure Act, 5 U.S.C. 553, are unnecessary in this proceeding because: (1) The U.S. Coast Guard no longer requires that radionavigation station licensees obtain its permission for the operation of such stations, (2) the addition of the 14.0 to 14.05 GHz band to the frequencies available to maritime shore radar test stations merely codifies a long standing Commission policy, and (3) applying equipment specifications to a second compulsory radar system implements a U.S. Coast Guard requirement and a provision in the SOLAS Convention. The first two actions reduce burdens on the public, while the third implements a treaty requirement and U.S. Coast Guard regulation. Therefore, we conclude that significant public participation would be neither likely nor useful if the subject notice and public provisions were utilized in this proceeding.

[1] The *Reporting and Order* in Docket No. 18762, released May 28, 1970, 23 FCC 2d 313, amended Part 83 of the Commission's rules to permit the operation of shipboard radars in the 14.0 to 14.05 GHz band.

8. Accordingly, it is ordered that effective June 13, 1983, the Commission's rules are amended as set forth in the attached Appendix.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.
William J. Tricarico,
Secretary

Parts 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

§ 81.403 [Removed]

1. Part 81 is amended by removing § 81.403.

2. In § 81.402 a new paragraph (c) is added to read as follows:

§ 81.402 Assignable frequencies.

* * * * *

(c) The following frequency bands are authorized for use by shore radar test stations indicated in § 81.404:
2900 to 3100 MHz
5460 to 5650 MHz
9300 to 9500 MHz
14000 to 14050 MHz

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

1. In § 83.465 paragraphs (c) and (d) are changed to (d) and (e) respectively and a new paragraph (c) is added to read as follows:

§ 83.465 Ship radar station.

* * * * *

(c) For ships of 10,000 gross tons or more required by SOLAS or any other ship than is required to be equipped with two radar systems, each of these systems must be capable of operating independently and must comply with the specifications referenced in paragraphs (a) and (b) of this section. One of the systems must provide a display with an effective diameter of not less than 16 inches (340 millimeters) and the other a display with an effective diameter of not less than 12 inches (250 millimeters).

47 CFR Part 90

Amendment To Relax Adjacent Channel Minimum Re-Use Standards in the 150–170 MHz Band; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: The Commission corrects the text of rules adopted in the matter of relaxing adjacent channel minimum re-use standards in the 150–170 MHz band. These errata bring the new rules into conformance with the Commission's decision in the Order (#32559) issued by the Commission's Managing Director on December 17, 1982 and published in the Federal Register on January 27, 1983 on page (48 FR 3758).

FOR FURTHER INFORMATION CONTACT: Keith Plourd, Private Radio Bureau, Washington, D.C., (202) 634-2443.

Errata

In the matter of amendment of Part 90 of the Commission's rules and regulations to relax adjacent channel minimum re-use standards in the 150–170 MHz band.

Released: May 5, 1983.

The Appendix to the Order released December 17, 1982 in the above-captioned matter [#32559) is corrected to read as follows:

Appendix

Part 90 of the Commission's Rules and Regulations is amended as follows:

PART 90—[AMENDED]

1. Section 90.173 is amended by revising paragraph (f) to read:

§ 90.173 Policies governing the assignment of frequencies.

* * * * *

(f) In the 150–170 MHz band, except in the Taxicab Radio Service, applications will not ordinarily be granted in situations in which the proposed base station is located less than 16 km (10 miles) from an existing base station on a frequency 15 kHz removed, unless the application is accompanied by a signed letter of concurrence from the licensee of each base station located within 16 km (10 miles) of the proposed base station that is operated on a frequency 15 kHz removed from the proposed frequency assignment. In the Taxicab Radio Service, applications will not ordinarily be granted in situations in which the proposed base station is located less than 12 km (7 miles) from an existing base station on a frequency 15 kHz removed, unless the application is accompanied by a signed letter of concurrence from the licensee of each base station located within 12 km (7 miles) of the proposed base station that is operated on a frequency 15 kHz removed from the proposed frequency assignment.

* * * * *

2. Section 90.175 is amended by removing the final sentence of paragraph (a)(1) and inserting a new sentence in its place as follows:

§ 90.175 Frequency coordination requirements.

* * * * *

(a) For frequencies below 470 MHz: (1) A report based on a field study indicating the degree of probable interference to all existing co-channel stations within 120 km (75 miles) of the proposed stations, together with a statement that all such co-channel licensees have been notified of the applicant's intention to apply. In addition, for frequencies in the range 150–170 MHz, a report based on a field study indicating the degree of probable interference to existing stations located between 16 and 56 km (10 and 35 miles) (12 and 56 km for taxicabs) from the proposed station operating on a frequency 15 kHz removed and a statement that the licensees of such stations have been notified of the applicant's intention to apply. The field study report required by this section need not address the degree of probable interference to existing adjacent-channel stations 15 kHz removed within the prescribed mileage limits when evidence of consent set forth in § 90.173(f) is included with the application; however, all other provisions of the field study requirement must be satisfied.

BILLING CODE 7035–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 650

[Docket No. 30520–91]

Atlantic Sea Scallop Fishery

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Rule-related notice; inseason adjustment.

SUMMARY: NOAA adjusts the meat count and shell height standards to impose a meat count standard of 35 meats per pound (3⅜ inch shell height) for the Atlantic sea scallop fishery through December 31, 1983. Adjustment of the standard will eliminate inconsistencies in management measures imposed on Canadian and U.S. sea scallop fishermen that would adversely affect the U.S. domestic fishery if the meat count were to remain at 30 meat per pound (3½ inch shell height). The adjustment will allow U.S. fishermen to harvest sea scallops at sizes smaller than would be allowed in the absence of the adjustment.

EFFECTIVE DATE: May 25, 1983 through December 31, 1983.

FOR FURTHER INFORMATION CONTACT: Bruce Nicholls, Scallop Management Coordinator, National Marine Fisheries Service, Northeast Regional Office, State Fish Pier, Gloucester, Massachusetts 01930. Telephone 617–281–3600.

SUPPLEMENTARY INFORMATION: The regulations (50 CFR Part 650) implementing the Fishery Management Plan for Atlantic Sea Scallops (FMP) (47 FR 35990, August 18, 1982) require the Regional Director, National Marine Fisheries Service, to review the status of the Atlantic sea scallop resource on a continuing basis.

In addition, the Director must prepare a report annually concerning the status of the fishery and possible changes in the resource, fishery, or industry which might require adjustment of the ananagement program. Such a report was prepared and reviewed at a public hearing held in conjunction with the February 1983 meeting of the New England Fishery Management Council (Council). That report recommended that no changes be made in the meat count and shell height standards which are established by the FMP and implementing regulations. The report recognized, however, that when the management standards automatically change from a 40 meat count (3¼ inch shell height) to a 30 meat count (3½ inch shell height) on May 15, 1983, inconsistencies could develop between the meat count and shell height measures imposed on Canadian and U.S. fishermen.

Following presentation of the report, Canadian fisheries officials advised the Regional Director that social and economic considerations make it impossible for the Canadian Department of Fisheries and Oceans to modify its management program to impose a 30 meat count standard on Canadian sea scallop fishermen and thus assure that management measures imposed on the Canadian and U.S. sea scallop fishermen are consistent at the 30 meat count standard. The Canadian officials stated their intention to alter their standards to prohibit the taking of sea scallops smaller than the 35 meat count.

The fishery regulations at 50 CFR 650.22(c)(4) include a provision for adjustment of U.S. management standards by the Regional Director if he finds four criteria are met as follows: (1) That the objective of the scallop FMP would be achieved more readily and be better served through an adjustment of the prevailing standards; (2) that the recommended alteration in the standards would not reduce expected catch over the following year by more than 5% from that which would have been expected under the prevailing standard; (3) that the recommended standards for meat count and shell height are consistent with each other; and (4) that inconsistencies exist in the management measures applied to sea scallop stocks in areas harvested by both domestic and foreign fishermen, and those inconsistencies provide foreign fishermen with an advantage over domestic fishermen which can be demonstrated to adversely affect the domestic fishery. After considering the position of the Canadian Department of Fisheries and Oceans, the Regional Director determined that, in the absence of an adjustment of the U.S. management standard from a 30 to a 35 meat count, the domestic fishery would be adversely affected because of the harvest by Canadian fishermen of smaller scallops. Domestic fishermen would experience a decline in the relative share of sea scallops they can harvest from jointly fished stocks. The ability of Canadian sea scallop fishermen to harvest smaller scallops would not only deprive U.S. sea scallop fishermen of the opportunity to harvest those scallops once they grow to the U.S. legal size, but it would also deprive the resource of the potential reproductive contribution those scallops could have made. The investment made by domestic fishermen in growth and recruitment to the fishery resource would thus be subject, at least in part, to capture by foreign fishermen.

On April 27, 1983, the Regional Director issued notice of his recommendation (48 FR 19046) to alter the meat count and shell height standards to eliminate the inconsistencies in these measures as applied to U.S. and foreign fishermen fishing on the same scallop stocks. A public hearing was scheduled in conjunction with the meeting of the Council on May 12, 1983, to solicit comments on the recommendation from the Council and the public. Written comments on the proposal were requested through May 12, 1983. At the meeting, the Council voted to endorse the recommendation. No public comments in opposition to the action were received. Thus, the Regional Director determined that the proposed changes in management standards met the four criteria outlined above. The Regional Director has therefore determined, in accordance with § 650.22(c), to adjust the management standards to allow the harvest of sea scallops, the size standard for which is no more than a 35 meat count per pound (or less than a 3⅜ inch shell height) during the period from May 25, 1983, through December 31, 1983. On January 1, 1984, the standard will revert to the 30 meat count (3½ inch shell height) level.

This action is taken under the authority of 50 CFR Part 650, and is taken in compliance with Executive Order 12291.

BILLING CODE 3510–22–M

50 CFR Part 658

[Docket No. 30519–89]

Shrimp Fishery of the Gulf of Mexico

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Rule-related notice; closure.

SUMMARY: NOAA adjusts the beginning date of the Texas closure from June 1, 1983 to May 27, 1983 for closure of the fishery conservation zone off Texas to trawl fishing. This closure applies for all species of shrimp except royal red shrimp beyond the 100-fathom depth contour. The area will remain closed through July 15, 1983. The action is prescribed by existing regulations, and its intended effect is to allow harvest of brown shrimp at optimal commercial size.

EFFECTIVE DATE: Closure is effective from 30 minutes after sunset on May 27, 1983, to 30 minutes after sunset on July 15, 1983. Public notice has been issued at least 72 hours prior to closure as stipulated under 50 CFR 658.24(b) (3) and (4).

FOR FURTHER INFORMATION CONTACT: Edward E. Burgess, National Marine Fisheries Service, Southeast Regional Office, Fishery Operations Branch, 9450 Koger Boulevard, St. Petersburg, Florida 33702, 813–893–3723.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico provides for adjustments to the closing and opening dates for the seasonal closure of the fishery conservation zone (FCZ) off Texas. Implementing rules at 50 CFR 658.24 describe the Texas closure and specify that these adjustments be made by the Regional Director under criteria set out in that section.

Available information and estimates indicate that an early closure is warranted and desirable. Biological data collected by the Texas Parks and Wildlife Department on the size of shrimp indicate an earlier-than-usual movement of brown shrimp from the bays into the Gulf. The regulations state that the closure date must be based on a prediction of when the average size of brown shrimp leaving the bays to enter the Gulf will be 80 to 90 mm, on the strength of outgoing tides at that time, and on periods of larger-than-average tidal duration, which this year occur May 15 to 18, 1983; May 27–June 3, 1983; and June 12–16, 1983. It is predicted that the average size of shrimp entering the Gulf of Mexico will be 90 mm on or about May 27, 1983. Based on this information, the Regional Director has determined that the customary closure dates of June 1 to July 15 will be changed to May 27 to July 15. The State of Texas will close its waters during these same days.

All trawling is prohibited between May 27 to July 15, 1983, in the area described in § 658.24(a), except that vessels may trawl for royal red shrimp beyond the 100-fathom depth contour. These vessels need no special permit or letter of authorization.

This action is taken under the authority of 50 CFR 658.24, and is taken in compliance with Executive Order 12291.

50 CFR Part 671

[Docket No. 30520–90]

Tanner Crab Off Alaska

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Rule-related notice; closure.

SUMMARY: The Director, Alaska Region, National Marine Fisheries Service, has determined that the condition of Tanner crab (*Chionoecetes bairdi* and *C. opilio*) in certain areas of the Bering Sea District of Registraion Area J is substantially different from the condition anticipated at the beginning of the fishing year and that early closure of the fishery is necessary to protect Tanner crab stocks. The Secretary of Commerce therefore issues this notice of closure of those parts of the Southeastern and Pribilof Subdistricts south of 57°30'N. latitude in the Bering Sea District to fishing for both species of Tanner crab by vessels of the United States on May 22, 1983, in order to prevent harm to Tanner crab stocks in those areas.

DATES: This notice is effective from 12:00 noon Alaska Daylight Time (ADT), May 22, 1983, until 12:00 noon Alaska Standard Time (AST), February 15, 1984. This motice of clousure was filed for public inspection with the Office of the Federal Register on May 20, 1983, at 4:50 p.m. Public comments on this notice of closure are invited until June 6, 1983.

ADDRESS: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802.

FOR FURTHER INFORMATION CONTACT: Robert W. McVey, 907–586–7221.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Commercial Tanner Crab Fishery Off the Coast of Alaska (FMP), which governs this fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act, provides for inseason adjustment by field order to season and area opentings and closures. Implementing rules at 50 CFR 671.27(b) specify that these orders will be issued by the Secretary of Commerce (Secretary) under the criteria set out in that section. This authority has been delegated to the Director, Alaska Region, National Marine Fisherise Service.

50 CFR 671.26(f)(1) established five districts within Registraion Area J. One of these districts is the Bering Sea District, which is further divided under § 671.26(f)(1)(v) into three subdistricts: Southeastern, Pribilof, and Northern. The optimum yields in the entire Bering Sea District for *C. bairdi* and *C. opilio* are 28.0–36.0 million pounds and 39.5–91.0 million pounds, respectively. To prevent local overfishing of individual Tanner crab stocks, however, closure or partial closure of subdistricts is allowed under § 671.27(b).

Those parts of the Southeastern and Pribilof Subdistricts south of 57°30'N. latitude are being closed by this notice to all further Tanner crab fishing this fishing year. Fishing north of this latitude is still allowed. Hence, fuller utilization of Tanner crab stocks will be promoted while protecting those Tanner

VOL 48 ISS 102 MAY 25 1983

crab stocks south of 57°30'N. latitude. Reasons for the closure are as follows:

Southeastern Subdistrict

C. bairdi—The fishery opened in the Southeastern Subdistrict on February 15, and about 4.0 million pounds of legal crab have been harvested by 100 vessels through May 8. Although trawl surveys conducted in 1982 by the National Marine Fisheries Service (NMFS) indicated 6.6 million pounds of *C. bairdi* were available for harvest, inseason analysis of the catches indicate only about 2–5 million pounds of crab are available. This analysis includes a study of the catch per unit of effort (CPUE), which has declined from 24 to 7 crabs per pot. On the basis of this analysis, the optimum harvest level for *C. bairdi* is set at 4.6 million pounds in the area south of 57°30'N. latitude. This harvest level will be achieved on May 22, 1983.

C. opilio—This species is being taken simultaneously in the *C. bairdi* fishery and about 3.0 million pounds have been harvested through May 8. Although 1982 trawl surveys conducted by NMFS indicated 15 million pound of *C. opilio* were available for harvest, inseason analysis of the catches indicated only about 3.0–3.4 million pounds of crab are available from the southern part of the subdistrict. This analysis includes a study of the CPUE, which has declined from 52 to 24 crabs per pot in the same area. On the basis of this analysis, the optimum harvest level for *C. opilio* is set at 3.4 million pounds in the area south of 57°30'N. latitude. This harvest level will be achieved on May 22, 1983.

Pribilof Subdistrict

C. opilio—The fishery opened in the Pribilof Subdistrict on February 15, and about 10.0 million pounds have been harvested by 100 vessels. Trawl surveys conducted in 1982 by NMFS indicated 10.0–13.0 million pounds of *C. opilio* were available for harvest in this area. Inseason analysis of the catches, including a study of the CPUE, which has declined from 171 to 85 crabs per pot, indicate 12.5 million pounds of crab are available from the southern part of the subdistrict, which approximates the results of the 1982 survey. On the basis of this analysis, the optimum harvest level for *C. opilo* is set at 12.5 million pounds in the area south of 57°30' N. latitude. This harvest level will be achieved on May 22, 1983.

C. bairdi—This species has been taken incidentally in the *C. opilio* fishery. About 600,000 pounds have been taken through May 8. Although 1982 trawl surveys conducted by NMFS indicated about 3.6 million pounds of *C. bairdi* were available for harvest, inseason analysis of the catches indicates less than one million pounds of crab are available from the southern part of the subdistrict. This analysis includes a study of th CPUE, which has declined from six crabs to one per pot. On the basis of this analysis, the optimum harvest level for *C. bairdi* is set at 700,000 pounds in the area south of 57°30' N. latitude. This harvest level will be achieved on May 22, 1983.

In light of this information, the Regional Director, National Marine Fisheries Service, in accordance with 50 CFR 671.26(b), has determined that —

1. The actual condition of *C. bairdi* and *C. opilio* Tanner crab stocks in the Southeastern and Pribilof Subdistricts south of 57°30' N. latitude is substantially different from the condition that was previously anticipated; and

2. This difference reasonably supports the need to protect those Tanner crab stocks by closing the Southeastern and Pribilof Subdistricts south of 57°30' N. latitude to further fishing for Tanner crab during the current fishing year after 12:00 noon, ADT, on May 22, 1983, until the next season's opening.

For these reasons, the Southeastern and Pribilof Subdistricts south of 57°30' W. latitude in the Bering Sea District Area J, as defined in 50 CFR 671.26(f)(1)(v), is closed to all fishing for *C. bairdi* and *C. opilio* Tanner crab from 12:00 noon, ADT, May 22, 1983, until 12:00 noon, AST, February 15, 1984, at which time the fishing season of this district prescribed in 50 CFR 671.26(f)(2)(v) will begin.

This closure will not be effective prior to filing this notice for public inspection with the Office of the Federal Register and publicizing the closure for 48 hours through Alaska Department of Fish and Game (ADF&G) procedures, under 50 CFR 671.27(a)(2). Under 50 CFR 671.27(b)(4), public comments on this notice of closure may be submitted to the Regional Director at the address stated above for 15 days following the effective date. During the 15–day comment period, the data upon which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m.) at (1) the NMFS Kodiak Field Office, ADF&G Building, at Kashevaroff and Mission Roads, Kodiak, Alaska 99615, and (2) the NMFS Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska 99802. If comments are received, the necessity of this closure will be reconsidered and a subsequent notice will be published in the **Federal Register**, either confirming this field order's continued effect, modifying it, or rescinding it.

Other matters

The *C. bairdi* and *C. opilio* Tanner crab stocks in these areas of the Bering Sea District described above will be subject to further harm due to overharvest unless this order takes effect promptly. The Agency therefore finds for good cause that advance notice and public comment on this order is contrary to the public interest and that there should be no delay in its effective date.

This action is taken under the authority of regulations specified at 50 CFR 671.27, and is taken in compliance with Executive Order 12291.

BILLING CODE 3510–22–M

Proposed Rules

Federal Register
Vol. 48, No. 102
Wednesday, May 25, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 29

Tobacco Inspection; Alternative Packaging for Burley Tobacco

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Department proposes to amend 7 CFR Part 29, beginning with the 1983–84 marketing season, to provide farmers official grading on U.S. Type 31 burley tobacco offered for sale at auction untied on burlap sheets, in addition to the present methods of tied in hands or untied in bales. These proposals are issued in an effort to provide the burley industry and opportunity to comment on untied sheeted tobacco as an alternative marketing package. Additional proposals concern the manner in which burley tobacco is to be displayed for inspection.

DATE: All persons who desire to submit written data, views, or arguments for consideration in connection with this proposal should file the same not later than July 11, 1983.

ADDRESS: Submit comments to Lioniel S. Edwards, Director, Tobacco Division, Agricultural Marketing Service, Room 502 Annex Building, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Lioniel S. Edwards, (202) 447–2567.

SUPPLEMENTARY INFORMATION: The Department proposes to amend the regulations to allow burley tobacco, U.S. Type 31, to be eligible for official grading when marketed untied on burlap sheets, thereby providing tobacco farmers with an alternative for the marketing of their tobacco. Additional proposals by the Department concern the manner in which burley tobacco is to be displayed for inspection.

These proposals are issued in an effort to provide the burley industry an opportunity to comment on untied sheeted tobacco as an alternative marketing package. The authority for promulgating these regulations is contained in the Tobacco Inspection Act of 1935 (49 Stat. 731, 7 U.S.C. 511 *et seq.*).

In an effort to improve the current burley marketing program and in the interest of promoting and maintaining orderly marketing conditions in the tobacco industry, the Department, on April 26, 1982 (47 FR 17825) issued an advance notice of proposed rulemaking soliciting the industry's views on alternative packaging for burley tobacco and the problems of "nesting." The advance notice of proposed rulemaking, which generated more than 1500 comments, was a joint project by the Agricultural Marketing Service (AMS) and the Commodity Credit Corporation (CCC). After evaluation of these comments, the Department issued a proposal (47 FR 09688) soliciting comments for (1) alternative packaging for burley tobacco sold at auction, and (2) identifying and preventing the problem of "nesting" in the flue-cured and burley tobaccos. That proposal generated over 7,000 comments from the industry.

After evaluation of these comments, the Department determined that tobacco marketed untied on burlap sheets would not be officially graded nor receive price support during the 1982–83 marketing season. The major determining factors for the Department's decision were (1) that more time was needed to observe the relatively new "bale" marketing package and (2) the possibility of market congestion and deterioration of quality in "sheeted" sales. A press release announcing the decision was issued November 8, 1982, and the final rule was published at 47 FR 51719, the day the 1982–83 burley season opened.

The Department's decision was the subject of numerous lawsuits brought in the burley producing area and resulted in the issuance of several temporary restraining orders and preliminary injunctions directing the Department to provide official grading and price support on untied, sheeted tobacco. In conformance with the District Court decisions the Department provided official grading and price support on untied, sheeted burley tobacco during the 1982-83 burley season as announced in a press release issued December 3, 1982. The Department indicated at that time that a further evaluation of alternative packaging would be made and proposed rulemaking considered prior to the 1983–84 burley season.

A small quantity of untied tobacco on burlap sheets has appeared on the burley markets for the last few years with the amount increasing each year. During the 1981 marketing season, approximately 5 percent of the crop was sold untied in burlap sheets. The Department recorded "sheeted" tobacco sales on a belt-wide basis only until the 1982 marketing season. At that point, records were kept by markets within each State. According to the Department's records, untied sheeted sales represented 6 percent of total sales, up one percent from the 1981–82 season, as reflected by the following:

State	Statewide percentage	Highest percentage and market	Lowest percentage and market(s)
Kentucky	5	18—Bowling Green	1—Cynthiana, Harrodsburg, London, Richmond.
Tennessee	7	41—Rogersville	1— Clarksville, Franklin, Greeneville, Johnson City.
Virginia	18	34—Gate City	9—Abingdon.
North Carolina	6	10—Boone	5—Asheville.
West Virginia	3	(1)	(1)
Indiana	9	12—Madison	3—New Albany.
Ohio	1	(1)	(1)
Missouri	.4	(1)	(1)

[1] Only one burley market is located in the State.

As noted above, there was strong opposition to the Department's decision disallowing official grading and price support on untied, sheeted tobacco in the 1982–83 season. Numerous court rulings in favor of the proponents of untied sheeted tobacco sales, coupled with recognition of the fact that the timing of the decision may have posed hardships on many burley producers

UMI

VOL 48 ISS 102 MAY 25 1983 UMI

who were convinced by proponents of sheeted tobacco that "sheets" would be an alternative package for the 1982–83 season, as well as the Department's commitment to reevaluate the packaging issue prior to the 1983–84 season, prompts the Department to again address the issue. Therefore, for the 1983–84 and succeeding seasons, the Department proposes to provide official grading and price support on U.S. Type 31 burley tobacco offered for sale at auction untied on burlap sheets in addition to the present methods of tied in hands or untied in bales.

In addition to the packaging proposal, it is appropriate that the Department give consideration to the manner in which burley tobacco is displayed for inspection. In the final rule published at 47 FR 51719, based on the recommendation of the Council for Burley Tobacco regarding display of baled tobacco at auction, the Department amended the regulations to provide that the stems of the tobacco packed in bales be turned towards the aisle. However, based on experience gained from grading baled tobacco packed in this manner during the 1982–83 season, it was found that visibility in inspecting the product substantially decreased, particularly in the lower portions of the lot. For this reason, in our effort to improve the current burley marketing program, the Department proposes to amend the regulations to provide that for the 1983–84 and succeeding seasons that bales be placed lengthwise on the pallets so that the midribs of the leaves run parallel to the aisle.

These proposed rules have been reviewed under USDA procedures established to implement Executive Order 12291 and the Secretary's Memorandum 1512–1 and have been determined to be "nonmajor" rules because they do not meet any of the criteria established for major rules under the executive order. Initial review of the regulations continued in 7 CFR Part 29, for need, currency, clarity, and effectiveness has been completed.

Additionally, in conformance with the provisions of Pub. L. 96–354, Regulatory Flexibility Act, full consideration has been given to the potential economic impact upon small business. Tobacco warehousemen and producers fall within the confines of "small business" as defined in the Regulatory Flexibility Act. A number of firms which are affected by these proposed regulations do not meet the definition of small business either because of their individual size or because of their dominant position in one or more marketing areas. William T. Manley, Deputy Administrator, AMS, has certified that these actions will have no significant economic impact upon all entities, small or large and will, in no way, affect the normal competition in the market place.

All persons who desire to submit written data, views, or arguments for consideration in connection with this proposal may file the same with Lioniel Edwards, Director, Tobacco Division, Agricultural Marketing Service, Room 502 Annex Building, United States Department of Agriculture, Washington, D.C. 20250, not later than July 11, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that an emergency situation exists which warrants less than a 60-day comment period on this proposal because all segments of the burley industry must be informed of any changes affecting the marketing process prior to the opening of the marketing season and producers must be provided substantial lead time to decide on the method in which they will market their tobacco. Therefore, a 45-day comment period will be provided on this proposal.

All written submissions made pursuant to this notice will be made available for public inspection at the above location during regular business hours (7 CFR 1.29(b)).

List of Subjects in 7 CFR Part 29

Administrative practices and procedure, Tobacco.

Accordingly, the Regulations under the Tobacco Inspection Act contained in 7 CFR Part 29 are proposed to be amended as follows:

PART 29—[AMENDED]

1. Section 29.75a, is amended by revising paragraph (a)(2) to read as follows:

§ 29.75a Display of burley tobacco on auction warehouse floors in designated markets.

(a) * * *

(2) The number of bales on a pallet shall not exceed eight. Tobacco packed in bales shall be placed lengthwise so that the midribs of the leaves run parallel to the aisle.

* * * * *

2. Section 29.3036 is revised to read as follows:

§ 29.3036 Lot.

A pile, basket, bulk, bale or bales, sheet, case hogshead, tierce, package, or other definite package unit.

3. Section 29.3044 is revised to read as follows:

§ 29.3044 Oriented.

A term applied to untied tobacco which denotes the arrangement of leaves in a straight and orderly manner. Oriented includes:

(a) Any lot of baled tobacco in which the leaves are packed parallel to the length of the bale with the butts to the outside and the tips of the leaves overlapping sufficiently to make a level, solid and uniform package;

(b) Any lot of sheeted tobacco in which the leaves are arranged in a circular pattern with the butts to the outside

Dated: May 19, 1983.

C. W. McMillan,

Assistant Secretary Marketing and Inspection Services.

[FR Doc. 83-14085 Filed 5-24-83; 8:45 am]

BILLING CODE 3410-02-M

Office of the Secretary

7 CFR Part 2900

Proposed Amendment Regarding Certification of Essential Agricultural Uses and Requirements; Natural Gas Policy Act

AGENCY: Office of the Secretary, USDA.

ACTION: Proposed rule.

SUMMARY: The Department of Agriculture proposes to amend its regulations certifying essential agricultural uses and requirements under the Natural Gas Policy Act. This amendment would add salt (sodium chloride) for human consumption to the list of essential agricultural uses certified by the Secretary of Agriculture. The proposed amendment is in response to a petition submitted by Morton Salt, a division of Morton-Norwich Products, Inc.

DATE: Written comments are due by 4:30 p.m., July 25, 1983.

ADDRESS: All written comments should be sent to Earle E. Gavett, Director, Office of Energy, Room 144–E, Administration Building, U.S. Department of Agriculture, 14th and Independence Avenue SW., Washington, D.C. 20250; Telephone Number 202–447–2634.

FOR FURTHER INFORMATION CONTACT: Earle E. Gavett, Director, Office of Energy, Room 144–E Administration Building, U.S. Department of Agriculture, 14th and Independence Avenue S.W., Washington, D.C. 20250; Telephone Number 202–447–2634.

SUPPLEMENTARY INFORMATION:

I. Background
II. Description of Proposal
III. Regulatory Information
IV. Public Comments and Hearing Procedures

I. Background

Under Section 401 of the Natural Gas Policy Act of 1978 (NGPA), the Secretary of Agriculture is required to certify to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) essential agricultural uses of natural gas necessary for full food and fiber production. A final rule containing such certification was issued by the Secretary on May 17, 1979 (44 FR 28782).

The Secretary of Energy and the FERC have incorporated the USDA certification in their rule promulgating and implementing agricultural priority in curtailment plans of interstate pipelines, in accordance with the NGPA.

This proposed action has an impact only in instances of curtailments of deliveries from interstate natural gas pipelines, in which case it would grant priority for 100 percent of current natural gas requirements of the facilities. Additional impacts arising from the exemption of the facilities from incremental pricing under Title II as a result of FERC's exemption under that Title of all uses certified by the Secretary of Agriculture will not occur because food-grade salt already has such an exemption.

II. Description of Proposal

Section 401(a) of the Natural Gas Policy Act provides certain protection against the curtailment of those "agricultural uses" of natural gas that the Secretary of Agriculture determines under section 401(c) to be "essential" uses. Such "agricultural uses" fall into two classes.

Those uses certified under section 401(f)(1)(A) such as irrigation, crop drying, and food processing, are protected from curtailment to the extent of their total natural gas use for feedstock, process, and boiler fuel uses. Those certified under section 401(f)(1)(B), including fertilizers and agricultural chemicals, are protected only to the extent of the process and feedstock use of natural gas. Boiler fuel use is not protected from curtailment under this section.

The NGPA does not permit distinctions in determining the types of food products to be certified as essential agricultural uses. Instead, its language indicates that all food products are to be so certified. The production of food-grade salt should be included in the list of essential agricultural uses under section 401(f)(1)(A) because it is manufactured under food-grade standards for sanitation and cleanliness, is used as a food additive or preservative, and is sold in retail stores for food use.

Although Standard Industrial Classification (SIC) Codes have been used by the Department as a method of certifying large groups of products, the SIC Code under which a product is produced has never been considered determinative in the certification process. For example, SIC Code 3497 Metal Foil and Leaf initially was not included among essential agricultural uses but certain of the products produced under that SIC Code have been shown to be integral to food quality maintenance and have therefore been certified as essential agricultural uses of natural gas under section 410(f)(1)(A) as "SIC 3497 Metal Foil and Leaf (food related only)". Likewise here, no attempt is being made to include all the SIC 2899 Chemicals and Chemical Preparations, Not Elsewhere Classified as essential agricultural uses. The majority of these products have no food application. However, since food-grade salt is a food product and a principal means of preserving many food products, it must be certified as an essential agricultural use of natural gas under section 401(f)(1)(A).

Salt for food and animal feed uses, classified in SIC Code 2899 Chemicals and Chemical Preparations, Not Elsewhere Classified, has been certified by the Secretary under section 401(f)(1)(B)—that is, only to the extent of its process and feedstock natural gas requirements. 44 FR 28786.

Morton Salt, a division of Morton-Norwich Products, Inc. ("Morton") has petitioned the USDA to amend 7 CFR 2900.3 to include under the "Food and Natural Fiber Processing—Food" list, the production of food-grade salt. Such an action would protect the total natural gas use of the food-grade salt industry from curtailment of deliveries from interestate natural gas pipelines in the case of a curtailment.

Salt is produced by 47 companies operating 88 salt-producing plants in 16 States. Of these 47 companies, nine use vacuum pan or open pan processing in at least one of their plant locations. The total quantity of domestic salt sold or used by producers in 1981 was 38.9 million short tons, and consisted of salt in brine, 53 percent; rock salt, 31 percent; vacuum and open pan salt, 9 percent; solar evaporated, 6 percent; and pressed blocks, 1 percent.

The salt production with which this petition is concerned is the food portion of the nine percent produced by the vacuum and open pan methods. In these processes, salt is obtained by dehydrating brine using heat alone or in combination with vacuum. In one technique, the grainer or open pan process, open, rectangular pans with steam-heated immersion coils that evaporate the water in the brine are used. The final product is usually flake shaped rather than the typical cubic form. Flake salt is preferred for production of cheese, butter, and baked goods. Another modified open pan technique, the Alberger process, is a grainer operation that mainly produces cubic salt with some flake salt. The pans are shallow, circular units with external heating units, rather than heating coils. Open pan salt production is more energy intensive due to the greater amount of heat required to evaporate the brine.

Salt produced by the vacuum pan process conserves energy by utilizing multiple-effect evaporators connected to vacuum pumps. A saturated salt solution will boil at a higher temperature than pure water. When a vacuum is applied, the brine boils at a lower temperature enabling the superheated vapor that is generated to act as the heating medium of the next evaporator.

Total vacuum open pan salt for food use in fiscal year 1982 was estimated at 1.1 million short tons. This includes food grade salt used in food processing, sold in grocery stores, used by the Federal government.

Natural gas use for vacuum and open pan salt was estimated by the Bureau of Mines in 1974 to total approximately 3.2 thousand cubic feet per ton. More recent industry figures indicate that natural gas consumption may be as high as 4.44 thousand cubic feet per ton. Total natural gas use, therefore, for the 1.1 million short tons of food grade salt produced by the vacuum and open pan methods in 1982 was between 3.52 and 4.88 billion cubic feet.

Industry figures indicate that boiler fuel use represents approximately 94 percent of total natural gas use in vacuum and open pan salt production. Therefore, inclusion of the boiler fuel use will add a maximum of 4.6 billion cubic feet to the total agricultural gas use of approximately 1,400 billion cubic feet at the 1982 salt production level. This is less than four-tenths of one percent of the interstate gas component identified as essential agricultural use in the May 14, 1979 combined Environmental Impact Statement and Final Impact Statement.

USDA believes that sufficient justification exists to institute rulemaking procedures to modify the existing Essential Agricultural Use certification.

III. Regulatory Information

The proposed action does not alter the impacts described or conclusions drawn in the combined Final Economic and Environmental Impact Statement issued May 14, 1979, in connection with the Essential Agricultural Uses and Volumetric Requirements certification rule (7 CFR Part 2900). A paper describing the options considered in developing this proposed rule and the impact of implementing each option is available on request from Earle R. Gavett, Office of Energy, Room 144–E Administration Building, U.S. Department of Agriculture, 14th and Independence Avenue, SW., Washington, D.C. 20250.

Executive Order 12291

This proposed action has been reviewed under U.S. Department of Agriculture procedures established in Secretary's Memorandum 1512–1 which implements Executive Order 12291 and has been determined to be "nonmajor". This proposed action has been determined to be "nonmajor" since the annual effect on the economy is less than $100 million, and there will be no increase in costs or prices for individuals, organizations, or other government agencies affected. There will be no significant adverse effect on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets because the proposed action affects only about 4.6 billion cubic feet of natural gas per year.

Paperwork Reduction Act

This rule imposes no information requirements.

Regulatory Flexibility Act of 1980

Earle E. Gavett, Director, Office of Energy has determined that this action will not have a significant economic impact on a substantial number of small entities since only about 4.6 billion cubic feet of natural gas per year are involved.

National Environmental Policy Act of 1969

The proposal has been reviewed pursuant to USDA responsibilities under the National Environmental Policy Act of 1969 (42 U.S.C. 4321) and USDA has determined that the proposed action alters the impacts disclosed by less than four-tenths of 1 percent and does not affect the conclusions drawn in the combined Final Economic and Environmental Impact Statement issued May 14, 1979 in connection with the initial Essential Agricultural Uses and Volumetric Requirements certification rule. Therefore, this action is proposed under the same analysis.

List of Subjects in 7 CFR Part 2900

Salt, food grade.

IV. Public Comments and Hearing Procedures

The public is invited to participate in any aspect of this proposed amendment by submitting data, views, or arguments with respect to the proposal herein set forth.

Written comments must be submitted by 4:30 p.m., July 25, 1983, to the address indicated in the "Address" section of the preamble, and should be identified in the outside envelope and on the document with the designation: "Part 2900—Salt". Five copies should be submitted.

All comments received will be available for public inspection in Room 144–E. Administration Building, 14th and Independence SW., Washington, D.C. 20250 between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday. All comments received by 4:30 p.m., July 25, 1983, and other relevant information will be considered by the Director, Office of Energy before final action is taken on this proposed amendment.

Any information or data submitted which is considered by the party submitting it to be confidential must be so identified and submitted in writing, one copy only. The Director reserves the right to determine the confidential status of the information or data and to treat it accordingly.

PART 2900—[AMENDED]

§ 2900.3 [Amended]

In consideration of the foregoing, it is proposed to amend Chapter XXIX of Title 7, § 2900.3 Code of Federal Regulations by adding at the end of the "Food and Natural Fiber Processiing—Food" list: 2899 Chemicals and Chemical Preparations, n.e.c. (Salt for food use only) and by changing, in the "Fertilizer and Agricultural Chemicals (Process and Feedstock Use Only)" list, "2899 Chemicals and Chemical Preparations, n.e.c. (Salt—food and feed grade only)" to: 2899 Chemicals and Chemical Preparations, n.e.c. (Salt—Feed grade only).

Authority: 15 U.S.C. 3391.

Dated: May 20, 1983.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 140, 145, 146, and 147

Release of Information; Delegation of Authority To Release Information

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed Rules to Effectuate Amendments to the Commodity Exchange Act.

SUMMARY: Pursuant to the Futures Trading Act of 1982, the Commodity Futures Trading Commission ("Commission") is proposing to amend its regulations to allow withholding of information contained in records of a pending investigation; to provide for notice prior to release of information pursuant to a subpoena for summons; and to delegate to certain Commission employees the authority to disclose information in connection with a receivership or bankruptcy proceeding.

DATE: Comments must be received on or before June 24, 1983.

ADDRESS: Interested persons should submit comments to: Commodity Futurers Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, Attention: Secretariat.

FOR FURTHER INFORMATION CONTACT: Tena Friery, Office of the General Counsel, 2033 K Street, N.W., Washington, D.C. 20581, telephone: (202) 254–9880.

SUPPLEMENTARY INFORMATION: The Futures Trading Act of 1982, Pub. L. No. 97–444, 96 Stat. 2294 (1983) ("1982 Act"), Includes several provisions which affect the disclosure of information in the possession of the Commission.

First, section 8(a), of the Commodity Exchange Act ("Act"), 7 U.S.C. 12(a), has been amended by section 222 of the 1982 Act (96 Stat. 2309) to authorize the Commission to "withhold from public disclosure any data or information concerning or obtained in connection with any pending investigation of any person. "[1] The effect of this amendment to Section 8(a) is to place "* * * information concerning or obtained in connection with any pending Commission investigation of any person in the same category * * * as, for example, trade secrets or names of customers." *See* H.R. Rep. No. 964, 97th Cong., 2d Sess. 44 (1982)("Conference Report"). The conference Report further explains that "[t]his category of information is protected from public disclosure under the provision of the Freedom of Information Act (5 U.S.C. 552(b)(3)) applicable to information exempted from disclosure by a statute that specifically refers to particular types of matters to be withheld." *Id.* In order that the Commission's regulations implementing the Freedom of Information Act, 5 U.S.C. 552, and the Government in the Sunshine Act, 5 U.S.C. 552b, reflect this statutory amendment, the Commission proposes to revise § 145.5(c) and 147.3(b)(3) of its regulations.[2]

Secondly, Section 222 of the 1982 Act revised Section 8(b) of the Act, 7 U.S.C. 12(b), to authorize the Commission to "disclose publicly any data or information that would separately disclose the market positions, business transactions, trade secrets, or names of customers of any person" in connection with "any receivership proceeding involving a receiver appointed in a judicial proceeding brought under th[e] Act, or in any bankruptcy proceeding in which the Commission has intervened or in which the Commission has the right to appear and be heard under title 11 of the United States Code." (96 Stat. 2309) The Commission recognizes that data or information which it is authorized to disclose pursuant to this section may include information from records maintained on individuals which is subject to the Privacy Act, 5 U.S.C. 552a. The Commission believes, however, that its current regulations implementing the Privacy Act (Part 146) together with the "routine uses"[3] most recently published on October 4, 1982, 47 FR 43759, contain adequate notice to the public of possible disclosure in connection with judicial proceedings and provide the Commission with a sufficient regulatory basis upon which to carry out the authority for disclosure contained in the amendments to Section 8(b).[4] However, in order to assure timely and efficient disclosures pursuant to Section 8(b) and to relieve the Commission of the necessity of considering each instance of disclosure, the Commission proposes to delegate its authority to certain Commission employees to disclose market positions, business transactions, trade secrets, or names of customers in connection with a receivership or bankruptcy proceeding. The Commission intends to effect this delegation by adding § 140.76 to Part 140.

Finally, Section 8(f), added by Section 222 of the Futures Trading Act of 1982 (96 Stat. 2308–10), prohibits the Commission from disclosing, pursuant to a summons or subpoena, information which has been submitted to it by a third party before the expiration of fourteen days from the date of notice of the summons or subpoena for that information to the person who submitted the information.[5] Accordingly, the Commission proposes to amend Part 145 of its rules regarding Commission records and information and Part 146 of its rules regarding records maintained on individuals to conform to the Section 8(f) provisions governing release of information pursuant to a summons or subpoena. Section 145.10, which the Commission proposes to add to its regulations, is intended to codify the notice and time restrictions on

---

[1] Section 8(a) continues to prohibit the Commission from disclosing "* * * data and information that would separately disclose the business transactions or market positions of any person and trade secrets or names of customers." unless such a disclosure is otherwise authorized by the Act. In this regard, the proposed amendments to § 145.5(c) and 147.3(b)(3) would delete surplus references in the existing rules to information obtained by the Commission in an investigation conducted pursuant to Section 8 or Section 16 of the Act. These references suggest a limitation not contained is Section 8(a) of the Act.

[2] The Commission notes that the authority conferred by the amendment to Section 8(a) extends only to matters contained in pending investigations. Thus, this amendments to Section 8(a) required no change to existing regulations §145.5(g) and 147.3(b)(7) concerning investigatory records compiled for law enforcement purposes, as these regulations may apply to records and information contained in closed as well as pending investigations.

[3] In addition to the existing rules implementing the Privacy Act and the published "routine uses," Section 12(a) of the Commodity Exchange Act, as amended, 7 U.S.C. 16(a), generally authorizes the Commission to cooperate with any department or agency of the government, any State, territory, district or possession, or department, agency, or political subdivision thereof or any person.

[4] Commission Regulation § 146.6(a)(7) allows disclosure of information which pertains to an individual to a third party when

The disclosure is made to another agency or to an instrumentality of any Governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity if the activity is authorized by law and if the head of the agency or instrumentality has made a written request to the Commissio specifying the particular portion desired and the law enforcement activity for which the record is sought . . .

Commission Rule 146.6(a)(11) allows disclosure to third parties when

[5] The disclosure is pursuant to the order of a court of competent jurisdiction.

In addition, the Privacy Act and the Commission's rules permit disclosure of records pertaining to an individual, if the disclosure is for a "routine use," defined as a use of a record which is compatible with the purpose for which it was collected. *See* 5 U.S.C. 552a(a)(7). The Commission has adopted eight routine uses which apply to all its systems of records. *See* 47 FR 43759, 43760 (October 4, 1982). The first of these "routine uses" is as follows:

The information in the system may be used by the Commission in any administrative proceeding before the Commission, in any injunctive action authorized under the Commodity Exchange Act or in any other action or proceeding in which the Commission or any member of the Commission or its staff participates as a party or the Commission participates as amicus curiae, and may be disclosed in response to a subpoena issued in the course of a proceeding to which the Commission is not a party.

[6] Specifically Section 8(f) reads as follows:

(f) The Commission shall disclose information in its possession pursuant to a subpena or summons only if—

(1) A copy of the subpena or summons has been mailed to the last known home or business address of the person who submitted the information that is the subject of the subpena or summons, if the address is known to the Commission, or, if such mailing would be unduly burdensome, the Commission provides other appropriate notice of the subpena or summons to such person, and

(2) At least fourteen days have expired from the date of such mailing of the subpena or summons, or such other notice.

This subsection shall not apply to congressional subpenas or congressional requests for information.

VOL 48 ISS 102 MAY 25 1983 UMI

disclosure set forth in Section 8(f). In addition, in amending § 146.6(b), the Commission intends to expand the existing notice requirement of that Section, which pertains generally to a summons or subpoena for Commission records maintained on individuals, to include the specific notice and time restrictions of Section 8(f) in those instances where a record maintained on an individual has been submitted to the Commission by such individual.[6] Both the proposal to add Rule 145.10 and the proposed amendment to Rule 146.6(b) incorporate the Section 8(f) prohibition against release of information pursuant to a summons or subpoena unless at least fourteen days have expired from the date of notice.[7]

Although the Administrative Procedure Act does not require that these proposed rules, which pertain to Commission organization and procedure and reflect statutory revisions to these procedures, be published for public comment, the Commission is inviting comment on the proposed changes since they will affect the treatment of confidential information received from or concerning the public. *See* 5 U.S.C. 553.[8]

[6] Commission Rule 146.6(b), as presently written, corresponds with Section (e)(8) of the Privacy Act, 5 U.S.C. § 552a(e)(8) and, as such, requires the Commission to make reasonable efforts to serve notice on an individual when any record on such individual is made available to any person under compulsory legal process when such process becomes a matter of public record. Unlike the mandate in Section 8(f), the "reasonable efforts to serve notice" requirement of the Privacy Act is not limited to those instances where a record has been submitted to the Commission by the individual who is the subject of the record. Thus, under circumstances where records subject to the Privacy Act *have not* been submitted to the Commission by the individual who is the subject of the record, the Commission will continue, as Section (e)(8) of the Privacy Act requires, to make reasonable efforts to notify such individual. However, in those instances where records covered by the Privacy Act *have* been submitted to the Commission by the individual who is the subject of the record and such records are sought pursuant to a summons or subpoena, the Commission's response to the summons or subpoena will be subject to the specific requirements of Section 8(f) of the Act.

[7] Section 8(f) anticipates that notice of the existence of a summons or subpoena will ordinarily be given by mailing a copy to the last known home or business address of the person who submitted the information sought by the summons or subpoena. The Conference Committee, however, in adopting Section 8(f), recognized that notice by mail would be impractical in instances where, for example, a summons or subpoena asks for data or information which consists of material obtained from several different sources. *See* Conference Report, 44. Under such circumstances, where notice by mail would be "extremely costly or burdensome," Section 8(f) would allow for an alternative means of notice such as publication in the **Federal Register**. *Id.*

[8] The Commission has determined that the provisions of the Regulatory Flexibility Act, Pub. L. 96-354, 94 Stat. 1164, do not apply to these proposed procedural amendments to the regulations. *See* 5 U.S.C. 601. Similarly, the Commission notes that these rule amendments do not constitute new paperwork collection requirements within the meaning of the Paperwork Reduction Act, 44 U.S.C. 3501, *et seq.*

List of Subjects in 17 CFR Part 140

Disclosure of information, Bankruptcy or receivership proceeding.

List of Subjects

17 CFR Part 145

Records and information, Disclosure of information, Investigatory records, Disclosure exempted by statute, Disclosure pursuant to a summons or subpoena.

17 CFR Part 146

Records maintained on individuals, Disclosure of information, Disclosure pursuant to a summons or subpoena.

17 CFR Part 147

Closed commission meetings, Disclosure exempted by statute, Investigatory records.

In consideration of the foregoing and pursuant to the authority contained in the Commodity Exchange Act and, in particular, sections 2(a)(11) and 8, 7 U.S.C. 4a(j) and 12, as amended by Pub. L. No. 97-444, the Commission hereby proposes to amend Parts 140, 145, 146 and 147 of Chapter I of Title 17 of the Code of Federal Regulations as follows:

PART 140—ORGANIZATION, FUNCTIONS AND PROCEDURES OF THE COMMISSION

1. Section 140.76 is proposed to be added to read as follows:

§ 140.76 Delegation of authority to disclose information in connection with a receivership or bankruptcy proceeding.

Pursuant to sections 2(a)(11) and 8(b) of the Act, the Commission hereby delegates, until such time as the Commission orders otherwise, to the Director of the Division of Enforcement, the Director of the Division of Trading and Markets, the General Counsel and any Commission employee under their direction as they may designate, the authority to disclose data and information that would separately disclose the business transactions or market positions of any person and trade secrets or names of customers, when such disclosure is made in connection with any receivership proceeding involving a receiver appointed in a judicial proceeding brought under the Act, or in any bankruptcy proceeding in which the Commission has intervened or in which the Commission has the right to appear and be heard under Title 11 of the United States Code. Notwithstanding the provisions of this paragraph, in any case in which the Director of the Division of Enforcement, the Director of the Division of Trading and Markets, the General Counsel, or any employee designated by them to make disclosures pursuant to this section believes it appropriate, the matter may be submitted to the Commission for consideration. In addition, the Commission reserves to itself the authority to determine whether to grant a request for information in any particular case.

PART 145—COMMISSION RECORDS AND INFORMATION

2. Paragraph (c) of § 145.5 is proposed to be revised to read as follows:

§ 145.5 Nonpublic matters.

* * * * *

(c) Specifically exempted from disclosure by statute, including:

(1) Data and information which would separately disclose the business transactions or market positions of any person and trade secrets or names of customers; and

(2) Any data or information concerning or obtained in connection with any pending investigation of any person;

* * * * *

3. Section 145.10 is proposed to be added to read as follows:

§ 145.10 Disclosure of information pursuant to a subpoena or summons.

The Commission shall serve notice on any person who has submitted any information to the Commission which is the subject of a summons or subpoena. Notice will ordinarily be made by mailing a copy of the summons or subpoena to the last known home or business address of the person who submitted the information. However, under circumstances which would make notice by mail unduly burdensome or costly, notice of the existence of the summons or subpoena may be effected by alternative means such as publication in the **Federal Register**. The Commission will not disclose such information until the expiration of at least fourteen days from the date of mailing, or such other notice as is given. This section shall not apply to congressional subpoenas or congressional requests for information.

PART 146—RECORDS MAINTAINED ON INDIVIDUALS

4. Paragraph (b) of § 146.6 is proposed to be revised to read as follows:

§ 146.6 Disclosure to third parties.

* * * * *

(b) The Commission will make reasonable efforts to serve notice on an individual when any record on such individual is made available to any person under compulsory legal process when such process becomes a matter of public record. In any instance where a record on an individual, which has been submitted to the Commission by such individual, is sought pursuant to a summons or subpoena, notice will be given in accordance with the provisions of Section 8(f) of the Commodity Exchange Act, and § 145.10 of this Chapter, at least fourteen days prior to disclosure.

* * * * *

PART 147—OPEN COMMISSION MEETINGS

5. Paragraph (b)(3) of § 147.3 is proposed to be revised to read as follows:

§ 147.3 General requirement of open meetings; grounds upon which meetings may be closed.

* * * * *

(b) * * *

(3) Disclose matters specifically exempted from disclosure by statute (other than the Freedom of Information Act, as amended, 5 U.S.C. 552), provided that such statute (i) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (ii) establishes particular criteria for withholding or refers to particular types of matters to be withheld. This includes, but is not limited to, data and information which would separately disclose the business transactions or market positions of any person and trade secrets or names of customers and data or information concerning or obtained in connection with any pending investigation of any person;

* * * * *

Issued in Washington, D.C. on May 19, 1983, by the Commission.

Jane K. Stuckey,

Secretary to the Commission.

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 223

National Forest Timber Sales: Stumpage Rate Adjustment Procedures for West Side of Region 6

AGENCY: Forest Service, USDA

ACTION: Notice of proposed policy.

SUMMARY: On April 15, 1982, the Chief of the Forest Service published a notice of adoption of final policy (47 FR 16178) for new National Forest timber sale procedures. Included in these procedures was the Forest Service decision to develop a suitable index and provide stumpage rate adjustment for National Forest timber sales on the west side of Region 6. Stumpage rate adjustments were to be implemented as soon as a suitable index was developed, but not for sales advertised before April 1, 1983. The Forest Service proposes to use the newly developed Western Wood Products Association (WWPA) Pacific Northwest Coast Lumber Price Indices for Douglas-fir, western hemlock and true firs, and the WWPA Inland Lumber Price Indices for Pines. Sitka spruce, cedars, hardwoods and Per Acre Material will not be subject to stumpage rate adjustment.

DATES: Comment must be received not later than June 24, 1983.

ADDRESSES: Send written comments to: R. Max Peterson, Chief (2400), Forest Service, USDA, P.O. Box 2417, Washington, DC 20013

All written submissions made pursuant to this notice will be available for public inspection during regular business hours in the offices of the Forest Service Timber Management Staff, Room 3207, South Agriculture Building, 12th and Independence Avenue, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Wendall L. Jones, Timber Management Staff, (202) 447-4051.

SUPPLEMENTARY INFORMATION: Stumpage rate adjustment is in effect in all areas of the Western United States except for western Oregon and western Washington. Stumpage rate adjustment permits the price paid for National Forest timber to fluctuate, within stated limits, in response to established market indices. This allows prices paid for timber to be partially responsive to market conditions and encourages continued operation during the down portion of market cycles.

An index is used to measure the change in market values between the time a timber sale is appraised and the time the logs are presented for scaling. Stumpage rates are adjusted quarterly based on the change in the market indices appropriate to the particular timber sale contract. This proposal would establish appropriate indices for the timber sales sold in western Oregon and western Washington.

Because Douglas-fir is used to manufacture both lumber and plywood products, several indexing procedures could be used for the stumpage rate adjustment. The following alternatives have been considered:

1. Use of a composite index of the Western Wood Products Association (WWPA) Inland Dry Douglas Fir-Larch Lumber Price Index and the Bureau of Labor Statistics Western Plywood Index. Each index is converted from a mill tally basis to a log scale basis using an overrun value factor. Such a composite index was used by the Pacific Northwest Region for indexing Douglas-fir, hemlock and true firs for the stumpage rate adjustment when this procedure was previously used in west side timber sale contracts.

2. Use the previous composite index, but substitute the new WWPA PNW Coast Douglas Fir Lumber Price for the WWPA Inland Dry Douglas Fir-Hemlock Lumber Index.

3. Use either 1 or 2 above, but do not convert the index to a log scale basis. Convert the Bureau of Labor Statistics Western Plywood Index from a percent change to a dollar change.

4. Use the new WWPA PNW Coast Douglas Fir Lumber Price Index. The index would be patterned after the procedure now used with the WWPA Inland Lumber Price Indices in timber sale contracts elsewhere in the western Regions. This would eliminate plywood representation in the indexing procedure.

5. Use only the new WWPA PNW Coast Douglas Fir Lumber Price Index as in item 4 above but convert to a log scale basis using an overrun value factor. Plywood would not be represented under this approach.

6. Use only the Bureau of Labor Statistics Western Plywood Index, either converted to a log scale basis or with its current value but converted from a percent change to a dollar change. Lumber would not be represented in the indexing procedure.

7. Use the American Plywood Association's Monthly Market Report on Plywood values to substitute for the Bureau of Labor Statistics Western Plywood Index in alternatives 1, 2, 3, and 6 above.

8. Use whichever index the timber purchaser may choose at time of sale,

VOL 48 ISS 102 MAY 25 1983 UMI

i.e., WWPA PNW Coast Douglas Fir Lumber Price Index, Bureau of Labor Statistics Western Plywood Index, or American Plywood Association's Monthly Market Report plywood values.

The criteria used in selecting among these alternatives were that the values used:

a. Must reflect market changes in the product selling values.

b. Must be compatible with the established appraisal method and timber sale accounting and billing procedures.

c. Must be easily verifiable and be furnished by a recognized authority.

d. Must be readily available to the timber industry.

e. Must be readily understood by all users.

Following discussions with forest industry representatives and evaluation of how well each alternative meets the established criteria, the Forest Service proposes to use only the WWPA Lumber Price Indices in indexing timber sale contracts in western Oregon and western Washington. The following indices would be used:

Species	WWPA index
Douglas-fir	PNW Coast Douglas Fir.
Western Hemlock and Mountain Hemlock.	PNW Coast Hem-fir.
True firs	Do.
Englemann Spruce and Lodgepole Pine.	Inland Whitewoods.
Sugar Pine	Inland Sugar Pine.
Western White Pine	Inland Idaho White Pine.
Ponderosa and other pines	Inland Coast-Inland North Ponderosa Pine.

The following species would not be subject to stumpage rate adjustment procedures but would continue to be priced at flat rates:

Sitka Spruce
Cedars
Per Acre Material—all species

The Forest Service finds that the WWPA indices best meet the selection criteria. Indices which include plywood were not selected because:

a. It was found that lumber and plywood product selling values follow the same general trend lines.

b. The process of combining lumber and plywood into a single index is quite complex because they are manufactured and sold on entirely different measurement units; i.e., lumber on a board foot basis and plywood on a square foot basis.

c. It was found that neither the Bureau of Labor Statistics Western Plywood Index nor the American Plywood Association's Monthly Market Report plywood values were suitable for plywood indices for stumpage rate adjustment. It would be impractical and expensive to develop a suitable plywood index.
